PROCEEDINGS AND DEBATES OF THE 84th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 10, 1955

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

God of all grace, as we again unite our hearts in the fellowship of prayer, may we be eager and willing to make the great adventure of trying sincerely to become the kind of men and women Thou wouldst have us be.

Wilt Thou give us the wisdom and the desire to trust and cultivate and obey those noble intuitions and instincts which Thou hast planted within our souls.

Grant that we may have more of the spirit of our blessed Lord, whose beauty of character haunts us and makes us ashamed of ourselves and fills us, however, with lofty aspirations to be like unto Him.

May we daily continue to seek and follow the ways of righteousness and peace.

Hear us in the name of the Christ. Amen.

The Journal of the proceedings of Tuesday, February 8, 1955, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 587. An act to provide that persons serving in the Armed Forces on January 31, 1955, may continue to accrue educational benefits under the Veterans' Readjustment Assistance Act of 1952, and for other purposes.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S. J. Res. 14. Joint resolution extending an invitation to the International Olympic Committee to hold the 1960 Olympic Games at Detroit, Mich.

COMMITTEE ON WAYS AND MEANS

Mr. COOPER. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight next Monday to file a report on H. R. 1, and that the same period of time be allowed for the filing of any minority, individual, or separate views on that bill.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

RESIGNATION FROM COMMITTEE

The SPEAKER laid before the House the following resignation from committee:

FEBRUARY 10, 1955.

Hon. SAM RAYBURN,
Speaker, House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Merchant Marine and Fisheries Committee, effective immediately.

Sincerely yours,

WALTER M. MUMMA,
Member of Congress.

NEW ATHEISTIC DRIVE SWEEPS SOVIET

Mr. BOGGS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BOGGS. Mr. Speaker, the Soviet Union today is fighting a battle for which no weapon of war has yet been invented.

It is the battle of communism against religion—the Kremlin against God.

Moscow's war on religion has been going on for more than 35 years, but the current crackdown which began last summer has been termed the most intense and best organized campaign since 1930.

The U. S. S. R.'s trump card is propaganda, and its ultimate aim, to shatter the very foundation of every church still remaining under the Soviet regime.

Thousands of Communist propagandists are spreading the doctrine of atheism from one end of the Soviet Union to the other. Communist writers are turning out new atheistic books filled with scorn against Christian, Jewish, and other faiths. Publishing houses issue stacks of antireligious pamphlets, and Communist agitators are going into the schools, homes, and factories of every town to lecture to people who have no choice but to listen.

Moscow's renewed purge on religion began last July when the Soviet newspaper Pravda sounded the keynote for the present campaign. Since the religious persecutions and crudities of the past had failed, Pravda advocated a different technique. Instead of outright insults to the church, Pravda told Communist propagandists to disguise their insults with scientific and educational theories.

Premier Malenkov was taking no chances with the type of antireligious attacks that took place under Lenin and Stalin, when priests were shot or arrested and church property was confiscated. Proving that violence only drove people to church rather than out of it, a 1937 survey by the Union of Militant Atheists showed that at least one-third of the urban population and two-thirds of the rural population still clung to religion despite the purges.

What Moscow Pravda advocated last July was shrewder, more adroit tactics. The campaign was to have a new look and a velvet-glove technique and was to be placed on a so-called high, scientific level. In this way, the Kremlin hoped to use more subtle measures to take away from the people the belief in God which they refused to give up.

Overzealous propagandists, however, deviated from the new party line. Even Radio Moscow went so far as to refer to Catholics as "verminous creatures" and "svoloch"—scum—and all religious rites were subjected to ridicule.

"Just as cheap alcohol, vodka, dulls the mind of individuals, so religion weakens and confuses them," said Radio Moscow.

"The Soviet people do not need the aid of miracles and faith in God," chanted the lesser Estonian network.

And the Soviet children's magazine, Pionerskaya Pravda, told its young readers: "Belief in God, the church, is a legacy of the aged."

The Soviet Union turned Leningrad's famous Kazanski Cathedral into a shrine to atheism, and what had been a national religious monument in the days of the Czar now boasts exhibits exposing what the Communists call the reactionary nature of religion.

Alarmed over an increase of religion among its troops, the Soviet armed services radio, demanded that soldiers be "convinced that the survival of religion is humiliating to Soviet citizens, especially to Soviet soldiers."

Other broadcasts called religion the enemy of peace and the misfortune of women. Said Radio Lutsk in the Ukraine:

Religion has put women in a subservient position in the family and in society. By viewing her as an inferior creature, unable to act independently, religion offends and humiliates women, harms her intellectual development, and hinders her participation in political and cultural activities.

And Radio Minsk was equally vociferous:

All religious institutions, and in the first place, the center of the world reactionary clergy—the Vatican—spare no efforts in order to disguise the social order of slavery, oppression, and imperialist wars. For this purpose, Catholicism, and all religious institutions abroad are extensively availing themselves of prayers, are poisoning the minds of the working people, causing them to lose confidence in themselves and are diverting them from the struggle for peace, freedom, national independence, and democracy.

The outside world listened—and was shocked. The United States Information Agency, through its news and broadcasting services, reported Moscow's latest antireligious activities to its overseas posts which, in turn, relayed the facts to the people of many countries. Obviously, this is not what the Kremlin had in mind. Abroad, Soviet propaganda blandly was assuring the world—and still does—that peaceful coexistence of communism and religion is entirely possible, and that all peoples of the U. S. S. R. are free to worship as they choose.

The Soviet regime, says Moscow in its frequent broadcasts abroad, really is not so bad as it is painted. Has it not asked for an alliance with the Catholic Church to bring about world peace? Has it not allowed a small number of Moslems living in the U. S. S. R. to resume the pilgrimage to Mecca, and has it not permitted the Russian Orthodox Church to exist with its official blessing?

The Soviet Union has, from time to time, gone out of its way to make overtures to religious groups abroad, but the political implications are clear. Moscow made a bid for Vatican support at a time when the Soviet Union was paving the way for the Communist-inspired World Peace Council which met in East Berlin last spring. It also sought to tie in the Catholic Church with the Soviet version of a ban on nuclear weapons—a version which did not get far in the United Nations.

Last June, for example, the secretary general of the Italian Communist Party, Palmiro Togliatti, urged "Catholic forces to attempt, together with the Communists, to reach concrete agreement for the solution of basic problems in the sphere of both foreign and home policies." Said the party leader: "Such agreements between Communists and Catholics are quite feasible."

The Vatican newspaper, Osservatore Romano, promptly replied that either Mr. Togliatti lived in a world of dreams, or he believed that the Catholic world has lost its senses.

Not long afterward, in a home broadcast, Radio Moscow referred to Catholics as "verminous creatures" and "svoloch"—scum.

The so-called annual pilgrimage to Mecca has been another Soviet prize conversation piece in broadcasts beamed to the Arab countries. In 1953, for the first time since 1945, and again in 1954, the Soviet regime allowed a small number of Moslems living in the U. S. S. R. to resume the pilgrimage to Mecca.

At the same time Communist Party workers in the Turkmen S. S. R. were urged by Moscow to wage unrelenting war against Islam and Moslem practices. Said Radio Ashkhabad last August:

With a view to preserving the religious poison in the minds of the backward people, the Moslem clergy call upon the religious people to fulfill the customs in connection with burying the dead, visiting the tombs, and calling the Moslems to prayer. Those who observe such demands of the Islamic religion are backward people.

In its propaganda abroad, the Soviet Union carefully omits any reference to the Shariat, the Moslem code of laws which governs the private life of the faithful. Today the Shariat no longer exists in the Soviet Union. According to the Soviet political dictionary: "In the U. S. S. R., now, the Shariat is eradicated."

Visitors who have penetrated the Soviet screen of misinformation, report some interesting facts. Last year, one English clergyman who had recently returned from the U. S. S. R. told his congregation that only 45 out of Moscow's 1,600 churches were still in operation. Canon Mervyn Stockwood, vicar of the Morrisfields parish in Bristol, England, said one church he attended had 3,000 persons jammed inside.

For the most part, and particularly since the start of the current campaign, Moscow has been careful to prevent visitors from grasping the true state of religious affairs in the Soviet Union. As proof that there is no oppression, a selected few religious leaders are invited to come and see for themselves. However, they are closely shepherded around the few places of worship kept open for the express purpose of impressing foreigners.

Radio Moscow, in an October broadcast to the Near East, found it profitable to relay this statement by an archbishop of Lebanon:

I spent a few days with the Patriarch of Moscow who stressed the great care taken by the Soviet Government for the preservation of churches, religious schools, and the academy of theology.

What the visiting archbishop did not say was that the Russian Orthodox Church is under strict Government control through the Council on the Russian Orthodox Church headed by Georgi Kerpov, who in 1945 was given the title of major general for his work in the Soviet secret police force.

Moscow agreed in 1943 to give the Russian Orthodox Church official recognition in return for a heavy price: complete subservience to the Soviet Union.

The Journal of the Moscow Patriarchate, the official church monthly, carefully parrots the latest party line. Even the Orthodox Church Calendar for 1954, published by the Moscow Patriarchate, indicates the increasing subservience of the church to the state and to its propaganda aims.

While Moscow continued to turn a pious front to the Western World, its latest antireligious drive was being reported by the free press and radio. This brought worldwide criticism upon the heads of the Soviet hierarchy and last November the Kremlin came to the conclusion that its propagandists had gone too far.

Since the drive was going badly, Soviet leaders began to scold their propagandists for poor taste. They did so officially on November 10, when the Soviet Communist Party Central Committee issued a decree signed by Party Chief Nikita Khrushchev.

The decree stated:

Insulting attacks against believers and the clergy can only lead to strengthening and even intensification of religious prejudices among the people. Instead, patient, well-organized scientific athiestic propaganda among the believers will help them finally free themselves from their religious errors.

At first glance, it looked as though the Kremlin had come up with a new idea in the present campaign, but to observers who have traced the U. S. S. R.'s antireligious drives from the beginning, the decree only brought a tighter Soviet grip on the church and clergy. It again directed propagandists to employ a more subtle technique instead of the direct attack, which had failed. And it reemphasized that atheism might be achieved more quickly through a shrewder campaign.

The Vatican promptly branded the decree as a tactical propaganda move to convince the outside world that the Soviet Union was softening its attitude toward religion. The United States Information Agency noted that Moscow's slanderous broadcasts had stopped. This was significant because a survey of Soviet home broadcasts for one day last September disclosed that 50 percent of the broadcasts in the RSFSR and 75 percent of those in the Ukraine dealt with antireligious themes.

One reason for the halt in broadcasts came from none other than Radio Moscow itself. A week after the Soviets shut off antireligious propaganda, Radio Moscow deplored the "claims put forward in anti-Soviet propaganda, particularly American propaganda." It was a frank admission that USIA reports on what was going on in the Soviet Union had hurt the Kremlin in more ways than it had foreseen.

Today, however, the antireligious campaign in the U. S. S. R. appears to be as strong as ever.

In the first article to appear in the Soviet Union since the decree, the central committee magazine, Party Life, pointed out that it is not a matter of slowing up the activity of antireligious propaganda, but to correct its errors. Said the magazine:

It is a matter of convincing everyone of absolute opposition between science and religion: Science is based on facts and experiments, while religion rests on nothing but fantastic inventions and Biblical or other legends. Scientific-atheistic propaganda, well carried on by the cadres, will bring out the triumph of materialist ideology and will raise the cultural level of the workers.

The magazine also disclosed that Moscow is considering putting a stop to religious pilgrimages.

It must be shown—

Said the magazine—

that the observance of rites and pilgrimages to holy places seriously prejudices the national economy, distracts thousands of people from their work, and thus undermines all work discipline.

For the first time in many years, the Kremlin is extending its attack on Christianity to include the Protestant Churches, and especially the Baptists. A recent issue of the publication, Soviet Latvia, says:

Every religious sect is an organization which preaches antiscientific, reactionary ideology. At the present time the center of the Baptist sect is the United States of America. The executive committee of the World Union of Baptists is in Washington. This is actually a branch of the State Department. The American imperialists are only too pleased to use this sect for the purpose of recruiting spies to send to the U. S. S. R.

All this propaganda, and more, is being echoed by the Soviet satellites.

The Vienna Roman Catholic news service, Kathpress, reports that the Polish Ministry for Culture has prohibited religious teaching in all Polish elementary schools. From now on, the report says, religious education of Polish children will be possible only at home or in the churches.

Recently a new Chief of the Office of Religious Cults was appointed by the Polish Government. Rome radio, viewing this as an indication that Poland is increasing its religious persecutions, said in a recent broadcast:

The Polish Government appointed Jan Izydorczyk, former Polish Ambassador in East Germany, as Chief of the Office of Religious Cults. The present chief was transferred to another post, as he was considered to be too mild toward the Polish clergy. The appointment of Izydorczyk to such an important post shows the intention of the Polish Government to increase its antireligious propaganda and religious persecutions, as the former Ambassador is in great favor with Soviet ruling circles. His duties will be to direct the activities of the antireligious office in such a way as to make the work and life of the Polish clergy more difficult, acting under Moscow orders.

The radio Rome forecast was followed by reports received from Poland which say that Izydorczyk has closed the theological faculties of the universities of Warsaw, Cracow, and Poznan.

This move limits the fields of higher theological studies in Poland to the independent Catholic University of Lublin, which was specifically protected by the church-state agreement of April 1950. The agreement allowed the Catholic University of Lublin to continue its activities within the scope hitherto enjoyed. Primate Wyszynski, however, pointed out to the Government in May 1953 that this agreement had already been violated by the closing down of the faculties of law and economics at Lublin—a move which resulted in the dismissal of more than a dozen professors.

Petrusblatt, the official Roman Catholic weekly in Berlin, reports that Catholic nuns of German origin have been forcibly driven out of their convents by officials of the Polish Government and put to work in the fields near Cracow. The newspaper also reported that Polish authorities have turned the Benedictine Abbey at Gruessay, Silesia, into a military barracks.

In Czechoslovakia the newspaper Nova Svoboda has announced that science established the fact that Jesus Christ never existed and that the church borrowed the stories about him from Egypt, Rome, and the East.

According to a Czechoslovakian priest now in Germany as director of one of the largest havens in Western Europe for refugee priests, the Roman Catholic clergy probably will die out in Soviet satellite countries in 10 to 20 years if the present pace of cold persecution continues.

Msgr. Adolf Kindermann, himself a victim of Communist persecution, views the present Communist war on religion as much more relentless and diabolically conceived than the persecution of the Christians under the reign of Roman Emperor Diocletian.

He says that of the 40,000 Catholic priests in the Soviet satellite countries before the early persecutions began, only about half remain, with most of them prevented from performing their priestly functions by imprisonment or by separation from their congregations.

As Moscow continues to pump its atheistic propaganda into the satellites the drive grows even more vicious at home. What is happening in the U. S. S. R. today speaks for itself.

The Soviets now are turning to 18th-century French philosophers to find more ammunition. The Journal of the Soviet Academy of Sciences says that a library of antireligious works will be set up and particular importance will be given to the books of Voltaire, Rousseau, and Diderot.

Radio Odessa denounces Christmas as a harmful survival of ancient superstitions. One broadcast said:

The church invented Christmas and imposed it upon the believers to prove the existence of the invented Son of God, Jesus Christ. There is nothing sacred and divine in Christmas and in other church festivals.

Another example of current Soviet propaganda is an article which appeared recently in the Soviet trade union daily newspaper, Trud. The paper, attempting to carry out the so-called scientific approach in the present campaign, claimed that Soviet children have split minds because they are taught religion at home and atheism in school.

Trud said that since the children are taught at school that there is no God and that religion is just superstition, it confuses them to learn otherwise at home and turns them into problem children.

The campaign concentrates heavily on youth, since Moscow is having its troubles with young people who forget their Communist training long enough to insist on church marriages and baptisms. For example, the Communist youth newspaper, Komsomolskaya Pravda, printed this lament for its young readers:

On a Sunday, Mikhail Shakh, a Komsomol (youth) member in a township of Moscow oblast, visited his married sister. She told him that she wanted to have her baby baptized in church, and asked him to join her.

Mikhail found it peculiar that he, a Komsomol member, should be asked to take part in a religious rite. He has been in the Komsomol for several years, had never been religious, and had never been in church. And now he was asked to be a godfather to a baby in church.

Writing about all this to the Komsomolskaya Pravda editor's office, he said: "Several days have elapsed since then, and I still cannot get over it. I understand that I acted wrongly. I let down the honorable title of Komsomol member."

In its editorial, Keep to the Principles, the paper says:

Yes, Mikhail, you did not act as a Komsomol member. A Komsomol member must keep to the principles, which originate in lofty, ideal consciousness and a stable, Socialist's world view, with which the Communist Party arms Soviet youth. Our world view is a Marxist and materialistic world view, the most advanced and the only scientific one.

A Komsomol member pledges himself to follow consistently the charter of the organization, which demands that its members struggle against religious prejudices and superstititions, keep to their principles always and everywhere, and serve as an example for the younger members. And what has happened now? Wanting to please your relatives, you acted not according to your principles, you made a bargain with your own conscience. You did not stand the test of making your deeds follow your conscience. You stand now before your comrades as one man in words and another man in deeds. And in our country we judge people after their deeds, their action.

In short, the Communists again have turned on the pressure against faith in God—a pressure that was relaxed during World War II. When the stakes were high and Moscow needed the support of all groups, the Soviet press was silent, religious faith was undisturbed, and the church became a matter of unfinished business—to be hauled out at a riper time. That time has come. The brief era of relaxation is at an end, and the purge of religion has begun anew.

I add a news story which tells, country by country, the fate of the Catholic clergy under the Soviets:

ESCAPEE PRIEST TELLS OF COMMUNIST PERSECUTIONS

FRANKFURT, WEST GERMANY, November 11.—The Roman Catholic clergy probably will die out in Soviet satellite countries in 10 to 20 years if the present pace of cold persecution of priests continues, Monsignor Adolf Kindermann predicted today.

In an interview on Communist treatment of the Catholic clergy, the Czechoslovak expellee told of priests being murdered and tortured behind the Iron Curtain and described Communist desecration of Catholic churches, schools, and seminaries.

Monsignor Kindermann, himself a victim of Communist persecution, is now the director of the Albert Magnus Seminary at Koenigstein, one of the largest havens in Western Europe for refugee priests from Soviet satellite countries. Formerly director of a theological seminary at the University of Prague, he was arrested by the Communists in 1946 for what they termed "high treason against the state," but escaped from prison just as he was to be sent to Siberia.

Reviewing the Communist war on religion, currently revived in the Soviet Union as a campaign to "educate the masses in scientific atheism," the priest charged that the Communist persecution of the Catholic clergy is much more relentless and diabolically conceived than the persecution of the Christians under the reign of Roman Emperor Diocletian.

He said that of the 40,000 Catholic priests in Soviet satellite countries before the persecutions began, only about half remain, with most of them prevented from performing their priestly functions by imprisonment

or by separation from their congregations. Approximately 3,000 East European priests, he said, have escaped to Germany, 350 to Austria, and 100 to other countries. He also pointed out that no Catholic priests have been ordained in Iron Curtain countries in the past 6 years, and that the education of the few young priests trained in the state-dominated seminaries has consisted more of Communist ideology than of the Catholic faith.

Here is Monsignor Kindermann's country-by-country report of the persecution of Catholic priests in Communist countries:

Albania: Archbishop Vinzens Prennushi, of Durazzo, nearly 70 years old, was tortured to death in prison when he was placed in a wooden cage studded with iron points. Monsignor Gjini, of Oroshi, and 10 of his followers were shot as he was blessing his companions and 1 of his priests was buried alive. Priests were tortured by Communists who threw them into cesspools, put salt in their wounds, and sawed off their legs. A total of 130 churches were desecrated and Catholic schools, seminaries, and cloisters were closed.

Bulgaria: Most of Bulgaria's 160 priests have by now died martyr's deaths or are at work draining marshes to build up the Communist economy. Three seminaries existed until 1949, but all are now closed.

Rumania: The Roman Catholic Church had 6 dioceses with 7 bishops and 1,400 priests. Today not 1 bishop can exercise his functions; 2 have died in prison, namely, Bishops Cisar and Scheffler; the others were imprisoned, including 85-year-old Bishop Pacher. The year 1948 brought an end to the Catholic press and schools. Since 1951 there has been one state-operated seminary at Alba Julia, where the Marxist doctrine is the major course.

Croatia: In September 1953 Monsignor Lajca Bunavic II, the bishop of Subotica, was beaten into unconsciousness by a Communist mob. Of late other bishops and priests have been drafted into the army as soldiers. Churches have been desecrated and seminaries closed.

Slovenia: 55 priests have been killed. Bishop Vovk was burned when the Communists poured gasoline on him and set him aflame. Seventy priests are in prison. One of the two seminaries has been closed. The other, at Ljubljana, conducts courses in communism.

Hungary: 19 priests have been killed. Cardinal Mindszenty was condemned to life imprisonment. Bishop Wilhelm Apor was killed by Soviet soldiers and about 350 priests live in exile. Only 6 out of 23 seminaries remain and these are under state control.

West Czechoslovakia: Archbishop Beran is in an unknown prison and auxiliary Bishop Zele, of Olmutz, has been condemned to 25 years' imprisonment. All but one seminary, now under state control, have been closed.

Slovakia: All religious priests are in prison or concentration camps and 600 secular priests have been deported. Nearly 150 priests have died in exile. One state-controlled seminary still exists.

Poland: Cardinal Wyszynski and 8 other bishops have been imprisoned, 37 have been killed, and the fate of 260 others is unknown. A total of 360 priests have been deported, 700 have been imprisoned, and more than 800 secular priests have escaped to other countries. Since 1952, 59 seminaries have been closed.

Lithuania: Bishop Matulionis, of Katsedorys, died in prison; Monsignor Borisevicius, of Telsias, was condemned to death; three other bishops were exiled. Every priest is suspected of being an "enemy of the state." Monasteries and seminaries were closed because the Communists said they were "revolutionary nests." The most beautiful cloister in Lithuania, Pazauseis, was converted into an insane asylum.

Ukrainia: All of the country's 10 bishops have been sent to concentration camps and 6 have died. Most of the former 3,000 priests are in concentration camps southeast of Moscow and about 400 were able to escape to the outside world. All seminaries have been dissolved. The Holy See and the Roman Catholic clergy are considered the worst enemies of the state.

Latvia: Only one bishop remains. Nearly all the priests have been condemned to forced-labor camps. Some have been exiled and 10 have been killed. Priest Gladislav Litaunieks had a crown of thorns placed on his head by Soviet soldiers. The country has one state-controlled seminary.

Estonia: This country no longer has a Catholic bishop. It is problematical whether any priests remain.

Soviet Union: Only two Catholic priests remain: The chaplain of the American Embassy in Moscow, who is not permitted any contact with civilians, and the priest attached to the Church of St. Louis in Moscow. The other bishops and priests have been in concentration camps for years, many of them since 1927.

HOUSING FOR OUR SENIOR CITIZENS

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to addres the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, I am happy to announce that associated together as cosponsors are 12 members of the Banking and Currency Committee and 1 former member in a legislative effort to give relief to the senior citizens of our country in the matter of housing, specially constructed for the greater convenience of the aging, and within the financial means of those who have passed the productive period of life and at the best have little more than retirement pensions usually running not more than $100 to $150 a month.

It is a new approach in the field of public housing which we trust will have sympathetic study by all the Members of this body. We bespeak also sympathetic study and cooperation by those in private industry, also of course by the churches, the civic groups, the press, and the public.

It well may be that the bill which we are sponsoring after study will need changes both as to form and policy. We will appreciate your suggestions to the end that one of the great accomplishments of the 84th Congress will be legislation assuring our senior citizens of freedom from worry in the matter of the roofs above their heads in the years of lengthening shadows.

Among the cosponsors of the bill are the distinguished gentlewomen from Pennsylvania, Missouri, and Michigan—BUCHANAN, SULLIVAN, and GRIFFITHS—who are members of the Banking and Currency Committee. Other Members sponsoring the bill are the Honorable WRIGHT PATMAN, the Honorable ALBERT RAINS, the Honorable ABRAHAM MULTER, the Honorable ISIDORE DOLLINGER, the Honorable THOMAS L. ASHLEY, the Honorable WILLIAM A. BARRETT, the Honorable IRWIN D. DAVIDSON, the Honorable HENRY S. REUSS, and the Honorable CHARLES A. VANIK.

As medical science improves we have more and more older people among us. They are no longer part of large family units. A shocking number of them lead lonely and frustrated lives in houses that are too large for them and are dilapidated. These people, who once served active and useful lives in their communities, are dependent for income on small savings, inadequate pensions, and on their families. They now have no place to turn for suitable modern housing. Many who wish to pass the remaining years in continuing independence in their own homes are forced to live with children and grandchildren, welcome and beloved it is true but nevertheless in the status of charity guests.

The bill introduced today envisions homes for the aging and aged within their financial means and located in or near the communities in which their children and friends reside and dear to them from the memories of past associations.

Many of the aged are living in oversized units or in dilapidated units. A special study prepared by the Bureau of the Census in agreement with the Division of Housing Research of the Housing and Home Finance Agency shows that only 66.4 percent of the aged were living in housing in 1950 which had private toilet, bath, and hot running water. By contrast 72 percent of those persons under 65 years of age live in houses having private toilet, bath, and hot running water.

Eleven and three-tenths percent of the aged do have private toilets, bath, and cold running water, but most of them live in a dilapidated house. Twelve and eight-tenths percent of the aged had running water but no private toilet or bath, and 8.4 percent did not even have running water available to them. In addition, they find that their property continually depreciates and that they are not able to keep it in repair because of physical and financial reasons.

Not only do the aged live in dilapidated units, but usually they occupy oversize units as well. Fifty-eight percent of the aged live in houses involving 5 or more rooms although they have smaller families than households headed by persons under age 65.

The aged often experience a feeling of extreme insecurity, not because of inadequate income but because they live alone. They fear the possibility of a fall or an illness with no one to notice their illness or their failure to appear at mealtimes. As a result they lead lonely and frustrated lives. Because their families are grown and no longer dependent upon them, they often have a feeling of uselessness as well which makes life hardly worth living for them. They desire companionship; they desire a feeling of being needed; they wish security in a psychological sense just as much as in an economic sense. This is not possible unless they are housed decently.

Unhappily for them the commercial market provides practically no opportunity to secure adequate housing. The reason for the lack of housing for the aged in the commercial market is not hard to understand. The aged are relatively questionable as a mortgage risk.

Hence, there is usually a large down-payment required of them, and the only mortgage given them is a relatively short-term mortgage, with resulting high monthly payments. The consequence of all this is that only the well-to-do aged can easily qualify for a new house in the open market.

From the landlord's standpoint, many are doubtful about renting to the aged because they fear the aged may become ill and be unable to pay their bills; or the aged may require expensive medical care. He fears that they may become a very real burden upon him and require more and more of his attention.

From the builder's standpoint, the market has been so good for housing for young families for the last 10 to 15 years that he has kept busy building homes for them. He has not thought to cultivate the market for housing among the aged. From the standpoint of rental housing, speculative builders have managed to do very well building for the young bachelor person, the young married couple, and the childless couple. Why should they undertake the risk involved in building rental units for the aged?

Neither have investors such as insurance companies, thought to cater to this market. The aged are certainly not likely to develop organizations through which they can provide housing for themselves. No case of consumer cooperatives, for example, composed of the aging has ever been called to my attention. The likelihood that older persons will organize a new corporation to build housing for themselves on any general basis is very small.

Older people need low rental housing especially designed to meet their special limitations and needs. Federally financed public housing, however, has not been generally available to them because the law states that such housing may be used only for family occupancy. Administrators, knowing that one member of an older couple may die soon, have been unwilling to accept older families.

State financed public housing in New York, it is true, has set aside 5 percent of all new housing for individuals 65 years and over, without reference to their family status. Massachusetts recently established a loan fund of $15 million which is available to local housing authorities to build low-rental housing for the low-income group aged 65 and over. Already 23 communities have provided plans and have applied for these funds. Efforts of these kinds are so limited, however, that they do not begin to meet the need.

A program of Federally financed public housing for the aged as provided in the bill introduced today is the only solution for the aged with low incomes.

I pray that this body speedily will enact it into law.

SPECIAL ORDERS GRANTED

Mr. RIVERS asked and was given permission to address the House for 10 minutes today, following the legislative program of the day and the conclusion of any special orders heretofore entered.

Mr. MURRAY of Illinois asked and was given permission to address the House for 1 hour on Wednesday next on the subject of Lithuanian independence, following the legislative program of the day and the conclusion of any special orders heretofore entered.

FEDERAL AID FOR SCHOOL CONSTRUCTION

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. PERKINS. Mr. Speaker, it is an admitted fact that our schools are in serious trouble. There is an emergency situation existing throughout the Nation which calls for immediate Federal aid for school construction. In my opinion the President's proposal to relieve this crisis is not adequate enough to help solve this urgent nationwide problem. His proposal may be helpful for a long-range program, but it will not fill the widening gap between existing inadequacies and increasing enrollments. Practically speaking, classroom bricks should be laid immediately and thousands of new classrooms should be near ing completion before the machinery for this school-building agency plan can be put in motion.

We are in an emergency period. Urgent school-building needs throughout the country have reached tremendous proportions. The time is now for Federal aid, the need is nationwide, and Congress must heed the warnings from citizens across the country.

The President's plan does not meet our present school construction predicament which is at the critical floodtide point. It is as one of my colleagues described: "The present emergency calls for a 'Mae West' life jacket and the President threw out a lifesaver—a candy one."

Our schoolchildren in this country should not be required to wait for halfway adequate housing until the various school districts throughout the country run an impractical obstacle course, especially when many of the most needy areas will find the course impossible.

As the following editorial from the Floyd County Times dated February 3, 1955, at Prestonburg points out, this type of plan does not meet our emergency:

[The] plan to create a National School Building Authority to lend money to the States, which in turn would lend money to school districts for building, may be a matter of too little, too late.

The school districts that have reached their bonded indebtedness limit and hence the very districts that need help most, might be excluded from this form of Federal aid because they could not contract added indebtedness, no matter how long they had in which to repay it.

It is basically right to encourage local efforts, to avoid give-away programs. But when our people here at home need roofs for their children at school, that should be a matter of no great consequence, in view of millions given toward the betterment of other peoples over the world.

The President admits that we have a shortage of more than 300,000 classrooms, with needed replacements annually adding to this total. There is an additional need of 50,000 new schoolrooms per year merely to meet the enrollment increases in elementary and secondary schools.

The President's recommendations, designed to meet the needs of a 3-year period, proposed appropriations of $750 million for loans and $200 million for grants in aid to school districts which cannot raise additional funds because they have reached their bonded indebtedness.

A proposal to appropriate amounts of slightly less than $67 million per year for the next 3 years for grants to needy districts can scarcely be considered realistic. This is less than 1 day's expenditures of the Department of Defense, or 1 week's interest on the national debt. In fact, the amount is approximately equal to $1 per year for each employed worker in the country. The total amount may sound like a substantial sum, but when a country with a population rapidly approaching 170 million people cannot appropriate even $70 million to provide classrooms for school children in a real emergency, it is time to start a survey of our economy as well as of our educational system. We must equip our youth so that they can help maintain our economy and our society at steadily rising levels. This can be done only if we provide adequate classrooms and schools for their training.

The President's grant-in-aid proposal is an admission by him, according to one editorial writer:

That restrictive debt limits forbid many school districts to borrow in this fashion and that in many others "the amount of taxable property and local income is so low as to make it impossible for the district either to repay borrowed money or rent a satisfactory school building." To the impoverished districts he would make Federal grants in conjunction with the States—thus breaching, so far as they are concerned, the wall he had previously erected against Federal intervention. If direct Federal aid will not imperil the independence of communities unable to borrow, it will not imperil the independence of more solvent communities.

The President's estimate of the need for an additional 450,000 classrooms during a 3-year period indicates that he considers the current cost of school building to be at the rate of $4,000 per classroom, of which the Federal Government would provide $2,000. I do not believe that classrooms constructed at an average cost of $4,000 per room will be adequate to modernize our school-building facilities.

As one columnist emphasized the other day—Walter Lippmann, February 3, 1955:

Though we cannot solve all the problems with more money, that is no excuse for failing to meet the gross, material, obvious deficiencies which can be cured and have to be cured with money. We shall never have the chance to solve the other and higher problems of our schools if we allow them to become more and more overcrowded, if we allow the teachers to become more and more overworked, if we allow the educational community to become more and more overwhelmed and discouraged.

The President said in his message that we have an emergency situation at hand and he considers this proposal to be an effective measure to meet the situation. He has proposed a middle-of-the-road plan, calling for a 2-lane highway, when nothing short of a 4-lane turnpike could possibly handle the flow of needed emergency aid for school construction.

He has also pointed out that his plan leaves room for the additional suggestions which will come from the State and local educational conferences, culminating in the White House Conference on Education next November. His proposal, however, would involve a long-term financial agreement with the States which would take the local school districts 20 to 40 years to pay off. It may appear pennywise, but it is ill-advised and parsimonious and certainly too little, too late. Moreover, it is far more entangling than any of the current congressional bills for emergency Federal aid for school construction would be.

The President's plan is not a measure designed to combat the urgent immediate need for more classrooms. In my opinion, the plan for bond purchases and the creation of State school building agencies is a hesitant, circuitous, and inadequate way to meet a problem that requires swift action and beachhead strategy. The President's plan is not enough, soon enough to attack the stupendous problem that is currently weakening this Nation's future security. This is a national problem which must be met with energetic action in keeping with the greatness of this country's reputation. We can meet this national educational crisis far more effectively, I believe, through enacting one of the emergency bills proposed in the present Congress. I personally feel that the Hill bill, provides the proper approach. However, these bills provide for enough emergency aid to help alleviate this national problem. We need Federal aid for school construction and the need is now.

TAX ON COAL

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, on Monday, February 7, I introduced a bill calling for the removal of an old, worn-out, moth-eaten tax of 4 percent on the transportation of coal. Historically, the reason for the existence of that tax obviously no longer exists, especially when you realize that many such taxes—and I have in mind especially the one on the motion-picture industry—are not concerned with national defense or the national economy, as is the coal industry. I have seen various administrative officials for many years shed tears about the distressed condition of the coal industry of this Nation. Yet, for no reason at all, our requests to remove this obnoxious and unnecessary impost at this time is denied. In dollars it will amount to less than $1 million. Psychologically there is no historic or economic, practical reason for this irritating tax at this time.

It is generally recognized that the coal industry is facing serious economic difficulties which have widespread implications throughout national economy as well as in the anthracite region from which I am a Representative. It is also to be noted that the anthracite industry is today a progressive, aggressive industry, facing up to its problems in realistic fashion. It is streamlining its production methods. It has developed new, modern, convenient, automatic equipment. It is now embarked on a suited industry program to market its product and improve its services. And it is successfully standing up to competition as never before in recent years. This is the kind of fighting American industry that is deserving of every consideration and certainly not to be subjected to unfair tax burdens.

I have before me a resolution adopted by the Eastern States Retail Solid Fuel Conference, representing fuel merchants from Northeastern and Middle Atlantic States. It reads as follows:

Whereas the Governors' Fuel Conference at Bolton Landing, N. Y., on July 12, 1954, and the committees of the Congress and the executive branch of the Government have highlighted the importance of a healthy coal industry to the national well-being and security; and

Whereas Congress has granted relief from wartime excise taxes to other industries, no more deserving or essential than the coal industry; and

Whereas the coal industry still bears the undue burden of a 4-cent Federal transportation tax per ton of coal, cancellation of which would contribute to the economic welfare of the coal industry; increased employment of mine workers and maintenance of those companies now in the business: It is hereby

Resolved, That the Eastern States Retail Solid Fuel Conference request the Congress of the United States to eliminate this 1942 4-cents-per-ton Federal transportation tax on coal, and relieve the coal industry of an inequitable obligation.

The motion-picture industry and others have come before this body and been granted relief from wartime excise taxes which were proving a handicap to them during a period of readjustment. I am sure their need was no greater than that of the coal industry. I know that none of them is more essential to our national economy during times of peace or more vital to our national security during times of emergency. Repeal of the 4-cent transportation tax does not mean a great deal to the Federal Government in terms of money. For the anthracite industry it will total only slightly more than $1 million. But it will mean a great deal to the retail fuel dealers and the coal-producing region. It will spur them on in their battle to stabilize a sound and prosperous industry. Up to now the legislative mills have ground slowly insofar as action to aid this industry is concerned. Not a single important remedial action was taken by the last Congress. The passage of this bill to repeal the 4-cent Federal transportation tax on coal will therefore bring encouragement to the people of the coal industry as well as financial relief. It will be encouraging for them to know that in this one instance, at least, the Federal Government has shown understanding and consideration in its attitude toward this deserving and loyal American industry.

FORTY-FIFTH ANNIVERSARY OF THE BOY SCOUT ORGANIZATION

Mr. PHILLIPS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PHILLIPS. Mr. Speaker, on Tuesday morning, as you yourself well know, for you were one of the dignitaries who attended the meeting and you made a short speech of welcome, I attended the annual breakfast meeting of the Boy Scouts of America.

This is the 45th anniversary of that splendid organization. It has been the custom for many years for one of the outstanding Eagle Scouts of each district in the United States to come to Washington, and to have this group present an annual report to the President of the United States. At one time they came down here and handed in a report. Then that was changed to the present method of having a demonstration, a visual report of some kind, which has become more interesting year by year. It was an inspiration to all of us who were privileged to attend. Members of the House in attendance were the gentleman from Connecticut, Mr. CRETELLA; the gentleman from New York, Mr. PILLION; the gentleman from Pennsylvania, Mr. JAMES; the gentleman from Kentucky, Mr. GREGORY; the gentleman from Mississippi, Mr. WINSTEAD; the gentleman from North Carolina, Mr. COOLEY; the gentleman from Michigan, Mr. JOHANSEN; the gentleman from Colorado, Mr. ROGERS; the gentleman from Texas, Mr. WRIGHT; the gentleman from South Dakota, Mr. BERRY; the gentleman from Oregon, Mr. COON; the gentleman from California, Mr. HAGEN; also the Senator from Minnesota, Mr. THYE, and the Senator from South Dakota, Mr. MUNDT.

The breakfast guests heard a message from President Eisenhower, honorary president, as follows:

To the Boy Scouts of America:

Boy Scout Week gives all of us an opportunity to honor the 2,765,000 boys and their nearly 1 million leaders who make up this great organization. Self-development and service to others, independence and good citizenship, a sense of brotherhood and responsiveness to spiritual values—these qualities which Scouting fosters mean much to America. To all Boy Scouts I extend congratulations on what they are achieving and on what they promise for our Nation's future.

DWIGHT D. EISENHOWER.

Mr. HAYS of Arkansas. Mr. Speaker, the Congress has a special interest in the ceremonies honoring the Boy Scouts of America on their 45th anniversary, for in 1916 the group was chartered by act of Congress. The pride which the Congress has in the Boy Scouts' progress was demonstrated by the presence of

our distinguished Speaker at the annual breakfast for the 12 outstanding Eagle Scouts on last Tuesday. These young men, accompanied by the Representatives from their respective districts, presented an impressive program. Those honored were Robert G. Pilvenis, Branford, Conn.; David L. Gerwitz, Williamsville, N. Y.; Larry Hutchinson, Thornton, Pa.; Paul B. Wellford, Paducah, Ky.; Jimmy Noblin, Forest, Miss.; Alexander R. Moore, Raleigh, N. C.; Lowell Gillem, Kalamazoo, Mich.; Bruce Kent, Denver, Colo.; John R. Cookerly, Fort Worth, Tex.; Charles Braun, Rapid City, S. Dak.; Robbie Langley, Milton-Freewater, Oreg.; Lee Talbert, Taft, Calif.

An impressive report of Scout activities was presented by Scout officials, John M. Schiff, president, and Chief Scout Executive Arthur A. Schuck. They reported a total of 41,721 different projects in soil and water conservation; 38,125 projects in forestry; 29,323 projects in fish and wildlife conservation; and 30,450 activities designed to keep America beautiful by eliminating litter along roadways, parks, rivers, and streams. In an effort to arouse public recognition, Scouts built some 40,940 public exhibits and demonstrations; gave 56,678 talks at public gatherings on conservation; and distributed more than 3 million posters.

Another significant message was the official greeting signed by the Honorable SAM RAYBURN, Speaker of the House of Representatives; the gentleman from Georgia, the Honorable CARL VINSON; the Senator from Kentucky, the Honorable ALBEN W. BARKLEY; the Senator from Arizona, the Honorable CARL HAYDEN; all of whom served in the 64th Congress when the act was passed which chartered the organization. These are the only Members of the Congress which authorized the incorporation now serving in the Senate or House in the 84th Congress, and I can assure you that the appearance of our beloved Speaker to represent the Congress on this occasion drew a heartwarming response from the Scouts and their assembled friends. I am sure that every Member of the House joins in extending sincere congratulations and best wishes to the Scouts and their leaders across the country.

SPECIAL ORDER GRANTED

Mr. MEADER asked and was given permission to address the House today for 20 minutes, following any special orders heretofore entered.

TELEVISING COMMITTEE HEARINGS

Mr. MEADER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MEADER. Mr. Speaker, I have taken this time to call the attention of the membership to the subject matter I wish to discuss later this afternoon under special order. I propose to discuss the telecasting and broadcasting of House committee hearings.

I introduced a resolution—House Resolution 99—to permit telecasting which is now pending before the Rules Committee. I have also read with considerable interest the discussion of other Members of the House on this subject.

I hope the Rules Committee will consider my resolution early in this session so we may have a definite ruling on this very important question before the committees get too far into their program.

THE RECIPROCAL-TRADE-AGREEMENTS PROGRAM

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. DAVIS of Georgia. Mr. Speaker, I have been very much interested in the public hearings which the Ways and Means Committee has been conducting on the bill H. R. 1.

In years gone by the traditional position of the Democratic Party nationally was in favor of a low tariff, while that of the Republican Party was for a protectionist tariff. I have always felt that these attitudes probably resulted from the fact that the strength of the Republican Party lay in the industrial States and centers, while the strength of the Democratic Party lay in the agricultural States of the South, which section has been throughout the years the stronghold of the Democratic Party.

As conditions have changed in recent years, the South has increased its industrial production and has made rapid strides in manufacturing, particularly in the textile field.

We can no longer feel that our interest in the tariff is based almost wholly upon our status as an agricultural section.

As we have increased industrial production, more and more of our people are in position to be affected by the volume of manufactured goods imported from other countries. Year by year the number of Georgia citizens has increased whose livelihood and income is derived from the payrolls of manufacturing and industrial concerns.

We have seen agriculture become more mechanized. We have seen more efficient methods of farming adopted. As these changes have taken place, surpluses of agricultural products have been created. The demand for farm labor has decreased, and many farmers have moved to the towns and cities to become a part of our program of industrial production.

If this industrial production is decreased now, it will, of course, mean unemployment for some who are now employed. The percentage of unemployment will depend upon the percentage of decrease in production.

In former years agriculture could always make a place for a returned farm worker. Such is not the case now with agricultural production under Government controls. The cotton farmer who is now allotted 5 acres or 10 acres—and there are many of them—can barely make ends meet for himself, and certainly cannot make a place for a son or brother who loses his job in town.

These are some of the problems which we must consider in passing upon this reciprocal-trade bill.

I have made plain my position to members of the Ways and Means Committee while this legislation was being considered there, that I would like to support the bill when they bring it out. But it is imperative that the bill contain adequate safeguards to prevent the destruction of the domestic market for our textile goods which constitute such a great part of our industrial output in Georgia, and particularly in the Fifth Congressional District, which I represent.

Mr. Speaker, I do not propose to close my eyes to the possibility of disastrous consequences which may befall the thousands of Georgia men and women unless adequate safeguards are placed in this bill to protect our domestic markets against a flood of textile products from abroad, manufactured by cheap labor with which our people cannot compete. It is of the utmost importance that we take such action here as we can to assure uninterrupted production of our textile mills, a continuing market for our textile products, and continued employment for the men and women who earn their livelihood in this industry.

The Randall Commission on Foreign Economic Policy, which made a report in January 1954, said in that report regarding tariffs and trade policy:

> We are fully aware of the arguments for free trade. It is sufficient to say that, in our opinion, free trade is not possible under the conditions facing the United States today. Even in moving toward greater freedom of trade we must consider all of the rigidities, both here and elsewhere, which negate some of the premises upon which the arguments for free trade rest. We must take into account that while the United States employs impediments to trade, primarily through tariffs and in only limited fields through quotas, other countries also employ these devices. Beyond this, they employ the quota procedure far beyond our use, and against other countries as well as against us, and also employ exchange controls and many other devices not used here.

I do not think anyone can claim that our present tariffs, duties, and quotas are unreasonable, or that they should be further reduced. The Randall Commission, which studied the question, carefully said:

> It is clear, on the evidence examined by this Commission, that, although many United States tariffs are high and many of our customs procedures are slow and cumbersome, many other United States tariffs are low, and more than half our imports enter free of duty.
>
> We fully recognize the dangers of using averages; yet it seems clear by any test that can be devised that the United States is no longer among the higher-tariff countries of the world. Taken by and large, our trade restrictions are certainly no more of a cause of payment imbalances than the rigidities maintained by other nations.

The Randall Commission recommended, on page 49 of its report, that the

President's power to negotiate trade agreements and to place them in force should be extended for not less than 3 years, but in the same sentence they recommended that this be done with appropriate safeguards. In my opinion, it is imperative that the power given to the President to negotiate these agreements should be restricted with appropriate safeguards, as recommended by the Randall Commission. I think it is important that the escape clause and the peril-point provisions should be retained in whatever extension of the Reciprocal Trade Act Congress grants. The Randall Commission likewise recommended that these provisions be retained.

Mr. Speaker, in conclusion I commend to the attention of the Members the following editorial entitled "Textiles and the Tariff" which appeared in the February 8, 1955, issue of the Atlanta Journal:

TEXTILES AND THE TARIFF

Georgia and its neighbor States contain the majority of the Nation's textile mills. Most of these mills are located in small communities and, frequently, are the principal support of the community. If the mills shut down, the people are out of work and the community is on the rocks.

The traditional position of the South has been for low tariff. In general, that is still the Southern position. But it is right that the people understand certain facts which concern the textile industry and, therefore, directly affect the economic structure of Georgia and the Southeast.

The chief cost in manufacturing textiles are raw materials and wages.

Raw materials can be delivered to a mill in Japan at substantially the same price as similar material can be delivered to a mill in Georgia.

But in Japan the average hourly wage paid textile employees is 13.6 cents. In the United States a textile employee is paid approximately 10 times that amount. The difference gives Japan an almost insuperable advantage.

The House Ways and Means Committee has been holding hearings in Washington on a bill, known as H. R. 1, that would extend the reciprocal trade agreement program for 3 years. It also would give the President authority further to reduce United States tariffs.

The dilemma is obvious. Lower American tariffs would stimulate world trade and bolster the internal economy of our allies. But lower American tariffs might endanger certain American industries, among them the textile industry.

Opponents of the bill have pointed out that we in the United States are erecting further safeguards against lower wages in this country. They argue that this is irreconcilable with offerings of further tariff advantages to countries of distinctly low wages.

Virtually every industry has some claim to hardship in the matter of tariff, and the textile industry is not selected for especial support; but the problem of this industry is a particularly vivid and enduring problem in Georgia where textiles are so important.

The people of the State would be wise to understand the problem, whether or not they support the position of the textile men. It is a matter that directly concerns so many individual Georgians and so many communities in the State and throughout the Southeast.

SPECIAL ORDER GRANTED

Mr. YATES asked and was given permission to address the House for 20 minutes on Monday next, following the legislative business of the day and any special orders heretofore entered.

IS THERE ADEQUATE MEDICAL TRAINING IN THE UNITED STATES?

Mr. SIEMINSKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. SIEMINSKI. Mr. Speaker, when I first came to Congress in 1951, the Korean war was at high tide and one of the first disappointments many of my constituents experienced was their inability, through me, to use the good offices of the House of Representatives to help gain admission for their sons and daughters to out-of-State medical or dental schools. New Jersey had neither. It does now. Therein lies the tale of this talk: "Is there adequate medical training in the United States?" I suggest that my colleagues read the following and judge for themselves:

IS THERE ADEQUATE MEDICAL TRAINING IN THE UNITED STATES?

I. HOW MANY MEDICAL SCHOOLS ARE THERE IN THE UNITED STATES?

1. There are 74 approved medical schools and 6 approved schools of basic medical sciences in the United States, including 1 approved medical school in Puerto Rico.

II. HOW MANY STUDENTS ARE THEY TRAINING?

1. Twenty-seven thousand six hundred and five students were enrolled in the country's medical schools and 438 students in schools of basic sciences in 1953–54, making a total of 28,043 persons now preparing to fill the Nation's need for doctors.

2. Six thousand eight hundred and sixteen students graduated from medical schools in the United States during the year ending June 30, 1954. However, it is estimated that about 4,000 doctors are lost each year through death and retirement, so that the actual net increase of doctors was only 2,816.

III. HOW MANY APPLICATIONS FOR ADMISSION TO MEDICAL SCHOOLS ARE RECEIVED?

1. Fourteen thousand six hundred and seventy-eight individuals applied for admission to American medical schools for the college year of 1953–54.

(a) Forty-three percent of these applicants came from 6 States (New York, Pennsylvania, Ohio, Texas, Illinois, and California).

(b) Applicants from the following 7 States (Delaware, Maine, Nevada, New Hampshire, New Mexico, Wyoming) represented only 1.4 percent of all persons submitting applications for admission to our medical schools.

(a) Among these 7 States there is only 1 approved medical school—in Vermont.

2. In contrast, a total of 20,000 individuals applied for admission to American medical schools during the college year 1951–52. This drop in the number of applications reflects three things:

(a) The increasing cost of medical school tuition is pricing thousands of potential medical school students out of the market. (New York University recently raised its medical school tuition to $1,000 a year.)

(b) The end of eligibility under the GI bill of rights.

(c) A general feeling among college graduates that it is just too tough to get into medical schools.

IV. HOW MANY OF THESE APPLICANTS WERE ACCEPTED?

1. Fifty-three percent of the 14,678 applicants, 7,489, were admitted as freshmen to the medical colleges in the United States in 1953–54.

(a) 41 percent of all first-year students in 1953–54 in the United States came from the 6 States listed above (New York, Pennsylvania, Ohio, Texas, Illinois, and California) in which are situated 36 percent of the approved medical schools.

V. WHAT ARE THE DIFFICULTIES ABOUT GAINING ADMISSION TO OUR MEDICAL SCHOOLS?

1. Large numbers of qualified applicants are unable to gain admittance to any medical college in this country because of geographical restrictions.

(a) Thirty-eight percent of the State and municipally owned medical colleges (15 out of 39) restrict enrollment of 1st-year students to residents of the State in which the school is located.

(b) Twenty-three schools limit the number of out-of-State residents to less than 10 percent of the positions in the entering class.

(c) Only 22 schools admit out-of-State residents in numbers equal to more than 50 percent of the positions in the entering class.

All but one of these schools is privately supported.

2. As a result of these geographical restrictions, some medical schools are forced to take nearly everyone who applies, while others can accept only 1 out of every 10 or 15 applicants.

(a) The State medical schools, because of their restrictions against out-of-State students, have fewer applicants than the private medical schools.

(b) Thirty-six percent of all applications (17,434 of 48,586) were made to the 22 schools admitting out-of-State residents to more than 50 percent of the positions in the entering class.

(c) Of the 7,489 freshmen admitted to our medical schools in 1953–54, 1,889, or 25 percent of the total, were admitted to these 22 schools.

3. The basic barrier to increasing the number of physicians is actually the limited capacity of our medical schools. This means that the proportion of students who enter medical school has remained almost constant for the past 20 years, whereas the proportion who receive a college education has more than quadrupled, and the proportion entering engineering has increased sixfold.

VI. HAS THE NUMBER OF MEDICAL SCHOOL GRADUATES INCREASED TO CORRESPOND WITH THE INCREASE IN POPULATION IN THE UNITED STATES?

No.

1. In 1910, there were 4,440 medical school graduates when the United States population was about 92 million.

2. In 1954, there were 6,816 medical school graduates when the estimated population was 160,927,000.

3. In other words, since 1910 the population has increased 75 percent, yet the annual number of medical school graduates has only increased 54.5 percent.

4. Based on the generally accepted ratio of one active doctor for every 750 people, our net rise in population in 1954 demanded a net increase of 3,333 new doctors, yet our actual net increase of new doctors was only 2,816 in 1954, a deficit of 517 in 1 year alone, excluding any consideration of the existing shortage of some 20,000 doctors.

VII. HOW MANY DOCTORS ARE IN PRACTICE IN THE UNITED STATES?

1. As of December 31, 1953, the total number of physicians in the continental United States was 218,522. This includes: 156,333 engaged in private practice; 6,677 in full-time research and teaching and physicians employed by insurance companies, industries,

and health departments; 29,161 interns, residents in hospitals, and physicians engaged in hospital administration; 17,040 in Government services; 9,311 retired or not in practice.

VIII. HOW MANY MORE DOCTORS DO WE NEED TO BRING THE REGIONS OF THE NATION WITH THE LOWEST RATIOS OF PHYSICIANS TO POPULATION UP TO THE CURRENT AVERAGE FOR THE NATION?

1. The report made in 1952 by the President's Commission on the Health Needs of the Nation stated that in 1960, in order to bring the regions of the Nation with the present lowest ratios of physicians to population up to the current average for the Nation, it would require 22,000 aditional physicians over and above the predicted supply for that year.

(a) This means that between 1952 (when this estimate was made) and 1960 our existing medical schools must train about 2,750 more physicians per year (or roughly 50-percent more medical-school graduates per year than are currently being graduated yearly in order to have these additional 22,000 badly needed physicians in 1960.

IX. HOW MANY MORE DOCTORS WILL WE NEED BY 1960 FOR REASONABLY COMPREHENSIVE MEDICAL CARE FOR THE WHOLE CIVILIAN POPULATION?

1. The report of the President's Commission on the Health Needs of the Nation, made in 1952, stated that by 1960, the United States will need 30,000 additional physicians over and above the predicted supply for that year for reasonably comprehensive medical care to the whole civilian population, for the pressing needs of public-health services, industrial medicine, mental and tuberculosis staffs, faculties of medical schools and schools of public health, and to meet all the requirements of the Armed Forces at present mobilization levels. This estimate, however, would still leave the physician-population ratio for the country as a whole well below that which prevails in some sections of the country today.

X. HOW MANY MORE DOCTORS WOULD WE NEED BY 1960 FOR THE WHOLE NATION TO HAVE THE SAME PHYSICIAN POPULATION RATIO OF NEW ENGLAND AND THE CENTRAL ATLANTIC STATES?

1. The report of the President's Commission on the health needs of the Nation, made in 1952, stated that in 1960, in order to bring all regions of the United States up to the average physician-population ratio of New England and the Central Atlantic States, it would require 45,000 additional physicians over and above the predicted supply for that year.

(a) This means that between 1952 (when this estimate was made) and 1960 our existing medical schools must train about 5,625 more physicians per year (or roughly twice as many more medical school graduates per year) than are currently being graduated yearly in order to have these additional 45,000 badly needed physicians in 1960.

XI. HOW MUCH MONEY DO DOCTORS EARN YEARLY IN THE UNITED STATES?

1. In 1949 (latest figures available), United States doctors (excluding interns and full-time teachers) averaged $11,058 net. General practitioners of all ages averaged $8,835.

2. In 1950, the average physician earned $11,538.

3. In 1951, the average physician earned $12,518.

4. Among full specialists in independent practice in 1949, the fields in which the largest incomes were made are the following:

	Average net income, 1949
Neurological surgery	$28,628
Pathology	22,284
Gynecology	19,283
Orthopedic surgery	18,809
Roentgenology-radiology	18,540
General surgery	17,765
Obstetrics and gynecology	17,102
Neurology and psychiatry	16,476
Urology	16,370
Cardiology	15,589

5. Among salaried full specialists in 1949, the fields in which the largest incomes were made are the following:

	Average net income, 1949
Roentgenology-radiology	$12,326
Pathology	11,745
Multiple specialties	10,742
Ophthalmology-otolaryngology	10,644
Industrial practice	10,271
Anesthesia	10,034
Orthopedic surgery	9,580
General surgery	9,283
Urology	9,218
Physical medicine	8,500

XII. WHICH ARE THE LARGEST MEDICAL SCHOOLS IN THE UNITED STATES?

The first 10 medical schools with the largest enrollments for 1953–54 are:

	State	Enrollment	Graduates
1. University of Tennessee	Tennessee	750	159
2. University of Michigan	Michigan	728	155
3. University of Illinois	Illinois	667	169
4. Jefferson Medical College	Pennsylvania	666	163
5. University of Texas, Galveston	Texas	599	132
6. Indiana University School of Medicine	Indiana	575	139
7. Ohio State University College of Medicine	Ohio	575	136
8. State University of New York, New York City	New York	573	131
9. Northwestern University	Illinois	533	136
10. Harvard Medical School	Massachusetts	531	148

XIII. HOW MANY NEW MEDICAL SCHOOLS HAVE BEEN ESTABLISHED IN THE LAST 20 YEARS IN THE UNITED STATES?

1. Only five medical schools have been established since 1935:

(a) Medical College of Alabama, division of University of Alabama, Birmingham, Ala., established 1943;

(b) Southwestern Medical Foundation, Dallas, Tex., established 1943, which became a branch of the University of Texas on September 1, 1949, and changed its name to the Southwestern Medical School of the University of Texas.

(c) University of Washington School of Medicine, Seattle, Wash., established in 1946;

(d) University of California at Los Angeles, established in 1951, will admit its fourth class in 1954;

(e) University of Miami School of Medicine, established 1952, will admit its third year class in 1954, and plans to have all 4 years in operation by the fall of 1955.

2. There were 1,136 students enrolled in these five medical schools for the year 1953–54. There were only a total of 227 graduates in the year ending June 30, 1954, from the Medical College of Alabama, Southwestern Medical School, and the University of Washington School of Medicine. The University of California at Los Angeles Medical School and the University of Miami School of Medicine have not as yet graduated any medical students.

XIV. ARE ANY NEW MEDICAL SCHOOLS BEING PLANNED?

1. If medical-school development plans, as outlined in the Journal of the American Medical Association of September 11, 1954, are carried through, four 4-year medical schools will be added. These new schools would be:

(a) The Albert Einstein College of Medicine at Yeshiva University anticipates that progress on construction will be sufficiently rapid to permit admission of a first-year class in 1955.

(b) The University of Florida at Gainesville has received a $5 million appropriation from the 1953 legislature to develop the medical-science building that will constitute the first unit of the college of medicine. According to current planning, the school will admit its first class in 1956.

(c) A new medical school—Seton Hall College of Medicine and Dentistry—has just been incorporated in New Jersey. It is hoped that the new college will be ready to accept students for the fall of 1955. This new college will be at the Jersey City Medical Center.

(d) University of Kentucky's board of trustees has sanctioned the establishment of a medical school in Lexington to cost about $25 million. This will not get underway constructionwise until about July 1, 1955.

XV. ARE ANY 2-YEAR SCHOOLS PLANNING TO EXPAND TO 4-YEAR MEDICAL SCHOOLS?

1. The following 2-year schools have plans to expand to 4 years:

(a) The University of Mississippi is completing the construction program of its new hospital and medical-school building at Jackson. It is anticipated that the first regular third-year class will be registered in the fall of 1955.

(b) The legislature of Missouri has appropriated $13,500,000 for the building program now underway at the University of Missouri, and it is hoped that the developmental program will permit the 1953–54 entering class to continue on into its third year of training at the University of Missouri.

(c) At West Virginia University, planning for their new medical center continues, but no definite date has as yet been advanced for registration of the first third-year class.

(d) In North Dakota, the legislature has directed that the school of medicine admit a third-year class by 1955, and that a full 4-year program be in operation by 1956.

It is impossible to predict the number of students who will graduate from these new 4-year schools and the 2-year schools planning to expand to 4-year schools in the next 6 years. For example, the University of Florida at Gainesville will only enroll 50 freshmen. This means a first graduating class of only about 45 doctors. By 1960, when it is estimated we will need at least 22,000 doctors over and above the predicted supply of new doctors graduating each year (about 6,800), most of these schools will have been able to turn out only 1 graduating class toward meeting this deficit.

XVI. HOW MUCH MONEY DO MEDICAL SCHOOLS SPEND EACH YEAR FOR TRAINING NEW DOCTORS?

1. Estimated funds available to our medical schools in 1954–55 totaled $148,645,201.

Budgeted funds and appropriations	$93,408,312
Funds for miscellaneous projects	4,978,812
Research grants from outside agencies	43,383,666
Teaching grants from outside agencies	6,874,411
Total	148,645,201

2. The $93-million estimated basic budgets of the medical schools represent an average budget of about $1,167,604 for each of the 80 schools if the money were evenly distributed.

(a) Thirty-eight schools report 1954–55 budgets of over a million dollars; six of the 4-year schools report budgets of less than $500,000, with one such school having a budget of less than $400,000.

3. Of the $93-million estimated basic budgets of the medical schools, about $18,182,000, or only 19.5 percent, of the budgets is provided by students' tuition.

XVII. WHAT ARE THE MEDICAL SCHOOLS SPENDING FOR CONSTRUCTION?

1. An estimated $110,013,846 is budgeted for capital expenditures at the present time for construction and equipment of basic medical science, hospital and clinic, dormitory and other facilities.

(a) During 1953 projects of this nature totaling $64,115,574 were completed.

2. In 1947–48 medical schools estimated a need of about $330 million for construction of facilities over and above operating-fund needs and research-fund needs. All but 4 schools out of 79 reported a need for additional or improved space.

3. The Journal of the American Medical Association of September 11, 1954, states: "Medical schools indicate that large sums are still needed for construction of new buildings, remodeling and modernization of existing facilities, and the purchase and installment of new permanent equipment."

XVIII. HAVE THE COSTS OF EDUCATING A DOCTOR INCREASED?

1. The average cost of educating one doctor has increased more than 100 percent in the last 20 years, and is estimated today at more than $13,000. Epoch-making advances in scientific knowledge in the past few decades have made the essential curricula for a medical student much more complicated and costly, as well as a steadily rising cost of living due to inflation.

XIX. HAVE THE TUITION FEES INCREASED FOR MEDICAL STUDENTS?

1. Tuition fees for resident students have increased 62 percent since 1940, and tuition fees for nonresident students have increased 76 percent during the same period. However, they pay only about one-fifth of the cost; and the fees cannot be raised without seriously narrowing the groups from which our future doctors can come.

Average tuition fees for resident students:

1940–41	$391
1953–54	633
1954–55	645

Average tuition fees for nonresident students:

1940–41	$445
1953–54	772

XX. WHAT IS THE COST TO A STUDENT FOR A MEDICAL EDUCATION?

1. The average annual expenditure by a student for 1 year of medical school in 1953–54 was $2,380, a total of about $9,520 for the entire undergraduate period. This included tuition, special fees, equipment, books, and essential living costs.

2. Minimum costs reported averaged approximately $1,690 per year, or $6,760 for the entire 4 years.

3. Of the $3,000 to $4,500 a year it costs the medical school to educate him, the medical student pays $600 to $900 a year in tuition, or about one-fifth of the cost.

XXI. IS THERE A SHORTAGE OF QUALIFIED PERSONNEL TO FILL TEACHING POSITIONS IN MEDICAL SCHOOLS? TO FILL INTERNSHIPS? TO FILL RESIDENCIES?

1. Yes. Out of 80 schools, for the year 1954–55, there were 258 vacant full-time positions. Of these 258 vacancies, 107 were in basic medical science faculties and 151 were in clinical departments.

2. In 1954, 22 percent of the 10,542 available internships in 844 hospitals were unfilled. This shortage of more than 2,000 interns is a serious crippler of hospital services throughout the county since interns are the backbone of emergency and routine medical services in many hospitals. This shortage poses a serious threat to good patient care.

3. In 1954, 21 percent of the residency appointments in the various medical specialties were not filled. Of 23,630 approved residencies in internal medicine, surgery, obstretics, pediatrics, etc., 5,011 were not taken. The resident, who takes an average of 2 years training in a specialty after having completed his internship, is a valuable and key part of any hospital staff.

4. The New York Times reports that in their 1952 nationwide survey it was found that "45 percent (of the Nation's medical schools) find it difficult to get a sufficient number of qualified faculty members."

XXII. ARE THERE SHORTAGES OF NURSES, AUXILIARY NURSING WORKERS AND TECHNICIANS?

1. Yes. According to latest available figures taken from the 1952 report of the President's Commission on the Health Needs of the Nation, it is estimated that the shortage of nurses for this country as a whole in 1960 may exceed 50,000.

(a) In 1951, about 27,000 nurses graduated from 3-year programs and less than 2,000 from 4- or 5-year programs which lead to a college degree. The expected supply of nurses in 1960 will not meet the increased demands of new hospitals and expanding community health services, nor will it make up present deficiencies.

(b) In public hearings before the President's Commission on the Health Needs of the Nation, community leaders pleaded for more nurses to staff their essential health services. Hospital administrators testified to large numbers of wards closed because they cannot obtain nurses to staff the beds. Mental and tuberculosis hospitals need more nurses, public health units are begging for them, industrial health programs suffer for want of them. Nursing schools and nursing education suffer from a lack of qualified teachers.

2. There are almost 300,000 auxiliary nursing workers in hospitals, and perhaps another 100,000 elsewhere. The need in 1960 for these workers is estimated at more than 450,000.

(a) Most auxiliary workers receive poor training. This training should be developed and intensified so that these workers can take over routine housekeeping and bedside tasks to release the graduate nurses to use the special skills in which they have been trained.

3. The technician shortage is a serious bottleneck in the provision of medical service. Hospitals in the United States recently reported about 18,000 vacant positions for workers in 7 major fields allied to medicine (i. e., laboratory technicians, therapists of all kinds, X-ray technicians, hospital administrators, clinical psychologists, etc.), and an expected need for 35,000 additional workers in these allied fields in another 5 years. The opening of new hospitals and the increasing demand for more comprehensive medical services will aggravate these deficiencies.

4. President Eisenhower in his state of the Union message to Congress on January 7, 1955, stated as one of his medical recommendations: "To reduce the gaps in medical service, I shall propose: New measures to facilitate construction of needed health facilities and help reduce shortages of trained health personnel."

XXIII. DO OUR MEDICAL SCHOOLS NEED FINANCIAL SUPPORT?

1. In a nationwide survey conducted by the New York Times in 1952 it was found that "30 percent of the Nation's medical schools report that they are unable to get sufficient funds to meet their operating budgets."

2. Brig. Gen. James S. Simmons, the late dean of the Harvard School of Public Health, states that the Nation's 10 schools of public health are in a precarious financial position with student tuition fees paying less than 10 percent of the cost of training these students. "The financial plight of these 10 public-health schools is such that their total output of specialists is now only one-fifth of the number needed to operate the Nation's peacetime health program."

3. The medical colleges absorb approximately 30 percent of the total budgets of the universities of which they are a part, although they enroll only 10 percent of the total university population. "Many university trustees are wondering whether they can afford their medical schools," said a recent statement of the National Fund for Medical Education.

4. In 1948, as the result of surveys compiled through the American Medical Association, the Surgeon General's Office and the Association of American Medical Colleges, the National Fund for Medical Education states that the Nation's medical schools had a deficit of $10 million and that by 1955 the deficit will probably be $20 million.

(a) The Surgeon General's committee goes even further and states that $30 million additional was needed (in 1948) in annual income to adequately perform the existing functions of our 79 medical schools, over and above the $10 million yearly needed to compensate for existing annual deficits actually on the books in red ink.

(b) None of the foregoing takes construction needs into consideration. In 1947–48 medical schools estimated a need of about $330 million for construction of facilities, over and above operating-fund needs and research-fund needs. All but 4 schools out of 79 reported a need for additional or improved space.

5. Medical-school budgets have already been trimmed to a point where any further reduction would endanger the quality of the product; that is, of medical teaching and research, and eventually of medical practice and medical care. Faculty time per student today is already 7 percent lower than it was 10 years ago; some schools have had to reduce teaching staffs to bare minimums. Current deficits now make it difficult to retain capable faculty members and make needed additions to the faculties impossible to consider.

XXIV. WHAT IS THE MEDICAL PROFESSION DOING TO HELP ITSELF FINANCIALLY IN THE MATTER OF EDUCATION AND TRAINING?

1. The National Fund for Medical Education was founded in 1949 as a central fund-raising agency for the Nation's medical schools. From its inception until July 1954, the fund distributed $6,941,056 to the medical schools. Of this amount, roughly, 45 percent, or a little over $3 million, was raised by the American Medical Education Foundation (an arm of the American Medical Association).

(a) The $6,941,056 expenditure by the National Fund for Medical Education represents a per annum average allotment of a little more than $1 million since the establishment of the fund. This contrasts with the goal of the national fund, which is to provide the medical schools of the Nation with funds approximating $10 million annually to aid in meeting the operational cost of their educational programs and to the annual deficits of our medical schools which is estimated to be between $10 million and $30 million.

2. This $10 million yearly goal of the national fund includes no funds for construction, research, or scholarships. In January 1954 a sum of $154,296,214 was requested for the construction of research facilities alone by medical schools, hospitals, and institutions throughout the United States from the National Institutes of Health,

United States Public Health Service, Bethesda, Md.

XXV. HOW DOES EXPENDITURE FOR MEDICAL EDUCATION COMPARE WITH MONEY SPENT ELSEWHERE BY THE AMERICAN PEOPLE?

1. In contrast to the $93,408,312 to be spent for medical education in the academic year 1954–55, the American public spent approximately in 1953: $5,310,000,000 for tobacco products and smoking supplies; $377 million for parimutuel net receipts; $105,960,000 for makeup bases, face powder, and lipsticks; $96 million for face creams.

Mr. Speaker, we in New Jersey are no strangers to the problem of adequate medical training as my opening remarks and certain research data cited below indicate.

In 1951, during my first term in Congress, I sent letters to every medical school in the United States and Canada on behalf of my constituents and their aspiring young men and women. Letters of regret from the deans of those schools said, in effect, "sorry, we're filled," or, "as our medical school is State controlled we are obliged to accommodate our own cititzens first; sorry."

Data concerning medical or dental schools in New Jersey shows no dental schools in being up to 1954. The first dental school is reported to have been established in December 1954 in Jersey City by Seton Hall University.

According to the New Jersey History Committee's Outline History of New Jersey, a rival medical society to the New Jersey Medical Society established in 1790 a school at Elizabethtown which was closed in 1807. In addition to this, Queens College, later Rutgers, permitted a school to be opened in New Brunswick, under its charter. This school was attended mostly by New York students and in 1811, when the New York Legislature refused to license its graduates, it closed.

The American Medical Association Directory, 1950, lists the following medical schools as having operated in New Jersey until 1891 when all of their charters were revoked—why, is not disclosed: Hygieo-Therapeutic College, Bergen Heights; Medical and Surgical College of the State of New Jersey, organized 1888; Livingstone University, Haddonfield; Central University of Medicine and Science, Jersey City.

Then came the 20th century with its three wars. Each stepped up the need for medical and dental doctors and operatives—World War I, World War II, and Korea. In December 1954 Seton Hall University, of New Jersey, established a medical and dental school, open to all, in Jersey City.

In America, we are reared with the spirit of standing on our own feet, to hold our own. As one of the first of the Original Three States to join the Union in 1787, it is fitting and proper that with its new medical and dental school, the State of New Jersey, at long last, can take its place in the ranks of those who can more adequately look after their own, and others, too, if need be.

The below cited article of January 15, 1955, from local New Jersey sources, tells more on this score, and adds, I think, information for the benefit of the House on the question, "Is there adequate medical training in the United States?"

DEAN OF MEDICINE NAMED FOR SETON MEDICAL SCHOOL

SOUTH ORANGE.—A long-awaited announcement was forthcoming this week when the identity of the dean of medicine in the Seton Hall College of Medicine and Dentistry was announced by Seton Hall University's president, Msgr. John L. McNulty.

Heading up the medical side of New Jersey's first college of medicine and dentistry will be Dr. Charles L. Brown, presently dean of the Hahnemann Medical College, Philadelphia.

The dean of the dental school, according to previous announcement, has also been selected and he is expected to be named in the near future.

Dr. Brown's resignation at Hahnemann will be effective July 1. Prior to that time, he will act as consultant for the Seton Hall College of Medicine.

Monsignor McNulty identified Dr. Brown as "a man with an unbroken span of over 20 years' experience in medical education with some of the best medical schools in the country. He has," Monsignor McNulty continued, "demonstrated an organizing and administrative ability that could be equaled by few and that has gained for him national recognition as an authority in medical education."

The Seton Hall president said that Dr. Brown will begin right away the determination of admission policy and procedures; the formulation of curricula; the screening of candidates for faculty appointment; and the overall pattern of organization for the Seton Hall College of Medicine.

The new dean will also represent the Seton Hall College of Medicine in consultations on the transformation of the 16-story clinical building in Jersey City Medical Center into a medical education unit with classrooms, laboratories, conference rooms, and library facilities. He plans to take up residence in Jersey City after July 1.

Dr. Brown received his bachelor of science degree from the University of Oklahoma in 1919 and his doctorate in medicine from the same school in 1921. In 1923 he joined the faculty of the Harvard University Medical School as an instructor in pathology. He participated in a teaching fellowship and served as an instructor in internal medicine at Harvard until 1928 when he joined the faculty of the University of Michigan Medical School as an associate professor of medicine.

In 1935, he left Michigan to become head of the department of medicine at the Temple University Medical School in Philadelphia.

His association with Hahnemann Medical College began in 1946 when he was appointed dean. In 1948 he assumed additional duties as head of the division and the department of medicine at Hahnemann.

Correlative with his experience as a medical educator, Dr. Brown has held many hospital positions. He has been resident pathologist at the Children's Hospital, Boston; chief of the department of medicine, Philadelphia General Hospital, and head of the department of medicine, Hahnemann Hospital.

Dr. Brown is a fellow of the American College of Physicians, and a diplomate of the American Board of Internal Medicine. He is a former president of the Philadelphia County Medical Society and received the Strittmatter award from that organization in 1951. In the same year he received an honorary doctor of law degree from Temple University.

As dean of the Seton Hall College of Medicine, Dr. Brown will retain the position of chief consultant in internal medicine to the Chief Medical Director of the Veterans' Administration in Washington.

He has contributed many scientific papers to the journals of the profession and is a member of the editorial board of the J. B. Lippincott Publishing Co. He is currently engaged in writing a textbook on medical treatment in general practice.

The Seton Hall College of Medicine and Dentistry, New Jersey's first, was incorporated on August 6 last year. On August 11 ceremonies marking the formal establishment were held in the Medical Center and attended by public officials and prominent educators and professional men. The new medical-dental college received its charter from the State board of education on November 17, and a formal lease for the use of the clinical building was signed by the college on December 11, 1954.

INVITATION TO HOLD 1960 OLYMPIC GAMES AT DETROIT, MICH.

Mr. CEDERBERG. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution (S. J. Res. 14) extending an invitation to the International Olympic Committee to hold the 1960 Olympic games at Detroit, Mich.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the resolution, as follows:

Resolved, etc., That whereas the United States Olympic Association will invite the International Olympic Committee to hold the Olympic games in the United States at Detroit, Mich., in 1960, the Government of the United States joins in the invitation of the United States Olympic Association to the International Olympic Committee to hold the 1960 Olympic games in the United States at Detroit, Mich.; and expresses the sincere hope that the United States will be selected as the site for this great enterprise in international good will.

SEC. 2. The Secretary of State is directed to transmit a copy of this joint resolution to the International Olympic Committee.

Mrs. GRIFFITHS. Mr. Speaker, at this time I should like to bring to the attention of the House certain observations and the feelings of the city of Detroit in connection with Senate Joint Resolution 14.

This resolution, unanimously adopted by the Senate on Tuesday, calls upon the United States Government to join with the United States Olympic Association in extending an invitation to the International Olympic Committee to hold the 1960 Olympic games in Detroit, Mich.

Detroit was selected by the United States Olympic Association as the only city in this country which would have official endorsement for the games of 1960.

The selection of Detroit as the official American site was made by a special committee which spent many months weighing the bids of many cities.

Detroit business and community leaders have labored a dozen years to bring the International Olympics to America's fifth largest city, a city which became known as the arsenal of democracy in World War II and which is now in the forefront of production for America's defense needs.

Of the score of persons who have been intimately associated with this venture on behalf of Detroit the names of Frederick Matthaei and Douglas Roby stand out. These able business and community leaders have devoted years of their

time at great personal expense to win this honor for Detroit. Mr. Roby will be remembered for his distinguished record as president of the Amateur Athletic Union of America.

Another to whom Detroit and the Nation owe a deep debt of gratitude for presenting a united front and thereby enhancing our chances of winning the 1960 games is Avery Brundage, present chairman of the United States Olympic Association.

Mr. Brundage can rightly be called Mr. Athlete for the years of untiring efforts he has expended on behalf of sports in this country. He has performed yeoman service and should be applauded for the good will for this country he has spread in his many travels throughout the world.

Detroit is proud of the work of its community leaders and is proud that it was selected as the official American site by our Olympic Association.

But this honor and the opportunity to make a substantial contribution to international good will would not be for Detroit alone. The entire Nation would share in this enterprise. The athletic eyes of the world would be focused on our great country for the entire year of 1960 should the Olympic games be awarded to us.

Detroit business leaders are confident that Detroit and nearby communities in Michigan could master the enormous problems involved in such an undertaking.

It has been estimated that staging of the games would cost $12 million. This would be spent for housing and other special facilities needed for the thousands of athletes and guests who would participate in the Olympics.

Detroit is fortunate in having at hand adequate stadia and athletic plants required for the Olympics. In nearby Ann Arbor, home of the University of Michigan, there is a stadium which seats nearly 100,000 people. Detroit and Ann Arbor are linked by modern divided expressway highways.

In addition within the city of Detroit there are the great athletic facilities of the University of Detroit, which only recently completed a new $5 million field house and Olympia stadium, an indoor arena of suitable size.

Detroit is blessed with great natural advantages, being situated on the Detroit River, the busiest waterway in the world, and closely adjacent to Lakes Erie, St. Clair, and Huron, three of the Great Lakes.

Then, too, Detroit has excellent transportation advantages, being linked with the rest of America and the world by the great airlines, railroads, and highways.

Detroit has two modern airports and plans are in the making for a third major airport, servicing national and international flights. Detroit is served by five of America's great railroads—New York Central, Baltimore & Ohio, Pennsylvania, Wabash, and Chesapeake & Ohio—and has a direct link by rail with Canada, our good neighbor to the north and one of the world's great countries. Windsor, Ontario, Canada, is only a 5-minute car ride by way of bridge and tunnel across the Detroit River.

Detroit, too, is linked with the world by sealanes. Detroit is fast becoming one of the world's busiest ports and the development of the St. Lawrence Seaway will add to the city's growth.

In every respect Detroit more than meets the needs of this country in staging a successful Olympiad.

There is even a greater resource not yet mentioned. That is the planning knowhow of our great industrial and community leaders. These are the men and women who mobilized industry to meet this country's needs in World War II and since. These are leaders of vision and ability, people from whom great things can be expected at any time.

Detroit can quite properly boast of an enthusiastic citizenry to back up its leaders. As has been proved dramatically in the past, Detroit can get big jobs done.

But because the benefits of playing host to the 1960 Olympic games go beyond the borders of any city or State, I would suggest to my colleagues in the Congress that staging these games should be a national responsibility.

In the past the host city has been solely responsible for holding the international games in this country. The most recent example was Los Angeles, which successfully handled the games in 1932, the last time the games were held in this country.

In view of the international aspect of the Olympic games and the fact that benefits would accrue to the entire country, I most seriously suggest that the Congress consider sharing the financial costs involved with the city of Detroit, should the games be awarded to this country. No other country places the entire financial burden on the host city.

This is a matter to which we can give more serious attention at a later date, but basic planning must be begun as soon as the International Olympic Committee makes a favorable decision on the invitation of this Nation.

At any rate this resolution deserves the unqualified support of each Member of the House. There is no partisan flavor to this resolution. It is a challenge to the pride of America and the Congress should go on record in support of this country's Olympic Association in endorsing the city of Detroit as host for the 1960 Olympic games.

The resolution was agreed to, and a motion to reconsider was laid on the table.

THE LATE HONORABLE RUSH DEW HOLT

The SPEAKER. The Chair recognizes the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Speaker, the untimely passing of Rush D. Holt, a former United States Senator from Weston, W. Va., at the Federal Research Clinic, at Bethesda, on Tuesday, reminds us again of the uncertainty of life and the certainty of death.

Rush Dew Holt was born June 19, 1905, at Weston, W. Va. He was elected to the United States Senate in the year 1934 at the age of 29 years, and served 1 term. He has been a member of the West Virginia House of Delegates for many years, both prior and subsequent to his service in the United States Senate, having first been elected at the age of 25 years.

The former schoolteacher was still 6 months short of the required 30 years in November 1934 and did not take his Senate seat until June 19, 1935.

Age had always been a thorn in the side of the "boy wonder." He graduated from high school in his native Weston at 14. He was turned down at the University of Cincinnati as too young. Instead, he went to small Salem College, West Virginia. He later received degrees from LaSalle University and West Virginia University. Before entering politics seriously, Mr. Holt served as a teacher or instructor at Bedford (Va.) High School, Salem College, and Glenville (W. Va.) State Teachers College. He married the former Helen Froelich, of Gridley, Ind., a teacher at the old National Park College, Forest Glen, Md., in June 1941. They had two children, a daughter Helen, and a son, Rush, Jr.

Rush Dew Holt was the son of Dr. Matthew Holt, a Weston physician and editor. His mother was the former Mrs. Lele Dew. Mr. Holt was an able, conscientious young man and citizen. He had deep convictions with respect to what he believed to be right and wrong. He stuck with those convictions and did not hesitate to express his views.

The passing of Mr. Holt was not unexpected. He had been in failing health for many months and unable to qualify as a member of the House of Delegates of the West Virginia Legislature now in session.

To his grieved wife and family, I extend my sincere and heartfelt sympathy. May our God who looks over the destinies of us all give them strength and courage to bear their sorrow.

A CAFETERIA AND A DINING ROOM FOR HOUSE LEGISLATIVE EMPLOYEES AND FOR THE REPRESENTATIVES IN CONGRESS

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, while I know of no one who is opposed to the project which would provide an adequate and comfortable eating place for legislative employees of the House, who number more than 1,500, and Members of Congress, who number 435, previous attempts to provide those adequate facilities bogged down.

Permit me to suggest that legislative employees and Members of the House write the Speaker and the minority leader, telling why she or he favors this move.

The only reason for this suggestion is that I personally know of no one op-

posed to it, but we know that the assistance of the Speaker and the minority leader will give us what we all want before the House adjourns late this summer or early next fall.

The recent message from the President of the United States among other things stated in reference to health insurance the following:

To the Congress of the United States:

Because the strength of our Nation is in its people, their good health is a proper national concern; healthy Americans live more rewarding, more productive and happier lives. Fortunately, the Nation continues its advance in bettering the health of all its people.

CALENDAR WEDNESDAY BUSINESS DISPENSED WITH

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday of next week be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ADJOURNMENT UNTIL MONDAY NEXT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. ALLEN of Illinois. Mr. Speaker, reserving the right to object, I do this solely for the purpose of inquiring what the program for next week will be. I think the Members would like to know.

Mr. McCORMACK. I am very happy that my friend from Illinois made the inquiry.

There is no business on Monday or Tuesday.

Wednesday we will consider H. R. 3828, the pay-raise bill for judges, some of the officials of the Department of Justice, and the Members of Congress.

Thursday and Friday, if a rule is reported out, which I expect, H. R. 1, the extension of the Reciprocal Trade Agreements Act, will come up.

Mr. ALLEN of Illinois. Will the soldier-ballot bill come up?

Mr. McCORMACK. No. That matter is before the Committee on Rules, and I understand, as the result of hearings, further consideration of one of the titles of the bill is going to be given by the Committee on House Administration. It may be that we can bring it up if the matter is adjusted, but I cannot announce it in the program at this particular time.

Mr. ALLEN of Illinois. I thank the gentleman.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, on January 31, I introduced a bill, H. R. 3322, that is of deep interest to every Member of this body. This bill would amend the Federal Property and Administrative Services Act of 1949 and make clear beyond any doubt what the Congress meant when it said in 1949 and 1950 that surplus property, both real and personal, no longer needed by the Federal Government and which is needed and useful for educational and health purposes may be donated for such purposes.

Since introducing this bill I have received many calls from Members of this body, indicating very clearly that they have just as deep an interest in this matter as I.

Because of the expressed approval and deep interest that has been shown, I have found it desirable to schedule hearings before the Subcommittee on Donable Property of the Committee on Government Operations beginning next Tuesday, February 15, in room 1301, New House Office Building at 10 a. m. I hope that all members will make note of this time and place and be present either on this day or the next following days.

I am pleased to announce that Senator McCLELLAN and 21 cosponsors have introduced an identical bill in the Senate—Senate bill 1004—and Senator McCLELLAN made an excellent statement in the RECORD of February 7 concerning this matter.

Mr. Speaker, I regret that it is again necessary to hold hearings, issue reports and enact legislation on this subject. I thought that the Congress after a thorough investigation of the matter in 1949 had clearly expressed itself in Public Law 152, and reiterated its directions in Public Law 754 on September 5, 1950.

The fact is, however, that the Department of Defense has in recent months established its own regulations and requirements in such a manner, that the intent of the laws passed by Congress have been brushed aside, and as a consequence, the donation program is in very great danger.

In a similar and related situation, the gentleman from Missouri [Mr. CURTIS] has epitomized the matter in words that compel my admiration and exactly reflect my views.

In a letter to the Secretary of Defense, dated January 19, this year, Congressman CURTIS stated:

In my opinion this is directly contrary to the laws by the Congress in words and certainly in intent. It is directly contrary to the statement of policy as expressed by the President from time to time. In my judgment this is one more instance where the Congress in proper fulfillment of its constitutional authority has written laws and the Military Establishment has sought to subvert these laws.

The important fact is that the Comptroller of the Department of Defense has issued a recent regulation based on a permissive law dealing with a related subject. As a result, large inventories of military property have been capitalized into stock funds which, by Department of Defense interpretation, means that such property, though useful and needed for education and health purposes, is no longer eligible for donation.

Instead, property of great public usefulness, is being sold in quantities all over the country at a very small return to the Government.

We all know of the dire needs in the fields of education and public health. I submit that by donating Federal property of no further Federal usefulness to these suffering institutions, we are making the most beneficial disposition of Government property.

As Members of the Congress, we are called upon to make contributions of our surplus food and property to foreign countries. We find it to be in our enlightened self-interest to do so. What about enlightened self-interest at home? What about our own institutions that need assistance?

May I paraphrase a well-known axiom, "giving begins at home."

May I also point out that the total donations for educational and health use from the surplus disposal program, is a small fraction of the total now being sold on the American market.

Since the donation program started, hundreds of schools and hospitals have received help. Many have found that even small amounts of surplus Federal property to be a godsend in carrying them over the long emergency period which may yet last a generation. Over and over again they have testified that without this property, it would have been difficult if not impossible to have coped with the swollen school enrollments and hospital loads.

If the Federal Government sells something that cost a dollar and only gets a few pennies return, and if this same property is really useful and needed by our schools and hospitals, I say give it to them for nothing.

It is only common sense to do so, and thereby lighten the load for which we as Members of Congress have at least some responsibility. This was our intent when the Congress passed Public Laws 152 in 1949 and Public Law 754 in 1950. Now we find that the Department of Defense, from which 85 percent of the surpluses come, is making ineffective the wishes of Congress, is bypassing these laws, because it chooses to do so.

It is claimed by the Department of Defense that the donation program is obtaining increasing amounts of property. This is misleading. The truth is that the disposal program in the military agencies has been enormously accelerated but the dollar value going to educational and health purposes while increasing slightly in some States, does not tell the story of the percentagewise reduction. Much surplus property of great value for school and hospital use is not being offered for such purposes but is being sold to the highest bidder.

It is most important that immediate action be taken on this bill, which will reaffirm what Congress wants done with this surplus property, because more large sales are scheduled for the near future.

Under the Constitution, Congress has the sole right and obligation to control the sale of all Government-owned property. The passage of this act will indicate in no uncertain terms what the Congress wants done.

The taxes that American citizens paid to the Federal Government bought this property, the public owns it, not Federal agencies, and all this bill will do is to see that the public utilizes for good purposes what it already owns.

WHEAT MARKETING QUOTA PROVISIONS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 145) to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma [Mr. ALBERT]?

Mr. ALLEN of Illinois. Reserving the right to object, Mr. Speaker, I should like to yield to the ranking member of the Committee on Agriculture [Mr. HOPE], for a statement on the bill.

Mr. HOPE. Mr. Speaker, this bill passed the Senate unanimously, and was reported unanimously by the House Committee on Agriculture. It is a departmental bill, submitted by the Department of Agriculture, and deals with a very critical situation with respect to the production of durum wheat. It must be passed this week if we are going to get full advantage of it, because it must be explained to producers, and they must become familiar with it prior to seeding time which begins soon after the first of March.

The purpose of the legislation is to encourage the production of durum or macaroni wheat which is in very short supply due to the ravages of a new type of stem rust known as race 15B.

Under this legislation farmers will be permitted to seed, harvest, and sell durum wheat over and above their regular wheat allotments. The bill applies only to the 1955 crop and is limited to the States of North and South Dakota, Minnesota, and Montana.

I know of no opposition to the measure and urge its prompt passage at this time.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That subsection (e) of section 334 of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1334 (e)), is amended, beginning with the 1955 crop of wheat, to read as follows:

"(e) Notwithstanding any other provision of this act, the Secretary shall increase the farm marketing quotas and acreage allotments for the 1955 crop of wheat for farms located in counties in the States of Minnesota, Montana, North Dakota, and South Dakota designated by the Secretary as counties which (1) are capable of producing class II durum wheat and (2) have produced such wheat for commercial food products during 1 or more of the 10 years 1945 through 1954: *Provided,* That the increase in the wheat acreage allotment for any farm shall not exceed the difference between the acreage of cropland on the farm suitable for the production of wheat and the wheat acreage allotment, if any, determined without regard to this subsection, and the increase in allotment shall be conditioned upon the production thereon of class II durum wheat. The increase in wheat acreage allotments authorized by this subsection shall be in addition to the national, State, and county wheat acreage allotments, and the acreage of class II durum wheat thereon shall not be considered in establishing future State, county, and farm acreage allotments."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD immediately preceding the vote on the bill S. 145.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

USE OF OFFSHORE OIL REVENUES FOR SCHOOL CONSTRUCTION

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. FOGARTY. Mr. Speaker, during the recent hearings before the Senate Committee on Labor and Public Welfare, considering legislation to provide Federal assistance for a program of school construction, I was deeply impressed by a circumstance most unusual in my experience in Congress. Not one person appeared to speak in opposition to a program of school construction financed in part by the Federal Government. To the best of my knowledge no person or organization sought an opportunity to express opposition. It can, therefore, be taken for granted that there is uniform acknowledgment of the fact that there is a drastic situation which must be faced up to by all Americans. A solution to our overcrowded and understaffed schoolrooms must be found immediately if we are going to continue to afford ourselves the luxury of being proud that we are Americans.

During the hearings on the Senate side, and in discussions I have had with Senators and Members of the House, it seems to me the only area of concern now is the amount of money to be taken from the Federal Treasury and the method to be applied in apportioning this sum among the several States in order to accomplish the maximum good.

I am not too much worried about a formula, though I am concerned. I do not want the wornout concepts of "wealthy States" and "poorer States" employed. I want to see the Federal Government apply its resources in the areas where there is the greatest need and at the same time I want the law to spell out clearly that the State which is the recipient of these Federal funds must be able to demonstrate that it is exhausting its best efforts to meet the school problem. I have no doubt the Congress can and will work out a formula which will be satisfactory—and will accomplish the real purpose of this legislation.

I am introducing a bill which is directed squarely at the problem of obtaining the funds to be divided among the States. I think all of us acknowledge that States with substantial revenue resources must not complain about helping a sister State with substantially less resources. I think we all acknowledge, also, that the development of the Federal establishment has preempted a substantial area of revenue raising—thus, in a sense, depriving individual States of funds which could be put to good use, within their own borders.

Having this in mind, I propose that resources which are the property of all the United States be earmarked for the support of this school-construction program which is properly the problem of all the United States.

Here is a problem which, as I say, is acknowledged by everyone and apparently is opposed by no one. Here are resources which in my opinion belong to everyone in the country. These resources should not be permitted to fatten the coffers of a few States, who will be looking for their share of a Federal-aid-to-education program. Permitting the income from this valuable area to go solely to the bordering States puts all other States at a distinct disadvantage and subjects them to an improper penalty every time taxes are collected to support a Federal program intended to benefit all the States.

This proposal, I know, has the enthusiastic support of several Senators and Members of the House. It seems to me it affords a painless method for solving a very painful problem.

Joint resolution to subject the submerged lands under the marginal seas to the provisions of the Submerged Lands Act, and to amend such act in order to provide that revenues under its provisions shall be used as grants-in-aid of primary, secondary, and higher education

Whereas as a result of the per curiam opinion of the Supreme Court of the United States of March 15, 1954, it is clear that the United States acquired in a proprietary as well as sovereign capacity the submerged lands beyond the ordinary low-water mark extending seaward from the coasts of the United States and outside of the inland waters (hereinafter referred to as "the submerged lands under the marginal seas"); and

Whereas section 5 of the Submerged Lands Act provides that there is excepted from the operation of section 3 thereof "all lands acquired by the United States by eminent domain proceedings, purchase, cession, gift, or otherwise in a proprietary capacity," and in consequence of this exception, the provisions of section 3 of that act are inapplicable to the submerged lands under the marginal seas: Now, therefore, be it

Resolved, etc., That this joint resolution may be cited as the "Submerged Lands Under the Marginal Seas Act."

SEC. 2. The provisions of the Outer Continental Shelf Lands Act are hereby made applicable to the submerged lands under the marginal seas as if such lands were a part of the outer Continental Shelf, as defined in such act, any provision in the Submerged Lands Acts to the contrary notwithstanding, and any provisions in the Submerged Lands Act to the contrary are hereby repealed.

SEC. 3. The Outer Continental Shelf Lands Act is amended by deleting section 9 and inserting in lieu thereof the following:

"SEC. 9. Disposition of revenues: (a) All rentals, royalties, and other sums paid to the Secretary or the Secretary of the Navy under any lease on the outer Continental Shelf for the period from June 5, 1950, to date, and thereafter, shall be deposited in the Treasury of the United States and held in a special account and, except for the payment of refunds under the provisions of section 10 of this act, such moneys shall be appropriated exclusively for the purpose of promoting the national defense and national security through grants-in-aid of primary, secondary, and higher education.

"(b) An Advisory Council on Education for National Security is hereby created to be composed of 12 persons to be appointed by the President of the United States with regard to their experience in the relationship of education to national defense and national security, of whom 6 shall be from the fields of education, and research in the natural and social sciences. It shall be the function of such Council to recommend to the President of the United States for submission to the Congress not later than January 1, 1956, a plan for the allocation of the grants-in-aid of primary, secondary, and higher education provided in paragraph (a) of this section in such manner as will contribute most effectively to meeting the immediate and long-range requirements of education as it relates to national defense and national security."

FEDERAL ASSISTANCE IN CONSTRUCTION OF CLASSROOM FACILITIES

The SPEAKER. Under previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 20 minutes.

Mr. BAILEY. Mr. Speaker, now that President Eisenhower has made known his position on legislation to meet the nationwide demand for Federal assistance in meeting the shortage of classroom facilities in our primary and secondary schools, I am sure my colleagues would be pleased to know some of the reactions to his proposal from school officials, parent-teacher groups, and the Nation's press.

The Washington Post and Times Herald refers to his proposal editorially as "half a loaf" and makes the point that it is as futile as applying a poultice to cancer. The editorial goes on to say as follows:

This recognition is a significant step forward and renders a most valuable service to the Nation. But the remedy proposed by the President seems to us hesitant, temporizing, and inadequate.

Mr. Eisenhower's hesitation grows out of a fundamental misapprehension. He fears that Federal aid to State public-school systems may introduce an element of national interference in local activities which ought to be kept resolutely independent. But the fear is an unreal one. The proposals for Federal aid put forward by the appropriate committees of the House and the Senate obviate any danger of Federal control. They offer financial assistance from the Nation because the problem is a national one and because the States lack the resources to meet it; but they carefully preserve local responsibility and local independence.

Instead of a program of direct and simple financial aid to the States, Mr. Eisenhower has proposed a complicated system under which the States and the Federal Government cooperatively would purchase school bonds issued by local communities. He acknowledges, however, that restrictive debt limits forbid many school districts to borrow in this fashion and that in many others the amount of taxable property and local income is so low as to make it impossible for the district either to repay borrowed money or rent a satisfactory school building. To the impoverished districts he would make Federal grants in conjunction with the States—thus breaching, so far as they are concerned, the wall he had previously erected against Federal intervention. If direct Federal aid will not imperil the independence of communities unable to borrow, it will not imperil the independence of more solvent communities.

We think the President has balked at a bugbear. The condition of the schools as he has pictured it constitutes a national crisis. Congress now has before it carefully considered bills which will meet this crisis more quickly, more generously, and more effectively than the President's plan. We hope it will enact one of them soon.

The Washington Post and Times Herald in today's edition comments editorially on the President's remarks at his news conference yesterday. The editorial under the caption "False Economy on Schools" is as follows:

Judging from his news conference comments yesterday morning, President Eisenhower feels strongly that the main burden of revitalizing the Nation's public schools ought to be borne by State governments and local public school districts. He would confine the Federal contribution, except in the case of genuinely indigent communities, to a kind of pump priming. Indeed, of the $7 billion of expenditure for school construction recommended in his program, only $1,120,000,000 would come from the Federal Treasury.

A part of the President's preference for this limited Federal participation stems apparently from a desire for economy. Most of the Federal outlay—$900 million earmarked for loans to State agencies—would be repaid in time, and with interest. But this is an economy only in a bookkeeping sense, and only from the Federal point of view. Whether schools are built out of Federal funds, State funds, or local funds, American taxpayers are going to have to foot the bill. Because the Federal Government takes, in a sense, the first bite, and the largest bite, out of the taxpayer's income, and because State and local sources of tax revenue are narrowly limited, we think that the emergency burden in school construction ought to be shouldered by the Federal Treasury.

In his message to Congress Mr. Eisenhower noted with approval that "capital outlays for public-school construction will reach an all-time high of $2 billion this year." This entire load is being carried by the States and localities. It comes very close to the emergency expenditure which the President has recommended—$7 billion over the next 3 years. Thus the President is proposing to double the State and local load. The trouble is that the States and localities are already staggering under the load they carry now.

The President's program looks oblique, cumbersome, and inefficient as compared with a program of direct Federal grants-in-aid to the States on a matching basis. The latter program, as approved unanimously by the House Committee on Education and Labor, would apply national resources candidly and generously to the solution of a national problem. That seems both sound economy and sound public policy.

The press today gives the reaction of the school officials in the areas of Virginia and Maryland, adjacent to the Nation's capital:

Nearby Maryland and Virginia school heads expressed keen interest yesterday in President Eisenhower's proposal for direct Federal-State emergency school construction aid—but to a man were unable to see how their respective systems could avail themselves of its principal benefits.

Their reactions were:

MONTGOMERY COUNTY

School Superintendent Forbes H. Norris termed President Eisenhower's education message to Congress Tuesday not too hopeful for schools in his jurisdiction.

He said present school borrowing is far below the county's 10-percent debt limit and that no lack of local income could be demonstrated to qualify for outright grants.

He added that interest on county school bonds is not excessive and therefore the school system would not need to sell bonds directly to the Federal Government.

Norris estimated that 130 elementary-school rooms and 70 high-school classrooms will be needed next year. He said that the school board will request funds to meet the deficit in its 1955-1956 budget.

PRINCE GEORGES COUNTY

Assistant Superintendent Thomas S. Gwynn said the President's program would be studied to determine if the county could benefit from any of its provisions.

Gwynn pointed out that although Prince Georges County has been forced to borrow some $26,700,000 for new school construction in the past 10 years, the interest rate has remained at a comparatively low figure. He said the last school construction bonds were sold at an interest rate of about 2.7 percent.

The county has at present authority from the State legislature to issue up to $5 million in bonds for new school construction. Gwynn said that the school board plans to ask the county commissioners to issue those bonds in June or July.

He pointed out that Prince Georges has received Federal funds under Public Law 815, enacted to assist local communities whose school populations had been affected by Federal activity.

About $4,600,000 has either been received or appropriated to Prince Georges County under this law.

FAIRFAX COUNTY

School officials said this area would not be affected by the President's proposed $7 billion program.

They said the county has spent about $29 million dollars since 1950 on school construction and will need another $3 to $4 million a year to carry them through 1960.

George Pope, administrative assistant to the superintendent, said that by February 1956 when the current construction program will be completed the county will have a sufficient number of classrooms.

ALEXANDRIA

Superintendent T. C. Williams said about 30 classrooms costing about $400,000 are needed immediately in the city. He said the money can be obtained through a bond issue since the city has not reached its debt limit.

During the past 5 years the city has spent about $5 million on school construction. Williams said he did not think Alexandria

would be eligible for any of the proposed new Federal funds.

ARLINGTON COUNTY

Superintendent of Schools T. Edward Rutter expressed disappointment in the program.

Rutter praised the program for the aid it will give some areas, but said Arlington will not benefit.

Arlington County will require a total of $10 million by 1960 for additional school construction, Rutter said. During the past 5 years the county has borrowed $20 million to support the school system. Additional money could be borrowed, if the voters approved, since there is no legal debt limit for Virginia counties, but Rutter said there is a practical limit above which county credit would be impaired.

However, an annual increase in school enrollment of 3,000 to 4,000 children will require another $20 million construction program during the next 5 years. The county has no debt limit and has been able to sell school bonds well under the President's proposed interest limit.

FALLS CHURCH

Superintendent Irvin H. Schmitt said he feels the Eisenhower program will not be adequate to take care of the country's school needs. He pointed out that Falls Church will receive no benefit.

Schmitt said that even with construction of all presently planned classrooms Falls Church will be 20 to 25 classrooms short by 1960. Schmitt said Falls Church is now within 3 or 4 percent of its debt limit.

The House Committee on Education and Labor, of which I have the honor to be a member, will begin hearings on school construction legislation within a week or 10 days. I feel sure it will be the decision of the committee to give careful consideration to the President's plan.

I note the committee in the other body, where hearings are underway, will also consider the White House plan, but not to the exclusion of other proposals coming from interested Members of the Senate.

It is my considered opinion that the Congress should, at this time, initiate a long-range program and make Federal grants-in-aid in sufficient amounts over a period of 5 or 6 years on a matching basis in order to meet the overall problem.

Mr. LESINSKI. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. LESINSKI. It seems to me the President has taken some of the proposals out of my bill, H. R. 2857, and changed the figures around.

Mr. BAILEY. I would like to inform the gentleman from Michigan that that is the President's prerogative.

Mr. LESINSKI. He changed the figures around. I have set forth the complete figures in the RECORD of Tuesday. It seems to me that he made some misstatements.

I was very disappointed with the school construction proposal outlined by the President Tuesday. He calls it a plan of Federal cooperation with the States. But his program offers very little with which to cooperate. It does no good for the President to express his sympathy. We need action. The scope of the school crisis cannot be placated with a gesture. We can tackle this difficult problem only with a concrete program of significant Federal aid.

The President speaks of State and local ressponsibility. Good heavens. How much does a community have to work itself to the bone and sacrifice on other needed functions before it can establish responsibility?

I am also for State and local responsibility, and I am strongly opposed to any Federal control of education. No one is suggesting that education be taken from the control and direction of the States and local communities. The President unfortunately seems fascinated with a fantasy of a figment. To feign fear is to foment fraud.

The truth is that Federal contributions to State and local systems under Public Laws 815 and 874 have been to the public interest. Educators themselves have approved and urged Federal aid for school construction, operation, and maintenance. I say that the administration cannot conceal the inadequacy of its program under misleading words.

Let us examine the President's complicated proposal. In the first place he recommends that the Federal Government be authorized "to purchase school bonds issued by local communities which are handicapped in selling bonds at a reasonable interest rate."

What is a reasonable interest rate? The going rate of interest varies in areas of a State as well as between the States. Is the Federal Government to discriminate between areas having different going rates of interest? This does little more than what the school districts can already do for themselves.

Secondly, the President paternally recommends that the Federal Government participate with States having school-construction agencies to establish a fund for these agencies amounting only to a year's payment on principal and interest. The State school-construction agency would issue bonds through the customary investment channels, then build schools for lease to local districts.

But note how high the rentals would be. They not only would have to cover the payments on principal and interest of the bonds outstanding, but also provide a payment for a reserve fund, besides sharing in the administrative expenses of the State construction agency.

This suggestion is clearly not something for nothing. By the time the rentals were paid off, a school district could be worse off than before.

Lastly, the President suggests what may be regarded as a subsidiary proposal. He asks that Congress authorize $200 million for a program of grants-in-aid for school construction in stranded school districts.

Two hundred million dollars were recommended when it was shown over a year ago that $4.7 billion were urgently needed for construction in school districts having exhausted all sources of revenue—source: Report of the Status Phase of the School Facilities Survey, December 1953, page 114, published by the United States Department of Health, Education, and Welfare.

No one can argue against the merits of evolving a long-term plan of financing our public schools. But it seems pretty callous to reduce boys and girls to dollars and cents. The Nation needs more classrooms and needs them now.

The greatest investment we have in this country is the boys and girls we are educating and bringing up to be the future citizens of this country.

There is some question as to how long many of the States can continue the present expenditure for school construction. And you cannot expect a badly needed increase in teachers' salaries when you are overwhelmed with the construction problem.

I feel that the whole approach of the administration is turned around in this matter. We should first agree on a program of direct and simple financial aid to the States. Our first consideration should be nothing less than a billion-dollar grant-in-aid program to extend over the next 2 years.

As an additional and supplementary form of aid, may I call your attention to my bill, H. R. 2857? It would provide a sound program whereby Federal loans could really assist States and local communities in building schools.

With assurance against Federal interference, my bill, submitted January 24, would provide a loan fund of $3 billion from which each loan would bear interest at the rate of 1 percent a year. It would have maturity of not more than 30 years.

The Federal Government would be authorized to make loans to States having school-construction authorities, or for those States that do not have such authorities loans may be authorized for school districts that obtain the approval of the State agency responsible for the supervision of public elementary and secondary schools. A school district may be eligible to borrow when it equals or exceeds 50 percent of its legal debt limit. Real effort on the part of the school district is therefore shown. A school district or a State school-construction authority may be eligible to borrow providing that it has not defaulted on any loan made to it under this proposal.

From the funds appropriated, the proportionate amount of money each State, or the aggregate of school districts therein, could borrow would be determined according to the number of schoolchildren in each State as it bears to the total school-age population of all the States.

A loan program should supplement a grant-in-aid program. I feel that only a loan proposal such as I have outlined can materially assist States and local communities which might otherwise find it difficult to borrow for school construction.

Mr. BAILEY. Mr. Speaker, I commend the gentleman from Massachusetts [Mr. MCCORMACK] for his comments and the legislation which he has introduced to provide the school and health authorities of the several States with a better and more equitable and fairer distribution of surplus property. I have already begun to get letters from school superintendents in my State asking that we support your legislation.

Mr. MCCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. McCORMACK. May I say I have received a letter from Governor Herter, who is very much interested. There is a tremendous interest in this matter. The purpose I have in mind is to carry out the intent of the Congress. What happened was that we passed a bill which contained provisions known as the donors' provision. Forty days afterward the Congress passed a law relating to another subject under the jurisdiction of the Department of Defense. A year later we passed another law reincorporating in whole or in part the original donors' provisions showing the intent of the Congress, and by the law passed 40 days after our original act in which the donors' provisions were included and relating, as I say, to another subject within the jurisdiction of the Department of Defense, they stretched the interpretation of that second law, which, in effect, defeats the purpose of the Congress in connection with the disposition of surplus goods to our States, political subdivisions, colleges, hospitals, schools, and the other beneficiaries of the so-called donors' provisions of existing law.

The purpose and the idea was to try to have the intent of Congress carried out, because the sales to date show that in connection with the acquisition cost the Defense Department is getting an average of between 7 and 8 cents, and the cost of the sales in relation to the acquisition cost is anywhere from 3 to 5 cents. So that for a negligible return our States and subdivisions, our schools and colleges are being denied the benefits that are of inestimable value to them and to the people of America.

Mr. BAILEY. I would like to assure the gentleman that his legislation will have my support.

The SPEAKER pro tempore. The time of the gentleman from West Virginia has expired.

KHRUSHCHEV: AVOWED ENEMY OF FREEDOM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. FEIGHAN] is recognized for 30 minutes.

Mr. FEIGHAN. Mr. Speaker, the Russian autocrats are at each others throats again, and as usual, a large segment of the leadership of the Western World is attempting to figure out the significance of this recent event. The Russian experts are placed at a disadvantage because Malenkov was still alive when his confessed resignation was announced to the world. It would have been much easier on them if Georgi had made his appearance before the firing squad before his obituary was announced. Moreover, these experts are put on the spot because their pet theory—to the effect that a so-called managerial class had arisen in the Communist empire which could be influenced by intellectual manipulation, has been discredited. When the world was treated to the announcement of Stalin's death, these same experts proclaimed the theory of rule by committee as contrasted with dictation by one all-powerful individual as a natural development within the international Socialist camp. It was also claimed that our best hopes for peace rested in a plan whereby we would seek to influence a new managerial class which Malenkov headed and who gave promise of being reasonable in terms of getting along with the non-Marxist world.

It has been this false assumption which has guided our approach to the threat of world communism since March 1953. The conduct of the cold war against communism has been anchored to this basic assumption. In truth, the implementation of the policy of liberation has been guided—or if you choose, impeded—by the acceptance of this fundamental assumption by the top foreign policymakers within the administration. This brings back to memory the 1952 campaign promises of the Republican Party—promises that if the Republicans were elected they would work for the liberation of the many non-Russian nations enslaved by the Communists. This memory refresher seeks no partisan advantage. It does, however, strongly suggest that the Republican leadership should immediately make a complete review of its present position with respect to the promised policy of liberation. Such a review should be balanced against all the stresses and strains within the Communist empire and these have been obvious to the objective students of the U. S. S. R., and at the same time to make a realistic evaluation of what has been done in the past 2 years to help the enslaved people regain their independence. The benefit of hindsight which would accrue from this process would help greatly in launching a political offensive in the cause of human freedom.

During the 83d Congress I served as a member of the Select Committee To Investigate Communist Aggression. That committee, as Members of the House are aware, submitted some 27 reports on the subject of its inquiry. The summary report which presents the findings, conclusions, and recommendations of the committee, calls for a political offensive against the conspiracy of communism as the only course of action which gives hope of preventing world war III. That report was submitted to Congress on January 3, 1955. In my opinion the information set forth in that report is an excellent guide to a practical understanding of the events taking place within the empire of communism especially during the last several days. I would urge every Member of Congress to reread the summary report of the committee against the background of these events.

There now seems little doubt but what Khrushchev has won the mantle of full dictator which Stalin wore until March 1953. The period of shadowboxing which the Russian experts called rule by committee is now over. A new Communist era has begun and it should be properly called the Khrushchev era. Just how long this era will last is a matter of pure speculation. Its tenure will very likely depend upon how much blood the new dictator and his immediate henchmen are prepared to spill and how deep they are prepared to go in the process of purge which must accompany the new dictatorship. On the basis of the evidence at hand, it would appear that the Khrushchev era will be with us for a while.

It is quite well established that Khrushchev is the real Czar of the Russian Communist empire. Bulganin, as Premier, is nothing more than window decoration. In fact, he has always been a stooge for the Russian Communist Party and as political commissar of the Red army, he was in charge of placing machine guns in the backs of the professional army officers so that they in turn would keep their machine guns in the backs of the foot soldiers of the Red army. He is completely subservient, as are all the Communist Party functionaries, to the will of Czar Khrushchev.

There are some interesting facts about Czar Khrushchev which to date have not been brought out in the free press. I believe it to be of fundamental importance that we get all the reliable information available concerning this new dictator out in the open so that the American people can better understand what he represents. It is a rather old-fashioned American custom, but one which strikes me as being sensible in these circumstances, to measure a man by his past record.

Khrushchev has been called a Ukrainian. He is in fact a Russian and as such is a confirmed imperialist. It is true that he spent many years in the Ukraine but—unhappily—in the capacity of hatchet man for the Kremlin. He was born in Russia, of Russian parents. His place of birth was close to the ethnographic borders of the Ukrainian nation. He did work in the Russian mines as a boy and there met many Ukrainians who were being used as involuntary laborers. When the feudal Russian Empire collapsed in 1917, Khrushchev lost no time in joining up with the Lenin Bolsheviks. He was assigned to Ukraine in 1919 as one of a task force directed to destroy the Independent Ukrainian Democratic Republic. He earned his Communist whip by demonstrating his disdain for all human values and his contempt for democracy and freedom.

He remained in Ukraine until 1927, serving in the capacity of hatchetman in the all-out Russian effort to destroy the popular movement for Ukrainian national independence which blossomed in 1917. There remains no doubt as to the vicious and cruel role he played in forcing the system of Russian collective farms upon the Ukrainian people. All loyal and freedom-loving Ukrainians will never forget the heroic struggle of the Ukrainian nation against this new Russian encroachment upon the sovereignty of the Ukrainian people.

In 1927 Khrushchev was recalled to Moscow—as a reward for his ruthless treatment of the heroic Ukrainian people. He remained in his native Moscovy until 1935. It is not completely clear at this time as to everything that occupied his evil talents but there is good reason to believe that he played a part in developing the blueprint for the man-made famine in Ukraine during 1932–33,

when up to 7 million patriotic, freedom-loving Ukrainians were starved to death because of their stubborn opposition to Russian collectivization efforts. This occurred in a year when the crop in Ukraine, the historic breadbasket of Europe, was as good if not better than average. This terrible crime against humanity has been best described as the "man-made famine." For more complete details on this sad chapter in the history of mankind, I would urge all Americans to read the eighth interim report of the Select Committee to Investigate Communist Aggression. This report, in my considered judgment, presents the most authentic picture of life under the Rusisan autocrats since the publication of the Journals of Marquis de Gustine in approximately 1844. It is a reliable index to the behavior we must expect from Khrushchev and all his henchmen.

In 1935 this Khrushchev was sent back to Kiev by the Russians as secretary of the Communist Party in Ukraine. He then openly engaged in a ruthless program to destroy the "intelligentsia" of the Ukrainian nation. The Russian-made famine in Ukraine of 1932–33, even though it wiped out close to 7 million human beings, did not break the Ukrainian spirit for national independence. The new Khrushchev task, therefore, was to ferret out and destroy all elements of leadership among the Ukrainians. By the process of torture, liquidation, and mass deportations, Khrushchev was able to temporarily subdue the spirit of nationalism in Ukraine.

In 1938 this same Khrushchev was named to the Russian Politboro. This was the reward he received for his ruthless persecution of the heroic Ukrainian people.

During World War II Khrushchev won further Communist laurels by directing the Kremlin effort to stamp out all resistance in the non-Russian nations of the U. S. S. R. In this connection, it is important to note that he organized and controlled the Communist partisan groups and elements parachuted into Ukraine, Poland, Byelorussia and other non-Russian nations. Here again he demonstrated his ruthless character and complete disdain for human life.

Following the defeat of Nazi Germany this same Khrushchev was again assigned as purge master of the Ukraine. As is now well known, the great and patriotic Ukrainian people completely revolted against the imperial Russian Communists during the course of World War II. While despising the Nazis, they sought to win their national independence. For aspiring to this noble goal, the Kremlin masters decided they must be punished. Stalin assigned their boy, Khrushchev, to this task—a tried and skilled executioner. He carried out this assignment with cold dispatch. In the same manner he now seeks to carry out his enlarged mission of enslaving the entire world.

More recently Khrushchev has been the advocate of a new population transfer within the U. S. S. R. He calls it the pioneer resettlement program. Some Russian propagandists have even likened this program to the efforts of the American pioneers. The essence of his plan is to move millions of people from their native lands to the interior reaches of the U. S. S. R.—there to reclaim millions of acres of land for food production. Naturally these people are not going to go there voluntarily because they are not fooled by the propaganda of Khrushchev. This has resulted in another wave of forced deportations from the non-Russian nations of the Communist empire. All those who resist the decaying process of communism are rounded up as "volunteers," for the new pioneer movement. This is the latest device created by Khrushchev to break the spirit of resistance within the empire and at the same time to hide the facts concerning it from the civilized world. How many millions of people will be purged by this scheme is anyone's guess. But of one thing we may be sure, this silent but thorough purge would not be underway if there were not great internal troubles confronting the Communists

Khrushchev has been built up as the symbol of peaceful coexistence between Russian communism and the democracies of the West. In this capacity he intends to carry out the goals of Lenin which in the words of Lenin himself are:

First. Use any device, method, or sacrifice to advance the ends of world communism.

Second. If needs be, two-thirds of the peoples of the world must perish in order that communism may triumph.

These are the goals Khrushchev represents. This short review of his background shows he is skilled in the inhumanities. There should be no doubt as to the policy which the United States should follow in these circumstances.

Mr. ASHLEY. Mr. Speaker, will the gentleman yield?

Mr. FEIGHAN. I am very happy to yield to the distinguished gentleman from Ohio.

Mr. ASHLEY. What is the gentleman's view on the direction which our policy should take?

Mr. FEIGHAN. My views on what we should do about the present situation are well expressed in the summary report of the Select Committee on Communist Aggression of the 83d Congress. As a member of that committee, I took part in its hearings and in the preparation of the reports it submitted to Congress. In particular, I would like to invite your attention to the series of recommendations made by that committee as the only course open to us which gives reasonable hope for avoiding all-out war. I would like to read at this point the recommendations of the select committee which appear on page 6 of the summary report:

The committee rejects the current Communist propaganda campaign of peaceful coexistence between the nations of the free world and the Red regimes of the Communist empire as the only alternative to preventive war. It recommends rather that the Government of the United States immediately launch a positive, bipartisan, political offensive against the international Communist conspiracy and in behalf of the enslaved nations, and that the following steps be undertaken as a part of such a program.

1. The committee again recommends that the President of the United States take the initiative in convening an international conference of all free non-Communist nations for the following purposes:

(a) To express formal recognition of the fact that the Communist governments, which now control over 800 million human beings, are not representative of the will of the people.

(b) To seek agreement whereby the free non-Communist nations acting in concert will withdraw diplomatic recognition from all Moscow-controlled Communist governments.

(c) To reaffirm the friendship and solidarity of the people of the free world with the people and nations enslaved by communism.

(d) To develop a program for the rapid and complete termination of all commercial treaties and trade with Communist governments and the initiation of a program of trade among all non-Communist nations which will strengthen the security of the free world.

(e) To develop an overall, dynamic program for the defeat of the international Communist conspiracy.

2. That Congress establish a joint committee on all United States overseas information programs in order that maximum results may be assured in bringing the full force of truth to all the people of the free world and increased hope to the millions of people enslaved by communism.

3. That Congress by appropriate action reiterate and make clear that the eventual liberation of all the nations enslaved within the Communist empire, together with unqualified support for the principle of national self-determination through free elections and the secret ballot, are firm and unchanging parts of our national policy.

4. That in the advancement of the American program for world peace and freedom all efforts therein be measured against the criteria of whether they assist the captive peoples to hasten the day when they may achieve their liberation, and that all acts or omissions which tend to confirm their enslavement be rejected.

5. That the spirit of resistance to Communist tyranny behind the Iron Curtain be encouraged and supported through the judicious use of funds already authorized by Congress for such purpose.

6. That the appropriate agencies of the Government concerned with the threat of world communism give maximum opportunity to those private American organizations, groups, and individuals that have a natural bond with the enslaved nations and people, to play a major role in the restoration of freedom in the lands of their ancestry.

7. That, as a demonstration of our genuine sympathy for the enslaved nations and peoples, and to weaken the will of the armies under Communist rule to fight and support the Kremlin's plan for world conquest, the President immediately direct the establishment of the national military units formed from escapees from the enslaved nations as authorized by section 101 (a) 1 of the Mutual Security Act of 1951, as amended, thus providing a concrete symbol of a genuine coexistence and unity between the nations and peoples on both sides of the Iron Curtain.

8. That Congress at the next session enact H. R. 8000, known as the Political Asylum Act of 1954, to provide for the rapid and effective reestablishment of selected escapees from communism and to encourage the defection and escape of others.

9. That the Congress give the United States Information Agency full support not only by way of an increase in funds but also by strengthening its role in our Government's political offensive. Similarly, foundations, private organizations, and indi-

vidual citizens are urged to continue and increase their support to the Committee for Free Europe (Radio Free Europe).

10. That an International Juridical Commission be established within the framework of the North Atlantic Treaty Organization so that Communist crimes perpetrated against humanity may be fully recorded and officially noted for prosecution.

11. That the Department of State transmit copies of this report, together with all other reports of the committee to each member nation of the United Nations.

12. That the Department of State formulate a resolution based upon the findings, conclusions, and recommendations of this report, branding the U. S. S. R. as an aggressor against all the nations enslaved by communism and that the United States delegation to the United Nations be instructed to take immediate steps to place this resolution on the agenda of the General Assembly for early action.

13. That the work of this committee be continued in order to complete the investigation of all phases and techniques of Communist aggression in areas of the world not already covered by the committee, together with further inquiry into conditions of life within the Communist empire; a program that lack of time has thus far prevented.

CENTURY OF PROGRESS: TAMPA, FLA.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Florida [Mr. CRAMER] is recognized for 10 minutes.

Mr. CRAMER. Mr. Speaker, I would like to call the attention of this body to a century of progress that is being celebrated today and throughout the balance of this year in the city of Tampa, Fla. This week, with gay and colorful ceremony, Florida's great port on the gulf, commemorates its 100 years of charter as a corporate town. Part of that celebration is the famed invasion of the pirate crew of Jose Gaspar. Part of that celebration is the largest Florida State fair now in progress and part of that celebration is the vision of a city that has in 100 years of its corporate existence grown from fewer than 100 homes to a city of over 200,000 souls.

I should like at this time to present to the Speaker of the House a plaque in commemoration of this celebration. I should like to read the inscription on the back thereof, which states:

TAMPA CENTENNIAL YEAR, 1955

The year 1955 marks the 100th anniversary of Tampa's existence as a corporate town under a charter granted by the Florida Legislature on December 15, 1855. But actually, Tampa, now a colorful, cosmopolitan city of 233,000, and center of Florida's flourishing west coast area, is older than any of its remembered birthdays.

When the first Spanish explorers landed in south Florida more than 400 years ago—Ponce de Leon in 1521 and Hernando de Soto in 1539—they found Tampa already established as the chief town of the Caloosa Indian Tribe.

Since that day, 100 years ago, when the Florida State Legislature approved the charter of the city of Tampa, its history has been one of progress. That progress was foreseen many years before, when the Spanish explorers discovered what was described by Cabeza de Vaca in 1528 as the "finest harbor in the world" on the beautiful west coast of subtropical Florida. Since that time the port of Tampa has played its important part in the life of Florida and the Nation.

Old Jose Gaspar, around whose fabulous name has been built the annual festivities of the Gasparilla Krewe, himself first dropped anchor in Tampa Bay in the closing years of the 18th century. The precise date, not pinpointed for us by diary, chronicle, or bruited legend, could not, however, have been later than 1790. By that time the old pirate was well established as the overlord among the pirates of Florida's west coast. Tampa then surrendered to his reign, and today Tampa surrenders to the modern Krewe of Gasparilla on the invasion day, February 14. I would extend an invitation to all of you that are young in heart but jaded from the travesty and travail of weather and work to join with me and the other thousands that will witness the invasion of the gaily bedecked pirate ship of Gaspar's Krewe into the famous old port city of Tampa. It is an exact replica of the ship sailed by the famous buccaneer over the seas in search of gold and prizes. The mystic Krewe will come thundering into the port city with cannon roaring and with the Jolly Roger flying at the masthead of this piratical old-fashioned square rigger. Hundreds upon hundreds of other vessels will accompany her. In the city and its Latin quarter the bells of celebration will ring out, and, along with the revellers, you, too, can become young again in heart and relax in the golden glow of Florida's sun.

The story of this centennial year of the city of Tampa is not one of just fun and frolic, however. Tampa is a strong, aggressive town that has faced a stern future with pride of its beginning and courage to face each day of its future with stalwart hearts and a spirit of teamwork that cannot be downed by the adversary unforeseen. Tampa is a city today only through the foresighted men who have made it. It opens its second century of growth with a wide vision of progressive minds to guide it to greater destiny.

The city of Tampa has played its part in the stern days of crisis for our Nation. Early an important port and fort as well as source of supplies for the troops of our Nation who fought against the Indians in the early history of our State, Tampa's sons set forth to serve in the War Between the States. Point of embarkment for troops during the Spanish-American War, many of these soldiers returned to add to the progress of the west coast of Florida. In two world wars Tampa has served as a manufacturing center and base for soldiers of the Nation who set out from here to defend the cause of freedom and democracy.

The great port of Tampa today, as it celebrates its 100 years of progress is a city of business and men, a city of trade and manufacture, a city of produce and distribution, a city of entertainment and guests. One hundred years have seen this "best port in the world" flourish in a garden land to a point that finds little equal in the gulf waters of our great land.

An even temperature, a verdant land, and plentiful rainfall make the area that surrounds Tampa one of the garden spots of our Nation. The produce of its farms finds its way to your homes each day—vegetables and beef, fruit, dairy and poultry products—all are there to make it one of the important agricultural sections of the land. Secretary Benson, in his visit to Florida just last week, lauded the progress that is there and commended the growth of the area. Farms are valued at over twenty-five million; the cattle at one hundred and fifty-three million—annual vegetable production is over five million; dairy and beef products over a million and a half. All of this proof of a fabulously growing agricultural empire around the 100-year-old port city of Tampa.

The Florida State Fair this year will show to the thousands upon thousands of visitors the many products of our fields. The fair that serves all the State is larger than ever this year with its own celebration of 50 years of expositions. A panoramic view of the whole State of Florida that brings attention to the many things that demonstrate a firm economy in agriculture and manufacture and a future that is today being demonstrated by the phenomenal growth of the area that surrounds Tampa and extends throughout the Nation's playland that is Florida. Here side by side will be displayed the manufactured products that form the background of payrolls that make the west coast economy sound—the exotic fruits and vegetables that grace your tables and serve to bring the health of the vitamins entrapped from Florida's sun to our children—the processed foods, citrus concentrates, crystalized and canned as well as the varied packs of vegetables—the arts of the cigar-manufacturing industry that saw more than 660,700,000 cigars manufactured in 1954—the products of the largest meat packing center in the Southeast—and all that goes to make a balanced economy that is expanded far beyond the limited confines of our neighbors in the States to the north of us. The Florida State Fair in its 50th year of operation during the 100 years of incorporation that is celebrated by the city of Tampa contributes a great part to our learning and the American ideal provided in the exchange of information.

To those of you who would witness a parade of progress and pageant of beauty I would extend the invitation to visit this showing of Florida's bounty and beauty at the Florida State fair.

It is an outstanding salute to the future of the great harbor at Tampa that in the budget message of President Eisenhower to this Congress was included the first funds of a program for improvement of this great port. The President's recommendations, which I commend to this body and those who will deliberate on the matter, would see even greater growth of these port and harbor facilities and a strengthening of our defense abilities and productive services. I pledge great effort in the interests of improving these facilities and furthering the progress of this famous harbor

that for hundreds of years has served the South.

One hundred years of incorporation have seen the people of Tampa grow in understanding and broaden in the viewpoints that demonstrate ideals for all America. In this great city there are traditions that can be traced back to the courts of Spain, there are gracious ways of living and courtesies of language and manner that came from the early Italian settlements. Tampa is a southern city with all the warm hospitality for which the South is famous and with many of the southern customs preserved. Tampa is a modern city with a vitality that amazes many of its visitors. Tampa is a gracious host to many tourists each year and in 1954 a million and a quarter people were warmed by the soft breezes from the Gulf of Mexico, charmed by its hospitality and entertained royally by the many activities planned for their pleasure. I am happy to say that many of them today remain to become a part of this growing metropolis.

These are just a few of the notes of progress that make this celebration of 100 years of growth for Florida's great west-coast port a milestone of future certainty. The tempo of progress and development are here. There is a pulsebeat of prosperity in its manufacturing, distribution, transportation, international trade, resort business, and agriculture.

Everyone is proud of their home State and community—and justly so. I am proud of this city that is the bustling center of trade in the first district of Florida that I represent among you in this center of our great Nation. I believe I have cause, however, to stand just a little straighter and face the future just a little bolder because I know of the strength and security, the hearty and cheerful, dedicated and principled soul that is Tampa, Fla. Its people are ones that afford the whole country a brighter future and many more hundreds of years to eternity of progress and growth together with a life that is gracious under Florida's sun.

I ask that you join in the centennial celebration of this great city of Tampa on Florida's west coast—personally if you can—as the swaggering pirates of old Gaspar take over your hearts—and wisely as you would see all-Florida on display during the Golden Anniversary State Fair—but always remembering to bow to the courage of those who 100 years ago founded so successfully upon the bay. Among you I am proud to rise and proclaim this century mark of a great city in our Nation.

TAMPA'S CENTENNIAL YEAR: 1955—A BRIEF HISTORY OF A CITY THAT IS OLDER THAN ANY OF ITS REMEMBERED BIRTHDAYS

Tampa—cosmopolitan, colorful, flourishing trade capital of Florida's west coast, the world's largest phosphate shipping port; long famous for its fine handmade clear Havana cigars, its luxurious Spanish restaurants, its Latin quarter (Ybor City). Tampa is the center of the world's largest citrus-canning area. It is Florida's leading industrial city and the State's second city in population (population 233,400) as estimated by Standard Rate & Data.

Tampa was first granted its charter as a corporate city by act of the Florida Legislature on the 15th day of December, 1855.

In celebrating 1955 as its centennial year, Tampa freely acknowledges that only 1 of its more recent anniversaries is being observed, for actually 100 years is but a fraction of Tampa's existence. It is one of the oldest place names in North America. The shores of Tampa Bay were echoing to the clang of Spanish armor a full century before Plymouth and Jamestown were settled.

Indeed, if anniversaries are wanted, Tampa could already in this 20th century have celebrated the 100th anniversary of the arrival of Ponce de Leon in 1521; or the 1528 expedition of Panfilo de Narvaez, whose chronicler, Cabeza de Vaca, was the first white man to write of Tampa Bay: "The port is the best in the world."

And 1539 brought Hernando de Soto, who gave Tampa Bay its first Spanish name, Espiritu Santo—Holy Spirit Bay—at the same time bequeathing to scholars and to the civic pride of a later day the unsettled question of where, on the shores of this sunlit bay, he made his first landing. The question is largely academic since he covered every foot of it in the 6 months his expedition was based on Tampa Bay. He set the fashion for today's visitors to whom Tampa says: "See all of Florida from Tampa." Tampa's magnificent De Soto oak, under whose branches he is said to have conferred with the Indians, is a legendary landmark of his stay.

These Indians were not the Seminoles familiar to today's tourists. They were Timucuans and Caloosas, both now extinct, the latter masters of south Florida. Tampa itself is a Caloosan word, and was recorded by the Spanish historian Fontaneda in 1575 as the name of the leading town of the Caloosa Indians, though he spelled it "Tampa." Herrera's early map of Florida, done in 1601, used the modern spelling and the name "Tampa Bay" in preference to DeSoto's "Espiritu Santo."

Hillsborough River and Hillsborough Bay, the upper area of Tampa Bay, were later named for Lord Hillsborough, British colonial secretary of state in 1772.

The Seminole Indians, separatists from the Creek tribes of Georgia, were established in north Florida and had already given Gen. Andrew Jackson an excuse for a brief adventure in 1817—the so-called First Seminole War—resulting in moving the tribes southward. The United States acquired Florida from Spain in 1821. One of the first results was the establishment in 1824 of Fort Brooke at the mouth of the Hillsborough River. Here was the nucleus of the future city of Tampa, and here the first white child of the area, John Mercer Brooke, was born in 1826, son of Col. George Mercer Brooke, the fort commander. John Brooke grew up to become chief of the bureau of ordnance of the Confederate Navy and directed the conversion of the Merrimac into the world's first ironclad warship.

Being located entirely on a Government military reservation, the community of Tampa offered little lure to developers for a quarter of a century. Weekly sailing vessel service between Pensacola and Key West via Tampa offered the only contact with the outside world. The first post office, officially the Tampa Bay Post Office, was established November 24, 1831, with William Saunders, a native of Mobile and proprietor of the first general store, as postmaster.

But new faces appeared from time to time. One newcomer was Augustus Steele, a Connecticut Yankee, who had wangled an appointment as deputy collector of customs at Fort Brooke in 1832. Two years later he was credited with inducing the State legislature to create, on January 25, 1834, the new county of Hillsborough, carved out of old Alachua County, with the county seat at Tampa and Augustus Steele as county judge. He had already replaced Saunders as postmaster.

Hillsborough was vast in those days. Its 5,500,000 acres included all the present counties of Hillsborough, Polk, Pinellas, Pasco, Manatee, and Sarasota, as well as Charlotte, DeSoto, Hardee, and Highlands. But the records show less than 100 civilians in the entire county at the time.

Seven years of bloody warfare with the Seminoles began in 1835, touched off by the massacre on December 28 of Maj. Francis L. Dade and his detachment of 107 men near Bushnell while on march from Fort Brooke, at Tampa, to Fort King, near Ocala. The remaining garrison at Fort Brooke was in peril until reinforced by Marines from Key West—the first time in United States history that Marines and the Army engaged in joint operations.

When the costly fighting ended, in 1842, 4,000 Seminoles had been deported to the West and only a few hundred remained in the Florida Everglades. Their great Chief Osceola, captured while under a flag of truce, was dead in the "white man's prison" at Camp Moultrie, S. C. Fort Brooke was reduced in importance, and on July 25, 1848, President Polk signed an act giving 160 acres of the military reservation to Hillsborough County. For the first time, property already platted as "Tampa" could be legally sold to private owners, and tracts were quickly disposed of, one to Capt. James McKay, who built the county's first official courthouse.

The first municipal government was formed in 1849 when a group of Tampans chose M. G. Sikes, a stonemason from Savannah, as president of the township trustees. But lacking taxing powers, the trustees were unable to meet the costs of government, and in 1852 were forced to sell the townhall furnishings and public market stalls to liquidate the public debt, which had reached $42.50.

But the very next year the town council was reestablished, with John Darling, a storekeeper from Vermont, as president. It was a frugal and successful government. On September 17, 1855, the townsmen voted to seek a charter from the legislature.

The legislature granted Tampa this first corporate charter on December 15, 1855—and thus gave Tampans of 1955 the occasion for a centennial jubilee. In the election of city officials, Judge Joseph B. Lancaster, a Kentuckian who had gained distinction as a Florida jurist, became Tampa's first mayor, only to die in office within a twelvemonth.

The year 1855 also brought the Third Seminole War—2 more years of Indian fighting against the handful of Seminoles remaining in the 'Glades, but a greater struggle was ahead—the War Between the States. Tampa was blockaded, bombarded, and finally invaded by Federal forces out of Key West, and the town's economic life was for a time destroyed.

But a courageous pioneer citizenry could rise above the recurrent disasters of wars, hurricanes, and pestilence—yellow fever, which struck repeatedly and with deadly effect. It should be noted that it was a Tampa physician, Dr. John P. Wall, who first proposed the theory that the disease was mosquito-borne.

The last three decades of the 19th century brought the upswing in Tampa's fortunes. A flourishing cattle trade with Cuba developed, which pumped new money into all south Florida. Tampa's four hotels, best known of which hostelries was the Orange Grove Hotel at Madison and East Streets, listed an increasing guest list, including poet Sidney Lanier. Incidentally, an English musician, J. A. Butterfield, composed When You and I Were Young, Maggie, while in Tampa, and organized the town's first brass band.

A progressive Tampa group organized a community telegraph company in order to

string a line from Tampa to Fort Meade, 40 miles away, where it could connect with international Ocean Cable Co.'s trunkline running down through the State to Key West and Habana.

One thing was needed: a railroad. And Henry Bradley Plant, founder of the Southern Express Co., brought that to Tampa in 1883, thereby starting a chain of reaction of prosperity. The first bank, the Bank of Tampa, later renamed the First National Bank, was opened that year. New industries followed the railroad. The world's richest phosphate fields were discovered near Tampa. And the cigar industry moved in, under the joint sponsorship of the chamber of commerce, known then as the board of trade, and Vincente Martinez Ybor, of Spain, Cuba, and Key West.

The cigar industry had been driven out of Cuba by revolutionary disorders, moving first to Key West, but labor troubles, plus a disastrous fire, prompted leading manufacturers to seek a new base. Senor Ybor was invited by a friend, Gavino Gutierrez, a New York importer, to take a look at Tampa. The result: Ybor City sprang up at the northeast corner of Tampa, Ybor sold sites to other manufacturers, and, in 1886, fine handmade cigars were rolling out of three factories—those of Ybor, Sanchez & Haya, and Lozano, Pendas & Co. Descendants of some of the pioneer cigarmakers are still rolling fine cigars in Tampa today—more than 2 million cigars every working day.

On the west bank of the Hillsborough River, Plant, the railway magnate, wrought an Arabian Nights miracle in the wilderness with his Tampa Bay Hotel, a $3 million specimen of Moorish architecture, whose 13 minarets remain today a distinctive feature of Tampa's skyline. The imposing 6-acre structure, which now houses the University of Tampa, was begun in 1888, and opened to the millionaires of the nineties, on February 5, 1891. It was for many years one of the great luxury hotels of this world. During the Spanish-American War, when Tampa was the chief United States port of embarkation, the hotel was headquarters for the Army's General Staff—and, of course, Col. Teddy Roosevelt.

Plant had previously established a steamship line to Cuba, placing the luxury steamer *Mascotte* in operation on January 7, 1886. With the other Plant ship, the *Olivette*, the *Mascotte* made an emergency run to Habana before the outbreak of war to bring back to Tampa cigar factories huge cargoes of tobacco. Bales of leaf were jammed even into staterooms of the two vessels. The *Mascotte* is pictured in the present official seal of the city of Tampa.

It was not surprising that even before the Spanish War, Tampa, numbering among its citizens hundreds of Cuban born, was an intense partisan of the Cuban cause. Cigar workers pledged 1 day's pay each week to the Cuban junta's representative here. Filibusterers' ships, loaded with arms, sailed for Cuban waters with the absolute minimum of local interference. Jose Marti, great Cuban patriot, set up headquarters in Tampa, and his small cottage is now a Cuban national shrine.

With the end of the war and the arrival of the 20th century, Tampa moved to take its place among the modern, progressive cities of America. Perhaps in 1898 it was, as Richard Harding Davis described it, "a sand-blighted city." But not for long. It paved its streets; electrified its street railways; put in new gas, water, sewer plants; engaged in land title battles, franchise fights, private scandals, and political brawls; displayed all the lusty manifestations of growing pains common to one-time frontier towns touched by destiny.

It got deep water for the port that the Spanish chronicler had called great 4 centuries before—first 12 feet, then 20 feet, then on to 30 and more. It got new industries, including huge shipbuilding plants during two world wars. And it got soaring population figures. The town that could count only 720 inhabitants in 1880 had 5,532 in 1890, 15,838 in 1900. By 1910 there were 37,782, with more than 10,000 workers, men and women, in the cigar factories alone.

Three more firsts—the first commercial airline in the world began operations New Year's Day, 1914, between Tampa and St. Petersburg, with Tony Jannus as pilot of the one plane, a Benoist flying boat. The world's first air express shipment was made January 12, smoked meat from a Tampa packer to St. Petersburg.

And in 1915 Tampa became the first American city to enjoy citywide automatic telephone service.

Growth became sensational during the twenties, accelerating dizzily into the Florida real-estate boom of 1924–25, which was nevertheless an era of major development for Tampa and its prosperous neighbor cities of St. Petersburg, Clearwater, Plant City, Lakeland, Bradenton, Sarasota, and Fort Myers. Their growth as tourist centers sped Tampa's expansion as a distribution and services center.

When a frenzy of land speculation cooled and a major depression began, Tampa could still credit the land boom with millions of dollars' worth of permanent improvements added to its skyline and its environs.

The remarkable Davis Island development, a sizable city in itself, was pumped out of the bay by D. P. Davis, who sold $18 million worth of created properties within 12 months. Gandy Bridge, long dreamed of by George S. (Dad) Gandy, was completed in 1924, linking Tampa and St. Petersburg.

And a score of developers and builders opened new residential areas, built handsome new homes, and the city's expanding population quickly absorbed all this new construction.

The Tampa of today, with its population of more than 233,000, its wide diversity of industries and interests, its sound economy, and its progressive people, has been built by men and women of the frontier spirit—the spirit that rises above every form of hardship to achieve ultimate success. They have built a solid foundation for the greater Tampa of the future.

EVIL IS HE WHO EVIL THINKS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from South Carolina [Mr. RIVERS] is recognized for 10 minutes.

Mr. RIVERS. Mr. Speaker, the intemperate, uncalled-for, unnecessary, unwarranted, and untrue words attributed to actor Paul Douglas, star of the Caine Mutiny Court Martial at Greensboro, N. C., some time ago, have caused the disbanding of the entire troupe and the cancellation of the remaining program of this company. Over 70 percent of which were scheduled to take place in that land of fable, song, tradition, hospitality, and prosperity, known as the South.

This is not the first occasion that Douglas has demonstrated bad judgment. If my memory serves me correctly, he was one of the leading lights of the Anti-Nazi League back in 1939. The publication Hollywood Now under date of 1939 states this:

Hollywood stars hold giant save Spain rally Sunday. * * * Melvyn Douglas, Gale Sondergaard, Chester Conklin, John Garfield, W. S. Van Dyke, Maxwell Shane, Oliver P. Garrett, Whitney Bourne, and Paul Douglas, representing the motion-picture artists committee in the rally are the Hollywood Anti-Nazi League, Friends of the Abraham Lincoln Battalion, Young Democrats, Medical Bureau, and North American Committee To Aid Spanish Democracy, American League for Peace and Democracy, and the United Anti-Nazi Conference.

As everyone knows these front organizations were to give aid and comfort to the Communists. The North American Committee To Aid Spanish Democracy, and the Friends of the Abraham Lincoln Battalion, and all of these other high-sounding names which were designed to carry the ball for Stalin against the courageous and dauntless fight of Franco in Spain which cost the lives of over a million men, women, and children.

Douglas has no reason to stray so far from the beaten path. He was born in Philadelphia some 48 years ago, attended Yale University, played professional football, and I remember when he was a sports announcer for Chesterfields on CBS; since, he has, I have been informed, married and divorced four times, this may be the reason he was selected to play the part of Captain Queeg. Those of us who read the book or saw the play or movie recall that Captain Queeg was as odd as a $3 bill. He was as unpredictable as the Washington weather, and about as popular aboard his ship as a skunk at a lawn party. Douglas was a natural for this part.

Recently when his outfit came to Charleston, S. C., my hometown, members of the cast, a genuinely fine group, made the statement that Douglas considered himself too good to travel with the rest of the troupe. One star of the play had this to say: "He does not even see the South; he travels by airplane."

His only observations of my land and my people were from high up in the blue which evidences beyond the peradventure of a doubt that Douglas was schooled in his dislike for my land and my people, to be sure, an old Communist maneuver. He is like the rest of those who know more about my people than we do ourselves. He gets his impressions from far away and he gives out these mean, vile epitaphs long before he has had occasion to know a single solitary thing about the South.

The cancellation of the Caine Mutiny Court Martial was not done because of any gesture of friendship to my people. It was done for the obvious and practical reason that the most sensitive nerve in the body has been offended, that is the pocket nerve of the producer, Paul Gregory. It is elementary that this troupe cannot continue playing to empty houses.

Paul Douglas not only offended the dignities of his troupe, but made an unfortunate reflection on that segment of the American people, both white and colored, who are compelled to eat "lower down on the hog" than Paul Douglas. Good fortune did not smile on these people.

The newspapers have been kind to this individual. They have obeyed the spiritual admonition of "Answer not a fool according to his folly lest he be wise

in his own conceit." Despite the fact that they were mindful, as Mr. Lowell aptly said:

A lie may keep its throne a whole age longer, if it skulk behind the shield of some fairseeming name.

My people have ignored Paul Douglas, instead of booing him or egging him from the South, they desired to shun him as a copper snake, or a leper, and let him, without molestation, depart with nothing but his guilty conscience to smite him; with nothing but his countless abominations to rebuke him; with nothing but the ghosts of his intemperate thoughts and utterances to haunt him for his treachery and unwarranted attacks on my people and our traditions.

Mr. Speaker, long after Paul Douglas has returned to the vile dust from whence he sprung, my land and my people will continue to hold the great promise it now has. We will continue to progress despite those who, like Paul Douglas, would remake us and our land. Despite the political decisions of the Supreme Court, the Executive orders of Presidents, and the unconstitutional acts of Congress of the United States, despite all these, the land of the magnolia, the honeysuckle, the camellia, and the warm and genuine hospitality will continue to attract all Americans.

Mr. Speaker, I ask permission to include with my remarks editorials from the News and Courier and the Charleston Evening Post, not saying anything about Paul Douglas but making a few reflections on this sad man now without a job and who has caused the Caine Mutiny to bust up right in his face.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

(The editorials referred to follow:)

[From the Charleston (S. C.) News and Courier of January 25, 1955]

SOME SOUR LINES

On reading remarks about the South attributed to Mr. Paul Douglas, an actor who played Charleston and other southern cities lately in the Caine Mutiny, we conclude that he was well cast in the road company as Captain Queeg, the naval officer who was all mixed up in his head. A reporter in Greensboro, N. C., says Mr. Douglas told him the South, in the elegant language of Hollywood, "stinks." Also, he said, it is a land of "sowbelly and segregation." Later Mr. Douglas said he was misquoted, that he was talking only about Greensboro.

No matter; we do not think Mr. Douglas, as a traveling player, is qualified to speak with much authority either about Greensboro as a city or the South as a region. He flits from place to place, we are told, by airplane, while other members of the troupe travel by highway. As to sowbelly, we wonder how Mr. Douglas happened to come across any of that nourishing but plebeian foodstuffs. We can't recall seeing any of it on the menus of public eating places. We wonder whether Mr. Douglas visited in any southern homes where sowbelly was served.

As to segregation, of course it is true that the South continues, in the face of misunderstanding and hostility in other regions, to maintain in certain areas a separation of the races. Mr. Douglas has made no new discovery there.

Steve Brodie, another member of the troupe, said Douglas was speaking only for himself. "He doesn't even see the South," Brodie said. "We've been treated wonderfully and we're enjoying ourselves tremendously."

When he was in Charleston, Mr. Douglas was a guest in one of Charleston's most hospitable houses. We have inquired and we can vouch for the fact that the entertainment was segregated, but that no sowbelly was served. Maybe the best answer to Mr. Douglas is to suggest that he stay in character on the stage as Captain Queeg, a much more attractive fellow than Mr. Douglas seems to be offstage.

[From the Charleston (S. C.) Evening Post of January 27, 1955]

MAGNOLIA BLOSSOMS AND HONEYSUCKLE VINE

Paul Douglas is an actor of talent, any lapse of good manners to the contrary notwithstanding. His stage performance in Charleston last week won him applause and admiration. Then, a few days later, he told a reporter in Greensboro that "the South stinks."

It had been our intention to ignore the rudeness, but some of our readers feel Mr. Douglas should be ticked off.

Let us say that the verb he selected makes us recoil. It is a harsh, an almost nauseating word. According to Webster it means "to emit an offensive and disgusting smell or odor." It refers to things vile and foul.

Mr. Douglas could not have meant what he said. He probably had in mind some dressing room, some men's room, or some hotel room he had seen somewhere during his southern peregrinations. He could not have meant the entire South—the land of magnolia blossoms and honeysuckle vines.

Our feeling is that the Greensboro reporter happened to catch Mr. Douglas at a time when his nerves were frayed and his temper shortened by too much traveling, too much stage portrayal of a neurotic, and too much self-pity. His trade carries him barnstorming around the countryside. He yearns for a few quiet evenings at home. Who doesn't?

Mr. Douglas let his bad manners show, but we cannot detect in our heart bitterness against him. The South has survived many cataclysms and catastrophes and somehow we'll manage to ride this one out. Sticks and stones may break our bones, etc., etc., etc.

TELEVISING AND BROADCASTING HEARINGS OF COMMITTEES OF THE HOUSE

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Michigan [Mr. MEADER] is recognized for 30 minutes.

Mr. MEADER. Mr. Speaker, last evening I sat in my living room and watched the President in his press conference, on television. This is a new practice in the White House, to telecast presidential press conferences. This must be the second or third such conference televised.

I may say that I think President Eisenhower handled himself extremely well under rather adverse circumstances. With what has been going on this last week it was perfectly apparent that the reporters present at the press conference were going to ask some pretty hot questions, and they did.

It makes one wonder, occasionally, whether it is not a risky practice to answer off-the-cuff, impromptu questions on such matters as the upheaval in the Russian Communist dictatorship, the tense situation in Formosa, and other problems of great national and international import.

I call attention to that press conference of the President to remind the House that we have before us now in these early days of the 84th Congress a parallel problem: Whether or not committees of the House shall be permitted to allow the telecasting or broadcasting of their public hearings.

I raised that question last month. I introduced a resolution which is now pending before the Rules Committee of the House (H. Res. 99). It would dispel any doubt about the power of committees of the House of Representatives to permit telecasts and broadcasts of their public proceedings.

Apparently, under the interpretation of the rules by Speaker RAYBURN, House committees are now prohibited from telecasting hearings. I am going to discuss a little bit later the applicable passages of the rules of the House of Representatives which lead me to suggest that the Speaker's interpretation is not crystal clear under the present rules of the House.

This matter is one of great public concern, because it has to do with the people's knowledge of the public business.

The other body has no such rule preventing telecasting of committee hearings.

Now that the executive branch of the Government has commenced the practice of televising presidential press conferences, it seems to me that we in the House of Representatives, frequently referred to as the greatest parliamentary body in the world, should concern ourselves with the access of the public to our activities in their behalf.

Of course, the radio and television industry is very much interested in this question. I understand that an association of reporters dealing with telecasting and broadcasting has addressed a communication to the Speaker of the House of Representatives urging that he reconsider the ruling he gave in response to my parliamentary inquiry. But the public interest goes far beyond that of the broadcasting and telecasting industry.

I hold in my hand an editorial from the Ann Arbor News, my hometown newspaper, dated February 1, 1955, which is as follows:

MEADER CHALLENGES RULING AGAINST TELEVISED HEARINGS

House Speaker RAYBURN's ruling against telecasting of House committee hearings has been challenged by Representative GEORGE MEADER, of Ann Arbor, who has a resolution pending before the Rules Committee to give committees full freedom to publicize their activities.

The Senate operates under an entirely different principle in the matter, a subcommittee of the Senate Rules Committee having recommended January 7 that no restraints be put on televising Senate committee hearings. Congressman MEADER argues that unless the Rayburn ruling is set aside the public will come to know less and less about proceedings of the House, as compared with its knowledge of senatorial and Presidential activities.

In the last Congress, Republican Speaker MARTIN decided that House committees themselves should determine whether to let their activities be telecast. Under the Rayburn ruling, however, House committees

now not only are forbidden to allow telecasting or broadcasting of their hearings, but they may not admit newsreel cameras nor permit even still pictures while they are in session.

The Senate subcommittee's ruling earlier this year in favor of telecast hearings recognized criticism that TV cameras may transform hearings into carnivals, tempt lawmakers to substitute grandiloquent gestures for statesmanlike moves, and tend to cheapen the legislative process. No doubt they were recalling the McCarthy hearings, but they can hardly be taken as typical of congressional hearings and therefore are not a valid measuring stick.

The subcommittee pointed out the premise that the public is entitled to be present at all public sessions of congressional committees, and "it would seem to follow that broadcasting, televising, and photographing of such proceedings * * * are legitimate means of acquainting the public with the activity of the legislature."

An open policy on telecasting would not mean, of course, that all congressional committee hearings would be telecast or broadcast. Most of them would make pretty dull reporting or viewing. Involved would be a selected few dealing with matters of general interest. It should be noted that in the Senate subcommittee's recommendation on the subject reference is made to public sessions of congressional committees. Too few of them are public; not only are telecasters and broadcasters barred but all representatives of the press and public, while lawmakers debate spending billions in taxpayers' funds.

Representative MEADER's resolution would not open any more committee meetings to the general public, but it would be a step toward increasing citizen interest in affairs of government, and any step in that direction is a good one.

There isn't any way of measuring, but it's probable that the televised Kefauver hearings gave millions of Americans a terrific jolt, as well as a great new interest in the country's crime rate. Selected televised hearings properly conducted could spur interest in many other subjects just as important, although it might be necessary for the House and Senate to draft a code of deportment for their Members to observe during the time they are operating in front of TV cameras. The danger would still exist that voters might be unduly impressed by ham acting on the part of some Congressmen. The sound thinkers may not be the boys who shine brightest under the lights of television.

Mr. Speaker, I desire to refer to a few passages from this excellent editorial entitled "MEADER Challenges Ruling Against Televised Hearings."

Let me read the opening paragraph:

House Speaker RAYBURN's ruling against telecasting of House committee hearings has been challenged by Representative GEORGE MEADER, of Ann Arbor, who has a resolution pending before the Rules Committee to give committees full freedom to publicize their activitites.

I omit a few paragraphs and refer specifically to the following:

An open policy on telecasting would not mean, of course, that all congressional committee hearings would be telecast or broadcast. Most of them would make pretty dull reporting or viewing. Involved would be a selected few dealing with matters of general interest.

A little further on I read the following:

Representative MEADER's resolution would not open any more committee meetings to the general public, but it would be a step toward increasing citizen interest in affairs of government, and any step in that direction is a good one.

There isn't any way of measuring, but it's probable that the televised Kefauver hearings gave millions of Americans a terrific jolt as well as a great new interest in the country's crime rate. Selected televised hearings properly conducted could spur interest in many other subjects just as important, although it might be necessary for the House and Senate to draft a code of deportment for their Members to observe during the time they are operating in front of TV cameras. The danger would still exist that voters might be unduly impressed by ham acting on the part of some Congressmen. The sound thinkers may not be the boys who shine brightest under the lights of television.

Mr. Speaker, I have today addressed to the chairman of the Rules Committee, Honorable HOWARD W. SMITH, of Virginia, a letter requesting that the Rules Committee set an early date for hearings on House Resolution 99 to amend the rules of the House with respect to conduct of the proceedings of committees. This letter is as follows:

FEBRUARY 10, 1955.

Hon. HOWARD W. SMITH,
Chairman, Committee on Rules,
House of Representatives,
Washington, D. C.

DEAR COLLEAGUE: Attached is a copy of House Resolution 99 which I introduced in the House of Representatives January 20, 1955, on which day it was referred to your committee. This is to request that your committee hold hearings on that resolution as soon as practicable.

House Resolution 99 is identical with House Resolution 550 which I introduced in the 83d Congress on May 17, 1954. In a general way, this subject matter was considered by the Scott Subcommittee on Committee Procedure of which you were a member in the 83d Congress. I appeared before that subcommittee and testified in behalf of my resolution and in opposition to certain other methods of dealing with committee procedural rules.

I share the reluctance of the leadership, both under Democratic and Republican control, and the Parliamentarian, toward amendment of House rules. I therefore have kept my proposed amendments as simple as possible. However, in my judgment they include everything which needs to be done by way of amendment of House rules to improve the functioning of committees and to clarifying their authority.

The two most significant provisions are contained in paragraphs (4) and (5) on page 2 of my resolution. The first facilitates the work of committees and subcommittees by easing the quorum requirement. The second clarifies an area of existing ambiguity by expressly authorizing committees in their discretion to permit telecasting and broadcasting of their public hearings.

It is my hope that your committee will grant a prompt hearing on my resolution.

Sincerely,

GEORGE MEADER.

Mr. Speaker, there is a matter I would like to clear up which arose during a previous address I made on this subject. In response to a question by the gentleman from California [Mr. ROOSEVELT], I stated that I believed committees should retain control over the reporting of their public proceedings. He asked the question because the President in his press conference apparently has a practice of having a newsreel camera film and tape recording made of the press conference; then he or his staff selects certain passages of the press conference which they are willing to let the broadcasting and telecasting companies show on television and over the radio.

Now I understand that 23 minutes of the press conference held yesterday was shown on television last night or, at least, were available to be shown. It seemed like a pretty complete coverage of the press conference.

I answered the inquiry of the gentleman from California by saying that I thought similar control should remain in the committee of the House of Representatives. Because of the use of the words "editorial control," I feel that an explanation is in order.

Of course, if the committee elects to permit live telecasting or live broadcasting of its proceedings at the beginning of its session, there is not much they can do by way of editorial control except, that in the event they feel it necessary, they could rescind the permission granted. Now, it might be necessary to do that in the interest of fairness.

I recall one instance in the Senate where the 5-percenter inquiry had before it a witness who was testifying to the gift of certain deep freezers to persons high in Government. The counsel of that committee immediately stopped the witness and stopped the public hearing, and the committee went into executive session on the ground that the testimony about to be given was a surprise to the committee and the committee did not want innocent persons smeared by offhand, casual comments made by witnesses in their public proceedings. After hearing the witness in executive session and ascertaining the validity or the soundness of his testimony, they again went into public hearing and heard his testimony on the record in public.

It is situations of that character that I had in mind when I said that I believed it was proper for the committee continually to retain control over the conduct of its proceedings and the manner in which the news of those proceedings would be disseminated.

Now, if the committee should agree to permit telecasting or broadcasting of its proceedings only by recording or by newsreel camera, it would be possible for the committee to make the same arrangement that the President has made, namely, to release certain portions of whatever had been recorded for public use.

But I did not in any sense have in mind, as someone later who spoke on this subject seems to have understood me, that the committee would have the right to have all news reporters submit in advance the stories they were going to write so that the committee in a sense could write its own news reports. That would be farthest from my mind.

Once the committee has opened up hearings to public consumption for news reporters or for telecasters or broadcasters, it seems there would not be any effective way of controlling the material which would be televised or broadcast except by completely shutting off the privilege.

I believe also that it is possible—and I think this was referred to by the gentleman from New York [Mr. O'BRIEN], who discussed this subject—by placing

the camera in a certain way or by selecting shots of various sections of the committee hearing room to put a slant on something which is seen live over television. Of course, it would be possible, I suppose, in rebroadcasting or retelecasting to eliminate certain passages of testimony and perhaps give a distorted impression of what actually happened.

However, let me say this: I think that telecasting and broadcasting are far less susceptible to distortion than the secondhand accounts of those who were personally present as observers. It is pretty difficult to take primary evidence and make anything different of it than what actually happened.

Now, with respect to the existing rules of the House, the only thing that can be said is this: The ruling, of course, comes from rule 11.

Mr. HARRIS. Mr. Speaker, will the gentleman yield before he gets away from the other part of his discussion?

Mr. MEADER. I will be glad to yield to the gentleman from Arkansas.

Mr. HARRIS. Do I understand the gentleman to say that there is a very definite arrangement between the White House and the television and radio broadcasters giving the President and the staff authority, after the broadcast, to go over what has been said and what has been done and to delete any part of that that they desire?

Mr. MEADER. The gentleman, of course, must recognize that I do not speak for the White House. I said what I did only because of my understanding that it has been the practice in the past before telecasting not to permit direct quotation of the President. I understood when it was annnounced that this first press conference would be televised, that it had been edited by someone on the White House staff. I do not know the detailed terms of any understanding between the President and any reporters using telecasting or broadcasting of the conference.

Mr. HARRIS. Mr. Speaker, will the gentleman yield further?

Mr. MEADER. I yield.

Mr. HARRIS. It is the general understanding, however, that this new form or medium of dispersing news carries with it that authority that such portions of the film may be deleted as the editing staff of the President decides. That is generally understood, is it not?

Mr. MEADER. I believe that it is, but I have no more information on that than has the gentleman.

Mr. HARRIS. I assume that that is the basis on which the gentleman proceeds here in connection with his disagreement with the ruling of the Speaker; and certainly he has that right in interpreting the rules of the House. But does not the gentleman feel that it is far worse, if it may be so described, for a committee of the Congress to have proceedings and then that information that is to go out to the public of what actually happened to be cut out and later someone else may pick it up in a column, distort it, and give some picture that is not the true picture? Would it not be better not to have these televised programs at all, if they are going to be edited?

Mr. MEADER. Let me say to the gentleman that I am not advocating any specific treatment by a committee. I think those situations must be met as they arise. But I would say to the gentleman—and I know that he is a high-ranking member of the Committee on Interstate and Foreign Commerce—that I would trust him and his committee to deal with those situations as they arise. That is all that I am suggesting, that the committees be entrusted with discretion concerning the media through which their proceedings are reported. I am talking of their public proceedings. I agree with the gentleman heartily that leaks of executive material, premature, surreptitious releases of reports of committees before they have been approved, are a very damaging thing to the reputation of the House of Representatives.

Mr. HARRIS. Mr. Speaker, would my friend yield again?

Mr. MEADER. I yield.

Mr. HARRIS. I do not want to take too much of the gentleman's time. I do want to say that I appreciate his expression of confidence in our committee. We do know a great deal about this business of broadcasting, dealing, as we do, with the television and radio industry. The gentleman is talking about a subject vital to the American people. Of course, the Congress of the United States also is very vital to the American people. But after all, we have got to recognize, I think the gentleman would agree, that there must be decorum maintained in the House and therefore in the committees. The only way it can be maintained is to follow the rules of the House. The committees certainly should not be permitted, in my humble opinion, to proceed under one rule while the House proceeds under another.

Mr. MEADER. I think the gentleman has a real point there, and that brings me to the point that I was about to make when the gentleman asked me to yield.

This is governed by rule XI–25 (a) of the rules of the House, which reads as follows:

> The rules of the House are hereby made the rules of its standing committees so far as applicable—

Of course, that clause, "so far as applicable," is so general that it leaves a lot of doubt. But let us see what the rules of the House are right now.

Rule XXXIV–(3) reads as follows in material part:

> Such portion of the gallery of the House of Representatives as may be necessary to accommodate reporters of news to be disseminated by radio, wireless, and similar means of transmission, wishing to report debates and proceedings, shall be set aside for their use, and reputable reporters thus engaged shall be admitted thereto under such regulations as the Speaker may from time to time prescribe.

I know the gentleman has been present at many joint sessions of the House of Representatives and the Senate to hear addresses by the President on the state of the Union, or other messages, where we have had broadcasting and telecasting apparatus in the Chamber of the House. I have checked this with the Parliamentarian, and this comes under the Speaker's general powers and is stated in rule I–3 as follows:

> He shall have general control, except as provided by rule or law, of the Hall of the House, and of the corridors and passages.

Under that rule, it is my understanding, without anything in the precedents, that the Speaker has permitted the telecasting and broadcasting of proceedings in the Chamber of the House of Representatives in joint sessions and also in so-called joint meetings, which are not legal sessions of the House but meetings to hear a foreign premier or a representative of a foreign government or a distinguished citizen.

Following this logic for just a moment, if the Speaker of the House now has under the express rule I have just read, the authority to permit telecasting of proceedings in the Chamber of the House of Representatives, then it seems to me if the rules of the House are the rules of the committees either the chairman of a committee or the committee itself has the power to control the proceedings in its committee room.

Mr. HARRIS. If the gentleman will yield further, certainly the gentleman makes a point if the House is actually in session at these joint meetings to which guests are invited and during the time they are here the proceedings are televised, but the gentleman himself mentioned a moment ago that the House is not actually in session at such times. We are in recess, and we are in recess for the purpose of inviting guests to come in here. Consequently, you are not televising the actual proceedings of the House, you are televising what goes on while the House is in recess.

Mr. MEADER. I am suggesting to the gentleman that rule XXXIV–3 is broad enough to permit radio, wireless and television reporters to cover the proceedings of the House under regulations of the Speaker. Perhaps I am wrong in that interpretation. At least, let us say that the joint sessions of the Senate and the House are official meetings of the House and the Senate and have been recorded in the CONGRESSIONAL RECORD and the Journal. They are different from joint meetings where a distinguished citizen or a representative of a foreign government speaks.

I want to make one other point. This should not be a political question. It could be argued that it is, because the Speaker of this Congress and the 82d Congress, under Democratic control, ruled against telecasting, and the Speaker of the 83d Congress, under Republican control, permitted it. However, I do not think it was decided by either one of the Speakers on a political basis. I think it was their honest interpretation of the existing rules.

It can become a matter of politics only if the Democratic controlled 84th Congress ignores this problem and does not permit its Committee on Rules to consider this question and present it to the House of Representatives for a decision. Then the leadership must have the responsibility for denying to the American public full access to the public proceedings of the House of Representatives. I think that radio and television

are here to stay. We cannot turn back the clock, and I do not think we can stop the demand of the public for the knowledge of public business they can gain through these new instrumentalities any more than King Canute could stop the waves from rolling up on the seashore.

Mr. CUNNINGHAM. Mr. Speaker, if there are no special orders at this time, I ask unanimous consent that the gentleman from Michigan may have 5 additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. BASS of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. MEADER. I yield.

Mr. BASS of Tennessee. The gentleman is discussing a very interesting and a very important question. I wonder if he would clear up one question in my mind. If we open up the hearings in the committees in the House of Representatives and the other Chamber of the Congress, how are we going to correct the lies that are perpetrated upon the general public through these media in open hearings, and we have had some of the results of that in the last few weeks by the admission of at least one of the witnesses who have appeared before a committee, and who have then come back and admitted that their testimony was complete lies. How are we going to disseminate this further information to the general public unless we have these things settled before they go out over the air through radio and television?

Mr. MEADER. Let me say to the gentleman that a committee of the Congress is a privileged forum and encourages people to be quite free in their expression of opinions and in their statement of facts, but they are also under oath and can be punished for perjury. That is true whether the proceedings are telecast or not. The official record is there and the lie is there whether the public sees it through television or through newspaper accounts or by the printed record of the committee.

I do not think that the question the gentleman raises has anything to do with the means of the dissemination of the news.

Mr. BASS of Tennessee. I think it would be better if there was a preliminary investigation.

Mr. MEADER. I agree with the gentleman that it would be better to have a preliminary investigation in those instances of deliberate falsehood before the committees, and that is the avenue through which the evil at which the gentleman and I, too, are aiming, could be corrected. But I do not think that has anything to do with the means of dissemination of opinions and news.

Mr. BASS of Tennessee. If the gentleman will yield further, I would like to remind him that not on every occasion is a witness under oath so that he can be punished for lying or perjury under oath. But the situation is this. When people are damaged through testimony before a congressional committee in some of the great dramas that we have had, and which I, as a private citizen no more than 6 months ago or a year ago, would look on, these great dramas were being put out as being truths before the American public, and then within the period of a very few short months, we find out that the stars in the drama were merely lying and putting out this information to the American public through channels of public information disseminating news. I think that those questions had a great bearing on the decision of our great Speaker in his ruling before the Congress this year.

Mr. MEADER. The gentleman knows, perhaps, better than I what the Speaker's attitude on telecasting is as a matter of policy. Let me say, and I want to be completely fair about this, that the majority leader, the gentleman from Massachusetts [Mr. McCORMACK] took the trouble when this matter was first under discussion in February 1952, and this is found in the CONGRESSIONAL RECORD, volume 98, part 2, page 1570, to state that the ruling of the Speaker did not indicate his belief about whether telecasting should be permitted or not, but only his interpretation of the rules of the House. I have never heard an expression of the Speaker as to what he would like to do. I know it is terrifically important and I would hope that he would favor as a matter of policy the telecasting of committee hearings because I know that the Committee on Rules of the House is very sensitive to the views of the Speaker with respect to amending the rules of the House. I would hope as a matter of policy he would be for it.

Mr. BASS of Tennessee. I want to make myself clear and to state that the Speaker of the House never has talked to me or told me why he made this decision. I merely said I think that the attitude I have told you about prompted, perhaps, part of his decision. At any rate it bears witness for the wisdom of his decision. I do want to say this—that I certainly hope any time misinformation is sent out from this Congress such as has been sent out through these channels of public information, we will find a way to reinform the people because they are under the belief today that certain citizens in America were traitors and Communists and so forth due to the false testimony, and that a great number of people were thrown out of the Government because of this testimony as a result of the great dramas on television.

I hope that my colleagues on both sides of the aisle will help correct that kind of situation.

Mr. MEADER. I am sure the gentleman and I are not in disagreement. I am quite sure the gentleman would not take the position that it is all right for a lie to be reported through the press, but wrong to have it reported through television or radio. I think they are just media of communication. I believe the gentleman will agree with me that there should not be any lying no matter what means of news transmission prevails in the hearings.

Mr. BASS of Tennessee. That is true.

The SPEAKER pro tempore. The time of the gentleman from Michigan [Mr. MEADER] has again expired.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. McDOWELL.

Mr. GENTRY.

Mr. PATTERSON in five instances and to include extraneous matter.

Mr. BERRY and to include extraneous matter.

Mr. DAWSON of Utah.

Mr. DOLLINGER (at the request of Mr. McCORMACK) in two instances and to include extraneous matter.

Mrs. KNUTSON (at the request of Mr. McCORMACK) and to include extraneous matter.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 587. An act to provide that persons serving in the Armed Forces on January 31, 1955, may continue to accrue educational benefits under the Veterans' Readjustment Assistance Act of 1952, and for other purposes.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 57 minutes p. m.), under its previous order, the House adjourned until Monday, February 14, 1955, at 12 o'clock noon.

COMMITTEE EMPLOYEES

COMMITTEE ON AGRICULTURE

JANUARY 12, 1955.

To the CLERK OF THE HOUSE:

The above-mentioned committee or subcommittee, pursuant to section 134 (b) of the Legislative Reorganization Act of 1946, Public Law 601, 79th Congress, approved August 2, 1946, as amended, submits the following report showing the name, profession, and total salary of each person employed by it during the 6-month period from July 1, 1954, to December 31, 1954, inclusive, together with total funds authorized or appropriated and expended by it:

Name of employee	Profession	Total gross salary during 6-month period
Geo. L. Reid, Jr.	Clerk	$5,823.00
John J. Heimburger	Counsel	5,823.00
Francis M. LeMay	Staff consultant	5,823.00
Mabel C. Downey	Assistant clerk	5,795.79
Lydia Vacin	Staff assistant	3,524.96
Alice Klotz	do	3,190.36
Betty Prezioso	do	2,729.66
Arlow Hill	Clerical aid	1,525.94

Funds authorized or appropriated for committee expenditures	$50,000.00
Amount of expenditures previously reported	41,480.61
Amount expended from July 1 to Dec. 31, 1954	450.14
Total amount expended from June 11, 1953, to Dec. 31, 1954	41,930.75
Balance unexpended as of Dec. 31, 1954	8,069.25

CLIFFORD R. HOPE,
Chairman.

COMMITTEE ON APPROPRIATIONS

JANUARY 3, 1955.

To the CLERK OF THE HOUSE:

The above-mentioned committee or subcommittee, pursuant to section 134 (b) of the Legislative Reorganization Act of 1946, Public Law 601, 79th Congress, approved August 2, 1946, as amended, submits the following report showing the name, profession, and total salary of each person employed by it during the 6-month period from July 1, 1954, to December 31, 1954, inclusive, together with total funds authorized or appropriated and expended by it:

Name of employee	Profession	Total gross salary during 6-month period

CARROLL REECE,
Chairman.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

398. A letter from the Chairman, United States Advisory Commission on Information, transmitting the 10th Semiannual Report of the United States Advisory Commission on Information, dated February 1955, pursuant to section 603 of Public Law 402, 80th Congress (H. Doc. No. 87); to the Committee on Foreign Affairs and ordered to be printed.

399. A letter from the Administrator, Federal Civil Defense Administration, transmitting the quarterly report of contributions for the quarter ending December 31, 1954, pursuant to subsection 201 (i) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

400. A letter from the Clerk, United States Court of Claims, transmitting a copy of the court's order of February 8, 1955, in the case of *John J. Braund* v. *The United States* (Congressional No. 9–52), pursuant to House Resolution 700, 82d Congress; to the Committee on the Judiciary.

401. A letter from the Secretary of State, transmitting the Third Semianual Report of the Administrator of the Refugee Relief Act of 1953 (Public Law 203, 83d Cong., as amended by Public Law 751, 83d Cong., pursuant to sec. 19 of Public Law 751, 83d Cong.); to the Committee on the Judiciary.

402. A communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1955 and for other purposes, in the amount of $913,508,767, together with several proposed provisions and increases in limitations pertaining to existing appropriations (H. Doc. No. 88); to the Committee on Appropriations and ordered to be printed.

403. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to amend the Federal Crop Insurance Act, as amended"; to the Committee on Agriculture.

404. A letter from the Assistant Comptroller General of the United States, transmitting a report on the audit of the Railroad Retirement Board for the fiscal year ended June 30, 1953, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

405. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation entitled "A bill to amend the definition of 'airman' in the Civil Aeronautics Act of 1938, and for other purposes"; to the Committee on Interstate and Foreign Commerce.

406. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to authorize the Pueblos of San Lorenzo and Pojoaque in New Mexico to sell certain lands to the Navaho Tribe, and for other purposes"; to the Committee on Interior and Insular Affairs.

407. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill relating to the establishment of public recreation facilities in Alaska, and for other purposes"; to the Committee on Interior and Insular Affairs.

408. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to provide for the disposal of public lands within highway, telephone, and pipeline withdrawals in Alaska, subject to appropriate easements, and for other purposes"; to the Committee on Interior and Insular Affairs.

409. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to abolish the Old Kasaan National Monument, Alaska, and for other purposes"; to the Committee on Interior and Insular Affairs.

410. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to amend the Mineral Leasing Act for acquired lands with respect to the disposal of mineral deposits in which the United States owns a partial or future interest"; to the Committee on Interior and Insular Affairs.

411. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to authorize the Secretary of the Interior to investigate and report to the Congress on projects for the conservation, development, and utilization of the water resources of Alaska"; to the Committee on Interior and Insular Affairs.

412. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation entitled: "A bill to amend the act of January 12, 1951, as amended, to continue in effect the provisions of title II of the First War Powers Act, 1941"; to the Committee on the Judiciary.

413. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of McFarland Cockrill, and for other purposes"; to the Committee on the Judiciary.

Mr. WALTER: Committee on the Judiciary. H. R. 2941. A bill for the relief of Mrs. Elfriede Majka Grifasi; with amendment (Rept. No. 46). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASHLEY:

H. R. 3873. A bill to amend title II of the Social Security Act to provide for the payment of child's insurance benefits to certain individuals who are over the age of 18 but who are incapable of self-support by reason of permanent physical or mental disability; to the Committee on Ways and Means.

H. R. 3874. A bill to provide an additional exemption for income-tax purposes for a taxpayer or spouse who is physically or mentally incapable of caring for himself; to the Committee on Ways and Means.

By Mr. BENTLEY:

H. R. 3875. A bill to suspend for 1 year certain duties upon the importation of aluminum and aluminum alloys; to the Committee on Ways and Means.

By Mr. BLATNIK:

H. R. 3876. A bill to allow certain persons to deduct for income-tax purposes amounts paid for meals and lodging when employed away from home; to the Committee on Ways and Means.

H. R. 3877. A bill to provide for the establishment of the Look-Out Mountain National Park in the State of Minnesota; to the Committee on Interior and Insular Affairs.

By Mr. BUCKLEY:

H. R. 3878. A bill to amend section 5 of the Flood Control Act of August 18, 1941, as amended, pertaining to emergency flood control work; to the Committee on Public Works.

H. R. 3879. A bill to amend section 2 of the act of March 2, 1945, pertaining to the Columbia River at Bonneville, Oreg.; to the Committee on Public Works.

By Mr. BYRNE of Pennsylvania:

H. R. 3880. A bill to extend the application of the Classification Act of 1949 to certain positions in, and employees of, the executive branch of the Government; to the Committee on Post Office and Civil Service.

By Mr. CELLER:

H. R. 3881. A bill to provide for the representation of indigent defendants in criminal cases in the district courts of the United States; to the Committee on the Judiciary.

H. R. 3882. A bill to require the registration of certain persons who have knowledge of or have received instruction or assignment in the espionage, counterespionage, or sabotage service or tactics of a foreign government or foreign political party, and for other purposes; to the Committee on the Judiciary.

H. R. 3883. A bill to amend title 18 of the United States Code, so as to increase the penalties applicable to seditious conspiracy, advocating overthrow of government, and conspiracy to advocate overthrow of government; to the Committee on the Judiciary.

H. R. 3884. A bill to permit the naturalization of certain persons by reason of honorable service in the United States Navy prior to December 24, 1952; to the Committee on the Judiciary.

H. R. 3885. A bill to amend the act of April 29, 1941, to authorize the waiving of the requirement of performance and payment bonds in connection with certain Coast Guard contracts; to the Committee on the Judiciary.

By Mr. CHELF:

H. R. 3886. A bill to create the office of Senator at Large in the Senate of the United States for ex-Presidents of the United States; to the Committee on the Judiciary.

By Mr. CURTIS of Missouri:

H. R. 3887. A bill to exempt from tax amounts paid for admissions to certain rodeos; to the Committee on Ways and Means.

H. R. 3888. A bill to exempt from tax assessments paid by club members for capital improvements; to the Committee on Ways and Means.

H. R. 3889. A bill to repeal certain excise taxes; to the Committee on Ways and Means.

H. R. 3890. A bill to encourage the use of private benefit plans in lieu of social security by providing that individuals who are eligible for certain benefits under such plans shall not be entitled to social-security benefits or subject to social-security taxes; to the Committee on Ways and Means.

H. R. 3891. A bill to amend the Internal Revenue Code of 1954 to allow a longer period for claiming refund or credit of income tax where the claim is based upon a judicial decision affecting tax liability in a similar case; to the Committee on Ways and Means.

H. R. 3892. A bill to protect farmers and other persons who are required to treat patronage dividends as income for Federal income-tax purposes by providing for the collection of income tax at source on such dividends; to the Committee on Ways and Means.

H. R. 3893. A bill to amend section 213 of the Internal Revenue Code of 1954 to permit the deduction of medical expenses without regard to the maximum limitations of existing law; to the Committee on Ways and Means.

By Mr. DINGELL:

H. R. 3894. A bill to increase the usefulness of the St. Lawrence Seaway by increasing the width and depth of certain locks, increasing the controlling depth of channels and canals, and by providing for the deepening of certain connecting waterways in the Great Lakes area so as to permit oceangoing vessels using such seaway to reach all the Great Lakes ports; to the Committee on Public Works.

H. R. 3895. A bill to provide that the United States shall aid the States in wildlife-restoration projects, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. DONDERO:

H. R. 3896. A bill to increase the fee for executing an application for a passport from $1 to $3; to the Committee on Foreign Affairs.

By Mr. ENGLE:

H. R. 3897. A bill to relieve the Secretary of the Interior of certain reporting requirements in connection with proposed National Park Service awards of concession leases and contracts, including renewals thereof; to the Committee on Interior and Insular Affairs.

H. R. 3898. A bill to amend the Domestic Minerals Programs Extension Act of 1953 in order to further extend the program to encourage the discovery, development, and production of certain domestic minerals; to the Committee on Interior and Insular Affairs.

By Mr. FINE:

H. R. 3899. A bill to increase the rates of basic compensation of officers and employees in the field service of the Post Office Department; to the Committee on Post Office and Civil Service.

By Mr. HERLONG:

H. R. 3900. A bill to amend section 5701 (b) of the Internal Revenue Code of 1954 so as to adjust the rates of tax on cigars; to the Committee on Ways and Means.

By Mr. HIESTAND:

H. R. 3901. A bill to authorize the Housing and Home Finance Administrator to aid

business enterprises in financing improvements to reduce smoke, air pollution, and contamination; to the Committee on Banking and Currency.

By Mr. IKARD:

H. R. 3902. A bill to amend the Natural Gas Act; to the Committee on Interstate and Foreign Commerce.

By Mr. KEARNS:

H. R. 3903. A bill to provide a plan for greater opportunities of employment, for distribution to owners, management, and to all other employees certain amounts of corporate income, and for other purposes; to the Committee on Education and Labor.

By Mr. KEOGH:

H. R. 3904. A bill to amend section 7851 (a) (1) (A) of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. KLEIN:

H. R. 3905. A bill to amend the Internal Revenue Code of 1954 to provide a deduction for loss of wages or other compensation by reason of calls to jury service; to the Committee on Ways and Means.

By Mr. LAIRD:

H. R. 3906. A bill to encourage the prevention of air and water pollution by allowing the cost of treatment works for the abatement of air and stream pollution to be amortized at an accelerated rate for income-tax purposes; to the Committee on Ways and Means.

By Mr. McMILLAN:

H. R. 3907. A bill authorizing an appropriation of $5 million to repair hurricane damage along the coast of South Carolina from Georgetown to Cherry Grove Beach; to the Committee on Public Works.

H. R. 3908. A bill to provide for the regulation of fares for the transportation of schoolchildren in the District of Columbia; to the Committee on the District of Columbia.

By Mr. MERROW:

H. R. 3909. A bill to amend section 12 of the Civil Service Retirement Act of May 29, 1930, as amended, so as to provide for the payment of annuities thereunder to the widowers of female employees who die in service; to the Committee on Post Office and Civil Service.

By Mr. METCALF:

H. R. 3910. A bill to amend section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended, to provide for administration of farm programs by democratically elected farmer committeemen; to the Committee on Agriculture.

By Mr. OLIVER P. BOLTON:

H. R. 3911. A bill to amend the Internal Revenue Code of 1954 to remove the limitations on the amount of medical and dental expenses which may be deducted, to permit taxpayers using the standard deduction to deduct such expenses, and for other purposes; to the Committee on Ways and Means.

By Mr. METCALF:

H. R. 3912. A bill to establish a conservation acreage reserve, to promote conservation and improvement of agricultural soil and water resources, to stabilize farmers' income, to adjust total agricultural production to consumer and export needs, to maintain an abundant and even flow of farm commodities in interstate commerce, and for other purposes; to the Committee on Agriculture.

H. R. 3913. A bill to amend section 6 of the act of August 24, 1912, as amended, with respect to the recognition of organizations of postal and Federal employees; to the Committee on Post Office and Civil Service.

H. R. 3914. A bill to foster the cooperative agriculture education work of the extension services; to free the extension services from the performance of nongovernmental functions and political activity; and to promote economy in agricultural extension work; and for other purposes; to the Committee on Agriculture.

H. R. 3915. A bill to authorize and direct the Secretary of the Interior to transfer 10 acres of land in the Blackfeet Indian Reservation, Mont., to School District No. 1, Pondera County, Mont.; to the Committee on Interior and Insular Affairs.

H. R. 3916. A bill to amend the Federal Crop Insurance Act; to the Committee on Agriculture.

H. R. 3917. A bill to declare that the United States holds certain lands in trust for the Blackfeet Indian Tribe of Montana; to the Committee on Interior and Insular Affairs.

By Mr. MILLER of California:

H. R. 3918. A bill to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177), as amended; to the Committee on Armed Services.

By Mr. O'HARA of Illinois:

H. R. 3919. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. MULTER:

H. R. 3920. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. DOLLINGER:

H. R. 3921. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mrs. BUCHANAN:

H. R. 3922. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mrs. SULLIVAN:

H. R. 3923. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. ASHLEY:

H. R. 3924. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. BARRETT:

H. R. 3925. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. DAVIDSON:

H. R. 3926. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mrs. GRIFFITHS:

H. R. 3927. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. REUSS:

H. R. 3928. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. VANIK:

H. R. 3929. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. O'HARA of Minnesota:

H. R. 3930. A bill to provide for the maintenance of a 9-foot channel in the Minnesota River, Minn., from mile 14.2 to its mouth; to the Committee on Public Works.

By Mr. PATTERSON:

H. R. 3931. A bill to amend the Internal Revenue Code of 1954 to provide, in the case of individual taxpayers, a deduction equal to 30 percent of amounts paid as tuition for college or university students; to the Committee on Ways and Means.

H. R. 3932. A bill to continue until the close of June 30, 1956, the suspension of duties and import taxes on metal scrap, and for other purposes; to the Committee on Ways and Means.

H. R. 3933. A bill to provide for the payment and collection of wages in the District of Columbia; to the Committee on the District of Columbia.

By Mr. POWELL:

H. R. 3934. A bill to provide for the recognition of organizations of postal and other Federal employees; to the Committee on Post Office and Civil Service.

H. R. 3935. A bill to amend the Civil Service Retirement Act of May 29, 1930, to provide for officers and employees within the purview thereof additional benefits with respect to qualification for retirement and computation of principal and survivor annuities, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. PRICE:

H. R. 3936. A bill to amend the act entitled "An act to establish Civil Air Patrol as a civilian auxiliary of the United States Air Force and to authorize the Secretary of the Air Force to extend aid to Civil Air Patrol in the fulfillment of its objectives, and for other purposes"; to the Committee on Armed Services.

By Mr. RADWAN:

H. R. 3937. A bill to establish a Medical Advisory Committee on Alcoholism in the Department of Health, Education, and Welfare; to the Committee on Interstate and Foreign Commerce.

H. R. 3938. A bill to amend the Railroad Retirement Act of 1937, as amended, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. REED of New York:

H. R. 3939. A bill to restore the right of American citizens to freely own gold and gold coins; to return control over the public purse to the people; to restrain further deterioration of our currency; to enable holders of paper money to redeem it in gold coin on demand; to establish and maintain a domestic gold-coin standard; and for other purposes; to the Committee on Banking and Currency.

Mr. ROGERS of Texas:

H. R. 3940. A bill to amend the Natural Gas Act, approved June 21, 1938, as amended; to the Committee on Interstate and Foreign Commerce.

H. R. 3941. A bill to amend the Natural Gas Act, approved June 21, 1938, as amended; to the Committee on Interstate and Foreign Commerce.

H. R. 3942. A bill to amend title 18, United States Code, to penalize unauthorized use of interstate motor trucks; to the Committee on the Judiciary.

H. R. 3943. A bill to grant to veterans with service after June 27, 1950, the same exclusive preferences provided under the Boulder Canyon Project Act for veterans with service during other periods of hostility; to the Committee on Interior and Insular Affairs.

H. R. 3944. A bill to amend the act of July 31, 1947 (61 Stat. 681), and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ROOSEVELT:

H. R. 3945. A bill to amend the Outer Continental Shelf Lands Act in order to provide that revenues under the provisions of such act shall be used as grants-in-aid of primary, secondary, and higher education; to the Committee on the Judiciary.

By Mr. SHELLEY:

H. R. 3946. A bill to permit employees of the Panama Canal Company who are piloting vessels through the Panama Canal to retire under the Civil Service Retirement Act of May 29, 1930, as amended, after 20 years

of service; to the Committee on Post Office and Civil Service.

By Mr. STAGGERS:

H. R. 3947. A bill to authorize the Commodity Credit Corporation to process food commodities for donation under certain acts; to the Committee on Agriculture.

By Mr. DAVIS of Tennessee:

H. Con. Res. 74. Concurrent resolution for Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. HALE:

H. Con. Res. 75. Concurrent resolution for Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. JOHNSON of California:

H. Con. Res. 76. Concurrent resolution for Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. METCALF:

H. Con. Res. 77. Concurrent resolution for Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. PRIEST:

H. Con. Res. 78. Concurrent resolution for Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. WALTER:

H. Con. Res. 79. Concurrent resolution for Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. ZABLOCKI:

H. Con. Res. 80. Concurrent resolution for an Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. MOSS:

H. Con. Res. 81. Concurrent resolution favoring temporary continuation of certain post offices after the Postmaster General has ordered their discontinuance; to the Committee on Post Office and Civil Service.

By Mr. WICKERSHAM:

H. Con. Res. 82. Concurrent resolution proposing immediate enactment by the Congress of necessary legislation to relieve certain farmers from acreage controls and for other purposes; to the Committee on Agriculture.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. METCALF: Memorial of the House of Representatives of the Montana Legislature, memorializing the Congress of the United States to amend the North Atlantic Treaty Organization (NATO) Status of Forces Treaty; to the Committee on Foreign Affairs.

By the SPEAKER: Memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States to amend the North Atlantic Treaty Organization (NATO) Status of Forces Treaty; to the Committee on Foreign Affairs.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States relative to urging that H. R. 246, now pending in the House of Representatives be passed and approved; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H. R. 3954. A bill for the relief of Mrs. Etella Weinstock; to the Committee on the Judiciary.

By Mr. BERRY:

H. R. 3955. A bill for the relief of Dennis LeCompte; to the Committee on the Judiciary.

By Mr. BUSH:

H. R. 3956. A bill for the relief of Elizabeth Rotics Whitney; to the Committee on the Judiciary.

By Mr. BYRD:

H. R. 3957. A bill for the relief of Pauline H. Corbett; to the Committee on the Judiciary.

By Mr. CURTIS of Massachusetts:

H. R. 3958. A bill for the relief of Louis Elterman; to the Committee on the Judiciary.

By Mr. DONOVAN:

H. R. 3959. A bill for the relief of Dr. Beni Horvath; to the Committee on the Judiciary.

H. R. 3960. A bill for the relief of Maria del Carmen Gago Santana; to the Committee on the Judiciary.

H. R. 3961. A bill for the relief of Paul, Zelma, and Ivan Fulop; to the Committee on the Judiciary.

H. R. 3962: A bill for the relief of Robert Grossman; to the Committee on the Judiciary.

By Mr. FRIEDEL (by request):

H. R. 3963. A bill for the relief of Ashot Mnatzakanian and Ophelia Mnatzakanian; to the Committee on the Judiciary.

By Mr. GARY:

H. R. 3964. A bill for the relief of Kingan, Inc.; to the Committee on the Judiciary.

By Mr. HOLTZMAN (by request):

H. R. 3965. A bill for the relief of Max Moskowitz; to the Committee on the Judiciary.

By Mr. KLEIN:

H. R. 3966. A bill for the relief of Harry and Sadie Woonteiler; to the Committee on the Judiciary.

H. R. 3967. A bill for the relief of Mrs. Hedeuk Kim; to the Committee on the Judiciary.

By Mr. MADDEN:

H. R. 3968. A bill for the relief of Cornel A. Lengyel-Leahu; to the Committee on the Judiciary.

By Mr. MULTER:

H. R. 3969. A bill for the relief of Shaoul I. Khedouri, Suzette Khedouri, Franklin Khedouri, and Frances Khedouri; to the Committee on the Judiciary.

By Mr. NORBLAD:

H. R. 3970. A bill for the relief of Sang Won Liu and Yung T. Liu; to the Committee on the Judiciary.

By Mr. O'NEILL:

H. R. 3971. A bill for the relief of certain Yugoslav seamen; to the Committee on the Judiciary.

By Mr. POFF:

H. R. 3972. A bill for the relief of Anthonius Marinus Kronenburg; to the Committee on the Judiciary.

By Mr. RABAUT:

H. R. 3973. A bill for the relief of Mrs. Florence Burke; to the Committee on the Judiciary.

H. R. 3974. A bill for the relief of Bernard Joseph Gignac and Rita Gignac; to the Committee on the Judiciary.

H. R. 3975. A bill for the relief of the Reverend Boniface Lucci, O. S. B.; to the Committee on the Judiciary.

H. R. 3976. A bill for the relief of Lisa El Anid and Alfred El Anid; to the Committee on the Judiciary.

H. R. 3977. A bill for the relief of Yrjo (George) Israel Erkinpoika Haapanen; Anna Esther Alfhild Haapanen, nee Talkari; Seppo Pellervo Haapanen; Anna Lissa Hytinen, nee Haapanen; Timo Juhani Haapanen; and Eira Telervo Haapanen; to the Committee on the Judiciary.

H. R. 3978. A bill for the relief of Herman Y. Misirliyan; to the Committee on the Judiciary.

By Mr. ROONEY:

H. R. 3979. A bill for the relief of Pasquale Gentile; to the Committee on the Judiciary.

By Mr. SCHENCK:

H. R. 3980. A bill for the relief of Harry V. Shoop, Frederick J. Richardson, and Junior K. Schoolcraft; to the Committee on the Judiciary.

By Mr. SIEMINSKI:

H. R. 3981. A bill for the relief of certain Polish sailors; to the Committee on the Judiciary.

By Mr. SIKES:

H. R. 3982. A bill for the relief of James H. R. Stumbaugh; to the Committee on the Judiciary.

By Mr. SMITH of Wisconsin:

H. R. 3983. A bill for the relief of Mrs. Sigrid Jurksaitis; to the Committee on the Judiciary.

By Mr. TEAGUE of California:

H. R. 3984. A bill for the relief of Nella Norma Giorgi; to the Committee on the Judiciary.

H. R. 3985. A bill for the relief of Filippo Vitale; to the Committee on the Judiciary.

H. R. 3986. A bill for the relief of Mrs. Virginia M. Tondel; to the Committee on the Judiciary.

By Mr. WOLCOTT:

H. R. 3987. A bill for the relief of Onie Hack; to the Committee on the Judiciary.

H. R. 3988. A bill for the relief of Mehdi Saleh Eidi; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

86. By Mr. FINO: Petition of Miss G. F. Hogan, Bronx, N. Y., to amend the Social Security Act to permit dependents of unmarried workers to receive benefits; to the Committee on Ways and Means.

87. By the SPEAKER: Petition of Richard Bladel Mossman, Bettendorf, Iowa, relating to a redress of grievance involving his attainder petition against the Government; to the Committee on Rules.

88. Also, petition of Cirila Teanila VDA. De Terrobias, Bato, Catanduances, Philippine Islands, relative to her claim regarding her deceased son Jose Terrobias, case No. USVA–XC–6385173; to the Committee on Veterans' Affairs.

EXTENSIONS OF REMARKS

Wage-Payment Law for the District of Columbia

EXTENSION OF REMARKS
OF
HON. JAMES T. PATTERSON
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. PATTERSON. Mr. Speaker, today I introduced a bill in Congress to regulate the payment and collection of wages in the District of Columbia similar to the labor laws of Connecticut.

I am amazed to find that Washington, D. C., has no wage-payment law. I am offering my bill to fill this vacuum. My bill is solely designed to afford the wage-earners of the Nation's Capital the same degrees of protection now enjoyed by workers in the more progressive States like Connecticut.

As a member of the House District of Columbia Committee it is my duty to give legislative attention to correcting glaring inequities in the laws of this Federal city where the citizens are denied the right to vote on their own laws. Members of Congress who are assigned to the District of Columbia Committees have this responsibility in addition to looking after the best interests of their own States and the Nation.

My wage-payment bill if enacted will not materially affect the responsible business establishments of Washington, but is directed specifically at the fly-by-night afterhours bottle clubs and irresponsible subcontractors that pull up and leave without properly settling with their dismissed workers.

I am advised by the Minimum Wage and Industrial Safety Board that this Board can enforce a statute along the lines of my bill at a very small additional cost to their regular operations, and would be of assistance in the enforcement of minimum-wage laws in the District of Columbia.

The language and the principles incorporated in my bill were initially adopted by a committee of State labor commissioners, with the endorsements of the United States Department of Labor, the International Association of Governmental Labor Officials, the National Conference of Labor Legislation, and the American Federation of Labor.

The purpose of my bill is to require regular payment of wages at least semimonthly in Washington, D. C., and to assist employees in collecting valid claims for wages due. Where, however, by custom or contract, an employer has been accustomed to paying employees at least monthly he may continue to do so.

My bill further provides that wages shall be regularly paid in cash or by check; it provides for payment of wages in the event of discharge, voluntary quitting, or in consequence of a labor dispute, and specifies the method of payment in the event of a dispute concerning the amount of wages due.

The Minimum Wage and Industrial Safety Board of the District of Columbia would be authorized to represent employees in the collection of wages due them and unpaid.

Forty-six States now have comparable legislation; only Delaware, Florida, and the District of Columbia are without a wage-payment law.

About two-thirds of the States, including Connecticut, require prompt payment of wages to discharged employees.

Almost half of the States, including Connecticut, give similar protection to workers who quit.

Also, my bill provides that willful violations of the act are subject to punishment as misdemeanors, and liquidated damages, not to exceed the amount of unpaid wages, are provided as a means of enforcing the act.

A similar bill was passed by the Senate last year, but Congress adjourned before the House took action.

A comparable bill is now pending before the Senate District of Columbia Committee.

We Must Help Our Underpaid Postal and Federal Employees Now

EXTENSION OF REMARKS
OF
HON. ISIDORE DOLLINGER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. DOLLINGER. Mr. Speaker, the following is my statement of February 1, 1955, to the chairman and members of the Committee on Post Office and Civil Service:

On January 5, 1955, I introduced H. R. 274, which provides for an increase in pay of $1,000 per annum for postal workers.

Last year, when the postal and Federal employees pay increase bill came before us, although the increase was inadequate, I voted for the measure because it was the best that we could get at that time. It was a grave disappointment to me and a serious blow to the employees when the President vetoed the measure, for a pay raise was long overdue and they were entitled to it.

Postal and Federal employees are many years behind in catching up with the cost of living. They cannot meet their obligations or give their families adequate care or support on their present pay. They suffer hardships and anxiety.

Living costs continue to rise, the tax burden is being shifted more and more to the shoulders of the low- and middle-income families, and there is no reason why the Federal Government should not provide its postal and Federal employees with a justified wage increase so that they can enjoy a decent standard of living.

Postal workers, who have always been underpaid, need a raise of at least $1,000 per year. Likewise, the other Federal employees need the same help. This sum would bring their pay only to the level of pay they would receive from private industry for similar effort on their part. If we wish to maintain the efficiency of our postal service, then we must recognize the necessity of providing adequate pay for faithful and competent work, and this also applies to all Federal service.

It is our duty to grant this increase in pay without further delay. I trust that your committee will take prompt and favorable action so that Congress may have the opportunity to vote on the necessary legislation in the very near future.

Congressional Salaries

EXTENSION OF REMARKS
OF
HON. BRADY GENTRY
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. GENTRY. Mr. Speaker, a bill has been reported to the House which would raise congressional salaries from $15,000 to $25,000.

I oppose this legislation on two grounds. The first is that the present salary will suffice, or should be made to suffice, at least until Congress is willing to stop voting appropriations that, even with our very high taxes, prevent our Government from living within its income and result in more borrowing and more debt. The Treasury will have to borrow the money to pay any increase in salary we vote ourselves, and the taxpayers will have to pay interest on it for generations. My second objection to this legislation is that the granting ourselves of this large increase in salary on the recommendation of the President would unconsciously, if not consciously, make us more responsive to pressure groups which will insist on the passage of the remainder of the President's recommendations, much of which cannot be afforded by our people because of its great cost.

Of all salaried and wage-earning people in America, 90 percent get less than $5,000 per year and less than 1 out of each 450 receives as much as the $15,000 already paid Congressmen. A Member of Congress, however, actually receives more than $15,000. Congressmen passed a law 9 years ago giving themselves retirement at 62 with 6 or more years' service. The retirement age was later lowered to 60. Retirement pay is $200 per month after 6 years' service, $400 per month after 14 years' service, and $700 per month after 26 years' service. These payments last for life. If the pay raise passes, retirement payments will increase in proportion to the raise in salary.

One-half of the funds necessary to meet these retirement payments are contributed by Congressmen during their service, the other half being contributed by the taxpayers. Members also receive certain traveling expenses. In addition, Congressmen, under the duties of their office, may travel extensively, not only throughout the United States, but throughout the world. This is a privilege which, by reason of circumstances, is

denied most of the people of our country. In addition to the $600 income exemption given all taxpayers, Congressmen passed a law giving themselves an additional $3,000 exemption upon showing expenses of that amount while living in Washington. The Government, under a law passed by Congress, also gives each Member of Congress life insurance of $5,000, free of any cost.

There are those who say the salary here should be large enough to make one resist temptation, while some say it should be large in order that others than the rich can afford to come here. An answer to the first would seem to be that only honest people should be sent here and that honest men do not yield to temptation. Since it is contended that the salary here has not been sufficient for several years now, the charge that this condition makes it possible for only rich men to serve here seems completely disproved by the fact that only a handful of the present Members are men of even moderate means. It is entirely likely that larger salaries would result in more men of wealth trying to come to Congress, instead of fewer.

Members of Congress should be paid reasonable salaries, of course. Is not $15,000, with all the added considerations, a reasonable salary? And, is it not true that a man who loves public service and devotes his time to the discharge of the duties of his office will find that a reasonable salary is sufficient for his normal mode of living? One of the great compensations in occupying any place of public trust is the satisfaction of having served your country in a position that gives a mesaure of public recognition. The office of a Representative in the United States Congress is such a position, one that is honored in the estimation of the American people.

Under all the circumstances would it not be fair for this proposed legislation to be deferred until after the next election? Then, the position of every candidate for Congress next year can be made known on this issue and the people themselves can decide it. If that is not acceptable, would it not be only fair to at least defer passing it until late in next year's session in order that the people of the Nation may, in effect, pass judgment on it soon thereafter?

The President's state of the Union message which recommended that congressional salaries be raised, also made other recommendations which would require additional expenditures of more than $25 billion. While there will be many urging congressmen to pass the particular recommendations in which they are interested, most of these recommendations should be rejected. This is true because their passage, at a time when the Treasury is absolutely bare, can only result in the Government taking and spending more of the people's savings, thereby further increasing an already dangerous public debt.

The combined debt today of the Federal Government, State and local governments, businesses, and individuals, is more than $650 billion. It amounts to $16,000 for each American family. This debt has tripled during the last 15 years. It has increased by one-third in the last 5 years. Even more alarming is the fact that both individual debts and State debts have actually doubled within 5 years. The Federal debt alone is $280 billion.

Our taxes today are so high that a person on a salary of $250 per month must pay an income tax of $422 per year. If one makes $300 per month, the income tax is $541. These do not include social-security payments. This illustrates the severity of present-day taxes and argues strongly against our increasing them for our own benefit.

If we now give ourselves a large salary increase, will not that action make it less likely that we will resist those who will so strongly insist that we pass all others of the President's recommendations just as we did his recommendation concerning ourselves? If we do that, when will we ever have the responsible fiscal policy which has been promised and which is so vitally needed here in Washington? When will we, if ever, lighten the tax load that so heavily burdens the American people?

Lithuanian Independence: A Tribute to a Nation

EXTENSION OF REMARKS

OF

HON. JAMES T. PATTERSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 10, 1955

Mr. PATTERSON. Mr. Speaker, on this occasion I wish to say that any nation that has withstood for more than a century and a quarter continued foreign domination and oppression from a ruthless and tyrannical neighbor and still survive certainly deserves the praise of mankind. Such praise Lithuania deserves; for in spite of the fact that Lithuania has been occupied and ruthlessly dominated by Imperial Russia and Soviet Russia for periods totaling over 125 years this nation still lives.

In many respects the Lithuanian people today are ruled by a far more ruthless master than in the days prior to the foundation of the Lithuanian nationality was relegated to an inferior status in the days of Czarist Russia; but the suppression exercised by the Czar might well be termed moderate when compared to the suppression imposed by the Soviet.

In this 20th century our language has taken on a new word—genocide—which means the willful destruction of a nation and a people. Genocide is the long-range objective of the Soviet rules; it is to destroy the Lithuanian nation. Deportations of thousands of Lithuanian people and the resettlement of Russians and other Soviet peoples in Lithuania have thus far done much to change the ethnic character not only of that country but also of the other Baltic States—Latvia and Estonia. As part of its scheme of communization Soviet Russia has laid down a plan calculated to eradicate the Lithuanian national consciousness. Along with their plan to destroy the idea of Lithuanian nationality, the Communists are seeking to remold this once free and happy country in the image of the Soviet state.

That Lithuania is going through an epoch of great trial goes without saying. But the Lithuanian nation is a virile nation. It is a nation with a glorious historical past and a sense of national destiny for the future. It is a nation which has survived other oppressions and shall survive this one.

On this occasion commemorating the 37th anniversary of Lithuanian independence the message of America is a message of hope that one day the Lithuanian people shall fulfill their national destiny and that they shall again enjoy the natural right of every nation to be free, as they once were, so that they can once more resume their tasks of development and progress, and pursue the happiness they once enjoyed as a free and independent people.

John C. Hazzard

EXTENSION OF REMARKS

OF

HON. HARRIS B. McDOWELL, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 10, 1955

Mr. McDOWELL. Mr. Speaker, it is with a heartfelt sense of personal loss and with deep regret that I announce the death of John C. Hazzard who passed away on January 29, 1955.

Among the many positions held by Mr. Hazzard were the following: chairman, Public Service Commission, State of Delaware; sales manager for Warner Co., Wilmington, Del.; Democratic National Committeeman for the State of Delaware; past chairman of the State Park Commission for the State of Delaware; and Democratic candidate for Congress in 1934. Mr. Hazzard was a distinguished citizen of the State of Delaware who attained much success in business and governmental affairs.

A recognized leader among men he was a devoted and loyal servant of the State of Delaware and of the Nation. His contributions to better government were many and he performed his duties in his many positions of trust with a zeal and faithfulness.

Of his many fine personal attributes, his capacity to get along with others and the practical way in which he got things done were outstanding. He was possessed of a keen sense of humor and a friendliness that were ever present in his associations with people of all walks of life. My State and I have suffered a great loss and my warmest sympathy goes out to his family and many friends in this time of deep sorrow.

John C. Hazzard was truly a fine American, loyal Delawarean, and worthy friend.

American Participation in World Trade Fairs

EXTENSION OF REMARKS
OF
HON. JAMES T. PATTERSON
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. PATTERSON. Mr. Speaker, I wish to extend my sincere congratulations to the Honorable Sinclair Weeks, United States Secretary of Commerce, for his forthright action in establishing the new Office of International Trade Fairs in the Commerce Department and appointing Mr. Roy F. Williams, Boston industrialist, to direct the new organization set up to promote American foreign trade expansion.

Soviet Russia has been grabbing the spotlight in all the world trade fairs. This is an integral part of the Soviets' aggressive program to exploit the world markets in a vicious campaign of economic warfare.

It is gratifying that Secretary Weeks is taking forthright action to put America to the forefront in the race to win the world markets.

It is my understanding that Secretary Weeks has no intention to compete with Russia in purely propaganda assaults, but to win sales contracts by attractively presenting superior American-made products and by superior American merchandising know-how.

The Russian Government has budgeted vast funds to build the most magnificent pavilions stocked with the biggest display of exhibits at these world trade fairs. How much the Russians have grabbed in the way of sales contracts is a debatable question. But we do know the Communist traders are making inroads in the world markets strategically designed to undercut American exports and thus create unemployment in the United States. This is the same old pattern of Soviet trade before World War II when the Soviet dumping program depressed the world market.

Secretary Weeks' projected program is the first time America has seriously sought to participate in the world-trade fairs except by small-scale representations. Historically speaking, these trade fairs are long-established trade marts in Europe extending back to the early middle ages. In the days of Charlemagne the annual trade fairs were great festival occasions where the East met West over the bargaining counter.

Today West meets East but not to barter with the rich merchants of the East with their rare perfumes, spices, and silks. Today a ruthless politico-economic power, producing with slave-labor, prepares to dump cheap commodities on the world market in a shrewd exchange for the raw materials and implements of war.

In order to avoid misunderstandings about these world-trade fairs, please permit me to explain that these world fairs are not operated for the entertainment of the general public nor for the benefit of sightseeing tourists.

Admission to these trade fairs is by official invitation only. Invitations are generally limited to big buyers in the world markets, industrialists, scientists, engineers, labor leaders, diplomatists, and high political leaders.

The big-scale operations of these world-trade fairs may be pictured by just one example, namely, the 1954 International Samples Fair at Milan, Italy, where 12,336 exhibitors displayed 900,000 samples and 84,213 foreign buyers representing 109 nationalities, inspected the displays in the colorful, flag-draped pavilions of all the leading exporting nations of the world. And the forthcoming International Trade Fair at Paris will be the world's biggest affair of its kind. America will be represented by a central exhibit entitled "Main Street, U. S. A." depicting the fuller, better life that is possible with American-made products.

These world-trade fairs are the cheapest and most effective advertising methods ever devised. Here sellers meet buyers from the far corners of the earth and are afforded the opportunity of getting acquainted and dealing directly. I am going to urge the Atomic Energy Commission within bounds of security to design an exhibit portraying the peaceful use of atomic energy to be entered in the Paris fair beginning May 14 of this year.

Another exhibit at the Paris Fair will be a four-sectional exhibit of a New England manufacturing town, showing a home, a school, and a farm, and a factory. A large-scale model of a typical New England house will have a full-scale furnished kitchen, diningroom, and livingroom in which life-size models of residents are placed. Many labor-saving household devices will make it clear how well we live in New England under our great system of free enterprise. This is one of many American exhibits for the Paris Fair.

There is keen competition among businessmen for the limited space in the American pavilion. I hope to see Connecticut's skilled techniques and high-quality products displayed at all the world trade fairs during the coming months.

I will be glad to help get proposed Connecticut exhibits entered in the limited American space available. I will be happy to cooperate with Connecticut industry and labor in promoting our State's foreign-trade expansion by soliciting the Commerce Department for our equitable share of recognition in the activities programed by the new Office of International Trade Fairs.

I offer the following information relative to dates and places of the world-trade fairs selected by the Commerce Department for United States participation:

The international spring fair at Frankfort, Germany, to be held March 6–10 is the first European fair selected under the 1955 program. Over the 200 American industrial products—from an eggbeater to a tractor—will be exhibited by American companies at the central exhibit.

Trade Agreements Extension Act

EXTENSION OF REMARKS
OF
HON. COYA KNUTSON
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mrs. KNUTSON. Mr. Speaker, we have normally in the United States an agricultural machine geared to abundant production. The American farmer produces enough for himself and 18 others; crop production per acre has increased 30 percent since 1920 due to better tools and techniques, more and better fertilizer, insecticides, and fungicides, hybrid corn, improved seed varieties, rural electrification, and the conservation of soil and water resources. Production per animal has increased 50 percent since 1920. The farmer has become one of the most important consumers of the automotive industry.

But American agriculture cannot prosper if it can only produce the food and fiber needed for the people of the United States. Agriculture must export or die. In 1951 we exported around $4 billion worth of agricultural products. In 1954 we exported a little less than $3 billion worth. It is necessary that we regain our export markets. Our markets must be world markets. Our customers must be mankind. If the American agricultural industry is to produce only for the domestic market, it is faced with bankruptcy; industry is faced with shutdowns, the industrial worker with unemployment. It is certainly a fundamental fact in our economy that when the farmer cannot buy, the industrial worker cannot work.

Trade is a two-way proposition. It is fundamentally an exchange of commodities. There is only one way that a person can buy anything and that is through the sale of commodities or personal services. Foreign nations need to sell to us in order that they may have dollars to pay the American farmer for his surplus production of cotton, wheat, lard, rice, and tobacco.

The extension of the Trade Agreements Extension Act of 1955, without crippling amendments, is of vast importance to the American farmer and to the industrial worker whose well-being is dependent upon the health of the agricultural economy.

Congressman Dollinger's Report to His Constituents

EXTENSION OF REMARKS
OF
HON. ISIDORE DOLLINGER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. DOLLINGER. Mr. Speaker, at the close of the first session of the 84th Congress, I shall prepare and include in the CONGRESSIONAL RECORD my report to

my constituents. I make this statement now so that the people I represent may know that the report will reach them shortly after the close of the session, and that they will be advised of progress made and the status of legislation of interest to them.

Suspension of Import Duties on Scrap Metal

EXTENSION OF REMARKS
OF
HON. JAMES T. PATTERSON
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. PATTERSON. Mr. Speaker, today I introduced a bill to suspend the import duties on all metal scrap in order to insure an adequate supply of essential raw materials for Connecticut industries and to reduce the amount of strategic metals now going to Russia, China, and other nations in the Soviet bloc.

My bill continuing the suspension of import duties on metal scrap is only one step in the direction of protecting our industrial economy, but it is a vital step. In the 80th Congress, I was the original sponsor of legislation to take the duties off copper imports badly needed by Connecticut's great copper and brass industries. I am gratified that each succeeding Congress has voted the continued suspension of taxes on imported copper. I need hardly add that I will continue the fight to get essentials for Connecticut's industries. There is much to be done yet.

In connection with the present bill I wish to explain that scrap metal is an essential raw material, the processing of which provides work for Connecticut labor. It should be permitted to enter the United States free of duty or import tax as an essential raw material.

The tonnage of scrap metal imported is very small when compared with United States production and consumption of such metals, but this small tonnage is very important to the welfare of the waste materials industry.

Imports of lead scrap and zinc scrap are principally from Canada and other countries in the Western Hemisphere which are good customers for articles produced in Connecticut. Every ton of scrap metal imported reduces the drain on our natural resources, and insures a stable market for domestic scrap and in preventing temporary shortages of metal scrap with the accompanying excessive variations in price due to the sudden jump in the London market.

I, therefore, recommend to Congress that legislation be enacted to provide for the suspension of import duties and import taxes on all metal scrap for the fiscal year ending June 30, 1956. I feel confident that Congress will see the need for such legislation in view of the critical world situation today.

Deadline Dates for Veterans' Benefits

EXTENSION OF REMARKS
OF
HON. E. Y. BERRY
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. BERRY. Mr. Speaker, assembled here is a list of several deadline dates before which eligible veterans must act if they wish to take advantage of certain benefits.

July 25, 1956: For those now in training under the World War II GI bill, no additional education or training may be afforded after this date except for veterans who may have additional training time under the Armed Forces Voluntary Recruitment Act of 1945.

July 25, 1956: In general, no vocational rehabilitation under Public Law 16 based on World War II service may be afforded beyond this date except for certain hardship cases who are granted an additional 4 years in which to train.

July 25, 1957: No guaranty or insurance will be available on World War II GI bill loans for homes, farms or businesses after this date except for those who have established a later terminal date under the Armed Forces Voluntary Recruitment Act of 1945.

January 31, 1963: Those who start their education or training within their required 3-year period must complete their training under the Korean GI bill by this date or 8 years after discharge, whichever is earlier.

January 31, 1964: For vocational rehabilitation under Public Law 894, eligible disabled veterans of the Korean conflict must start in time to finish their rehabilitation by this date or 9 years after separation, whichever is earlier.

January 31, 1965: For GI loans on homes, farms or businesses, eligible veterans of the Korean conflict now have until this date to receive VA guaranty or insurance as a result of the President's proclamation. No further guaranties or insurance may be issued after that date on loans made to veterans under the present law.

The Korean benefit termination dates apply to eligible veterans except in certain hardship categories. For these, an additional 4 years are granted by law in which to complete their rehabilitation.

Seriously disabled veterans of the Korean conflict may apply for a $1,600 grant toward the purchase of an automobile or other conveyance, but they must apply within 3 years after they leave service or they forfeit the benefit. The President's proclamation set January 31, 1955, as the end of the Korean conflict period, during which eligibility for this grant may be established. This means injuries to be covered by the law must have been sustained in active service on or before that date.

No application deadlines prevail on the other VA administrative benefits for veterans of the Korean conflict on the wartime basis. These include: hospitalization and domiciliary care for non-service-connected disabilities; compensation for service connected disabilities or death at wartime rate; pension for total and permanent and non-service-connected disabilities or death; reimbursements of burial expenses and a flag to drape the casket.

Income Tax Deduction for College Tuition

EXTENSION OF REMARKS
OF
HON. JAMES T. PATTERSON
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 10, 1955

Mr. PATTERSON. Mr. Speaker, today I introduced a bill in Congress to amend the Internal Revenue Code of 1954 to provide, in the case of individual taxpayers, a deduction equal to 30 percent of amounts paid as tuition for college or university students.

The purpose of my bill is to afford a higher educational opportunity to many young men and women who might otherwise be denied the benefit of a college education that opens the door to successful careers in all walks of life. This is accomplished by easing the tax burden on the parent or benefactor who pays the tuition fees for college students. The taxpayer receives a 30-percent deduction of amounts paid for tuitions. Not only does this provide tax relief for low-income families struggling to send their children to college but offers an incentive to higher-income benefactors to cut their income tax by sending talented and deserving young persons to college.

From the national standpoint, the proposed legislation I am now offering will materially assist in providing a future supply of trained leadership and technical skill. In his budget message, President Eisenhower stressed the need for highly qualified scientists. Furthermore, today there is a pressing need for engineers and technologists in the rapidly expanding field of new industries and commerce. There is always the need to fill the vacancies in the older professions in this great Nation of free enterprise.

According to a recent survey conducted by the Commission on Human Resources and Advanced Training, only about 51 percent of the highest talented high-school graduates are currently enrolling in college. My tax relief proposal for education is especially designed to aid that 49 percent denied the privilege of educational advancement. The cornerstone of our Republic is our system of free enterprise, and there is no higher aspiration of free enterprise than pursuit of education.

SENATE

FRIDAY, FEBRUARY 11, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father God, in the quiet of this moment of prayer we would hush all earth's noises and make our souls a sanctuary of Thy spirit. In the midst of thronging duties and confused issues we would keep the avenues of our lives open to Thee, the source of all goodness and beauty and truth. Be Thou our chart and compass in all the complex problems of state. May we know no glory but the supreme satisfaction of rendering to the Nation and to the world our utmost service, unsullied by base motives of self-interest, as again with the golden gift of a new day we pledge at this white altar of devotion integrity of character, purity of heart, cleanness of hands, and unswerving firmness of purpose in the fulfillment of our high and holy calling as servants of the Republic. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, February 9, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed, without amendment, the following bill and joint resolution of the Senate:

S. 145. A bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; and

S. J. Res. 14. Joint resolution extending an invitation to the International Olympic Committee to hold the 1960 Olympic games at Detroit, Mich.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 587) to provide that persons serving in the Armed Forces on January 31, 1955, may continue to accrue educational benefits under the Veterans' Readjustment Assistance Act of 1952, and for other purposes, and it was signed by the President pro tempore.

REPORTS OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Pursuant to the order of the Senate of February 9, 1955,

Mr. GREEN, from the Committee on Rules and Administration, on February 10, 1955, submitted the following favorable reports:

S. Con. Res. 9. Concurrent resolution to print for the use of the Committee on the Judiciary additional copies of certain parts of the hearings on interlocking subversion in Government departments; without amendment;

S. Res. 56. Resolution to print for the use of the Committee on the Judiciary additional copies of the report entitled "The Korean War and Related Matters"; without amendment;

S. 913. A bill to eliminate the need for renewal of oaths of office upon change of status of employees of the Senate; with an amendment (Rept. No. 31);

S. Res. 40. Resolution continuing the authority of the Committee on Labor and Public Welfare to investigate employee welfare and pension plans and funds subject to collective bargaining; with an amendment (Rept. No. 29);

S. Res. 41. Resolution authorizing additional expenditures and the employment of further temporary assistants by the Committee on Government Operations; with an amendment (Rept. No. 30); and

S. Res. 20. Resolution authorizing the employment of additional personnel by the Committee on Post Office and Civil Service and appropriating funds therefor; with an additional amendment (Rept. No. 28).

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine business, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

AMENDMENT OF DEFINITION OF "AIRMAN" IN CIVIL AERONAUTICS ACT OF 1938

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the definition of "airman" in the Civil Aeronautics Act of 1938, and for other purposes (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

REPORT OF UNITED STATES ADVISORY COMMISSION ON INFORMATION

A letter from the Chairman, United States Advisory Commission on Information, transmitting, pursuant to law, the 10th semiannual report of that Commission, dated February 1955 (with an accompanying report); to the Committee on Foreign Relations.

AUDIT REPORT ON RAILROAD RETIREMENT BOARD

A letter from the Assistant Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Railroad Retirement Board for the fiscal year ended June 30, 1953 (with an accompanying report); to the Committee on Government Operations.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A letter in the nature of a memorial from Henry A. Alexander, of Atlanta, Ga., remonstrating against the continuation of the reading of Washington's Farewell Address (with an accompanying paper); to the Committee on Rules and Administration.

The petition of Carribel Beck Holmes, of Baton Rouge, La., praying for a redress of grievances (with accompanying papers); to the Committee on the Judiciary.

CONSTRUCTION OF THE NAVAHO PROJECT—JOINT RESOLUTION OF NEW MEXICO LEGISLATURE

Mr. ANDERSON. Mr. President, I have received Senate Joint Memorial No. 4 from the 22d Legislature of the State of New Mexico.

The memorial, introduced by Mr. Guido Zecca, asks the Congress to enact legislation authorizing the Secretary of the Interior to construct, operate, and maintain the Navaho project as one of the participating projects in the upper Colorado River storage project.

I present the joint memorial, and ask unanimous consent that it be printed in the RECORD.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The joint resolution was referred to the Committee on Interior and Insular Affairs, as follows:

Senate Joint Memorial 4

Memorializing the Congress of the United States of America to enact legislation authorizing the Secretary of the Interior to construct, operate, and maintain the Navaho project as one of the participating projects in the Colorado River storage project

Whereas there has been introduced in the 84th Congress of the United States a bill to authorize the Secretary of the Interior to construct, operate, and maintain the Colorado River storage project and participating projects; and

Whereas the foregoing proposed legislation includes the Navaho project in New Mexico, as one of the participating projects, for the irrigation of reservation and nonreservation lands located on the Navaho Indian Reservation and adjacent thereto; and

Whereas the Navahos are at present a low-income, underprivileged group, numbering more than 75,000, whose population is steadily increasing, and whose economic condition is steadily declining because of the extreme drought existing on the Navaho Reservation; and, recognizing that where a group of people exist under such adverse economic conditions as do our neighbors, the Navahos, it affects the whole economy of the surrounding area; and

Whereas the proposed Navaho project will irrigate reservation lands which will provide for approximately one-fifth of the present Navaho Indian population with a living standard equal to that of non-Indian agriculturists within the area and will greatly improve and better the economic condition of our neighbors, the Navahos: Now, therefore, be it

Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be and is hereby respectfully memorialized and urged to enact legislation authorizing the Secretary of the Interior to construct, operate, and maintain the Navaho project as one of the participating projects in the Colorado River storage project; and be it further

Resolved, That copies of this memorial be sent to each Senator and Member of the House of Representatives from New Mexico.

JOE M. MONTOYA,
President of the Senate.
EDWARD G. ROMERO,
Chief Clerk of the Senate.
DONALD D. HALLAM,
Speaker, House of Representatives.
FLOYD CROSS,
Chief Clerk, House of Representatives.

Approved by me this 31st day of January 1955.

JOHN F. SIMMS,
Governor, State of New Mexico.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce:

S. 456. A bill relating to the regulation of nets in Alaska waters; with amendments (Rept. No. 32).

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POTTER:

S. 1030. A bill to increase the fee for executing an application for a passport or a visa from $1 to $3; to the Committee on Foreign Relations.

S. 1031. A bill to extend the authority of the American Battle Monuments Commission to all areas in which the Armed Forces of the United States have conducted operations since April 6, 1917, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1032. A bill to authorize the modification of the existing projects for the Great Lakes connecting channels above Lake Erie; to the Committee on Public Works.

(See the remarks of Mr. POTTER when he introduced the last above-mentioned bill, which appear under a separate heading.)

S. 1033. A bill for the relief of Ann Arbor Construction Co.;

S. 1034. A bill conferring jurisdiction upon the United States District Court for the Eastern District of Michigan to hear, determine, and render judgment upon certain claims of Mr. and Mrs. Donald D. Parrish;

S. 1035. A bill for the relief of Ambrose Anthony Fox;

S. 1036. A bill for the relief of Gust Kostas Kountoupis;

S. 1037. A bill for the relief of Chung Herp Youn; and

S. 1038. A bill for the relief of Dr. Lu Ho Tung and his wife, Ching-hsi (nee Tsao) Tung; to the Committee on the Judiciary.

By Mr. POTTER (for himself, Mr. KUCHEL, Mr. ERVIN, Mr. DOUGLAS, and Mr. MARTIN of Pennsylvania) (by request):

S. 1039. A bill to incorporate the Military Order of the Purple Heart, a national organization of combat wounded composed solely of Purple Hearters; to the Committee on the Judiciary.

By Mr. BEALL:

S. 1040. A bill to provide for a commission to regulate the transportation of passengers by common carriers operating over regular routes within the metropolitan area of Washington, D. C., and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. JOHNSTON of South Carolina:

S. 1041. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide for the inclusion in the computation of accredited service of certain periods of service rendered States or instrumentalities of States, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. KEFAUVER:

S. 1042. A bill for the relief of Angel Feratero Madayag; to the Committee on the Judiciary.

By Mr. DANIEL (for himself, Mr. PAYNE, Mr. PASTORE, and Mr. O'MAHONEY):

S. 1043. A bill to amend title 18 of the United States Code by adding a new chapter defining crimes and providing penalties for possession, transportation, and sale of narcotics, and for other related purposes; to the Committee on the Judiciary.

By Mr. BIBLE:

S. 1044. A bill for the relief of Edward Naarits; to the Committee on the Judiciary.

By Mr. BIBLE (for himself, Mr. ANDERSON, Mr. CHAVEZ, Mr. DUFF, Mr. MALONE, Mr. MARTIN of Pennsylvania, and Mr. MUNDT):

S. 1045. A bill to make permanent certain temporary judgeships; to the Committee on the Judiciary.

By Mr. HENNINGS (for himself, Mr. SYMINGTON, and Mr. DOUGLAS):

S. 1046. A bill for the relief of Dr. Cristjo Cristofv, his wife Jordana Dilova Cristofv, and his children George and Daphne-Kremena Cristofv; to the Committee on the Judiciary.

(See the remarks of Mr. HENNINGS when he introduced the above bill, which appear under a separate heading.)

By Mr. GORE:

S. 1047. A bill to provide for the construction of a Veterans' Administration hospital, and for other purposes; to the Committee on Labor and Public Welfare.

S. 1048. A bill to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the construction of highways, and for other purposes; to the Committee on Public Works.

(See the remarks of Mr. GORE when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. GORE (for himself and Mr. MONRONEY):

S. 1049. A bill authorizing the appropriation of funds for the construction by the Atomic Energy Commission of an experimental facility for the production of electric power from nuclear fission; to the Joint Committee on Atomic Energy.

(See the remarks of Mr. GORE when he introduced the above bill, which appear under a separate heading.)

By Mr. THYE:

S. 1050. A bill to provide for the establishment of the Look-Out Mountain National Park in the State of Minnesota; to the Committee on Interior and Insular Affairs.

By Mr. ELLENDER (by request):

S. 1051. A bill to amend section 8a (4) of the Commodity Exchange Act, as amended; to the Committee on Agriculture and Forestry.

By Mr. LANGER:

S. 1052. A bill to authorize projects for the improvement of the Great Lakes connecting channels above Lake Erie; to the Committee on Public Works.

By Mr. MANSFIELD:

S. 1053. A bill to amend the act authorizing the Secretary of the Interior to lease certain lands in the State of Montana to the Phillips County Post of the American Legion in order to authorize the renewal of such lease; to the Committee on Interior and Insular Affairs.

By Mr. SMITH of New Jersey:

S. 1054. A bill for the relief of Helene Kaljuse; and

S. 1055. A bill for the relief of Domenico Leonardi and his wife, Clara Corradi Leonardi; to the Committee on the Judiciary.

By Mr. THURMOND (for himself and Mr. JOHNSTON of South Carolina):

S. 1056. A bill for the relief of Jirair Mazartzian and his wife Gertrude Mazartzian and their children Mario Mazartzian and Aram Mazartzian; to the Committee on the Judiciary.

By Mr. SYMINGTON:

S. 1057. A bill to permit the consolidation of District of Columbia banks and the conversion of national banks into and the consolidation of national banks with District of Columbia banks; to the Committee on the District of Columbia.

(See the remarks of Mr. SYMINGTON when he introduced the above bill, which appear under a separate heading.)

By Mr. HUMPHREY:

S. 1058. A bill to allow certain persons to deduct for income-tax purposes amounts paid for meals and lodging when employed away from home; to the Committee on Finance.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. ELLENDER (by request):

S. 1059. A bill to amend section 8 (e) of the Soil Conservation and Domestic Allotment Act; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. ELLENDER when he introduced the above bill, which appear under a separate heading.)

By Mr. SPARKMAN (for himself and Mr. CAPEHART):

S. J. Res. 42. Joint resolution to amend the National Housing Act, as amended; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. BARRETT:

S. J. Res. 43. Joint resolution authorizing the Secretary of the Interior to institute a comprehensive study for the purpose of assisting the coal industry develop new markets and a greater utilization of our coal resources and byproducts derived therefrom; to the Committee on Interior and Insular Affairs.

IMPROVEMENT OF GREAT LAKES CONNECTING CHANNELS ABOVE LAKE ERIE

Mr. POTTER. Mr. President, based on recommendations by the Chief of Army Engineers, after studies and findings by the Board of Engineers for Rivers and Harbors, I introduce, for appropriate reference, a bill to provide for the improvement and the deepening of the Great Lakes connecting channels above Lake Erie.

This bill authorizes work in the navigation channels between Lakes Superior and Huron, Lakes Huron and Michigan, and Lakes Huron and Erie, and includes the St. Marys River, Straits of Mackinac, St. Clair River, Lake St. Clair, and Detroit River.

The board found that the controlling depths of these channels should be 27 feet, the same as that authorized for the St. Lawrence Seaway from Lake Erie to Montreal.

Mr. President, the start of this work is vital to bringing closer the date when the American industrial heartland will be directly connected with the ports of the world.

I envision the day, Mr. President, when this waterway will be considered to be

one of the greatest steps forward ever taken in the economic development of the Nation.

The initial cost of this enterprise and the annual maintenance expense will be returned many times in savings to the American taxpayer.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1032) to authorize the modification of the existing projects for the Great Lakes connecting channels above Lake Erie, introduced by Mr. POTTER, was received, read twice by its title, and referred to the Committee on Public Works.

DR. CRISTJO CRISTOFV, HIS WIFE, AND CHILDREN

Mr. HENNINGS. Mr. President, on behalf of myself, my colleague the junior Senator from Missouri [Mr. SYMINGTON], and the Senator from Illinois [Mr. DOUGLAS], I introduced, for appropriate reference a bill to provide for permanent residence in the United States for Dr. Cristjo Cristofv and his wife and two children.

The Cristofv family has been subjected to so many harrowing experiences and has been the victim of so many false charges that I earnestly hope the Congress will act to approve this bill without delay, so the family may find, at long last, a haven in our land of freedom.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1046) for the relief of Dr. Cristjo Cristofv, his wife Jordana Dilova Cristofv, and his children George and Daphne-Kremena Cristofv, introduced by Mr. HENNINGS (for himself, Mr. SYMINGTON, and Mr. DOUGLAS), was received, read twice by its title, and referred to the Committee on the Judiciary.

FEDERAL AID IN CONSTRUCTION OF HIGHWAYS

Mr. GORE. Mr. President, I introduce, for appropriate reference, a bill to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the construction of highways, and for other purposes.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1048) to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the construction of highways, and for other purposes, introduced by Mr. GORE, was received, read twice by its title, and referred to the Committee on Public Works.

Mr. GORE. Mr. President, this bill would increase the authorization for the Federal-aid highway program. It provides for the appropriation of $500 million for projects on the Federal-aid primary highway system, $325 million for projects on the Federal-aid secondary system, $275 million for Federal aid on urban projects; and an additional $500 million for the interstate system.

The Subcommittee on Public Roads, of which I am chairman, by virtue of assignment by the senior Senator from New Mexico [Mr. CHAVEZ], will begin hearings on this bill and related bills on Monday, February 21, 1955.

CONSTRUCTION OF EXPERIMENTAL FACILITIES FOR THE PRODUCTION OF ELECTRIC POWER FROM NUCLEAR FISSION

Mr. GORE. Mr. President, on behalf of myself and the Senator from Oklahoma [Mr. MONRONEY], I introduce, for appropriate reference, a bill authorizing the appropriation of funds for the construction by the Atomic Energy Commission of the experimental facility for the production of electric power from nuclear fission.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1049) authorizing the appropriation of funds for the construction by the Atomic Energy Commission of an experimental facility for the production of electric power from nuclear fission, introduced by Mr. GORE (for himself and Mr. MONRONEY), was received, read twice by its title, and referred to the Joint Committee on Atomic Energy.

Mr. GORE. Mr. President, I invite the attention of Senators to the fact that 6 months after the enactment of the Atomic Energy Act of 1954, no license has been granted to a private concern for the construction of a reactor to produce power. The Commission has informed the Joint Committee on Atomic Energy that no application has been made.

I would not close the door to private industry to move into this field. Indeed, I would keep it ajar, and invite and encourage private industry to come in.

I believe that one effective way of encouraging the entrance of private industry into this field is for the Government to build an experimental plant to point the way. Scientists have made rapid progress in recent months, and inform us that they believe such an undertaking is now feasible. The bill authorizes the Atomic Energy Commission to proceed with such a program, and authorizes the making of an appropriation for that purpose.

CONVERSION AND CONSOLIDATION OF NATIONAL BANKS WITH DISTRICT OF COLUMBIA BANKS

Mr. SYMINGTON. Mr. President, I introduce for appropriate reference a bill to permit the consolidation of District of Columbia banks and the conversion of national banks into and the consolidation of national banks with District of Columbia banks.

An identical bill, H. R. 396, was introduced in the House of Representatives on January 5, 1955, by Representative OLIN E. TEAGUE, of Texas.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1057) to permit the consolidation of District of Columbia banks and the conversion of national banks into and the consolidation of national banks with District of Columbia banks, introduced by Mr. SYMINGTON, was received, read twice by its title, and referred to the Committee on the District of Columbia.

DEDUCTION FOR INCOME-TAX PURPOSES OF AMOUNTS PAID FOR CERTAIN MEALS

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference a bill to allow certain persons to deduct for income-tax purposes amounts paid for meals and lodging when employed away from home. The purpose of the bill is to correct an inequity in existing tax legislation. Our tax laws today allow persons engaged in business to deduct from their income expenses in connection with activities they engage in pursuant to their business responsibilities. Thus meals and lodging expenses incurred by business people when on a business trip are deductible. The same rule does not apply, however, to working men and women who spend money for meals and lodging when they are employed away from their homes. This particularly affects adversely building trade employees who must travel away from home in pursuit of employment. I ask unanimous consent to have printed in the RECORD a letter I received from William D. Gunn, secretary-treasurer of the Minnesota State Federation of Labor, together with a copy of a letter he submitted to me which he received from the district director of the Internal Revenue Service.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the letters will be printed in the RECORD.

The bill (S. 1058) to allow certain persons to deduct for income-tax purposes amounts paid for meals and lodging when employed away from home, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Finance.

The letters presented by Mr. HUMPHREY are as follows:

MINNESOTA STATE FEDERATION OF LABOR,
January 29, 1955.

Hon. HUBERT H. HUMPHREY,
United States Senate,
Washington, D. C.

DEAR SENATOR HUMPHREY: We enclose a copy of Resolution No. 74 of the last convention of the Minnesota State Federation of Labor. We also enclose a copy of a letter from the Internal Revenue Service with respect to the position of that agency on the subject matter embraced in the resolution.

The problem is particularly significant with respect to construction workers who by the very nature of their employment work only short periods of time for particular employers and often are required to leave their hometown and family in search of employment.

Under the present law, when a construction worker living in Hibbing, for example, is required to leave Hibbing because of lack of construction work in Hibbing and go to

some other city for employment, he is not permitted to deduct the additional expenses involved in taking this away from home employment. In other words, the construction worker will necessarily have to provide for personal expenses of his family in Hibbing, and in addition he will have to provide for his personal expenses in the new location of employment. Nevertheless, the worker is not permitted to deduct the additional expenses incurred.

The problem of the construction and similar worker is peculiar. There is no good reason for the construction worker to move his home and family every time he is hired for a different construction job, because there is ordinarily no permanency to the new employment. This is why we feel that some consideration should be given to this kind of worker so that he will be permitted to offset against his income the additional amount of personal expense necessarily incurred in maintaining his permanent residence as well as his temporary dwelling place while engaged in work away from home.

We hope that you will agree with our view that the present law is unfair in this respect, and that you will sponsor an amendment to the law designed to correct the inequity.

Very truly yours,

WILLIAM D. GUNN.

JANUARY 14, 1955.

Mr. DONALD C. SAVELKOUL,
Care of Minnesota State Federation of Labor, St. Paul, Minn.

DEAR MR. SAVELKOUL: This is in reply to your letter of December 17, 1954, in which inquiry is made relative to the deductibility of travel expenses for Federal income-tax purposes.

You state that the following resolution was adopted at the recent convention of the Minnesota State Federation of Labor:

"Whereas building and construction tradesmen are frequently called upon or find it necessary to work out of town away from home; and

"Whereas when employed on such jobs they incur considerable additional expenses in addition to maintaining their permanent home; and

"Whereas the interpretation of an existing law issued by the Director of Internal Revenue does not permit most of these tradesmen to list out-of-town expenses as allowable deductions on income tax; and

"Whereas most employees of Government and in private business in practically every field are allowed certain expenses when they must leave their home in course of employment: Therefore be it

"*Resolved*, That the Minnesota State Council of Carpenters and Joiners take action requesting the proper legislators to do everything possible to have this unfair situation corrected, either by legislation or a more favorable interpretation of existing laws."

You wish to be advised what interpretation of the Federal Income Tax Division would not permit employees to deduct expenses as indicated in the resolution.

Generally, the question of the deductibility of subsistence costs incurred during periods of employment away from the taxpayers' customary places of residence becomes a matter of concern to two principal classes of taxpayers whose income is derived from salaries and wages:

(1) Those taxpayers who are regular and continuing employees of their employers and who are assigned to temporary jobs away from their established homes or regular posts of duty, with the expectation that they will return to their established homes upon completion of each such temporary assignment or that they will then proceed to other temporary assignments of work away from their homes in pursuance of the business of their employers; and

(2) Taxpayers who voluntarily terminated or sever their employment or business connections in one locality to accept employment for indefinite periods of time in other localities.

It is the position of the Commissioner of Internal Revenue and the courts that the cost of subsistence incurred by taxpayers described in (1) above, while they are temporarily away from their homes in pursuance of the business of their employers, may be deducted from gross income under section 162 of the Internal Revenue Code of 1954. *Leach* v. *Commission* (12 TC 20 (ACQ)).

In the case of taxpayers who have incurred subsistence expenses under circumstances described in (2) above, it is the position of the Commissioner of Internal Revenue and of the Director of Internal Revenue at St. Paul, Minn., that the cost of such subsistence is not deductible from gross income for Federal income tax purposes. Such position is based upon the decision of the Supreme Court of the United States in the case of *Commissioner of Internal Revenue* v. *J. N. Flowers* (326 U. S. 465), and upon subsequent court decisions which have consistently followed the rules laid down by the Supreme Court with respect to this issue in its decision in the J. N. Flowers case.

In view of the weight of the decisions bearing on this issue, this office will continue to maintain its position held heretofore that, in cases where taxpayers have terminated their employment or severed their business connections in one locality to accept employment at another locality, the cost of their subsistence during the period of such employment is not deductible, although the taxpayer may continue to maintain a residence for himself or his family at a location removed from his employment.

The term "home" in connection with traveling expenses is distinguished from domicile or legal residence. "Home" in such cases, has been construed to mean the taxpayer's "post of duty," "principal place of business," or "place of employment."

Very truly yours,

V. C. MULLANEY,
Acting Chief, Review and Information Section.

AMENDMENT OF PROVISION OF SOIL CONSERVATION AND DOMESTIC ALLOTMENT ACT, RELATING TO CERTAIN INCREASED PAYMENTS

Mr. ELLENDER. Mr. President, by request, I introduce, for appropriate reference, a bill to amend section 8 (e) of the Soil Conservation and Domestic Allotment Act. I ask unanimous consent that a brief explanatory statement of the bill, prepared by me, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received, and appropriately referred; and, without objection the statement will be printed in the RECORD.

The bill (S. 1059) to amend section 8 (e) of the Soil Conservation and Domestic Allotment Act, introduced by Mr. ELLENDER (by request), was received read twice by its title, and referred to the Committee on Agriculture and Forestry.

The statement presented by Mr. ELLENDER is as follows:

STATEMENT BY SENATOR ELLENDER

This bill would repeal the provision of the Soil Conservation and the Domestic Allotment Act which provides for increasing the total payment to any person under that act where the total payment is less than $200. This provision was incorporated in the act at a time when the principal purpose of payments under that act was to improve the economic position of farmers. At present the principal purpose is to encourage conservation practices.

The Department of Agriculture feels that these small payment increases do not contribute materially to effectuating this purpose and are no longer desirable. The Department points out that more than 90 percent of all payments under the program are under $200, and that the small size of a payment does not necessarily indicate that the recipient is a small farmer.

AMENDMENT OF NATIONAL HOUSING ACT, RELATING TO INCREASED MORTGAGE INSURANCE AUTHORIZATION

Mr. SPARKMAN. Mr. President, on behalf of myself, and the Senator from Indiana [Mr. CAPEHART], I introduce, for appropriate reference, a joint resolution to amend the National Housing Act. This resolution has but a single purpose—to increase the mortgage insurance authorization of FHA by an amount deemed sufficient to allow it to operate until June 30, 1955. It has been estimated by the Housing and Home Finance Administrator, with the approval of the Bureau of the Budget, that $1½ billion of authorization will be required for that purpose.

In the Housing Act of 1954, approved on August 7, 1954, the Congress increased the FHA mortgage insurance authorization by $2 billion. $500 million of this amount was to be made available to FHA only with approval of the President. Such action was taken by the President on December 28, 1954. On December 31, 1954, FHA had an authorization balance of approximately $602.9 million. Net use of this authorization during December 1954 amounted to about $298.6 million. Information now available indicates that use of the authorization in January and February 1955 will continue at about the same rate. On the basis of budget estimates of mortgage insurance applications and commitment activity, about $1,466,000,000 in authorization will be used between January 1, 1955, and June 30, 1955.

In order to make it possible to carry out the contemplated FHA program, the proposed joint resolution would increase FHA's mortgage insurance authorization by $1.5 billion. This would be accomplished under the resolution by amending section 217 of the National Housing Act, as amended. This section presently contains the mortgage insurance authorization for all programs administered by FHA under the National Housing Act, with the exception of the home improvement and repair program carried on under title I of that act.

It is common knowledge that the rate of building activity assisted by FHA mortgage insurance in recent months has shown a substantial increase over the early months of 1954. The continuance of this increased activity is of great importance to the many persons and segments of industry which make up the building industry. It should also be kept in mind that considerable advance planning is required in the building industry.

For these reasons, and in order to avoid an artificially stimulated rush for applications for FHA mortgage insurance

just prior to the presently expected date of exhaustion of mortgage insurance authorization, it is essential that the Congress take immediate action on this resolution.

The President has already indicated his intention of asking for an additional $5 billion of mortgage insurance authorization for FHA to cover the period from July 1, 1955, through June 30, 1956. The committee intends to examine this request thoroughly in its relationship to the total amount of FHA mortgage insurance authorization outstanding. However, it appears that the proposed increase in mortgage insurance authorization contemplated in this joint resolution is necessary and should receive early attention.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 42) to amend the National Housing Act, as amended, introduced by Mr. SPARKMAN (for himself and Mr. CAPEHART), was received, read twice by its title, and referred to the Committee on Banking and Currency.

SUPPLEMENTARY BENEFITS TO RECIPIENTS OF PUBLIC ASSISTANCE—CHANGE OF REFERENCE

Mr. ELLENDER. Mr. President, under date of January 21, Senate bill 627, to provide supplementary benefits for recipients of public assistance and benefits for others who are in need through the issuance of certificates to be used in the acquisition of surplus agricultural food products, was referred to the Committee on Agriculture and Forestry. Inasmuch as the bill deals with social security, and the Committee on Finance has handled bills of this character in the past, I now ask that the Senate Committee on Agriculture and Forestry be discharged from the further consideration of the bill, and that the bill be referred to the Committee on Finance.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ADDITIONAL EXPENDITURES AND PERSONNEL FOR COMMITTEE ON BANKING AND CURRENCY

Mr. SPARKMAN submitted the following resolution (S. Res. 57), which was referred to the Committee on Banking and Currency:

Resolved, That, in holding hearings, reporting such hearings, and making studies as authorized by section 134 of the Legislative Reorganization Act of 1946 and pursuant to its jurisdiction under rule XXV (1) (d) 4 of the Standing Rules of the Senate, the Committee on Banking and Currency, or any duly authorized subcommittee thereof, is authorized until January 31, 1956, to make such expenditures, and to employ upon a temporary basis such investigators, and such technical, clerical, and other assistants, as it deems advisable; and with the consent of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $100,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. HENNINGS:

Address delivered by him before the Lawyers Association of St. Louis on December 3, 1954.

By Mr. BEALL:

Address delivered by Senator MARTIN of Pennsylvania on February 10, 1955, at a Lincoln Day dinner at Hagerstown, Md.

By Mr. PAYNE:

Address delivered by Senator BENDER at the Lincoln Day meeting at Portsmouth, Ohio.

NOTICE OF HEARINGS ON NOMINATIONS OF MEMBERS OF UNITED STATES ADVISORY COMMISSION ON EDUCATIONAL EXCHANGE

The PRESIDENT pro tempore. In his capacity as a Senator from Georgia, the Chair desires to say that the Senate received today the nominations of three persons, whose names appear elsewhere in the RECORD of this date, to be members of the United States Advisory Commission on Educational Exchange. Notice is hereby given that these nominations will be considered by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

NOTICE OF HEARING ON CERTAIN NOMINATIONS BY COMMITTEE ON THE JUDICIARY

Mr. HENNINGS. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that public hearings have been scheduled on the following nominations for Friday, February 25, 1955, at 10:30 a. m., in room 424, Senate Office Building:

William E. Miller, of Tennessee, to be United States district judge for the middle district of Tennessee.

M. Frank Reid, of South Carolina, to be United States marshal for the western district of South Carolina.

At the indicated time and place all persons interested in the above nominations may make such representations as may be pertinent. The subcommittee consists of myself, chairman, the Senator from Texas [Mr. DANIEL], and the Senator from Utah [Mr. WATKINS].

THE TREATY WITH NATIONALIST CHINA

Mr. LEHMAN. Mr. President, the New York Times this morning, on page 1, carried a significant article relating to the Formosa Treaty. The headlines read as follows: "Formosa says United States pledged to defend all offshore isles. Foreign Minister Yeh's statement is held to contradict 'understandings' insisted on by Senate in ratifying treaty."

This article may be prophetic of serious complications to come because of what I consider the most unfortunate failure of the Senate to adopt formal reservations to the Chiang Kai-shek treaty, as strongly urged by me and by a number of my associates. I ask unanimous consent to have the news article printed in the body of the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FORMOSA SAYS UNITED STATES PLEDGED TO DEFEND ALL OFFSHORE ISLES—FOREIGN MINISTER YEH'S STATEMENT IS HELD TO CONTRADICT UNDERSTANDINGS INSISTED ON BY SENATE IN RATIFYING TREATY

WASHINGTON, February 10.—Nationalist China's Foreign Minister asserted today that the United States was pledged to defend all the offshore Chinese islands in addition to Formosa and the Pescadores.

George Yeh made this comment as he paid farewell calls on Secretary of State John Foster Dulles and on Walter S. Robertson, Assistant Secretary of State for Far Eastern Affairs. Mr. Yeh, who has been in the United States since last October, is returning to Taipei tomorrow.

He said he had discussed with Mr. Dulles "a few matters of common interest." His remark on a United States pledge to defend the offshore islands, including Quemoy and Matsu, appeared to contradict the understandings that the Senate insisted upon in ratifying the Formosa defense treaty last night by a vote of 64 to 6.

One of these understandings, concurred in by Mr. Dulles although it is separate from the treaty, provides that the United States will not be obliged to take military action in defense of the Nationalists beyond Formosa and the Pescadores unless the treaty is specifically amended.

President Eisenhower, however, under the terms of the congressional resolution adopted January 28, can order the Seventh Fleet and its carrier-based planes to fight for Quemoy and Matsu if he deems those positions essential to the defense of Formosa.

Mr. Yeh appeared to be suggesting that the President had promised the Nationalists such assistance. Mr. Eisenhower has consistently refused, when pressed by Generalissimo Chiang Kai-shek, to commit the United States publicly to fight for Quemoy and Matsu.

The State Department earlier today poured cold water on a statement by Rear Adm. Liang Hsu-chao, commander of the Nationalist naval forces in the Formosa Strait. The admiral said he had been assured United States carrier-based planes would aid in the defense of Quemoy and Matsu whenever they were needed.

A State Department spokesman made this comment: "The Department does not know of any such commitment. Presumably that decision would be up to the President."

Mr. Yeh was no less emphatic than Admiral Liang. Asked whether he had received a pledge of United States military assistance for Matsu and Quemoy, he replied that Washington had promised to help the Nationalists defend related positions and territories.

Did that mean Quemoy and Matsu? a reporter asked.

"Of course," Mr. Yeh replied. "The pledge includes all the offshore islands."

When another reporter suggested that the related positions and territories to be defended would be those the United States deemed essential to the defense of Formosa and the Pescadores, Mr. Yeh said: "We can deem, too."

Asked about the juridical status of Formosa, he said:

"Are you writing a doctor of philosophy thesis in international law? Let's talk of practical matters. There has never been any legal question about who has Formosa and to whom Formosa belongs.

"It was made a province of China right after V-J Day and Japan recognized this status in surrendering the island to us."

On this point, a reporter suggested, Mr. Yeh appeared to be in accord with Communist Premier and Foreign Minister, Chou En-lai.

"I pay no attention to what that —— says or writes," he replied.

The State Department declined to comment on Mr. Yeh's remarks, delivered as he was leaving Mr. Robertson's office, accompanied by Dr. V. K. Wellington Koo, Nationalist Ambassador to Washington.

One official said the policy remained as announced last Saturday, when the evacuation of the Tachen Islands was authorized. This was that the United States "will extend assistance to the Republic of China in defending such related positions and territories now in its hands as the United States deems to be essential to the defense of Formosa and the Pescadores."

ANNIVERSARY OF THE BIRTH OF GENERAL KOSCIUSZKO

Mr. LEHMAN. Mr. President, February 12 will mark the anniversay of the birth of Gen. Tadeusz Kosciuszko, the great Polish hero who fought in the American Revolutionary War. I ask unanimous consent that a statement I have prepared to mark that occasion be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LEHMAN ON THE ANNIVERSARY OF THE BIRTH OF TADEUSZ KOSCIUSZKO, POLISH GENERAL AND HERO, FEBRUARY 12, 1955

February 12 marks the anniversary of the birth of Gen. Tadeusz Kosciuszko, a great national hero of Poland, and also of America. General Koscluszko was not only a great leader in the struggle for Polish liberation and freedom in the 18th century, but in 1777 he came to the United States to fight for freedom's cause in the American Revolution. Under the leadership of this skilled commander and engineer, the American fortifications at West Point were constructed. He also participated in the Saratoga and Carolina campaigns before returning to his native land.

When General Kosciuszko returned to Poland, he joined with the Polish forces of freedom who were fighting against the Prussian and Russian oppressors. After the unsuccessful uprisings in 1794, General Kosciuszko lived in exile in Switzerland until his death in 1817.

The memory of General Kosciuszko, and his service to our great Nation in the hour of its birth, remind us of the great debt we owe to Poland's sons and daughters. Against the background of this memory, we must think of the present plight of the Polish people, living under the yoke of Communist enslavement. We have a special obligation to these people, who have kept the torch of freedom burning through many long nights of foreign oppression and occupation.

We Americans must give more than lip service to this cause. We must show by action our continuing concern for the eventual liberation of the Polish people. For example, we must liberalize our immigration and refugee laws to provide a haven in the United States for some of the escapees and refugees from Poland.

We must strengthen the Voice of America, so that the voices of freedom will continue to penetrate the Iron Curtain.

We must press for the ratification of the genocide convention, in order to demonstrate to the world our conviction and determination that the destruction of national, racial, or religious groups must be placed beyond the pale of international law and punished accordingly.

Through these, and many other acts of faith in freedom, we in these United States will be fulfilling the fundamental principles for which our Nation was conceived, and for which General Kosciuszko so valiantly and heroically fought.

THE GENOCIDE TREATY

Mr. LEHMAN. Mr. President, the genocide treaty has been buried in the Senate Foreign Relations Committee for more than 4 years. This is a most unfortunate and highly regrettable situation. There have been indications from the present administration that it has no intention of pressing for the ratification of this highly important convention. This was one of the concessions Secretary of State Dulles made to the pro-Bricker amendment forces in the Senate—a tragic sacrifice, in my opinion.

I believe with all my heart that the United States should join with the 48 other nations of the free world to outlaw the infamous crime of genocide. It is my hope that the Foreign Relations Committee, under the distinguished leadership of the Senator from Georgia [Mr. GEORGE], will move this year to report the convention to the Senate, so that it may be debated on the floor and acted upon.

In this connection, I ask that an editorial on this subject appearing in the New York Times of February 8, 1955, be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE SENATE AND GENOCIDE

More than 4 years ago a subcommittee of the Senate Foreign Relations Committee reported favorably on the Convention on the Prevention and Punishment of the Crime of Genocide—the U. N. treaty popularly known as the genocide convention. But since that time, although distinguished leaders of industry, labor, civil liberties, church and legal groups have testified to its worth and moral necessity, the treaty has languished in the Senate. It has not been allowed to get to the floor for full debate and the vote.

Forty-eight nations have ratified or acceded to the treaty. Forty-eight nations have said in effect—and this includes Russia, whose state document, for what it is worth, has been boldly on view at the U. N.—that genocide is criminal; that they adhere to this great principle which outlaws the destruction of national, racial, or religious groups; that such acts are punishable.

That the United States and Britain still drag their feet on this treaty, whose principles they live by, is lamentable. What should certainly be clear, at least to our own lawmakers, is that such an international law as this is both moral inspiration and deterrent—telling this atomic-minded generation that moral force is vital in a materialistic world; staying the ambitions of the wicked and the ruthless.

After leading the fight for this treaty in Paris back in 1946 shall we now allow our leadership to go by default to the Soviet Union? Is the crime of genocide less evil than war itself?

Let's get on with the job. Let's get on with ratification.

FEDERAL ASSISTANCE FOR SCHOOL CONSTRUCTION

Mr. PAYNE. Mr. President, on Tuesday, February 8, President Eisenhower sent a message to Congress on Federal assistance in school construction and the distinguished senior Senator from New Jersey [Mr. SMITH] introduced a bill to implement the President's recommendations, which bill it is my privilege to cosponsor.

Since Tuesday the President's school-construction program has been subjected to unjustifiable criticism. Much of this criticism has been partisan. Any objective analysis of the President's program clearly indicates a soundly conceived approach to a major national problem.

I ask unanimous consent that five editorials from leading American newspapers objectively analyzing the President's school-construction program be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times of Wednesday, February 9, 1955]

FEDERAL AID FOR SCHOOLS

The eagerly awaited administration proposal on school construction has now been put forward by President Eisenhower. As was to be expected, its emphasis is on helping local communities help themselves, but it also cautiously recognizes the principle of direct Federal aid to meet what is truly an emergency need. It is sure to be shot at, both on the basis that it is inadequate and on the opposite ground that it opens up a new field for Federal grants-in-aid to the States.

There is one point on which the friends and foes of even so restrained a program as the President proposes can agree, and that is the extreme shortage of classrooms and the urgent necessity of providing decent school facilities for America's children. The virtual cessation of school construction during the war, coupled with a subsequent jump in the national birth rate, has brought about a present deficit of 300,000 classrooms, quite apart from the 50,000 new rooms now needed annually to keep pace with increasing enrollments. The utterly inadequate salaries of teachers in many parts of the country—including, of course, New York City—is another but related question.

The key to the President's program lies in the two sentences: "Fundamentally, the remedy [for shortage of school construction] lies with the States and their communities. But the present shortage requires immediate and effective action that will produce results." Whether his proposals will actually bring about "immediate and effective" action is a question, but we do agree with the President that the fundamental responsibility for education is primarily a local one and ought to remain so. Some localities can afford to spend more for education than others, but it is highly improbable that there is a State in the Union that cannot afford to spend more than it is now spending for this purpose if it is willing to tax its citizens accordingly. The funds for Federal aid are not manna from heaven; they come out of the pockets of citizens just as surely as if they were raised by local agencies.

The difference is, of course, in distribution. When the Federal Government steps into the picture, the taxes levied in New York, already inadequate for our own schools, help as well to pay for even more inadequate schools elsewhere.

We do not say this is wrong. In fact, we think it is right because poor educational facilities in any State adversely affect the Nation as a whole, not that State alone. When the school situation has become as bad as it has become throughout the Nation, it seems to us that the only practical way to solve it is through Federal action. Under the circumstances it is hard to see why there should be Federal aid for housing, for highways, for hospitals, for dams, etc., etc., and no Federal aid for the most valuable facilities of all—facing the greatest emergency of all—namely, the schools.

The President's proposals involve principally Federal aid to localities in the financing of their school structures. But he also asks Congress to appropriate $200 million in grants-in-aid on a matching basis for the most needy districts. The President has made an important move toward ameliorating the school emergency "within the traditional framework of local responsibility for our schools." Congress now has the opportunity to improve on this program, if it can, while retaining the essential principle expressed by the Chief Executive.

[From the New York Herald Tribune of February 9, 1955]

FEDERAL LEADERSHIP ON SCHOOLS

President Eisenhower's special message to Congress on the crisis in the public schools is a plea for emergency action. It recognizes that delay cannot be tolerated. With the educational system struggling under a deficit of more than 300,000 classrooms, to say nothing of the need for greater quantity and quality in teaching, it is self-evident that a vast school-building program is called for. This must be started at once.

What the President proposes is a plan of Federal cooperation with the States. He says that great numbers of additional schools are required as quickly as possible. Here there can be no argument whatever. The Nation has the resources in production and income. The only question is as to method. Shall the Federal Government give the money outright, with the inevitable trend toward more and more Washington strings on the schools? Or shall the funds be largely loaned, with direction of policy and details lodged by continuing tradition in the States and the local boards of education?

Mr. Eisenhower, of course, is against centralized control. He opposes Federal aid that would nourish a national bureaucracy posing a threat to education for freedom. His idea is that of Federal leadership to encourage vigorous action on every local front. About a billion dollars of Federal funds are proposed for a 3-year emergency building program, but this money is largely in the nature of advances. Outright grants are proposed only for areas with proved need and lack of local income. And every part of the plan, it should be emphasized, specifies sharing of the obligation between the Federal Government and the States.

The program, then, is one which faces up to urgency. The children cannot wait; thousands of schools must be built right now. But the President also properly insists on the free way that leaves people at home in charge of their schools. The crisis will be met—of that there can be no doubt. The best and quickest method is Federal leadership and help—under a plan that keeps education free.

[From the Philadelphia Inquirer of February 9, 1955]

TO SPUR DRIVE AGAINST CRITICAL SCHOOL SHORTAGE

In proposing a broad program of Federal aid to ease the shortage in school buildings, President Eisenhower has clung to the concept, favored by most educational authorities and other citizens, that the education of the Nation's children is primarily a local responsibility.

No one who has the slightest acquaintance with the school situation can doubt that a shortage, approaching emergency proportions, exists. The combination of a slowdown in construction during the war with a rapidly rising birthrate, has brought on a situation where there is a deficit of more than 300,000 elementary and high-school classrooms. Moreover, to meet future needs, an additional 50,000 must be constructed each year.

Mr. Eisenhower's recommendations to Congress for measures to meet this problem consist, in essence, of Federal moves to spur the States and local communities to do more than they have been doing to cope with the schoolroom shortage.

Part of his program calls for an expansion of the authority system, now used in Pennsylvania, under which authorities would finance construction and lease the school buildings to school districts. Federal funds would be used to help States launch such programs.

A second part calls for Federal purchase of school bonds issued by local communities which have found difficulty in selling them at reasonable rates. Federal funds amounting to $750 million over 3 years would be used for this purpose.

Finally, there would be provision for direct Federal aid to communities too poor to build their own schools or to lease them under the authority system. But this aid would require matching State contributions.

Although Pennsylvania appears to have kept up with its school responsibilities better than some other States, the need for a concerted effort to overcome the schoolroom problem will be readily appreciated here.

Most people also will agree with the President that the problem of getting and keeping better teachers by paying them decent salaries must be met if we are to provide proper education for our children. Congress, in studying the President's classroom program, might well consider also what might be done to insure that our growing school system is staffed by capable and adequately paid teachers.

[From the Washington Evening Star of February 10, 1955]

BLUEPRINT FOR CLASSROOMS

President Eisenhower's program for Federal aid to school construction follows expected lines. It reflects the administration philosophy that the Nation's public-school system should continue to be basically a State and local responsibility, free from Federal control or political domination. At the same time, the President acknowledges that there is today a most serious deficit of more than 300,000 classrooms, and that Federal assistance to the States and communities is essential to meet this crisis.

Accordingly, he has proposed three emergency steps: (1) That the Federal Government be authorized to purchase school bonds which local communities have been unable to place at reasonable interest rates; (2) that the Federal Government should join with the States in establishing reserve funds to cover bonds issued by statewide school-building agencies; and (3) that there be authorized a $200 million 3-year program of direct Federal matching aid to States for school construction in districts unable to finance their own building. To cope with the long-term local financing problems, the President proposed a joint Federal-State study of debt limitations and other restrictions.

This four-way line of attack would implement, in effect, the comment by the President in his state of the Union message that the Federal Government should serve as the "catalyst" in spurring State and local action on school construction rather than resorting to "the simple remedy" of direct financial intervention. At the President's earlier suggestion, a series of State educational conferences began last year and will be climaxed in a national meeting here next November. The President has implied that any further development of administration policy toward the school problem must await the findings of these conferences.

The administration approach already is under fire, of course, on Capitol Hill and from quarters eager to see the Federal Government undertake a large program of direct spending for school construction. Legislation has been proposed both in the House and Senate to provide direct and immediate construction aid. While this latter method might bring quicker results, it would also increase the prospect of Federal control of education and the danger of local abdication of appropriate financial responsibility.

[From the Springfield (Mass.) Union of February 9, 1955]

MESSAGE ON EDUCATION

In his message on education the President made clear that while there is a deficit of more than 300,000 classrooms, there is a great deal of school construction. Capital outlays will reach an alltime high of $2 billion this year, for the 60,000 classrooms being built. During the last 5 years some $7 billion has provided new classrooms for 5,750,000 pupils in public schools, while about 5,500,000 additional children enrolled. And while the rate of construction has more than kept pace with mounting enrollment, it has only slightly reduced the classroom deficit.

Hence, there is nothing more urgent than this program of rebuilding and expanding our public schools which have been outgrown and neglected during the past decade. The facilities of public education throughout the United States are in dangerously short supply. It is basically the responsibility of communities and States. But the real need can only be met with Federal cooperation—and that means Federal money.

There is need, says the President, for a long-range educational program—to bring the physical plant into keeping with a steadily mounting population, to pay teachers better, to recruit better teachers. But there is also a need for emergency action to meet an emergency situation.

Without interfering with the responsibility of State and local school systems, the President proposes over the next 3 years a total expenditure of $7 billion for badly needed new schools under a four-point program which envisions the needs of even the poorest communities.

The President recommends legislation authorizing the Federal Government, cooperating with the several States, to purchase school bonds issued by local communities which are handicapped in selling bonds at a reasonable interest rate.

Where there are special statewide school building agencies that can borrow advantageously, schools can be built and rented to school districts. The Federal Government would share with the States in establishing an initial reserve fund equal to 1 year's payment on principal and interest. The State under this proposal could issue bonds in the next 3 years to build $6 billion worth of new schools.

Where needed to relieve extreme overcrowding, double shifts, hazardous or unhealthful conditions, the Federal and State

aid would be in an amount sufficient for a school district to qualify under either proposal 1 or 2 for financing the remainder of the building costs.

And last it is proposed that the Federal Government furnish one-half of the administrative costs of State programs which are designed to overcome obstacles to local financing or to provide additional State aid to local school districts.

The President is convinced that the basic facts are sufficiently established to justify emergency action now and he believes he has good reason to expect active support in Congress.

There is, of course, need to make sure that Federal funds are not made a device to insinuate the Federal Government into the running of the schools themselves. Federal interference can be protected against. The fact that the Federal Government matches State funds in highway construction doesn't mean that the Federal Government has any hand in making the State traffic laws.

The States and communities simply haven't the resources to build urgently needed classrooms. Here is where the States and the Federal Government must combine to do what the Nation urgently requires: More classrooms in more schools now, unless we are to let our public school system dangerously deteriorate.

Here is good news for the Nation's harassed teachers in their overcrowded classrooms, and it is good news for the students. It is also good news for scores of companies that are feverishly turning out everything from blackboards to school buses in an effort to meet a demand that keeps growing by leaps and bounds.

We are convinced that the substantially increased funds needed for our public schools can be found without an undue burden upon the economy. Economists generally foresee a rising level of productivity which will reach some $525 billion a year in the next 10 years and, on the basis of such an increase in the gross national product, it is believed that the increased costs of public education will not be impracticably large.

ANNIVERSARY OF FOUNDING OF THE JUNIOR CHAMBER OF COMMERCE—STATEMENT BY SENATOR ERVIN

Mr. ERVIN. Mr. President, I ask unanimous consent that there be printed in the body of the RECORD a statement prepared by me concerning the recent anniversary of the founding of the junior chamber of commerce.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ERVIN

The distinguished work of the United States Junior Chamber of Commerce is well known and appreciated by men and women in positions of leadership.

I wish to congratulate the junior chamber of commerce on its 35th anniversary which has just passed. I shall do so by referring to only a few of its highly significant contributions to the betterment of the people of North Carolina which I have the honor to represent.

The North Carolina Junior Chamber of Commerce was founded in 1929 by the Charlotte Junior Chamber of Commerce, followed closely with the organization of the Winston-Salem Junior Chamber of Commerce. Its State organization has been in existence since 1937. Mr. Spruille Thornton of Winston-Salem was elected its first State president. North Carolina Jaycees, as they are affectionately called, now have approximately 6,000 members from 104 local clubs. I am particularly happy that my son has the present honor of serving as president of the Jaycees in Morganton, N. C.

Jaycees of the Tar Heel State have always stood in the forefront in the recognition of the necessity of community development. They have carried on Farmers Day projects, recreation improvement, nonpartisan voter interest drives, Operation Christmas for orphans, highway safety promotion, prisoner rehabilitation, mental health, and a multitude of other activities which have resulted in manifold blessings for our citizenry.

The official definition of the organization is: "A junior chamber of commerce is a constructive action organization of young men who devote a portion of their time to community service in the public interest, developing young men as leaders in their community."

This definition can most assuredly be applied to North Carolina Jaycees.

Let it be publicly recognized that a good local Jaycee club in a community is a good sign of progress. Multiply the local clubs in the State organization and the United States Junior Chamber of Commerce—America's heritage for those who follow us will be bright indeed.

IMPORTANCE OF STATE GUARDS

Mr. DANIEL. Mr. President, in Texas we have a very strong State Guard. The men who make up this fine organization are patriotic citizens who feel that by participating in an organization of this type they can render a service to their State and Nation, when circumstances might prohibit their doing so as a member of the Reserve forces or the National Guard. This group has rendered fine service in times of emergency, in cooperation with the civil-defense and disaster authorities.

Recently, President Eisenhower recommended Federal recognition to these State guard groups by the enactment of legislation permitting States to maintain militia forces "which would take over the National Guard's domestic missions and support civil-defense activities upon its withdrawal." A provision in keeping with the President's recommendation is contained in the proposed legislation dealing with the Reserve program, now under consideration in the House Committee on Armed Services. I hope Congress will give recognition to this body of men who are ready, willing, and able to perform any required service in time of emergency.

Mr. President, I ask unanimous consent that a statement prepared by the State Guard Association of the United States, concerning the State militia section of the national Reserve plan, be printed in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE STATE MILITIA SECTION OF THE NATIONAL RESERVE PLAN

(Submitted by the State Guard Association of the United States)

The members of our Government who are familiar with the vital role played by the State Guard during World War II are not unmindful of the services rendered by the various States' militia during the absence of the National Guard in Federal service immediately prior to and during the conflict; and, the State Guard Association of the United States submits that to delay further the recognition of State guards by the failure to enact proper congressional authority for the various States to organize and maintain such State militia units in time of peace would be overly optimistic and would deny many citizens the right to participate in a most vital part of the defense of this Nation.

During World War II countless thousands of citizens not eligible or not then on active duty with the Armed Forces of the United States performed militia duty without compensation or any desire for reward as members of the States' guards during the absence of the National Guard in Federal service. Many thousands of men eligible for service in the regular forces were given training which better prepared them for their impending military duty and saved the military establishment money and (most valuable of all) time. The members of this State militia were men over and under age, those who could not meet the regular physical requirements, and those who were deferred for good cause.

The public has been constantly reminded that the next conflict might well involve their own cities and homes, and, under such conditions the regular forces including the National Guard, will be engaged in actual combat or in some vital containing action other than internal security.

To properly cope with any disaster, in the absence of the National Guard in Federal service, a State guard militia organized and trained in internal security tactics is necessary. Under conditions of panic or hysteria, from whatever cause, it would be impossible for civil defense to perform its tasks of first aid, decontamination, feeding, housing, etc., unless law and order is restored and maintained, unless panic is controlled, unless traffic (both civilian and military) is channeled; and, unless looting and sabotage is prevented by the weight of a trained military organization.

The very reason for the existence of any armed force is the protection of home, family, industry, and way of life, and all of this would be forfeit unless a complete program, including State militia forces in addition to those now recognized by the Federal Government, is not only authorized but is made the subject of positive action to the end that each State may have such a force properly organized, equipped, and trained to immediately take over the National Guard's domestic missions and support civil-defense activities.

The patriotic citizen who cannot become a part of his country's Regular or Reserve forces does not demand or require that he be furnished equipment and instruction equal to that of combat troops, but he does deserve the chance to familiarize himself with his task before he is expected to perform one of such importance. Volunteer forces, although making minimum demands upon public treasuries, will more than repay whatever their cost in patriotic service and in aiding in a better understanding of the military problems of our Government.

Many problems will arise in the organization and development of the State guard militia of the various States. Even after Federal authority to organize such forces, many States will require additional State legislation before they can participate in this program. While Texas, California, Utah, Oregon, and perhaps a few others have such State authority at the present time and are actually maintaining State Guard Reserve units on a cadre basis without Federal authority or assistance, the large majority of States will require time to enact their own laws before participating in this program.

The State Guard Association of the United States heartily endorses the new National Reserve Plan as outlined by President Eisenhower in his message to Congress January 13, especially part 5 of such address, quote:

"Fifth, existing law does not permit States to maintain troops in addition to the National Guard. In view of the fact that the potential enemy possesses weapons of mass destruction and means for their delivery, it is a matter of urgent importance that there be no break between the time that National Guard units might be called into Federal service and the time that the State could raise additional forces to replace them.

"I therefore recommend that the Congress enact legislation which would permit the States to raise and maintain in time of peace organized militia forces which would take over the National Guard's domestic missions and support civil defense activities upon its withdrawal."

The State Guard Association of the United States also endorses H. R. 2967, section 5, for State militia in addition to the National Guard, but respectfully calls your attention to and recommends that the first sentence of subsection (f), line 21 through line 25, page 20, and the first four words of line 1, page 21 (of the printed bill) be deleted, for the reasons hereinbefore stated, and that the remaining portion of subsection (f) of section 5 of the bill be left unchanged as it is adequate and self-explanatory.

In the future development and planning of the State militia portion of the program, the State Guard Association of the United States respectfully requests that its representatives be given an opportunity to appear and be heard.

STATE GUARD ASSOCIATION OF THE UNITED STATES,
By DONALD W. PEACOCK,
Colonel, GS, TSGR, Executive Director.
CARL C. HARDIN, Jr.,
Colonel, GS, TSGR, Legislative Officer.

IMPORTANCE OF PROMPT DEVELOPMENT OF THE COLUMBIA RIVER BASIN SYSTEM

Mr. DWORSHAK. Mr. President, because of increasing demands for power and the desirability of constructing flood-control projects in the Columbia River Basin, it is imperative that there be no unnecessary delay in continuing the integrated development of this river system.

A joint report on the proposed development of the Middle Snake River and its tributaries has been prepared by the Bureau of Reclamation and the Army Corps of Engineers. The administration has advocated a partnership plan, but events have caused little progress to be made so far in the implementation of a plan which will insure orderly utilization of the water resources of the tributaries of the Columbia in the upper watershed.

Mr. President, Idaho is vitally concerned with this resource development. It would be extremely unfortunate if it should be delayed by involvement in political controversy. Therefore, in order to obtain some timely information, I requested the Department of the Interior to provide data. I ask unanimous consent to have printed at this point in the RECORD a letter from Fred G. Aandahl, Assistant Secretary of the Interior; and also a statement he made February 3, 1955, before the Joint Committee on the Economic Report, outlining an adequate water resources development program to meet the demands of our national economy.

There being no objection, the letter and statement were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
Washington, D. C., February 11, 1955.

Hon. HENRY C. DWORSHAK,
United States Senate, Washington, D. C.

MY DEAR SENATOR DWORSHAK: This is in reply to your letter of February 8, to Secretary McKay, requesting information on the administration's partnership plan, with particular reference to projects in Idaho.

The principal premise of the partnership program is that this Department is not opposed to construction by non-Federal groups, either public or private, where such development is in accord with a plan assuring optimum use of our water resources. In the case of those projects providing benefits which are both nonreimbursable and reimbursable—i. e., flood control, navigation, power, irrigation, etc.—the Federal Government is willing to share the costs for purposes which are necessary to accomplish broad public or national objectives. An example of this type of project is the proposed Priest Rapids development. Under legislation passed by the 83d Congress, local agencies would be permitted to develop the power potentialities of the Priest Rapids site on the Columbia River in accordance with the terms and conditions of a license issued pursuant to the Federal Power Act. The law further authorizes inclusion of navigation and flood control facilities at Federal expense either as a part of the initial construction or at a later date.

Applications for licenses or permits are now pending before the Federal Power Commission for private development of the Hells Canyon, Penny Cliffs, Bruces Eddy, Mountain Sheep, and Pleasant Valley sites in Idaho. As you undoubtedly know, the Federal Power Commission held extensive public hearings on the Idaho Power Co.'s proposal to develop the Hells Canyon site, and a final decision has not yet been reached by the Commission.

A joint report on the proposed development of the Middle Snake River and its tributaries has been prepared by the Bureau of Reclamation and the Army Corps of Engineers. This development comprises two dams and reservoirs to be constructed by the Army Corps of Engineers at Bruces Eddy on the North Fork of the Clearwater River and at Penny Cliffs on the Middle Fork of the Clearwater River, and two dams and reservoirs to be constructed by the Bureau of Reclamation at the Mountain Sheep and Pleasant Valley sites on the Snake River above its confluence with the Salmon River. This report was submitted to the Columbia River Basin States and Federal agencies for comment and review. Most of the replies have been received and are now under consideration in the Department.

On December 21, 1953, the Pacific Northwest Power Co., made up of the Montana Power Co., the Washington Water Power Co., Pacific Power & Light Co., Mountain States Power Co., and Portland General Electric Co., applied to the Federal Power Commission for a preliminary permit for the Penny Cliffs and Bruces Eddy sites. Permit to make preliminary studies prior to application for a license was issued by the Federal Power Commission on August 18, 1954. The company later applied for an amendment and was granted its request to exclude from the permit the Penny Cliffs development. The reasons given by the applicant and recited in the Commission's order amending preliminary permit are as follows:

"The applicant states that investigations thus far conducted under its preliminary permit respecting costs, nonpower features, possible financing arrangements and other related matters in connection with the proposed Penny Cliffs development—solely from the viewpoint of power development—show that the public interest would best be served by development of other hydroelectric sites prior to development of the Penny Cliffs site. The applicant notes also that there is an indication that the proposed Penny Cliffs development might have an effect on the wildlife and fish in the area and that an adequate investigation to determine the effect of this impact might occupy a period of time in excess of the period of the outstanding preliminary permit or any legal extension thereof."

Recently, the Pacific Northwest Power Co. applied to the Federal Power Commission for a permit for the Mountain Sheep and Pleasant Valley sites. This application is now under consideration by the Federal Power Commission.

It is apparent that there is considerable interest on the part of non-Federal groups to undertake hydroelectric power developments in Idaho. However, conflicts among various groups have developed so that it may be expected that final decision on these proposals will be delayed.

For your information and assistance, there is enclosed a statement which I recently made before the Joint Committee on the Economic Report. This statement sets forth the position of this Department regarding the development of our Nation's water resources.

Sincerely yours,

FRED G. AANDAHL,
Assistant Secretary of the Interior.

STATEMENT BY ASSISTANT SECRETARY FRED G. AANDAHL, DEPARTMENT OF THE INTERIOR

(Panel discussion on public works policies before the Joint Committee on the Economic Report, Thursday, February 3, 1955)

The President's Economic Report calls for an acceleration of the development of our natural resources. To speed this process, with particular reference to the programs for reclamation and hydroelectric power under the Department of the Interior, the Federal Government has attempted to distinguish as clearly as is possible the proper role for Federal participation, and to encourage the States, local governmental bodies, and private investors to undertake as much resource development as they possibly can.

The Government can contribute in a very substantial degree by undertaking those multiple-purpose projects which may not readily be undertaken by others. Where projects are of great size or complexity, or where they serve numerous national interests, such as flood control, navigation, reclamation, fish and wildlife conservation, recreation, and pollution abatement, as well as hydroelectric power production and municipal water supply, and produce many benefits which are not always assessable against the beneficiaries, there is an excellent opportunity for the Federal Government to supplement the enterprise of others in the work of resources development.

An adequate water resources development program to meet the demands of our national economy is a matter of national concern. It is appropriate that the Federal Government take cognizance of the problems in this field and endeavor to formulate sound national policies in the public interest. As you may know, the President's Cabinet Committee on Water Resources Policy is currently reviewing many aspects of existing policies and programs in this field.

The planning of development of water resources on a river basin basis with active and cooperative participation by both Federal and non-Federal interests is necessary to assure coordination of construction and operation of related units within a river system,

and to promote the maximum economic utilization of the valuable resource with a minimum of interference in the case of conflicting uses.

The policies we have been following in the Department of the Interior are based on the development of the natural resources of the country through the initiative and industry of its citizens with the assistance but without domination of the Federal Government.

The Department of the Interior constructs hydroelectric powerplants as a part of the reclamation program, markets this power, and also markets power generated at hydroelectric plants constructed by the Corps of Engineers as a part of the national flood-control and navigation program.

Over a year ago the President approved a power policy for this Department. The policy recognizes that the Federal Government has a proper but limited role in the power field. The Reclamation Act of 1902, and various other acts of Congress have made Interior the power-producing and marketing agency at many Federal plants. These various laws have established basic policies for the marketing of power, as well as for the planning of facilities for generation and transmission. Primary responsibilities of the Department in the field of water resources are the reclamation of arid lands and the development of natural resources as authorized by Congress. This includes a disposal of electric power which can be economically produced in such developments. The Department, therefore, actively plans and recommends construction of generating facilities in water projects under its jurisdiction when such facilities are economically justified. We recognize that the primary responsibility for supplying power needs rests with the local people. We do not oppose the construction of facilities which local interests, either public or private, are willing and able to provide and which are consonant with the best development of the natural resources of the area. The Department will construct and operate transmission lines that are economically feasible and necessary for proper interconnection of Federal plants. Transmission facilities also will be built and operated to carry power to load centers within economic transmission distances unless other public or private agencies will provide the necessary facilities upon reasonable terms.

We do not favor a general disposition or transfer of title to the project facilities now held by the Federal Government. In two exceptional instances, discussions have been pursued regarding the transfer of ownership of physical facilities to the States concerned. In both cases the States initiated the negotiations but in neither case has the transfer been arranged. California inquired as to the terms on which the Central Valley project might be transferred to that State. Arizona inquired as to the purchase of the feeder transmission system in that State. In any case, in the event that an equitable arrangement could be agreed upon and the repayment of the Federal investment assured, legislative action by the Congress would be necessary before a property transfer could be made.

Direct Federal participation in water-resources development, in keeping with the President's policies, is provided in his recent budget message. It was recommended in the message that the Secretary of the Interior, through the Bureau of Reclamation, be authorized to undertake the construction of two comprehensive river-basin improvements which together will require an investment of over a billion dollars. These projects will require some years of progressive development before their long-range objectives are reached. They are beyond the capabilities of local initiative, public or private, but are needed in their respective regions for irrigation, power, flood control, and municipal and industrial water supply. These projects, which are familiar to many of you, are the Colorado River storage project, serving the States of Wyoming, Utah, Colorado, Arizona, and New Mexico; and the Fryingpan-Arkansas project in the State of Colorado.

The budget for 1956 contemplates initiation of construction on these two projects in the fiscal year 1956 upon their authorization by the Congress. An amount of $7 million is included in the budget as an estimated 1956 supplemental appropriation to initiate these developments. Their construction will continue the pattern of Federal construction of such large-scale projects as the Central Valley project in California, the Columbia Basin project in Washington, and the Missouri Basin project. In addition to such vast developments, however, the small irrigation project which does not have the ability to show ready repayment by the irrigators alone, but is otherwise economically justified, is equally a part of our balanced program.

Thus, the budget contemplates initiation of five small reclamation projects having an estimated total cost of $33 million. These are: Foster Creek Division, Chief Joseph Dam project, Washington; Haystack Equalizing Reservoir, Deschutes project, Oregon; Michaud Flats project, Idaho; Palo Verde project, Arizona-California; and Santa Maria project, California.

The total appropriation estimate for the Bureau of Reclamation in the 1956 budget is $176 million. This finances planning, operation, and continuation of construction on 63 projects in the Western States.

The appropriations for all Interior water and power agencies as submitted for the 1956 fiscal year total $201 million, as compared to $195 million for 1955.

In regard to your question on the sharing of costs of construction and maintenance by the Federal Government, it is to be commented that today certain Federal programs in the field of water resources are entirely reimbursable, others partially reimbursable, and some essentially nonreimbursable. Thus, municipal water supply and hydroelectric power are reimbursable with interest; irrigation is reimbursable, but without interest; and flood control, navigation, and certain conservation programs are essentially nonreimbursable in respect to the Federal investment, although frequently there is required the provision of rights-of-way, local maintenance, or other local contributions. These practices are founded on the provisions of existing law.

The President has stated in his budget message that an important policy of this Government is to encourage an increased sharing by State and local governments of our long-range development projects. For example, under legislation passed last year, the Markham Ferry project in Oklahoma and the Priest Rapids projects in the State of Washington, both with large power developments, will be built by State or local units with modest Federal contributions for those purposes, such as flood control, which involve national responsibilities.

The message goes on to say that achievement of the resource development basic to the economic progress and security of the Nation requires encouragement of local public and private initiative and, where Federal participation is necessary, requires emphasis on the partnership aspects of essential cooperative arrangements with State and local governments or with private enterprise. To the greatest extent possible, the responsibility for resource development, and its cost, should be borne by those who receive the benefits. In many instances private interests or State and local governments can best carry on the needed programs. In other instances Federal participation or initiative may be necessary to safeguard the public interest or to accomplish broad national objectives where projects, because of size or complexity, are beyond the means or the needs of local public or private enterprise. The Federal Government must be willing and ready to share the cost of improvements made for national purposes; but in all cases where the partnership principle logically applies there is automatically acquired a concern for economy and efficiency that is often lacking when no local contribution is required.

In connection with the general question of cost sharing, it is of interest that, in order to establish equity between the Federal Government and other interests, the administration repeated in this year's budget message the recommendation for enactment of legislation to provide that the Federal Government make payments to non-Federal owners of water-resources projects when Federal hydroelectric developments benefit from these projects.

May I say in conclusion that under our policy we will revive and encourage local responsibility, avoid greater demands for Federal investments than our national income will permit, and continue the Government's proper participation in developing the water resources of the Nation.

FORM-LETTER OPPOSITION TO APPOINTMENT OF JUDGE JOHN MARSHALL HARLAN TO SUPREME COURT OF THE UNITED STATES

Mr. NEUBERGER. Mr. President, I should like to call the attention of the Senate to something which I believe to be rather interesting and significant. I refer to certain communications which I have received from my State. In recent days I have been receiving quite a large number of form letters opposing confirmation of the nomination of Judge John Marshall Harlan to the Supreme Court of the United States. Almost all of the letters are on the letterhead of a particular manufacturing company in my State, namely, Crawford & Doherty Foundry Co., 4604 Southeast Seventeenth Ave., Portland 2, Oreg. The letters are signed by people who apparently are employees of that one company. All these letters are worded identically. Inasmuch as the letters are very short, I shall read one of them, as follows:

DEAR SENATOR:—

In some cases the letters are addressed, "Dear Mr. Senator"—

For the sake of the Constitution of the United States of America and this country's free men, I, as a registered voter, ask that you oppose confirmation of Judge John Marshall Harlan to the Supreme Court.

Then the letters are signed, on lines labeled "Signature" and "Address," by persons who evidently are residents of my State and of the community in which I live.

What disturbs me about this matter is that all the letters are identical in form, including the letterhead. They cite absolutely no reason why the appointment and confirmation of the nomination of Judge John Marshall Harlan to the Supreme Court would threaten the Constitution of the United States, or why it would be a danger to the freemen of this Nation.

It seems to me that either this company is dragooning its workers into signing these petitions against confirmation of the nomination of Judge John Marshall Harlan, with no reason given, or

there is some undercover movement, for which no real evidence is cited, against the nominee.

In conclusion, Mr. President, I wish to say that of course every American has the right of petition; and if there is any reason why the nomination of Judge John Marshall Harlan to be a member of the United States Supreme Court should not be confirmed, the Senate should have it. But I am concerned and alarmed when 40 or 50 persons sign identical letters, but give no reason at all why the appointment would, as they state, threaten the Constitution or the freemen of the Nation.

I ask unanimous consent that a sample letter, without the signature, be printed in the CONGRESSIONAL RECORD, so that all Members of the Senate may see for themselves one of the letters, all of which attempt to attack and discredit Judge Harlan, but give no evidence at all as to why he is unfit for the position to which he has been nominated.

There being no objection, the sample letter was ordered to be printed in the RECORD, as follows:

CRAWFORD & DOHERTY FOUNDRY CO.,
Portland, Oreg., February 9, 1955.

Hon. RICHARD L. NEUBERGER,
United States Senator,
Senate Office Building,
Washington, D. C.

DEAR MR. SENATOR: For the sake of the Constitution of the United States of America and this country's free men, I, as a registered voter, ask that you oppose confirmation of Judge John Marshall Harlan to the Supreme Court.

Respectfully yours.

VISIT BY SENATOR HENNINGS TO FEDERAL CORRECTIONAL INSTITUTION AT DANBURY, CONN.

Mr. HENNINGS. Mr. President, throughout the previous Congress, I had the pleasure of serving with the distinguished senior Senator from North Dakota [Mr. LANGER] and the able junior Senator from Idaho [Mr. WELKER] on the Subcommittee on Federal Penitentiaries. In that capacity, I visited and inspected a great many Federal penal and correctional institutions in various sections of the country. I have always tried to make it a point to visit such institutions unannounced, so as to be able to see conditions exactly as they are. I also make it a point to talk to the prisoners alone, without the warden or other prison officials being present.

Recently, I inspected the Federal Correctional Institution at Danbury, Conn. I ask unanimous consent to have printed in the RECORD at this point in my remarks an article from the Danbury News-Times describing that visit and setting forth my observations on that interesting institution.

In connection with my visit at Danbury, my attention was called to a number of letters addressed to the editor of a national magazine following the publication of an article written by a former inmate of that institution. I asked for copies of some of those letters, which have been furnished to me, and I ask unanimous consent, Mr. President, that these letters also be printed in the RECORD as a part of my remarks.

There being no objection, the article and letters were ordered to be printed in the RECORD, as follows:

[From the Danbury News-Times of December 31, 1954]

HENNINGS FINDS FEDERAL PRISON STANDARDS UNIFORMLY HIGH

Senator THOMAS C. HENNINGS, JR., Democrat of Missouri, said yesterday he finds standards of administration and personnel in Federal prisons uniformly high.

The Senator, a member of the Subcommittee on Federal Prisons of the Senate Judiciary Committee, was interviewed on a visit to the Federal Correctional Institution.

He commented that inmate morale seemed exceedingly high.

A visitor to any prison can usually sense a high or low degree of tension if tension exists, he said. "I have seen no sulkers here."

Senator HENNINGS toured the FCI under the guidance of Warden Harold E. Hegstrom and Assistant Warden Thomas Joyce, stopping frequently to chat in friendly fashion with prisoners, guards, and instructors.

Talking to newsman, the Senator emphasized that he was not there to snoop. "I have great confidence in the kind and caliber of men in the prison service," he said.

"The morale of the prison personnel is remarkably good here and in all the institutions I have seen. The workers here are well disciplined, alert, and take pride in their work.

"They show a remarkably fine spirit toward the inmates, I heard one prisoner say, 'If you've got to be locked up, at least here you learn something.' "

Senator HENNINGS noted that the FCI was one of a dozen penal institutions he had visited in the last few weeks.

Crime, punishment, and rehabilitation are subjects in which he has long been interested, he explained. He is a former district attorney in St. Louis and currently a member of the Senate Subcommittee on Juvenile Delinquency as well as the prisons subcommittee.

He is also a national director of the Big Brothers of America, an organization which strives to provide guidance for young men and keep them out of trouble.

Reporters who followed Senator HENNINGS through the prison's busy typewriter repair shop and glove factory judged he was seeing a true picture of conditions at the FCI.

Nothing appeared specially arranged for his benefit. The newsmen noticed that Mr. Hegstrom and Mr. Joyce often strolled out of earshot as the Senator talked with workers and inmates.

They did not appear to be at all concerned with what he might hear.

Senator HENNINGS himself was convinced that he was getting an undistorted view. "With my experience," he said, "I could spot a setup easily."

The Senator explained that he is touring the prisons to discover what problems prison officials face in respect to administration, plant, or personnel, and what he can do to make their job more effective.

He said he feels more medical and psychiatric personnel are needed at all the penal institutions so inmates can be given more individual attention.

He added that he believes prison service pay inadequate and that he intends to back a pending bill to raise it.

The better the pay, the better prison personnel will be, he said, and only good personnel can turn out a good "end product"—rehabilitated convicts ready to be useful members of society.

Warden Hegstrom, answering a question from the Senator, said the FCI is now operating with fewer personnel than ever before.

During his visit, Senator HENNINGS also learned that the FCI could use a chapel and a gymnasium. Religious services are now held in the auditorium.

The lawmaker was asked whether he had seen any signs of coddling as he made the rounds. Prisoner coddling is a favorite charge of critics of the institution.

"Everything here is disciplined and orderly," Senator HENNINGS replied. "Everyone has a job to do and does it."

COMMENTS ON J. PARNELL THOMAS' LIFE MAGAZINE ARTICLE, RED HUNTER'S RED JAILMATES

In its October 4, 1954, issue Life magazine published an article, Red Hunter's Red Jailmates, by J. Parnell Thomas, which was critical of the Federal Correctional Institution at Danbury, Conn. James V. Bennett, Director of the Federal Bureau of Prisons, has made available to Federal Probation copies of a few of the many communications sent to the editor of Life and to the Bureau of Prisons, commenting on the article.

Telegram to the editor of Life from Senator WILLIAM LANGER:

OCTOBER 5, 1954.

Having been a member of the Senate Subcommittee on National Penitentiaries for many years and as its chairman for 4 years, I am entirely familiar with the operation of these institutions including the Danbury Federal Correctional Institution. I therefore request opportunity and equal space and artistic assistance to reply to the distorted, unfair, and misleading article of J. Parnell Thomas published in your last issue. The fee which should be in fairness equal to his will be donated to the crippled children's home at Jamestown, N. Dak. As one North Dakotan to another don't you believe in simple fairness you should grant this request.

Sincerely,

WILLIAM LANGER,
Chairman, Committee on the Judiciary and Subcommittee on National Penitentiaries.

(Senator LANGER and Judge Morgan Ford of the United States Customs Court in New York City made an unannounced visit to Danbury on the Sunday following the publication of the article and, as a result, sent the above wire.)

SEPTEMBER 30, 1954.

To the Editor of Life from James V. Bennett, Director, Federal Bureau of Prisons:

You have done an irreparable disservice to a public agency sincerely attempting to execute faithfully the sentences of the court when you permit embittered and vindictive Parnell Thomas to ventilate his unfounded charges. During the nearly 4 years he has been attempting to get them published they have been carefully investigated by this office and the appropriate Federal agencies and found to be utterly without substance. The one statement you checked because it involved a person who was not a defenseless ex-prisoner or a public official you eliminated from your final copy. Certainly this incident alone should have alerted you to check on others of the charges or have given some heed to the warning voice of Mr. E. R. Cass, secretary of the American Prison Association, who knows the institution and the efforts made to operate it constructively.

Also it should have been well known to your editors that the charge Federal prisons were staffed with political appointees was false, since civil-service laws are applicable to all but a few positions. As a matter of fact, every employee of the Federal Prison Service from the Director on down was recruited in accordance with civil-service regulations. It has shocked and saddened all of us who are proud to be a part of what we consider a satisfying public service, notwithstanding its hazards and exasperations, to have Life magazine circulate such uncorroborated statements.

I realize it will be impossible for any denial to overtake the misstatements, half-truths, and innuendoes the article contains, but I do hope Life will do what it can to remove the wholly erroneous impression the article creates.

JAMES V. BENNETT.

To the editor of Life from Harold E. Hegstrom, warden, Federal Correctional Institution, Danbury, Conn.:

OCTOBER 1, 1954.

You have printed without verification the article by former prisoner, J. Parnell Thomas, with his rantings and criticisms of prisoners, personnel, program, facilities, and services of prison life at Danbury 49 months ago.

Apparently you did not take into account that this article permits a former convicted prisoner to impugn the integrity and loyalty of competent civil service employees carefully screened, trained, and never arrested. That conditions described by the former prisoner are not true can be attested by many public and private agencies, the FBI, and by qualified unbiased individuals whose fairmindedness cannot be questioned. The article is unfair to the present inmate population who are worried that their families and friends will believe the untruths that Life editors consider news after a lapse of 4 years.

You have made our task more difficult without any constructive end and with no good purpose.

HAROLD E. HEGSTROM.

To the editor of Life from Dr. George G. Killinger, member of the United States Board of Parole:

SEPTEMBER 30, 1954.

In Mr. J. Parnell Thomas' Life article of October 4, 1954, he states that 95 inmates went before me for parole consideration on June 13 and 14, 1950, and as time passed all were released except three.

His statement is without foundation. The facts are that only 68 individuals were given parole hearings at the June 1950 meeting to which he refers.

Of this group 45, or 66.2 percent, were denied parole and 23, or 33.8 percent were granted. During subsequent months, before expiration of sentence, parole was granted to 10 additional prisoners (including Mr. Thomas) meaning that only 33, or 48.5 percent of the group, were eventually paroled. Thirty-five, or 51.5 percent, continued to be denied and completed their sentences.

All parole decisions are majority decisions by a quorum of five members of the Board and each decision is the result of careful and intensive study of each case. Mr. Thomas' statements that any factors other than the merits of an individual case are considered by the board in reaching a decision are untrue.

Mr. Thomas was required to serve 9 months, or 50 percent, of his 18-month sentence, and even though he seems to feel that he should have been paroled immediately following his initial hearing it is well to note that the average Federal prisoner serves approximatley 62 percent of his sentence before release.

I regret that Life published this article before ascertaining the facts.

GEORGE G. KILLINGER.

To the editor of Life from Dr. Walter M. Wallack, president, American Prison Association:

OCTOBER 4, 1954.

Your article in the October 4 issue of Life magazine, entitled "Red Hunter's Red Jailmates," by ex-Congressman and ex-prisoner J. Parnell Thomas, is a blow below the belt to the progressive element in American penology. Moreover, it is an unjustifiable attack upon the high level competency of the Federal Bureau of Prisons and its enlightened management.

Approximately 25 years ago the Federal prison system was a fair example of almost everything a prison system should not be. That condition no longer prevails since the reforms inaugurated by Sanford Bates and Austin MacCormick have been carried to maturity by Director James V. Bennett who is unquestionably one of the ablest, if not the ablest, prison administrators in the country.

Many of us, including Mr. Bennett, are aware of the numerous, and in some cases deplorable, shortcomings of the penal institutions in this country and have devoted our energies toward the eradication of faults. The Federal institutions have been pacesetting in their progress and have served as a fine example for the emulation of the State jurisdictions. It is therefore most disconcerting to note that a publication such as Life, whose journalistic integrity is believed by millions to be of the highest order, would stoop to printing a canard such as this article is. You have done a disservice to an element of social welfare that is greatly in need of constructive help and criticism. The damage of the Thomas article to the cause of penological reform may be irreparable. Why you did not check the facts, which we know you did not, is beyond our comprehension. There are many who could have assured you from firsthand knowledge that the Thomas article was filled with half-truths and innuendos. That the Federal Correctional Institution at Danbury, Conn., is not only one of the best in the Federal system, but also in the country, is well known by those who are informed concerning penal affairs.

Speaking for the American Prison Association let me assure you that nearly all of our members do resent the unfair and irresponsible way in which you handled the Thomas article and sincerely hope that you will try to undo some of the damage it has done, if that is possible.

WALTER M. WALLACK.

To Mr. Henry R. Luce, editor in chief of Life, from Sanford Bates:

OCTOBER 21, 1954.

I read with indignation and dismay an article in your issue of October 4 by former Congressman and Convict J. Parnell Thomas. I can understand his frame of mind and I have no doubt that what he might say would be repudiated by the reading public with the same definite action that the people of his district repudiated him at the polls last fall. What I cannot understand is the willingness of an influential magazine like yours to publish dogmatic statements without first investigating the accuracy.

I shall refer to only one or two of them—"Federal penitentiaries are full of political appointees, misfits who will never understand the meaning of rehabilitation." Inquiry would disclose the fact that the prison personnel is covered by civil service right up to the top position and the medical, surgical, and psychiatric services are furnished by the competent United States Public Health Service.

Thus, the aspersions on the medical services are reflections on one of the most respectable career services in our Government. From its very inception, that is one thing that the Federal bureau has been practically free from; namely, the influence of politics which has been so ruinous an influence in many State institutions. It may be that prison food will never be wholly satisfactory to the inmates, but one charge that cannot be made against the Federal system is that the food is meager and that the clothing allowance insufficient.

As a former director of the Prison Bureau, I happen to know that Dr. Killinger is an honest and conscientious person and that the Federal parole system, while it exercises its own judgment in each case, has never been charged with venality or bribery.

The Federal Prison Bureau is one of the great Federal bureaus that has been conducted along strictly professional and competent lines and it certainly is a discouraging thing to "reward" the men and women who have made it what it is by the publication of an irresponsible and exaggerated article such as you have published in your last issue.

SANFORD BATES.

To the editor of Life from Rabbi Jerome R. Malino:

OCTOBER 6, 1954.

I have been chaplain to the Jewish inmates of the Federal correctional institution since the day the institution was opened in 1940. It would be a simple matter to refute in detail the accusations made by an ex-convict who seems intent upon clearing his own past by suggesting that legislators and the judiciary ought to spend some time in jail. Would he suggest under circumstances similar to his own? I will not, however, attempt a general refutation of the article because there are others in the administration who could more properly do so. I am able to affirm nonetheless that Thomas' reference to the concentration of the Jewish inmates in a so-called Israel house is not true now, was not true when he had a Danbury address, nor was it ever true in the history of this institution. At the present time there are 33 Jewish inmates distributed in varying numbers among 10 housing units, the distribution being determined, as in every case, by factors other than religion or color.

JEROME R. MALINO.

To the editor of Life from Protestant Chaplain Harrison L. Anthony and Catholic Chaplain Joseph J. Maglione:

SEPTEMBER 30, 1954.

As the chaplains of the Federal Correctional Institution in Danbury we feel that our first concern is for the welfare of the inmates of the institution. Next, we must consider the mothers and fathers, the wives and families of the inmates.

If the allegations of Parnell Thomas are true, then we, the chaplains, are committing a grave injustice to the inmates and to their families if we allow such conditions to exist.

May we frankly and flatly state that the allegations of Parnell Thomas are grossly exaggerated. He has taken some isolated instances and has given them a false and tainted reality. In other instances, he has let his imagination run wild.

All in all, practically the entire article is nothing but unadulterated trash.

HARRISON L. ANTHONY.
JOSEPH J. MAGLIONE.

Excerpt from a Danbury News-Times editorial, October 2, 1954:

"A magazine with a national circulation has just published what Warden Harold Hegstrom, of the Federal Correctional Institutions calls an article packed with 'malicious lies.'

"The article was written by J. Parnell Thomas, New Jersey Congressman, who served 9 months at the FCI after being convicted of payroll padding and accepting kickbacks from Federal employees in his office.

"Parnell Thomas certainly does not come into courts with clean hands. And anyone who knows Warden Hegstrom—as many people in the Danbury area do—most certainly will accept his word as against that of the tarnished former Congressman from New Jersey.

"Thomas alleges that almost nothing was right at the FCI, and everything wrong. Food was poor, and insufficient, immorality and graft were rife, near-riots threatened many times, guards were brutal and almost sadistic, drugs were easily obtainable, and bribery common. Prisoners in desperate need of medical care and medicine received neither, and malnutrition was common. Thomas goes allout in his accusations. * * *

"Mr. Hegstrom made this pithy observation: 'I think most of the inmates here would take exception to almost everything Thomas said.'

"It seems absurd and ridiculous for a criminal such as Thomas to take a righteous stand, and to spell out ways to aid young men to become moral and better while in prison. One would think that a public servant who betrayed his trust and was convicted of serious crime would want to hide himself and his name forever from the public, rather than to flaunt it openly in a magazine article.

"The hard fact about publishing such charges is that many will believe them, no matter how absurd they are, or how completely they are proved false.

"Although Warden Hegstrom was not at the FCI when Thomas served his sentence there, he knows what went on, and he knows the Federal prison service, where he has had a distinguished and honorable career. When he says that what Thomas alleges is a mass of 'malicious lies' we believe him. So does everyone who knows him, and knows the unsavory record of Parnell Thomas.

"It is not surprising that the former Congressman, embittered, his career ruined by his own viciousness, should turn and pour the phials of his wrath on the place where he was confined. It is surprising, we feel, that a magazine of good repute would publish such mouthings. Surprising and disappointing."

To the editor of Life from a former inmate of the Federal Correctional Institution at Danbury, Conn.:

"Upon reading an article relative to conditions in the Federal Correctional Institution at Danbury, Conn., which was published in the October 4 issue of Life magazine, I felt that out of a sense of fairness I should relate my observations from personal experiences as to conditions there in 1954.

"I was admitted with a group of 24 men, examined and assigned by the qualifications board to work in the hospital. It was my observation that each man was examined physically, intellectually, and practically to determine which type of work was best suited for him. Too, should he for any reason feel that he did not wish to carry on his assignment, he would be placed at a different task. Many men were shifted from week to week if necessary. Naturally here, as in any field, there were maladjusted persons who found it difficult to conform in the institution as they did on the outside. It is not an easy task to show this type of person that bitterness hindered, not helped, him to busy himself, accept his sentence, and so make his stay there easier to endure.

"Many of us, including myself, felt that we did not deserve the penalty imposed upon us but were astute enough to accept the uniforms, institutional food, and inconveniences, which could be compared to the vicissitudes of Army life, with good grace and make the best of them. The clothing was clean, and the food, I found, while it could not compare with the meals which I have been used to, was well balanced. It contained a sufficient number of calories, proper ratio of carbohydrates, proteins, and fats, with enough diversity from day to day.

"Relative to hospital treatment of inmates I can state that they have the best that can be given under the circumstances. The pharmacy is well stocked, and when a new drug is needed it is supplied quickly. X-ray examinations are done routinely; no one is refused this added help in diagnosis. The machines such as X-ray are serviced immediately should this be necessary as is the case in any well-regulated hospital. Right now an up-to-date machine is being installed.

"With regard to rehabilitation of the men I can truthfully say that the moral, physical, and educational components are being covered as adequately as possible. All told I feel the morale is on a high plane if one considers the whole as a cross section from so many different strata of life.

"At no time during my stay was there ever a hint at bribery regarding paroles.

"The above statement is purely voluntary and is made by a man who at no time received any special consideration and who states the facts as he saw them in the year 1954.

"PMB–10737."

Letter to James V. Bennett, Director, Bureau of Prisons, from a former Federal prison inmate:

OCTOBER 7, 1954.

After reading an article written by a former inmate named J. Parnell Thomas who served a short prison sentence at the correctional institution located in Danbury, Conn., it became my duty to write you a personal letter in reference to the untruth in the story.

I must do my duty in respect to the lies and unfairness of such an out-of-order story which was written by Thomas.

My name which appears upon the letterhead will reveal my identity as a former Federal prison inmate. * * *

I must also state in this letter that the officers of the prison were decent and human. Inmates such as Thomas and others who were prominent in the free world thought that they should be treated better than the average inmate. This does not happen in the Federal prisons as I know from past experience during my 5-year sentence at Lewisburg. * * *

Many times I thought of writing you a letter of praise in regards to the decent handling of inmates by the Bureau. You as Director, and your staff of officers, are to be merited and respected for the clean and outstanding system.

Before I sign off, many praises to you and your staff for the human, clean, and outstanding Federal Prison System.

PMB–16651.

To a Danbury inmate from his wife:

"DEAREST LOVE: I had a pleasant trip back to Philadelphia and everything was going rather smoothly until I read an article in Life magazine about the place you are in and I got so upset I was sick for 2 days. Everyone is calling me on the phone and asking me about it."

To another Danbury inmate from his wife:

OCTOBER 3, 1954.

DEAR JACKS: I just finished reading an article in this week's Life by a former inmate (political) and it was awful. It made me sick. He said he worked 12 hours a day, 7 days a week, and that the place was dirty and the clothes battered and that Jews and Negroes are segregated. I know these letters are censored, but the article is in Life for everyone to read. How can that be? You looked well-clothed and you said that the place was immaculate and that there was no anti-Semitism, and the food was good. He said most of the guards were bad and you told me how understanding and kind they all are—and I believe you, because when we visit we are extended every courtesy and treated kindly. He also said there is much indecency and bad medical facilities. This was only 4 years ago. Can he be lying or has everything changed for the better since then? I am very much concerned. Why doesn't some outgoing inmate write the truth—when guards and officials treat you as though you were in a correctional institution and not a prison (like you told me) why isn't the public told of how they try and not let anyone get away with such lies.

From an article entitled "The Truth About Federal Prisons," written for submission to Life magazine by Una C. Walters, wife of a correctional officer at the Federal Correctional Institution, Seagoville, Tex.:

"I have just read the article in the October 4 issue of Life, by J. Parnell Thomas, and as I begin this I blush for shame—not for the Federal Prison Bureau, but for the integrity or rather the lack of it in a former Congressman of the United States. On one point I must agree with Mr. Thomas. Justice is not very well regulated. Military courts often mete out too stiff sentences, and civil courts will sentence a man 20 years for bank robbery, while a fellow citizen elected to a position of trust and control is given 6 to 18 months for flagrantly cheating the people who trusted him, violating the very principles he pretends to represent, released after serving half his maximum term to return to his game as dangerous to our democracy as communism itself. The game is bribe and be bribed.

"For 7 years my husband has worked as a Federal correctional officer in a Federal penal institution, all of which are under the same direction and rules set up by the Federal Prison Bureau, very ably headed in Washington by Mr. James V. Bennett. Remembering the intensive training period my husband went through in the beginning of his career to fit him for his work, the burning of the midnight oil to learn what was required of him, the hard work and earnest effort he expended, and even now seeing the tired lines and too rapidly graying hair that so often accompanies the constant dealing with those less fortunate than oneself, helping when help is often resented, enforcing rehabilitation, when self-improvement is neither wanted nor the need for its recognized—all of this plus experiences that could fill volumes, and the firm belief that he is typical of the officers that make up the force of the Federal prison system, I am furious to see these men and those who share their responsibility belittled and underrated by a common snob.

"Much of Mr. Thomas' article is false; all of it is the composition of a broken, bitter man who, for the first time in his life, evidently, has had to live by the same rules and regulations that govern others, unable to bribe or threaten his way into a soft spot."

RULES OF PROCEDURE FOR CONGRESSIONAL INVESTIGATING COMMITTEES

Mr. HENNINGS. Mr. President, all of us have given considerable thought to the subject of rules of procedure for congressional investigating committees. Many proposals to regulate and define such procedures have been presented in this body. On January 6, I submitted Senate Resolution 15, designed to assure the unhampered continuation of legitimate investigations, and at the same time to assure fair conduct in such investigations. Since that time I have received many letters from thoughtful citizens commenting on this subject in general, and my resolution in particular.

I invite the attention of my colleagues to the issues raised in one such letter, and I ask unanimous consent that I be permitted to have this letter printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CALDWELL, DOWNING,
GARRITY & EASTIN,
Kansas City, Mo., January 10, 1955.

Senator THOMAS HENNINGS,
Senate Office Building,
Washington, D. C.

MY DEAR SENATOR: May I congratulate you upon the introduction of Senate Resolution 15 suggesting an amendment to the Standing Rules of the Senate.

I have two suggestions for your consideration. The first grows out of the thought and research that I have given in connection with the power of the Senate to investigate. You have a rough copy of the authorities

that influence my thinking on this point. Certainly one must agree with your conclusion that power to investigate exists "to develop concise and adequate information in order to formulate intelligent legislative policy."

I am doubtful about the existence of the power, and certainly about the exercise of that power should it exist, "to supplement the extensive investigatory machinery work in the executive branch."

Certainly the Senate should exercise its power to investigate how legislation can authorize the Secretary of Agriculture to cry "Wolf," on Wolf and how the State Department can hear such a statement and merely act as though someone had belched at a diplomatic dinner. My point is that as Missourians whose ancestors had quite a good deal of experience with test oaths, I think that both of us would overhaul a good many of the laws under which the executive branch acts because I am inclined to think that many of these laws have vested far too much power to make nonjudicial judgments on the conditions of men's minds in the exercise of methods completely foreign to our basic traditions.

Of course, that problem is one of alternatives and judgment as to where the greatest risk might lie. I personally find myself lining up with the basic Jefferson philosophy as most eloquently expressed by Judge Hand in 1952 when he accepted a degree from New York University.

Secondly, I am bothered by the omission of even a limited right of cross-examination in the suggested amendment. Quite correctly, you have based your plea for following rules of evidence upon the time-tested rules of fair play, pushing the origin back to the Plains of Runnymede. But one of the traditional restraints on power demanded and received from King John by the barons was the right of cross-examination.

Perhaps there are compelling reasons, practical and otherwise, that prevent the inclusion of that right, at least in a limited form in connection with what you call the inquisitorial phase of congressional investigation, in paragraph 4 of your proposed amendment, but unless those reasons are most compelling I would be hopeful that the right of cross-examination will ultimately be included.

May I close with the expression that certainly your approach is basically sound. This business of promulgating codes and pious statements leave me quite cold because as long as the power exists to investigate in accordance with one's personal whim, I am inclined to think that Lord Acton's dictum as to what power tends to do and what absolute power does is quite applicable, even to the United States Senate.

With warm personal regards,

Sincerely yours,

JOHN W. OLIVER.

Mr. HENNINGS. The writer of this letter expressed doubt about the existence of a congressional power to supplement the extensive investigative machinery at work in the executive branch. I pointed out to him that Congress has an overwhelming obligation to safeguard the general welfare of our country, and if the executive should plainly be deficient in protecting the security of the United States. Congress must assume the role.

The writer also expressed concern over the absence of the right of cross-examination from my proposal. I explained to him that such omission seemed necessary. For such a right could perhaps be abused by persons not sincerely interested in the welfare of our country. I explained that my resolution is intended to prevent such abuse, and at the same time to assure injured persons the right to answer their accusers.

I believe that this letter is typical of the concern which all citizens feel in this matter, and I am encouraged that the people are taking the time to express this concern to their elected representatives.

The PRESIDENT pro tempore. If there be no further morning business to be transacted, the Chair recognizes the Senator from New Mexico [Mr. CHAVEZ].

ALIEN PROPERTY SEIZED UNDER THE TRADING WITH THE ENEMY ACT

Mr. CHAVEZ. Mr. President, I am pleased to note that on last Tuesday there was introduced in this body by the Senator from West Virginia [Mr. KILGORE] and the Senator from Illinois [Mr. DIRKSEN] a bill which will result in the return of the property seized from its private owners under the Trading With the Enemy Act.

During the last session of Congress the Senator from Illinois [Mr. DIRKSEN] introduced a similar bill and it was considered by the committee. I also introduced a similar bill, which was considered by the committee, but no action was taken by the Senate on either bill. I hope the legislation recently proposed by the Senator from West Virginia and the Senator from Illinois will receive favorable action at this session of Congress.

It is now 10 years after hostilities. Further delay in returning this property is neither necessary nor wise. Closing out this situation will permit a substantial reduction in administrative expense by ending the need for the agencies which are now engaged in administering the property for the Government.

Favorable action now upon this proposed legislation is especially desirable for other important reasons. There is in Western Germany a government which has evidenced an unwavering desire for friendship with us and a steadfast adherence to the principles of the Western World. The actions of the government of Chancellor Adenauer are those of a friend determined to join with us in resisting communistic aggression. Events over the last weekend in France make it clear that there still are great obstacles to be overcome before West Germany will be accorded the full status of a partner in the common defense of the Western World, even though the constancy of the purpose which the Adenauer government has shown demonstrates that it has earned the right to this partnership now. It is lacking in realism to believe that this constancy has been achieved by the Adenauer government without domestic difficulties. There are those in Europe who oppose communism but who are not willing to be active in their opposition. Some of the neutralists are in Germany. The Communists have made and will continue to make glamorous offers to Germany as well as elsewhere. Chancellor Adenauer has consistently pierced the sham of these offers. But some Germans may succumb to them.

The best way for us to help the friendship, which has been so important to establish, to prevent Germans from being beguiled by Communist promises and to continue in Germany a government with ideals like those of our own country, is now to act toward Germany with a spirit consistent with that which a sincere partnership requires.

It is inconsistent with such a spirit to continue to withhold private property from its rightful owners simply because they are German citizens. As Chancellor Adenauer himself has said, the failure to return this property to its rightful owners is and continues to be a sore spot in German-American relations.

But this is not the only inconsistency. To refuse to return this property to its private owners is inconsistent with our tradition. It is inconsistent with the opinions and judgment of all the recognized writers of international law since the beginning of this country. It is inconsistent with the views of every American authority with a reputation beyond the community in which he lived.

It is inconsistent with the spirit of the Farewell Address of George Washington, which will be read in the Senate on the 22d day of this month. In that address the great President asked the people of the United States to meet their obligations and to treat all people correctly and firmly.

The measure of this inconsistency and the strength and long-standing character of this tradition are shown by the names of those who have held that our Government does not have the right to confiscate the property of private persons who are distinguished from other persons in that they are enemy aliens. The list includes Alexander Hamilton, John Adams, Thomas Jefferson, John Marshall, Benjamin Cardozo, Charles Evans Hughes, Cordell Hull, John Bassett Moore, and Edwin Borchard among the others. They uniformly condemn confiscation of private property as a violation of the right to private property.

These authorities have made clear that unless confiscation is rejected the individual's right to property becomes a sham. They have held that expediency or compromise cannot apply when basic principles are involved, if basic principles are to remain basic. Their position is that we must stand firm on principle. I submit that that is the course we must now follow.

Our Government is a government charged with protecting private rights and not with destroying them. Especially within the past 2½ years has the idea or principle that private rights must be protected been emphasized by the administration.

That the Government has the power to destroy such rights should not make us blind to the fact that its power cannot properly be exercised to destroy them and that when such unfortunate action has occurred it is the duty of the Government to make reparation.

As the law now stands it is in conflict with the principles which we have always held to be basic to our tradition. As the law now stands the right to private property in the United States is not inviolate; our Government has exercised the power

given to it to protect the property rights of individuals and to destroy such rights in the case of some people. In the passion of wartime, with the suffering and hate of such tragic periods, the spirit of vengeance often replaces reason.

There has now been time enough for calm reflection, and with it the realization that basic principles have been violated in the existing legislation. That being the case, the error should be corrected. The great men whose names I have mentioned point out the corrections we must make. The bill introduced last Monday adopts the advice they give.

Mr. LANGER. Mr. President, will the Senator from New Mexico yield?

Mr. CHAVEZ. I yield.

Mr. LANGER. Mr. President, I am delighted that the senior Senator from New Mexico, who is a very warm friend of mine and whose judgment I greatly respect, has finally and at last come around to the viewpoint that the German property should be returned. Eight years ago, 7 years ago, 6 years ago, 5 years ago, 4 years ago, 3 years ago, 2 years ago, and 1 year ago I offered a bill on the subject, but every time the bill was reached on the Consent Calendar, my distinguished friend from New Mexico objected to its consideration.

Finally, approximately a year ago, the Senate passed Senate bill 155, providing for the return of the German property, but, as my distinguished friend from New Mexico will remember, the House failed to act upon it. The Senator will find that in the bill about which he is now speaking Senate bill 155 is incorporated in its entirety. The bill should have been passed, Mr. President, 6 or 7 years ago, when it would have done much more to help the situation in Germany than the passage of a bill today will accomplish.

Adenauer is standing with his back to the wall. He has lost the past two elections. It may be that, if we can get prompt action on the bill, as the distinguished Senator from New Mexico now suggests, it may still do a great deal of good.

I was a member of the subcommittee of the Committee on the Judiciary which had under consideration the bill which was introduced by the Senator from Illinois [Mr. DIRKSEN] last year. It was reported by unanimous vote of the Judiciary Committee, but we were unable to get action upon the bill.

Mr. President, I wish to compliment my friend for bringing the matter to the attention of the Senate today, and I can assure him that I shall fight shoulder to shoulder with him in the effort to pass the bill.

Mr. CHAVEZ. Mr. President, the proposed legislation is not political; it is not Democratic or Republican. It merely carries out the Amercan idea of fair play and decency. That is all that is intended to be done. Ten years have passed since the war. What country do we depend upon to oppose Communist China. The people of Japan. What people do we depend upon in Germany at this time to be our friends even as against our so-called allies? The people against whom we fought 10 years ago.

I feel, Mr. President, that individuals should not be held responsible for the doings of governments. The property involved is individual property. It belongs to A, B, C, D, and probably to X. Are we going to continue to use their property because we were once at war with the German Government, or are we going to be fair? Are we only sermonizing with respect to our democracy? Are we going to show the world that when a piece of property belongs to Jim Jones we are going to protect the rights of Jim Jones?

Mr. LANGER. Mr. President, will the Senator from New Mexico yield further?

Mr. CHAVEZ. I yield.

Mr. LANGER. Mr. President, let us consider a situation, for example, in which an American boy has an insurance policy worth $10,000. The insurance is made payable to his mother in Germany. Yet, at the present time, the money cannot be sent to his mother. There are numerous cases of men in this country who have made some money setting up trusts for their fathers or mothers in the old country, Germany or Austria. But at the present time, even though the fathers and mothers may be starving, they cannot get the money.

Mr. President, I congratulate my friend from New Mexico, and I hope we may obtain prompt action upon the bill to which he has been referring.

Mr. CHAVEZ. Mr. President, the passage of this bill will demonstrate to the Germans and the Japanese, people and governments alike, that principles are important to us and that they control not only the actions of our people but our Government. It will be a concrete illustration of the regard for life and property by governments which are subject to the rule of law as contrasted with the lack of such regard by the Communist master government which asserts all power unfettered by any law.

We cannot compromise between right and wrong. The property taken should be returned to those from whom it was taken.

Mr. NEUBERGER obtained the floor.

Mr. MORSE. Mr. President, will the junior Senator from Oregon yield?

Mr. NEUBERGER. I am happy to yield to my colleague.

Mr. MORSE. Mr. President, I appreciate the Senator's courtesy. I have a luncheon engagement which has been waiting for half an hour.

The PRESIDING OFFICER. The senior Senator from Oregon may proceed.

STATEMENT OF NATIONALIST CHINA'S FOREIGN MINISTER WITH REFERENCE TO FORMOSA AND THE PESCADORES

Mr. MORSE. Mr. President, I wish to make a comment on a story appearing in this morning's New York Times, headed "Formosa Says United States Pledged To Defend All Offshore Isles."

I read from the story, as follows:

Nationalist China's Foreign Minister asserted today that the United States was pledged to defend all the offshore Chinese islands in addition to Formosa and the Pescadores.

George Yeh made this comment as he paid farewell calls on Secretary of State John Foster Dulles and on Walter S. Robertson, Assistant Secretary of State for Far Eastern Affairs. Mr. Yeh, who has been in the United States since last October, is returning to Taipei tomorrow.

Further on in the article it is stated:

One of these understandings, concurred in by Mr. Dulles, although it is separate from the treaty, provides that the United States will not be obliged to take military action in defense of the Nationalists beyond Formosa and the Pescadores unless the treaty is specifically amended.

President Eisenhower, however, under the terms of the congressional resolution adopted January 28, can order the 7th Fleet and its carrier-based planes to fight for Quemoy and Matsu if he deems those positions essential to the defense of Formosa.

Mr. Yeh appeared to be suggesting that the President had promised the Nationalists such assistance.

The article leaves the impression that Mr. Yeh is of the opinion that the President of the United States has made that pledge. I do not believe it, Mr. President. I wish the RECORD to show that I do not believe the President of the United States has made such a pledge to the Nationalist Chinese. I wish the RECORD to show that I do not think the Nationalist Chinese minister is telling the truth. If he is, it is a sad day for America. If he is telling the truth, Mr. President, we are headed for serious trouble in the East. Yet in the debate spokesmen for the administration on the floor of the Senate sought to leave with the American people the impression that no such commitment has been made by this Government to the Nationalist Chinese.

I should like to know who is lying. The American people are entitled to know who is lying. If the Nationalist Chinese have in this country a foreign minister who is issuing such lies, he should be repudiated by this administration, because his statements are very disheartening to the American people. We want to go forward unitedly behind our President, but we also want at the same time assurance from our President that there is no commitment to defend the Quemoys and the Matsus, because we have not the slightest legal right to be on the Quemoys and the Matsus. That will be the judgment of history and of international law.

So I close, Mr. President, by saying that the Chinese foreign minister himself raised the issue yesterday. Let the President of the United States answer him, because he owes it to the American people to do so.

PROPOSED REFORMS IN THE TREATMENT OF THE MENTALLY ILL IN ALASKA

Mr. NEUBERGER. Mr. President, I have introduced 2 bills to bring about 3 urgently needed reforms regarding treatment of the mentally ill in Alaska. These bills are S. 1027 and S. 1028.

These proposals, first, provide for construction of a modern hospital within Alaska for treatment of men and women who are mentally ill; second, improve

and modernize the methods of committing the insane in Alaska; and, third, transfer these functions from the Interior Department to the Department of Health, Education, and Welfare, where they properly belong.

I am sponsoring the proposed legislation because, in view of an extraordinary situation, I believe it must originate with a Member of Congress from the State of Oregon to have a reasonable chance of adoption.

Since 1904 all insane Alaskans have been treated at the Morningside Hospital in Portland, Oreg., a private institution. This hospital served a useful purpose during Alaska's frontier era, and it has been operated by responsible and conscientious owners. However, the system of contract care has long been recognized to be fundamentally wrong and has been abandoned in modern, humanitarian communities. It is particularly cruel and archaic, in my opinion, to transport American citizens who are mentally ill into confinement several thousand miles from their loved ones.

EX-GOVERNOR FAVORS CHANGE

In his recent authoritative book, The State of Alaska, ex-Gov. Ernest Gruening, who served outstandingly as Governor of Alaska for 15 years, has written that "accessibility of relatives and friends" is a basic prerequisite for successful treatment of most mentally ill individuals, yet this accessibility is denied to Alaskans by the lack of hospitals and by the ancient laws which compel Alaska's mental patients to be treated in Portland, Oreg., rather than within Alaska itself.

Not 1 of the 48 States represented in the Senate would think of sending its mentally ill citizens 2,000 miles to be confined in a hospital operated for private profit, and I can see no sound reason why this system should continue to apply to the residents of Alaska.

On earlier occasions Members of the Congress from my State may have used their influence to block a change in the treatment of Alaska's mentally ill because the Morningside Hospital has provided a valuable local payroll in Portland.

I renounce any such considerations. I know that the humane and upright people of Oregon join me in this stand.

I also should like to make clear that my proposal involves no criticism of the operators of the Morningside Hospital. I have no doubt of their competence and their personal devotion to the patients under their care. But would residents of Oregon look with favor upon any system which required the mentally ill people of Oregon to be treated at Phoenix, Ariz., for example, or at Fort Nelson, British Columbia? The people of Alaska certainly have an equal right to be comparatively near relatives who have lost their sanity.

PHYSICIANS URGE HOSPITAL IN ALASKA

In 1949 a committee of distinguished psychiatrists reviewed the Alaskan program for treating the mentally ill. These leading physicians in the field of mental health had this to say of the Morningside Hospital in Portland:

> Only custodial care is provided at the present time, and as such it is reasonably good as compared with the poorer mental State hospitals. The facilities as a whole are overcrowded, but not so seriously as in some State institutions. The patients appear to be well fed and sympathetically treated * * * Practically no psychiatric treatment is afforded the many patients who urgently need such treatment. The professional staff is inadequate numerically and professionally to provide the required treatment * * * Although the physical layout of the plant is not good, it is evident that there have been substantial improvements made in recent years, and your committee was informed of additional betterments planned, such as an improved dining room for the patients.

In addition to this impartial analysis of the Morningside operation, the committee of doctors pointed out:

> The fundamental principle of contract care in proprietary institutions is wrong. It has long been outmoded in the United States. * * * It is subject to criticism on sound humanitarian grounds.

This committee then unanimously recommended construction of a modern mental hospital in the central region of Alaska, with at least 350 beds, plus a short-term 50-bed clinic in southeastern Alaska for acute cases.

A follow-up survey made in 1954 further pointed out that many patients from Alaska have a limited knowledge of English and that the cultural barrier between them and psychiatrists in the distant hospital makes treatment difficult.

A great many of these patients are Indians and Eskimos and, therefore, cannot communicate with the persons who are treating them.

Moreover, the distance between Portland and the Territory makes it almost impossible to parole patients who show improvement to their homes.

OREGON WILL NOT DISCRIMINATE AGAINST ALASKA

Undoubtedly there was a time, during Alaska's pioneer era, when the facilities at Morningside Hospital were the best available for treatment of the mentally ill. But, as the poet Lowell wrote, "new occasions teach new duties, time makes ancient good uncouth."

Today, Alaska has a population of about 200,000. It has modern buildings, supermarkets, bus lines, a streamlined railroad train, vast airports, and some of the world's biggest defense installations. Yet the system for caring for the mentally ill of Alaska remains anachronistic and, in some respects, barbaric. Proximity to home and loved ones is, as I have said, an important phase of therapy in insane cases. Yet the mentally ill Alaskans at Morningside Hospital in Portland are as far from their families as would be a mentally ill Oregonian in Omaha, Nebr. I ask again: What would the citizens of Oregon think of any such arrangement involving their relatives?

MENTALLY ILL PEOPLE MUST BE NEAR FAMILIES

The hardships of having to travel far from home to receive mental hospitalization and treatment will be eliminated only when the mental hospital which has been needed and urged so long is actually built in Alaska. I hope the 84th Congress will authorize the construction of such a hospital and appropriate the funds for its construction.

In the meantime, however, many of the worst cruelties of the existing system can be somewhat alleviated by the adoption of modern commitment procedures which will make the process of qualifying for and obtaining mental hospitalization as speedy and humane as the actual conditions in the Territory can possibly permit.

The legislation I propose would finally do away with the archaic trial of the sanity or mental illness of an individual by a United States Commissioner's jury of laymen. It would substitute modern processes of voluntary, involuntary, or judicial hospitalization based upon the best medical examination available. Based upon model legislation, similar proposals have received favorable consideration in conjunction with hospital-construction bills in earlier sessions of Congress and, I understand, came close to passage last year. As it is completely uncontroversial and as the need is universally recognized, I am confident that modernization of the commitment procedures of Alaskan mental patients should win speedy approval in the present Congress.

HEALTH DEPARTMENT SHOULD TAKE OVER

The bill which I have introduced is very similar to H. R. 610, introduced in the House of Representatives by the able Delegate from Alaska, Hon. E. L. BARTLETT. Like H. R. 610, my bill would transfer responsibility for the operation of a modern program of mental health to the Department of Health, Education, and Welfare—the agency of our Federal Government with functions in the field of health that obviously equip it and its personnel for this work. I also had the privilege of studying the suggestions of Mr. Wayne Coe, of Portland, who, in managing Morningside Hospital, has had more experience than any other person with the mentally ill of Alaska, and who has urged upon me the importance of bringing the archaic commitment procedures up to date without further delay.

I am informed by the office of Delegate BARTLETT, of Alaska, that approximately $25,000 annually is spent just in transporting patients the long distance by air or sea from various Alaskan communities to Portland, Oreg. A substantial portion of this sum certainly can be saved when a mental hospital is constructed in Alaska, although I confess that my purpose reflects far more humanitarian than budgetary considerations.

The unfortunate people of Alaska have been unable to correct the existing situation themselves, and so only Congress can provide a method of dealing with Alaska's insane which is worthy of a great free nation. This is because the Organic Act of 1912, which first established Alaska as a Territory, expressly forbids the Territorial legislature at Juneau "to alter and amend, modify and repeal" the present code dealing with Alaska's insane.

Previous to the Organic Act of 1912, conditions with respect to the treatment of the insane were completely disorganized, and anarchy prevailed.

OREGON'S PEOPLE WILL NOT BE SELFISH

I realize that there may be some in my home State and in the city of Portland, where I was born and reared, who will criticize me for introducing legislation which threatens a Government contract with a local institution which provides a local payroll. But I know that the great majority of my fellow residents of Oregon realize that, as a United States Senator, I must serve the best interest of all the people of our country. Alaskans are our fellow American citizens. They are as much entitled to humane consideration by our Government as are the residents of Oregon or any other State.

It is my conviction that no Americans anywhere should have to be taken into custody under archaic procedures, to receive hospitalization under a "contract" arrangement many thousands of miles from their homes and families. It is this conviction which has motivated my sponsorship of the present bills.

AUTHORIZATION FOR SIGNING OF BILLS DURING ADJOURNMENT OF THE SENATE

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President pro tempore of the Senate may have the authority to sign bills during the adjournment of the Senate.

The PRESIDING OFFICER (Mr. BIBLE in the chair). Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business to act on nominations on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. BIBLE in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

The PRESIDING OFFICER. If there be no reports of committees, the nominations on the Executive Calendar will be stated.

DIPLOMATIC AND FOREIGN SERVICE

The legislative clerk read the nomination of Philip W. Bonsal, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Colombia.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

DEPARTMENT OF COMMERCE

The legislative clerk read the nomination of George T. Moore, of Illinois, to be an Assistant Secretary of Commerce.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

ROUTINE DIPLOMATIC AND FOREIGN SERVICE

The legislative clerk proceeded to read sundry nominations in the routine diplomatic and Foreign Service.

Mr. MANSFIELD. Mr. President, I ask that the nominations in the routine diplomatic and Foreign Service be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations in the routine diplomatic and Foreign Service are confirmed en bloc.

UNITED STATES COAST GUARD

The legislative clerk proceeded to read sundry nominations in the United States Coast Guard.

Mr. MANSFIELD. Mr. President, I ask that the nominations in the United States Coast Guard be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations in the United States Coast Guard are confirmed en bloc.

COAST AND GEODETIC SURVEY

The legislative clerk read the nomination of John O. Boyer to be commissioned lieutenant commander, subject to qualifications provided by law.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask that the President be notified of all nominations this day confirmed.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith of the confirmation of these nominations.

ADJOURNMENT TO TUESDAY

Mr. MANSFIELD. Mr. President, as in legislative session, I move that the Senate now adjourn until 12 o'clock noon on Tuesday next.

The motion was agreed to; and (at 12 o'clock and 59 minutes p. m.), the Senate adjourned until Tuesday, February 15, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 11, 1955:

RENEGOTIATION BOARD

Thomas Coggeshall, of Connecticut, to be a member of the Renegotiation Board, vice George C. McConnaughey, resigned.

FEDERAL FARM CREDIT BOARD

Sam H. Bober, of South Dakota, to be a member of the Federal Farm Credit Board for the remainder of the term of 2 years from December 1, 1953, vice Raymond Sayre, deceased.

UNITED STATES ADVISORY COMMISSION ON EDUCATIONAL EXCHANGE

The following-named persons to be members of the United States Advisory Commission on Educational Exchange for the terms indicated, and until their successors have been appointed and qualified:

Laird Bell, of Illinois, for a term expiring January 27, 1957, vice James L. Morrill, resigned.

Arthur Hollis Edens, of North Carolina, for a term of 3 years, expiring January 27, 1958. (Reappointment.)

Anna L. Rose Hawkes, of Vermont, for a term of 3 years, expiring January 27, 1958. (Reappointment.)

IN THE NAVY

The following-named officer of the Reserve of the United States Navy for temporary promotion to the grade of rear admiral in the line, subject to the prescribed qualifications:

George A. Parkinson

The following-named officers of the Reserve of the United States Navy are nominated for permanent appointment to the grade of rear admiral in the line or staff corps indicated:

LINE

William A. Read	William W. Drake
Karl L. Lange	Charles L. LaBarge
James M. Ross	Harry P. Stolz
Edward C. Holden, Jr.	Richard R. McNulty

MEDICAL CORPS

Richard A. Kern
Alphonse (n) McMahon

DENTAL CORPS

Charles R. Wells

SUPPLY CORPS

William L. Nelson

CHAPLAIN CORPS

Maurice S. Sheehy

CIVIL ENGINEER CORPS

Robert C. Johnson

The following-named officers of the Navy for permanent appointment to the grades indicated:

Captain, line

William H. Sublette	Blish C. Hills
Clarence A. Keller	Frank G. Selby
Charles E. King	Stevan Mandarich
Lewis L. Snider	Richard Lane
Raymond D. Fusselman	Harry C. Maynard

Victor Koll

COAST AND GEODETIC SURVEY

To be commissioned lieutenant commander, subject to qualifications provided by law

John O. Boyer

EXTENSIONS OF REMARKS

Lincoln Day Address by Hon. George H. Bender, of Ohio

EXTENSION OF REMARKS
OF
HON. FREDERICK G. PAYNE
OF MAINE
IN THE SENATE OF THE UNITED STATES
Friday, February 11, 1955

Mr. PAYNE. Mr. President, I ask unanimous consent that the text of the address delivered by the distinguished Senator from Ohio [Mr. BENDER] at the Lincoln Day meeting in Portsmouth, Ohio, may be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I am very happy to be here this evening.

Anyone who has ever gone through a statewide election campaign can never forget it. And when you have gone through a campaign, an unofficial count, an official count—and then a recount—never seems too short.

I am most grateful to you for your help during the difficult weeks before, and after, November. You may be sure that I shall work my hardest to show my gratitude.

We Republicans have good reason to observe our Lincoln Day tradition every year. It serves to remind us of many fundamental truths. First, and perhaps most important, is the reminder that crises are nothing new to the American people. There is no war more shattering to a nation than a civil war. Lincoln led us through the valley of the shadow of death to a new understanding of the Union. Division and disunity have become unthinkable in our country since his time. We may differ, we may disagree violently, but we shall never again divide.

There are other reminders, too, in the Lincoln story. We have almost forgotten that the War Between the States was also a time of international tension. We had enemies overseas in the 1860's. They were ready to do everything in their power to disrupt the Federal Union. They encouraged rebellion and hoped for American weakness. With civil war raging, they planted a foreign emperor upon the soil of Mexico. This fantastic episode in our continent's history has faded from sight, but it was a major threat to our peace and security then. Foreign problems are nothing new to our people. We have met them and we have overcome them before. We shall do it again.

I think of still another lesson from the Lincoln legend. No man in the pages of history was ever a more direct example of Micah's Biblical injunction: "Do justice, love mercy, and walk humbly with thy God." Lincoln never strayed far from these guides to human conduct. He showed in his life that men can achieve greatness without violence, without injustice, and without arrogance.

We know all these things. I emphasize them because there is a strong similarity between our own times and the troubled days of the 19th century. There is a strong similarity between the man who leads our country today and Lincoln.

President Dwight D. Eisenhower is a great man. He is a humble, God-fearing man.

There are people who disagree with him. There were many who disagreed with Abe Lincoln. That is as it should be. There is room for honest division of opinion on the policies and the program of any President. But there can be no disagreement on the absolute integrity, the single-minded devotion, and the firm determination of President Eisenhower.

This is the 166th year of our Republic. We are just beginning the second century of the Republican Party. Our country's greatness is just beginning.

The times are difficult. When were they ever otherwise?

I am an optimist. In the midst of our trials, I look to the future with confidence. There are some people who have little faith in the future of our country. They call themselves Democrats. During the difficult years of the 1930's, these Democrats told us to plow under our crops, to destroy the little pigs, and throw in the towel. America was through. Some new form of socialism was going to sweep the land.

Last year, these same Cassandras were out in full cry, scaring up a depression which never occurred, looking for the age of darkness under every burned-out electric-light bulb. They closed their eyes to the real wave of the future, the tremendous new age which is almost here.

In the last few weeks, I read the report of the Atomic Energy Commission. They have a tiny atomic device, only a few inches square, which can generate the same amount of cancer treatment as $20 million worth of radium. They have a new atomic plant which will preserve food for as long as 2 years without a trace of spoilage. I don't know if you will like this one, but they say they can turn out women's stockings that will never wear out. We know that atomic energy will drive ships, fly planes, heat cities, and do almost everything we can think of except find a place to park our car.

Maybe there won't be too many cars. The next generation may be flying the family plane exactly the same way we have been driving the family auto. You can sit down and start thinking of the most incredible new inventions you can imagine. Somebody already has it on a drafting board. We have come to take these things for granted.

I don't think we ever should. Look back with me for a moment into this whole amazing period. How did our side win the atomic race? Before World War II, German scientists were as far advanced as our own—perhaps further advanced. Yet, somehow, thanks to the policies of Hitler and Mussolini, the greatest minds of Italy and Germany and Central Europe were driven to our country at the most critical moment of modern history. Enrico Fermi, possibly the master mind of all the great minds in atomic physics, came to America because of his wife. Albert Einstein and Niels Bohr fled from Europe because they could not breathe in the stifling atmosphere of fear and hatred. These were not accidents. They were the hand of destiny. The outcome of World War II might have been far different without this divine intervention.

Abraham Lincoln was always aware of God's presence in human affairs. One time a delegation of northern clergymen came to see him in the White House. One of them said, "I pray that the Lord will always be on our side." Lincoln looked up and said, "I would like to modify that prayer. Let us pray that we shall always be on the Lord's side."

Our President today is the same kind of man. He is a fighter who prays for guidance. We need it today. Let there be no mistake about the facts before us. The administration in Washington has not created the problems we must solve. We have inherited them. They were the legacy of those New Dealers who dealt the cards from marked deck under the table at Yalta. No one has yet analyzed fully the significance of that infamous conference. It was a sellout of China. Personal, secret agreements were entered into by Mr. Roosevelt, by Stalin and Churchill. Roosevelt approved all of Russia's encroachments upon China. He approved Russia's claim to preeminence in Manchuria. In 1951 Dean Acheson admitted to a Senate committee that the Government of China knew nothing of this secret agreement.

At this same conference, we sanctioned the occupation of North Korea by the Communists. These were the two big decisions at Yalta. They have been the root of all the problems in Asia ever since. Because of Yalta, we found ourselves fighting an undeclared war in Korea.

Because of Yalta, we find ourselves in a desperate dilemma today in the Straits of Formosa.

This is by no means all of the story. We made other deals, unknown to the American people, involving all of Europe. Poland was not turned over to the Communists by action of the Polish people. A few men sitting around a table made the decision. They did not consult with the leadership of the countries involved. They did not even consult with the leadership of our American Congress, much less the full membership. When Roosevelt reported to Congress on March 1, 1945, after the Yalta meeting, he said that the formula for the future of Poland was "agreed to by Russia, by Britain, and by me."

The decisions on East Germany, turning over the great industrial centers of Silesia, Saxony, and Bohemia to the Soviet Union, were made by a few individuals. They were not produced by bipartisan agreements or even by partisan consultation with one party.

Lenin once wrote that communism would conquer Europe in a bypass through Asia. They are trying; they have seized China; they have seized Korea. Now they have taken the northern part of Indochina. The battle for Formosa is already on. Let us not deceive ourselves or permit others to deceive us.

Some people ask why we are concerned. They say that we should not be fighting in a Chinese civil war. This is not a civil war. It is a war between international communism and the free world. There can be no misunderstanding of this fundamental issue.

Formosa in the hands of Red China would be exacty what President Eisenhower described—a dagger thrust into the heart of the Pacific.

For half a century our lines of defense have been committed to the Philipine Islands. We saw how our own country could be endangered in 1941. An air attack based from Japan came within a hair's breadth of destroying our Pacific Fleet at Pearl Harbor. That destruction would have opened the whole of our Pacific coast to the threat of invasion.

Thanks to President Eisenhower, we are far stronger today than we were in 1941. We have learned the realities of life the hard way.

Our country wants peace. We know that in a new war there will be no victors. Albert Einstein has said that he does not know all the weapons which could be used in world war III. But he does know the kind which will be used in world war IV. They will be bows and arrows.

This terrible paradox confronts us today. We have arrived at a moment when we can look forward to a new era of tremendous human progress—at exactly the same moment when we have discovered the means of wiping mankind from the face of the earth. Our scientists are frightened at the

Frankenstein they have created. They tell us that the "fall-out" of atomic radiation from a hydrogen bomb can impair life for hundreds of miles away from the spot where the bomb hits. What sane men will risk war with this knowledge?

These are the serious facts of life today. The next 25 years will be filled with crises. When we analyze them, they always come down to the same basic issue. Each one represents the fight of the State to own our souls. Communism says, "Give me your birthright, and I will feed your stomach. Let the state run your life for you."

In America the Republican Party is still fighting for the rights of the individual. We know what happens when governments take over the responsibilities of the people. They surrender their birthright of freedom for a mess of pottage. In our day we have seen how this works. Here in our own country the Democratic Party is offering us the same bait. Turn to Washington for everything you need. We will take care of you. All we want in return is your vote, your taxes, and your soul.

The Republican Party has never followed this theme. We fight the belief that there is some magic in a mysterious thing called the state. We object to the theory that the people of this country are members to be manipulated for political purposes, like puppets dangling from a string. We believe in free men, living in a free economy, leading a free world.

Look back at the record of our service. From 1860 until 1900 only one Democrat was elected President. In that span of time our population grew from 23 million to 76 million. Our railroads crossed the continent. American unearthed the treasures of our natural resources. They developed mines; they poured out a never-ending stream of inventive genius. America became a world power. It was an unmatched period in history. All that has happened since that time has been an extension of this magnificent effort.

Republican leadership, Republican foresight made the system of free enterprise a symbol of creative skill. They made free enterprise a living force throughout the world.

When he came to the crucial questions, he understood how America had become great back in 1860. "We are a great empire. We are 80 years old," he said. "We stand at once the wonder and the admiration of the whole world, and we must inquire what it is that has given us so much prosperity, and we shall understand that to give up one thing, our free government, would be to give up all future prosperity. This cause it is that every man can make himself. It has been said that such a race of prosperity has been run nowhere else."

That is the story. The words are just as true as they were when Abraham Lincoln said them. The only way to improve our condition is to increase our business by investing more money and making more jobs for more people. If we kill the goose there can be no eggs. We are not going to kill our geese, and there are going to be enough eggs for everybody.

I think that we have made long strides forward in the past 2 years in Washington. Lincoln would have approved our efforts. He was a man who abhorred violence and bloodshed, but he was not afraid to use all the power at his command to fight for what he believed right.

He enjoyed peace and quiet, but he fought one of the fiercest wars ever fought for principles—not power.

In our own time, too, Americans have been called upon to perform repugnant tasks. We have done them well. I like to think in terms of parallels. History does not ever really repeat itself. We like to interpret it in terms of the past, so that it has meaning and continuity.

President Eisenhower, like Abe Lincoln, stepped into the White House after years of Democratic supremacy. He too has been forced to clean the stables. In the very short space of 2 years, people have forgotten what we endured before. This is a tribute to our Republican administration. The stale odor has gone and a fresh spirit moves into Washington.

No one can tell us what the future will bring. A few months ago, President Eisenhower used a neutron wand in Denver, Colo., to break ground in Pennsylvania for the first commercial plant powered by atomic energy. The first atomic battery has already been manufactured. Think of what a small atomic generator in your home would be able to do. All of your heat, light, and fuel will be provided for as long as you can foresee. Salt water will be converted to fresh in quantities sufficient to feed the deserts into life.

Those are some of the miracles before us tomorrow, if only we have the courage and the wit to overcome the problems that plague us today. Here in our country, we have the technical know-how, the scientific skills, the manpower necessary to realize these dreams.

Political parties and their programs have played a tremendous part in the development of our Republic. The Republican Party has always stood for stability. We do not believe in the quick shortcuts, or in the planned utopias of the New Deal intellectuals.

The WPA, the PWA, the CCC, and all the rest of the alphabetical agencies never achieved security, or stability or prosperity. They were emergency measures designed for the moment only. When they ended, we were as badly off as we were when they began.

We Republicans differ from the Democrats in much of our outlook.

In the field of public spending, there is a basic difference between Republicans and Democrats. The Democrats like inflation. Republicans abhor it.

We have seen what happens when money declines in purchasing power. Every man and woman who plans ahead and saves for the future knows that he has been cheated when our dollar is worth only 35 cents.

The Republican Party does not believe in controls. We want to keep the system of free enterprise which built this country. The Democrats are split into two groups on this vital issue. Many of them are conservatives. They want to keep the system. But the leadership of the Democratic Party today has been captured by the leftwing group which does not like our system. They are the Americans for Democratic Action, the professional labor leaders who are using the Democratic Party as a handy vehicle. They want to turn the Democrats into a party patterned after the British Labor Party. No matter how loudly they protest, this is the record of the Democratic Party. It is one thing in the North and another in the South. It is one kind of party when it calls on Harry Truman.

It is quite another when it calls on Adlai Stevenson.

Let me call your attention to still another major difference between the two parties. In the field of taxation, the Democrats are trying one of the greatest feats of magic ever conceived. They have suddenly discovered that taxpayers are voters. For 20 years, no Democratic Congress ever thought of a tax cut.

Suddenly, when the Republicans come up with a real cut for everybody, they decide that we didn't cut enough. But, interestingly enough, although they criticize us for not cutting down on taxes more heavily, some of them are demanding bigger military spending.

I think the American people know what we want. We want consistency. We want firmness. We want a prosperous economy. We do not want to walk through the world with a chip on our shoulder. But we don't want anyone to think we're afraid to fight for our beliefs.

We have a President who is committed to these principles. He does not compromise with them. He has made them clear not only to us but also to those who challenge us.

I admire his courage. I regard him as a great man. Some folks have been asking me if I think he will seek reelection in 1956.

Back in 1864, a reporter asker President Lincoln the same question. He did not want to answer, so he told him this story of an old friend back in Springfield, Ill.

It seems that a very mild-mannered little preacher came to see him one day to rent a hall for a series of lectures. "You can't rent any hall in this town," he was told, "until we know who you are and what you propose to preach about." The preacher looked at him and said, "My subject shall be the Second Coming of Our Lord." "Then you're wasting your time. If the Lord has been to this town once he knows better than to come back a second time."

Mr. Lincoln did choose to come back a second time. And you know there were people who opposed his renomination. Some of them were Republicans and they held a convention in Cleveland. They wanted to nominate General Fremont. The convention was a complete fizzle. Only about 400 people attended, and when President Lincoln heard about it he called for his Bible and opened it to the First Book of Samuel, chapter 22, and he read it out loud: "And everyone that was in distress, and everyone that was in debt, and everyone that was discontented," he read, "gathered themselves unto him, and he became a captain over them, and there were with him about 400 persons."

I don't think any opponent to Dwight D. Eisenhower would do any better.

Address by Hon. Thomas C. Hennings, Jr., of Missouri, Before Lawyers Association of St. Louis

EXTENSION OF REMARKS

OF

HON. THOMAS C. HENNINGS, JR.

OF MISSOURI

IN THE SENATE OF THE UNITED STATES

Friday, February 11, 1955

Mr. HENNINGS. Mr. President, recently it was my privilege to address the Lawyers Association of St. Louis, Mo., on the occasion of the 20th anniversary of its founding. My speech was devoted to the problem of establishing proper standards for the conduct of congressional investigations. I ask unanimous consent to insert in the CONGRESSIONAL RECORD the text of that speech.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY UNITED STATES SENATOR THOMAS C. HENNINGS, JR., OF MISSOURI, BEFORE THE LAWYERS ASSOCIATION OF ST. LOUIS, DECEMBER 3, 1954

Mr. Susman, distinguished guests, ladies and gentlemen, I am greatly honored to be invited to address you on this occasion as part of the 20th anniversary celebration of the Lawyers Association of St. Louis. In the 20 years since the formation of this distinguished society of lawyers on April 24, 1934, you have achieved a record of which you may be justifiably proud. To review the list of the many accomplishments of the Lawyers Association of St. Louis, would, I think, consume the better part of the time

which you have so graciously allotted me. Moreover, most of you well know the record, having shared in these achievements.

We have had the pleasure of participating this evening in ceremonies honoring the service of past presidents of this association, among whom I have had some of my closest associations and friendships in my practice at the St. Louis bar. These 19 past presidents, together with Bernard Susman, your present presiding officer, would constitute a distinguished bar anywhere in the land or wherever Anglo-Saxon jurisprudence is a shield and a bulwark. Beyond this, the Lawyers Association of St. Louis has numbered among its members many of our State's leading lawyers. In short, this a society in which any lawyer or counselor-at-law is very proud to claim the honor of membership.

This evening I am going to talk about something we all recognize and believe deeply—the importance to our country and our civilization of an independent and fearless bar and incorruptible judiciary as the foundation of constitutional democracy. With this theme in mind, I think it fitting that I repeat tonight the preamble of the constitution of the Lawyers Association. As you know, it reads: "To promote the study of law as a science and its practice as a learned profession; to defend the courts, their officers, and the administration of justice; to maintain the honor, dignity and worthy traditions of the profession of law; to encourage general improvements of conditions among lawyers in the practice of their profession; and to secure reasonable reforms and improvements of law and procedure." In these words, the Lawyers Association has set for itself high standards and worthy objectives. In the past, you have fulfilled these standards and met these objectives. I am confident that in the trying years ahead, you shall continue, as an association and as individuals, to make these precepts dynamic and vital.

I think we can take it as axiomatic, and especially so among lawyers, that liberty of person and security of property cannot be said to exist without impartial justice, adequate juridicial defense and proper representation.

For Anglo-Saxon lawyers almost from the 13th century, it has been a tradition that to provide a fair trial and an adequate defense for one accused of crime is the highest dignity to which the law can attain. As stated by Thomas Erskine on the 18th of December, 1792, in his defense of Thomas Paine then being tried, in absentia, for libel and sedition, "If I were to ask you gentlemen of the jury what is the choicest flower that grows upon the tree of English liberty, you would answer security under the law. If I were to ask the whole people of England the return they look for at the hands of government, from the burdens under which they bend to support it. I should still be answered, security under the laws; or, in other words, an impartial administration of justice." Erskine, you will remember, later to become Lord Chancellor, was, at the time of his defense of Thomas Paine, the foremost advocate in England and, even though only 42, had already made a fortune at the bar handling civil as well as criminal matters, and had behind him a distinguished record of successfully defending in a hostile atmosphere many persons accused of crime.

But, to have liberty of person and security of property based on the impartial administration of justice we must have stable and orderly government. Indispensable ingredients for justice are an independent and incorruptible judiciary and an informed and fearless advocacy. We lawyers often bear the brunt of heavy criticism for being conservative, for resisting change, and for defending the status quo. Our basic conservatism is our tradition and our heritage. It flows naturally from our knowledge of history, from our intimate acquaintance with legal institutions, and from our deepfelt realization that liberty and security are, at best, precarious. Our training and our traditions at the bar insist that, in spite of calumny that may be heaped upon us, we must do everything within the law to preserve our ancient rights, including the right of one accused of crime, however heinous, to receive an adequate defense.

Lately, in this country, we have been witness to certain reprehensible tendencies toward disorderly government. To you, my friends, who have been trained in and daily practice the orderly procedures of our law courts, to you I do not have to expand in great detail concerning the tendencies to which I have alluded. You are all aware that some congressional committees have tended with increasing tempo to go beyond the restraints dictated by orderly procedures.

Congressional investigations have been the subject of increasing concern among thoughtful people for two reasons. First, in some instances they have amounted to unconstitutional attacks on the authority and prerogatives of the executive. And second, they have failed, in some cases, to provide due process of law.

Insofar as unlawful attacks upon the executive branch are concerned, it seems to me that we must look to the President to provide the proper checks and balances by asserting his authority. Members of the Congress can assist him by speaking out, as they have done in recent attacks on his authority. Insofar as congressional committees have failed to provide due process of law in their investigations, the Congress, and the Congress alone, has full responsibility.

To the charge that some congressional committees have, at times, used star-chamber methods and have denied due process of law by refusing to persons whose integrity or loyalty are impugned the right to present evidence, to be represented by counsel, and to cross-examine adverse witnesses, we have heard the argument that these investigations are being conducted to get the facts. To the charge that some committees have, at times, conducted inquisitorial investigations on the premise that one is presumed guilty until proven innocent, we have heard the reply that such investigations are not judicial trials to which "due process" applies. And we hear repeatedly, in answer to these charges, that these investigations are conducted to expose Communists and that, therefore, the niceties of fair procedure are irrelevant.

This last-mentioned defense, of course, calls to mind a basic doctrine of the Communists—that "the end justifies the means." It is this concept which threatens the core of our personal liberties—the liberties for which our Republic was founded. We have been shocked with the thoughtless comments of those who assert: "I don't like the methods, but I approve of the end result." As lawyers, we know that there can be no liberty without due process of law.

We have also heard the argument that to compel congressional investigating committees to meet the minimum standards of due process would add unduly to the burden of these committees, that it would be time-consuming and would impede the work of the committee in getting at the facts. In this connection, we may recall that one of the reasons set forth for the establishment of the court of star chamber in 1487 was that the convictions by the regular courts of justice were so slow as to enable felons to break the peace with impunity. In fact, statute 3, Henry VII, chapter I, creating the court of star chamber, provided that the body should punish misdoers "as they should and ought to be punished if they were thereof convicted after the due order of the law."

In considering what standards should govern the conduct of congressional investigations, we should bear in mind that congressional investigations or hearings, in general, fall into 2 fairly distinct types; 1 is what I would term the legislative hearing, the other I would call an inquisitorial hearing. It is the latter about which we are disturbed. The procedures that are quite appropriate for the legislative hearings are not appropriate for the other type. One of our principal difficulties with inquisitorial investigations, I think, stems largely from our failure, until very recently, to note the basic difference between the two types of hearings and our consequent failure to apply different rules to them.

In legislative hearings the purpose is to develop concise and adequate information in order to formulate intelligent legislative policy. Such hearings often involve the wisdom of actions that Government officials have taken and invariably explore questions of governmental policy and the administration of particular programs. Such hearings seldom, however, explore the integrity or loyalty of individuals and the committees holding such hearings have not had to concern themselves with the problem of providing persons under attack with an adequate opportunity to defend themselves. When the problem presents itself, however, I think committees ought to give it special attention.

In the case of inquisitorial investigations to ferret out disloyalty or dishonesty, the purpose is, or at least it should be, to supplement the extensive investigative machinery at work in the executive branch and to provide information on which to base legislation, that is, to strengthen our laws dealing with crime and corruption generally, and, in particular, with acts and conspiracies against national security.

The inquisitorial investigations have affronted our standards of fair play and fair hearing. They have at times caused irreparable damage to loyal and innocent persons. However, even for persons who may not be honest or loyal, there must be fair hearings in the legislative branch as well as in the courts. We cannot have one code of procedure for innocent people and another code of procedure for guilty people. The abuses that have been practiced in congressional inquisitorial hearings must be brought to an end as quickly as possible.

In coping with this problem, it would be well for us to bear in mind that no Senator or Representative of the Federal Legislature has any power to investigate on his own beyond that enjoyed by every citizen. The same is also true of congressional committees. They hold their powers at the pleasure of the Senate or the House acting as a body. They have only the power which the Senate or the House delegates to them. And, likewise, subcommittees, whether they consist of one or more members, may enjoy power only as it is delegated from the parent committee. The Senate and the House may at any time take away the powers given to a committee.

What I have just said is, of course, a simple truth that is obvious to everybody. I think, however, that many persons, including Members of the Congress, have at times overlooked these basic facts. From these facts we may conclude that it is within the power of the Senate and the House of Representatives, respectively, to deal with abuses of its committees or its own Members. With this in mind, a good many Members of the Congress in both Houses have introduced measures that would establish mandatory codes of fair procedure for committees. I, myself, have been a cosponsor of one or more already introduced in the Senate.

While some changes are apparently needed in the rules governing investigative committees, the problem with which we have recently been confronted in the Congress, cannot, in the end, be reached by rules. It is a matter which, in its basic elements, involves moral standards, self-restraint and

ideals of fair play. Can any of you imagine the kind of scenes which we have so recently witnessed occurring in a court of law? It is offensive to us. It is unthinkable. And while for obvious reasons, the rules of procedure governing the conduct of cases in our law courts cannot be carried over into legislative matters, it is our duty to be ever vigilant and to have one eye on the traditions and the standards of our law courts as a guide to orderly procedure and fair conduct in legislative matters.

Our present day difficulties with congressional investigations would not have reached the present point of crisis if Russian Communist conspiracy and treachery were not abroad in the world.

The convictions of Klaus Fuchs, in England, and of the Rosenbergs and others here for espionage in connection with atomic secrets; the conviction of the top Communist leaders in this country; the charges of Whittaker Chambers and Elizabeth Bentley leading to the conviction of Hiss and Remington—these dramatic events together with other developments including the seeking of refuge in the fifth amendment by many witnesses before various congressional committees, set the stage for abuses of committee power. The point I am making is that without the Communist conspiracy, congressional committees would not have had occasion to take on the inquisitorial aspects which I have just discussed.

In this era of the hydrogen bomb—in this period of neither peace nor war so aptly called the cold war—all loyal Americans are concerned about our national security and bitter against traitors. Some loyal citizens have even become hysterical and stand ready to pillory those who insist on orderly democratic government, on the preservation of constitutional rights, and on lawful procedures even in the exposure and conviction of traitors.

In this period of tenseness, lawyers have a great opportunity and an equal responsibility to lend a steady hand to the course of public affairs and to bring the full pressure of their wisdom and sound judgment to bear against disorderly and illegal extremes.

So far, we have come through this period fairly well and with reasonable dignity, but, at times, I have felt that the atmosphere of public affairs was in danger of being permanently polluted by fear, intolerance, and hysteria. During this period, altogether loyal and usually restrained Americans have felt impelled to employ such epithets as "witch hunt" and "book burning" to describe some of the excesses.

In pondering our present problems, I have searched for a period of history which, while not on all fours with our own—no two periods are ever identical—would contain some of the elements of tension and world unrest that we are now experiencing. I wanted to consider what fearless advocates did to meet the crises of their times. My thoughts turned to the events in England and France, during the French Revolution, beginning with the fall of the Bastille on the 14th of July 1789. Conservative Englishmen, in that day, viewed the atrocities committed by the Paris Commune with its Committee of Surveillance and its mob rule with a horror and a fear even as great as that with which we view the conspiracies and the treachery of the men in the Kremlin. The French revolutionists, it is true, did have many sympathizers among the British people, and even distinguished defenders in the House of Commons, such as Charles James Fox, the great Whig leader. On the other hand, we will recall that it was Fox's former friend and colleague, Edmund Burke, who after his dramatic appearance in the House of Commons dressed in the blue and buff of revolutionary America to defend our War of Independence, was now so shaken by the terror in Paris, that he wrote and published his historic philippic against the French, Reflections on the French Revolution. You will remember that this bitter controversy ended the long association and friendship of these two great titans of the Whig Party.

William Pitt, the Younger, then Prime Minister of England, decided that Thomas Paine should be indicted for libel and sedition against the Crown for having written part II of his famous essay The Rights of Man as an answer to Burke. In November of 1792, the trial of Paine was commenced before the Court of King's Bench. Paine was at the time in Paris, having been elected a member of the National Convention, and he was tried in absentia, the laws of England at that time permitting the trial of criminal defendants without their presence before the court. Friends of Paine urged Thomas Erskine to take Paine's case. Erskine, at the height of his career as England's ablest advocate, was faced with a hard decision. Should he provide, for Thomas Paine, charged, in effect, with treason against the British Crown the best defense possible in England—not just an ordinary defense which Paine might otherwise get—but a defense in the hands of this master of the English juries, or should he heed the cautious warnings of his friends not to be identified with this defendant who was anathema to British conservatism and respectability? As you all know, Erskine took Paine's brief and stood before the King's judges while his client, as a member of the French Revolutionary Government, remained safely beyond the reach of the court. You will also remember Erskine's magnificent address to the hostile jury in the face of what he knew was certain defeat for his client.

This case was soon followed by the trial of John Frost, a London solicitor of great eminence and respectability who was pronounced guilty of sedition on the evidence of a copy of The Rights of Man found in the pocket of his greatcoat. This case Erskine likewise took in the face of an almost certain verdict of guilty.

Erskine, intrepid advocate that he was, continued to act as counsel for persons accused of sedition and in December 1793 won an acquittal before a jury for the owners of the Morning Chronicle. Soon after, Erskine successfully defended Thomas Walker, of Manchester, who likewise had fallen victim to an oppressive zeal to prosecute anyone who dared to question government policy. And there were many others. This period came to be known as England's reign of terror. But in the end, fearless, resolute British advocacy won through. As you know, Erskine on April 7, 1806, became Lord Chancellor of England and took as his motto for his peerage Trial by Jury.

My friends, I have dwelt at some length on the history of Lord Erskine not so much because he was an exception to the rule—I think he was not. He merely took his place among the many before and after him who have maintained the highest tradition of the British and the American Bar. You and I can cite cases much closer to hand if there were need to do so. I think, however, I have illustrated my point.

As lawyers in this great democracy we have a public trust and a responsibility that falls more heavily on us, perhaps, than on any other group of our citizens—to cherish our independence of judgment, to champion just causes without fear or timidity, to remain vigilant against any inroads upon our basic freedom of person and security of property, and to defend with all our vigor the principles of justice under a government of laws and not of men.

As members of the Lawyers Association of St. Louis, I am confident there will be no shrinking from this obligation, but that, true to the high standards and noble traditions of this great organization, we will meet this continuing challenge with courage and with honor.

Lincoln Day Address by Hon. Edward Martin, of Pennsylvania

EXTENSION OF REMARKS
OF
HON. J. GLENN BEALL
OF MARYLAND
IN THE SENATE OF THE UNITED STATES
Friday, February 11, 1955

Mr. BEALL. Mr. President, I ask unanimous consent to have printed in today's RECORD the text of an address delivered by the senior Senator from Pennsylvania [Mr. MARTIN] on February 10, 1955. The occasion was a Lincoln Day dinner in Hagerstown, Md., given by the Washington County Republican State Central Committee.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR MARTIN OF PENNSYLVANIA

I am sincerely grateful for the privilege of addressing this splendid meeting of true Americans and loyal Republicans.

It is an honor and a real pleasure to come to the Free State of Maryland and to join you in tribute to one of the greatest of all Americans—the first Republican President of the United States—Abraham Lincoln.

First, let me tell you that in the Keystone State of Pennsylvania we have the highest admiration of our fine Maryland neighbors.

We know how much of the spirit of America has gone into the building of your great State.

We share your pride in its glorious history and its steadfast record of loyalty and patriotic sacrifice.

Like Pennsylvania, Maryland is the home of many faiths and creeds living in tolerance and good will. One of the great landmarks in religious liberty was the Maryland Toleration Act, passed by the Provincial Assembly more than 300 years ago.

It was the first law in the American Colonies granting freedom of worship to everyone who professed belief in the Christian faith.

In my own State we are proud that the same principle of religious liberty was established by William Penn in founding the Commonwealth of Pennsylvania.

I am happy to be here tonight to tell you of my high regard for my distinguished friends and colleagues—JOHN MARSHALL BUTLER and GLENN BEALL. They are both great Americans and great Republicans.

Both served their country with honor and distinction as soldiers in time of war. Both serve their State and Nation with the highest degree of statesmanship in these days of troubled peace.

I am proud to tell you that the State of Maryland is represented in the Senate of the United States by two forceful, vigorous, fighting American patriots who battle with tireless energy to protect the American system of government and the American way of life.

I want to make special mention also of your distinguished Republican Congressman, DEWITT HYDE, and to offer my praise for his able, courageous, and patriotic service.

He came to the House of Representatives in the 83d Congress with a valuable background of legislative experience in the general assembly as a member of the house and of the State senate.

The people of the Sixth Congressional District gave proper recognition of his outstanding ability by sending him back to Congress for a second term.

The fame of your great Governor has spread far beyond the borders of Maryland

and has made him an outstanding national figure.

Maryland is so fortunate to have the leadership of Theodore Roosevelt McKeldin. His statesmanship is in the historic pattern of Maryland's greatness. His stanch Republicanism is in line with the highest standards of political integrity.

I congratulate the people of Maryland on retaining Governor McKeldin in office for a second term.

Your Republican Senators and Representatives and your Governor believe in freedom of the individual, freedom of enterprise, and freedom of opportunity.

These are American principles. They are the principles of the Republican Party. They were the principles of Abraham Lincoln.

In commemorating the birthday anniversary of the Great Emancipator we recall his steadfast courage, his inexhaustible patience, his lofty spirit of tolerance, his deep humility, his enduring devotion to the ideals of our Republic, and his faith in God.

It is therefore fitting on this anniversary to reaffirm our allegiance to the heritage passed on to us by the Founding Fathers, preserved for us by Abraham Lincoln, and strengthened by the high principles to which President Eisenhower and the Republican Party are dedicated.

We honor Lincoln as one of the founders of the Republican Party.

It was his suggestion that the delegates to the first national convention of the Republican Party unite on the principles of the Declaration of Independence and hostility to the extension of slavery.

Lincoln put it in these memorable words:

"Let us, in building our new party, plant ourselves on the rock of the Declaration of Independence, and the gates of hell shall not be able to prevail against us."

The political wisdom of Abraham Lincoln grows more impressive with the passing of the years.

The Declaration of Independence stands as a firm, immovable rock, symbolizing the Republican Party's dedication to freedom of the individual, human dignity, and human integrity.

Throughout the 100 years of its existence the philosophy of the Republican Party has been based on the sacred principle that "all men are created equal; that they are endowed by their Creator with certain unalienable rights, that among these rights are life, liberty, and the pursuit of happiness."

Let me read to you the first resolution adopted by the first Republican National Convention in Philadelphia in 1856. It is as follows:

"*Resolved*, That the maintenance of the principles promulgated in the Declaration of Independence and embodied in the Federal Constitution are essential to the preservation of our republican institutions, and that the Federal Constitution, the rights of the States, and the union of the States, must be preserved."

My fellow Americans, that ringing declaration has been the watchword of the Republican Party ever since. The words are timely and true. They apply to the issues which confront us today.

Lincoln called upon every American to accept a full share of responsibility for the preservation of our liberties.

On February 11, 1861, when he was on his way to Washington to assume the office of President he made a speech at Indianapolis in which he said:

"In all trying positions in which I shall be placed, and doubtless I shall be placed in many such, my reliance will be upon you and the people of the United States. * * *

"It is your business to rise up and preserve the Union and liberty for yourselves—and not for me.

"I appeal to you to constantly bear in mind, that not with politicians, not with Presidents, not with officeseekers, but with you is the question:

"Shall the Union and shall the liberties of this country be preserved to the latest generations?"

Those words of Abraham Lincoln are a challenge to all of us in this present day.

They are a warning that the people alone can save America from the dangers that can bring us to national disaster.

Our system of government is based on the fundamental principle that people can manage their own affairs better than government can manage for them.

One hundred years ago Abraham Lincoln said:

"The legitimate object of government is to do for a community of people whatever they need to have done, but cannot do at all or cannot so well do for themselves—in their separate and individual capacities. In all that people can do as well for themselves government ought not to interfere."

Lincoln recognized that interference by government in the lives of its citizens is a dangerous encroachment upon individual liberty—contrary to the plan of the Founding Fathers.

Only the people can rise up in their might and enforce relief from the evils of big government—high taxes and excessive debt.

It is frightening to realize that the public and private debt of the American people has climbed to a point so high that it is a serious threat to the safety and security of the Nation.

Uncontrolled debt, rising higher and higher year after year, places a crushing burden on the economic structure of our country, and points the way to financial collapse.

It should be a matter of deep concern to every one of us that the American people now owe a total of more than $600 billion, three times as much as the debt of 15 years ago.

In the last 5 years alone the total public and private debt has increased by $50 billion.

Never before in the history of the world have any people owed so much as we owe today.

At the top of the list is the Federal debt of $278 billion—an increase of $20 billion since the end of World War II.

Twenty-three years ago, when we were fighting the worst depression we ever had, the Federal debt was less than $20 billion.

The debts of State and local governments have increased 16 percent in 1 year alone, reaching a total of $38 billion on June 30, 1954.

In terms of national income public debt stood at 34 percent in 1929, rose to 102 percent in 1933, declined to 69 percent in 1941, and rose again to 147 percent in 1945. It has since declined to 86 percent, largely because of the rise in income.

There is real cause for alarm in the tragic fact that while the debt burden is increasing by millions every day, the great majority of our people don't seem to be worried about it.

They take the position that we are a strong nation, we are prosperous, our people have a backlog of savings, times are good, the national income is high, why worry?

But the danger is all about us.

If for any reason we should be forced into a decline—even a slight decline in business activity, jobs and income, the staggering burden of debt could prove too much for our economy to sustain and could bring us to disaster.

I ask you to remember that the debts, which so many people hold so lightly, are not mere bookkeeping items. They will have to be paid by generations far in the future, out of the earnings of Americans who had no part in creating the debts.

The question that naturally arises is: Are we going to drift into bigger debt, or are we going to begin thinking about reducing it.

I bring this serious situation to your attention because I believe we Republicans should be concerned with the problem of government grown too big and too costly.

Yes, my fellow Americans, we have too much government, and government is involved in too many functions in which it does not properly belong.

The future of our Nation depends upon the course of action we take and the principles for which we fight.

Let us—like Lincoln—call for a new dedication to our country's cause and resolve that this Nation, founded to sustain the God-given freedom of the individual, shall not perish from the earth, but shall live forever, and grow stronger with each passing generation.

HOUSE OF REPRESENTATIVES

MONDAY, FEBRUARY 14, 1955

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

O Thou who art the beneficent and mighty Ruler in all the affairs of our human order, may it be our supreme ambition to serve Thee daily in faithfulness and humility.

Grant that in times of national peril and crises we may know the way of how best to measure up to the overwhelming obligations of our high vocation.

Wilt Thou evoke within our minds and hearts those capacities and powers of insight and understanding which will enable us to find the right answers to our many needs.

May men and nations everywhere be baptized and inspired with a more generous and magnanimous spirit, for history and experience teach us so clearly that selfishness always defeats itself and self-seeking is self-losing.

Hear us in the name of our blessed Lord whose spirit of love and good will is the only bond of unity, amity, and fraternity among the members of the human family. Amen.

The Journal of the proceedings of Thursday, February 10, 1955, was read and approved.

SPECIAL ORDERS GRANTED

Mr. JARMAN asked and was given permission to address the House for 1 hour on Wednesday next, following the legislative business of the day and any special orders heretofore entered.

Mr. PRICE asked and was given permission to address the House for 10 minutes today, following any special orders heretofore entered.

INCREASED CONGRESSIONAL SALARIES

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. DAVIS of Georgia. Mr. Speaker, I notice on Wednesday's calendar the bill to raise congressional salaries by $10,000 a year.

This bill would also increase the salaries of United States district judges and United States court of appeals judges by $7,500 a year, and United States Supreme Court Justices by $10,000 a year.

I regret that those in charge of the bill have seen fit to tie congressional salaries and judicial salaries together. They are separate items; they involve different factors, and should be considered separately. It is not the practice to lump together unrelated groups of employees in the same salary bill. Legislation is pending now to increase the salaries of Federal employees, but one bill deals with postal employees and another and separate bill deals with classified Federal employees.

I shall oppose this congressional salary bill as it is now written for these and other reasons. What I have to say here concerns mainly the proposed congressional salary increase.

I think some increase is justified, but not $10,000. This is a two-thirds increase over the present salary. The amount of the increase alone is more than twice the salary the average worker in private industry receives. I have before me a table showing by industry divisions the average annual wage and salary payments in private industry. This average annual salary in all private industries is $3,590. In House bill 3828 it is proposed to give Representatives and Senators, at one jump, a raise of $10,000.

I realize that the grave and important decisions which Congress must make, and the handling of the tremendous budgets of the Government each year, require that congressional positions be filled by persons of good judgment, wide experience, great ability, and high integrity. Members of Congress ought not to be required to serve here at a financial sacrifice. However, it is all out of reason to jump these salaries from $15,000 to $25,000 in one bill.

I think that we here in Congress, whose responsibility is to appropriate money and to levy taxes upon the citizens to pay the expenses of government, owe a duty to the people of the United States to set an example of economy and thrift.

I have heard some of the stories told by Members of going in debt thousands of dollars each year while serving here. I think the question as to whether one goes in debt or lives within his income of $15,000 a year depends to a great extent upon the manner in which he lives. That is no princely salary, it is true, but statistics show that more than three-fourths of the people in this country live and care for their families on less than one-third of that amount.

In considering this question I cannot keep out of my thoughts the fact that in 20 of the last 23 years the Federal Government has spent more than it took in, and that in each of those 20 years our national debt has continued to increase. Our Government now owes $278 billion. We all know that Congress had to increase the debt limit last year by $6 billion. Our Government is going to spend $2 billion more this year than it takes in in taxes, and the time is not yet in sight when the Federal budget will be balanced.

When I think about this increase and the kind of example it sets insofar as Federal spending is concerned, I cannot help thinking of the fact that in 1953 the people of my home State of Georgia sent to Washington the enormous sum of $708 million—nearly three-fourths of a billion dollars—as their contribution to Federal Government expenses.

This is nearly 50 times the amount of Federal taxes which Georgia sent to Washington in 1929, just 25 years ago. In that year our total internal revenue payments were $14,056,000. It is more than 20 times the $34 million which Georgia sent here in 1939, just 15 years ago.

Every increase in Federal spending is a tendency toward inflation. Inflated prices have already reduced the American dollar to less than 50 percent of the purchasing power it had in 1939.

This continual upward trend in Federal spending and Federal taxing must stop somewhere. It will never stop if we continue to pass such legislation as this.

Mr. Speaker, I am convinced that this bill is unreasonable, and I shall vote against it.

TRUMAN ADMINISTRATION BUILT MILITARY STRENGTH

Mr. PRICE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PRICE. Mr. Speaker, in the barrage of Lincoln Day speeches by Republican orators, perhaps none was more ridiculous and none so lacking in foundation of fact than the one delivered by Attorney General Herbert Brownell before the National Republic Club.

Only the most naive audience could agree with Mr. Brownell that President Eisenhower and his administration were entitled to credit for the military strength the United States possesses today. It is true that our defense is improved today over 1, 2, or 3 years ago, but credit for this new strength cannot be given to an administration which has, for the most part, sponsored cutbacks in military strength in all branches—the Air Force, the Navy, the Army, and the Marines—which has reduced appropriations and cut the defense budget to the point where military leaders, before congressional committees, openly state our national security is jeopardized thereby.

When Attorney General Brownell said, "Our offensive striking power is outstanding in the present world situation," he was, in effect, paying tribute to the planning and appropriations of a previous administration. Not a single plane that flies, not a single new scientific development, not one atom of our atomic potential in the field of weapons, can be credited to the present administration. All of these were inherited from the planning of others.

It has always been amazing to me to observe the breast-thumping of the present administration on increasing national military strength, while actually this administration has done little to bring it about.

I agree with Attorney General Brownell that our present military strength is not an accident, but it has not been the extraordinary knowledge of military affairs on the part of the present administration that has brought it about. It was the foresight and vision of the Truman administration that brought us our present strength.

Time alone will tell how good is the existing administration judgment which has consistently made cutbacks in our military programs—even in research and development—and has withheld what many military leaders believe to be necessary appropriations that would insure a continuation of adequate military strength.

It is utterly stupid for Mr. Brownell or anyone in the Eisenhower administration to attempt to take credit for the scientific and technological developments which are today the key to our military strength. All these things were in the making, and many of them in production, before the present administration took over and before Mr. Brownell and Mr. Wilson knew the difference between a Springfield rifle and an atomic cannon.

SPECIAL ORDERS GRANTED

Mr. HOLIFIELD asked and was given permission to address the House for 25 minutes today, following any special orders heretofore entered.

Mr. O'HARA of Illinois asked and was given permission to address the House for 1 hour today on the anniversary of the sinking of the U. S. S. *Maine*, following any special orders heretofore entered and to withdraw special order that he had for 1 hour on tomorrow.

LITHUANIA FREEDOM ANNIVERSARY WEDNESDAY

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. MADDEN. Mr. Speaker, on Wednesday of this week I have a special order for 60 minutes to commemorate the anniversary of the independence of Lithuania. It will be the 37th anniversary of the independence of Lithuania. During that 60-minute period I shall be glad to yield to any Members of the House who wish to make statements regarding the fight that this great nation has waged during the centuries for liberty and freedom.

Lithuania is one of the countries that today is a Soviet captive nation. In 20 years it entered into three different

peace pacts, agreements and treaties with the Soviet Union.

On July 21, 1920, it signed a peace pact with the Soviet Union.

On July 1, 1933, Lithuania signed a nonaggression pact with the Soviet Union.

On October 10, 1939, it signed a mutual assistance pact with the Soviet Union.

All three of these pacts, agreements or treaties were thrown out of the window when it served the purposes of the Soviet Union to take over Lithuania and place that nation in communistic slavery. Lithuania has been the victim of the same type of so-called peaceful aggression which the Kremlin inflicted on other Iron Curtain satellite nations.

The same creeping infiltration is slowly working under Soviet supervision in free countries in Western Europe, Asia, South America, and throughout the globe.

The Committee on Communist Aggression in the last Congress recorded sworn testimony of over 330 witnesses revealing the Communist pattern for world conquest. Every Member of Congress should read that report.

PRINTING OF COPIES OF HEARINGS ON TRADE AGREEMENTS EXTENSION ACT OF 1955

Mr. COOPER. Mr. Speaker, I offer a resolution (H. Con. Res. 83) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 2,500 additional copies of the hearings on H. R. 1, the Trade Agreements Extension Act of 1955, held by the Committee on Ways and Means for the use of the said committee.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

Mr. ALLEN of Illinois. Mr. Speaker, reserving the right to object, will the gentleman from Tennessee state whether he took this matter up with the ranking minority member of the Committee on Ways and Means?

Mr. COOPER. I have conferred with the distinguished gentleman from New York [Mr. REED] and he and I are in full agreement.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The resolution was agreed to; and a motion to reconsider was laid on the table.

COMMITTEE ON THE JUDICIARY

Mr. ROGERS of Colorado. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file a report.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

THADDEUS KOSCIUSKO: HERO OF THE AMERICAN REVOLUTION (1746–1817)

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, Thaddeus Kosciusko was one of those brave and restless Polish fighters for freedom who was so strongly motivated by a love of liberty that we would go almost anywhere and take part in any battle provided it was for a righteous cause. It was this feeling which brought him to America not long after our revolutionary war had begun. He arrived in Philadelphia in August of 1776 and immediately applied for military service. He was admitted, and charged with the drawing up of plans for fortifying the Delaware River. The success of this work earned him a commission as colonel of engineers in the Continental Army.

In the spring of the following year he joined the Northern Army at Ticonderoga. Later the fortifications he erected at Saratoga contributed greatly to the brilliant victory of our forces there. During the next 2 years he was placed in charge of the building of fortifications at West Point. Subsequently he took part in the battle of Charleston, and was among the first of the Continentals to enter that city after its evacuation by the British. On October 13, 1783, Congress made him a brigadier general.

Having served this country and its cause successfully and brilliantly, in July of 1784 he returned to his native land, hoping to carry on the fight for her freedom. For more than 20 years he continued his brave but unfortunately futile efforts for Poland's freedom and died in exile in Switzerland in 1817.

Today on the 209th anniversary of his birthday we solemnly honor his noble memory. We do this not only because he fought for our independence, but also because he was a vigorous champion of the universal cause of human freedom as long as he lived.

COMMITTEE ON RULES

Mr. SMITH of Virginia. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tomorrow night to file certain privileged reports.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

POSSIBILITY OF INUNDATION OF LONG ISLAND BY THE ATLANTIC OCEAN

Mr. WAINWRIGHT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WAINWRIGHT. Mr. Speaker, the incredibly realistic possibility that the flat, low plains of Long Island may be inundated by the Atlantic Ocean must be recognized. Despite the fact that we have had a series of hurricanes, starting with the great storm in 1929, including the hurricane of 1938, another in 1944, and concluding with Carol and Edna in 1954, the danger to this sand peninsula, which juts 150 miles out from New York City, is not understood. Those who would seek to save the land operate within a difficult legal framework which, also, is not understood. I am setting forth, here, not only the problem but the solution agreed upon by all concerned.

The Weather Bureau has unequivocally stated that Long Island is now in the hurricane path. What does this mean? Every few years, and possibly several times a year, a devastating storm will strike the south shore of Long Island. Protecting some 50 miles of this south shore is a sand barrier known as Fire Island. At the present rate of erosion and storm destruction Fire Island will be split and broken within 15 years. Corrective action can stop this. What happens if no action is taken? The Atlantic Ocean will jump 3 or 4 miles, will cross the Great South Bay, and begin its dreadful erosion work on the mainland proper.

At the east end of Long Island there is no sand barrier other than beach dunes. These, too, are being eroded, destroyed, and eaten away at a rapid rate. And once the high bluffs are leveled, there will be no impediment to the ocean rolling inland.

Long Island's north shore also suffers from serious erosion conditions. It receives a full share of any storm damage. Thus, any action taken to save the island must be comprehensive.

In ages past every shore front owner was required to protect his own property. The local community, State, and Federal Government did not contribute to the protection of a man's individual property. This philosophy is still good. However, on Long Island a different situation exists. Very few people are able to pay the high price of bulkheads and jetties for protection of their own property. It is often true, too, that where an individual property owner builds a defensive bulkhead, he will unwittingly damage the property of his neighbor. This is one of the most important reasons why the entire program must be comprehensive.

Because of the necessity for community approach villages first became interested, recognizing that protection of the shorefront benefited the area directly behind the raging seas. Soon the county took an active part, and before long the State of New York took the lead under the guidance of the Duryea Commission in the early forties.

Now, however, the situation has become so serious that the Federal Government must, I repeat, must take an active

role. The responsibility for shoreline protection rests with the Army Corps of Engineers, under the Secretary of the Army. No comprehensive plan can be undertaken without their approval. They are ideally suited by experience and equipment to conduct the necessary survey of Long Island. They are also aware of our plight on Long Island. They are aware of the fact that this sandy peninsula can be completely eroded in several generations, within the life span of an individual.

Yet, there exists on the books today Public Law 727 of the 79th Congress. This prohibits the Federal Government from participating in shore protection except in front of publicly owned property such as a Coast Guard station or a public beach. And even then the Federal Government is limited to the extent of one-third of any cost for work done to protect that publicly owned property. Consequently, the Federal contribution to erosion control on Long Island would be infinitesimally small. At the present time the gentleman from New Jersey, Congressman JAMES AUCHINCLOSS, and I have introduced identical bills in this session of Congress—H. R. 31 and H. R. 3146. These proposals would allow the Federal Government to contribute up to one-third of the total cost of protecting the shores of all property, public or private. Such a bill would produce a joint venture: the county, the State, and the Federal Government would participate in the overall program as partners.

There is one more phase which must be examined. Before any work can be done, a survey must be made of every foot of the shore front to be protected. This survey must be in the form of a detailed, comprehensive, technical study. It is not something that can be accomplished in a few days. The present length of time required for a survey of Long Island's south shore is estimated at a 6-month minimum and probably far closer to a year. The Federal Government cannot participate without such a survey, nor can any money be authorized or appropriated without this survey.

Last year the United States Army Corps of Engineers was allocated in the budget, $100,000 for all survey work on beach erosion. This pitiful amount was a drop in the bucket in comparison to total requirements. We, on Long Island, were allocated a cash outlay of approximately $3,000, but the survey for the south shore would cost $50,000—50 percent to be paid by the State and county, and 50 percent by the Federal Government. Suffolk County advanced $12,500 and the State of New York advanced $12,500, but the Federal Government was not in a position to match these funds. There was a proposed arrangement whereby the State or county would advance the required funds to the engineers under a repayment agreement. This would have meant that the engineers could have started their program late last fall. Tragically, though, these negotiations seemed never the have materialized.

Fortunately, due to the excellent teamwork of our legislators in Albany, a new approach may be in the offing. Edmund R. Lupton from my own district has had a great deal of experience in this field. There is no lack of understanding.

Last week I introduced a bill, H. R. 3811, which will authorize a special study for what I call the "hurricane" area. This includes New England, New York, Long Island, and New Jersey. Funds would be authorized and appropriated to the Beach Erosion Board to allow them to make the necessary studies and survey in the affected areas. This is in the nature of an emergency proposition and should not in any way detract from the requests made by the Beach Erosion Board for other funds. Senator BUSH, of Connecticut, has introduced a similar measure in the other body. I hope the committees to which these bills are referred—both the Senate and House Public Works—will act as soon as possible so that we may present our case to the Appropriations Committee at once.

One of the criticisms usually leveled at parliamentary governments is that they are slow to act in time of crisis. This criticism has proved to be unfounded if we are to use as examples the last two Great Wars and the Korean conflict. We have also risen quickly to the occasion of revitalizing the threatened economies of many free nations throughout the world who would have gone under. Well, Long Island can go under, too. It can go under the Atlantic Ocean. We are faced with an unbelievable crisis. The terrible burden of responsibility rests squarely upon the Congress, the Corps of Engineers and the governors of the several States. Let us prove that we can act when an emergency strikes at home, that we can act now, that we will act now.

ANNIVERSARY OF ARIZONA'S ADMISSION TO THE UNION

Mr. RHODES of Arizona. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RHODES of Arizona. Mr. Speaker, in 47 States of our Nation February 14 is St. Valentine's Day. But in the State of Arizona it is Admission Day. It is the anniversary of that day in 1912 when the State of Arizona became a member of this Union.

I respectfully submit to the House that this is the anniversary of a great day not only for the State of Arizona but for the United States of America. The baby State of Arizona has literally grown out of its three-cornered pants in the last few years and with the fine help which we have received from our sister States we have certainly made the desert bloom like a rose. The foundation has been laid for even greater growth in the future.

All that is needed to make this promise become reality is water. With water, the productivity of our soil and the production of our factories will continue to add ever-increasing bounty for the needs of our people and the wealth and security of our Nation. I hope and pray that the obstacles both technological and legal now in the path of the development of water for the arid West, will soon be removed.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. HOFFMAN of Michigan. The State of Arizona sent some very distinguished men here to be helpful, too.

Mr. RHODES of Arizona. I thank the gentlemen, assuming that he refers to me.

THE LATE GEN. BREHON B. SOMERVELL

Mr. HAYS of Arkansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAYS of Arkansas. Mr. Speaker, we were all saddened by the news of the death of Gen. Brehon Somervell yesterday in Ocala, Fla. General Somervell was born in Little Rock, Ark., in 1892. He won an appointment to West Point in 1910 and graduated 4 years later, sixth in the class of 106.

I am sure we all know of his fine leadership during the Second World War as the head of the Service of Supply. His achievements in that branch of the service were impressive and received worldwide recognition. In the First World War General Somervell won the Distinguished Service Cross for a daring reconnaissance in the Meuse-Argonne offensive as a Corps of Engineers lieutenant colonel. He also won a Distinguished Service Medal for vital construction of gas and ammunition depots under fire in France.

In 1925, General Somervell assisted in a navigation survey of the Rhine and Danube Rivers for the League of Nations and late in 1933 conducted a comprehensive economic survey of Turkey. Between his colorful foreign and Washington assignments he completed many important engineering projects.

Mr. COOPER. Mr. Speaker, will the gentleman yield?

Mr. HAYS of Arkansas. I yield.

Mr. COOPER. Mr. Speaker, I desire to join the distinguished gentleman from Arkansas [Mr. HAYS] in his remarks concerning General Somervell. General Somervell had relatives in my hometown. We were all very fond of him and I should like to join the gentleman in expressing deep regret at his untimely passing.

Mr. HAYS of Arkansas. I thank the gentleman. In the passing of Brehon Somervell the Nation loses a great public servant, a great patriot, and a distinguished leader in many fields of human endeavor.

ADJOURNMENT OVER

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. ALLEN of Illinois. Mr. Speaker, reserving the right to object—and I do not intend to object—will the gentleman please inform the House of the program for the week?

LEGISLATIVE PROGRAM

Mr. McCORMACK. I shall be very glad to do that. The program, as I announced last week, is for Wednesday, the pay raise bill. On Thursday, although no rule has yet been reported out, H. R. 1. I am scheduling that for Thursday, and Friday if necessary. If it is brought up this week, I expect that it will be completed this week.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. HOFFMAN of Michigan. Mr. Speaker, in Michigan, we have a very important meeting coming up the last of the week. I was wondering how many of us would be able to get away for that meeting. As you will recall, the labor movement up there, in the persons of Walter Reuther and Gus Scholle, took over the State administration. Will we be able to get away to attend what might be called the funeral services up there?

Mr. McCORMACK. I assume the gentleman will admit that Walter Reuther is one of the outstanding Americans of today.

Mr. HOFFMAN of Michigan. Yes.

Mr. McCORMACK. I am glad to get that admission. I am sure Walter Reuther will be very glad to read in the RECORD here that the gentleman does admit that he is an outstanding American.

Mr. HOFFMAN of Michigan. I did not say what for.

Mr. McCORMACK. What is the serious inquiry my friend is making?

Mr. HOFFMAN of Michigan. The serious point is: How many of the few remaining Republicans in Michigan can get away to attend that State convention Friday and Saturday?

Mr. McCORMACK. That is a parliamentary inquiry that is outside of the House. The gentleman is just being facetious.

Mr. HOFFMAN of Michigan. What are we going to vote on on Friday?

Mr. MASON. H. R. 1.

Mr. HOFFMAN of Michigan. H. R. 1?

Mr. McCORMACK. We expect to vote on that on Friday.

Mr. HOFFMAN of Michigan. Is that a Republican or Democratic measure?

Mr. McCORMACK. That is for the gentleman to decide.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. McCORMACK]?

There was no objection.

THE LATE ALLISTER COCHRANE

The SPEAKER. The Chair recognizes the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Speaker, the Members of the House appreciate very much the cooperation given us by every employee who constitutes a part of the organization of the House, from the page boys up, and we are deeply grieved when we read of the death of any employee of the House, particularly one who has rendered long years of honorable and trustworthy service to the House and its Members.

Mr. Speaker, it is with sorrow that I announce to the House the death on October 20, 1954, of Allister Cochrane, who for over 50 years served this House as an Official Reporter of Debates.

Mr. Cochrane was born in Brampton, Ontario, and studied law at Detroit College of Law. For several years he was a court reporter in Detroit. On January 31, 1902, he came to the House of Representatives as a substitute reporter, and shortly thereafter was appointed by Speaker Cannon as an Official Reporter of Debates. He served in that capacity during the tenure of 11 Speakers, until his retirement in June 1953.

Gifted with great skill in his profession, expert in the use of the English language, and learned in the history and traditions of the House, he filled his position with distinction. Few men have had the honor to be associated with the House of Representatives for so long, yet in his devotion to duty, his ability, and his integrity, Allister Cochrane typified many persons who have devoted a large part of their lives to the service of this body, and upon whose experience and knowledge of its procedures the House relies so much for the orderly carrying on of its functions.

Those of us who were his friends will miss him, and we mourn his passing.

HALL OF THE HOUSE

The SPEAKER. The Chair desires to make a statement on the use of the Hall of the House of Representatives.

Rule XXXI reads:

> The Hall of the House shall be used only for the legislative business of the House and for the caucus meetings of its Members, except upon occasions where the House by resolution agrees to take part in any ceremonies to be observed therein; and the Speaker shall not entertain a motion for the suspension of this rule.

A great many Members have asked the Parliamentarian and the present occupant of the chair about the use of the Hall of the House of Representatives. At any time in the future when any Member desires to entertain a group except Members of the House of Representatives it will be held that the caucus room is open for that purpose, but not the Hall of the House of Representatives.

ATOMIC ENERGY

The SPEAKER. The Chair recognizes the gentleman from Illinois [Mr. YATES] for 20 minutes.

Mr. YATES. Mr. Speaker, I ask unanimous consent to address the House for 10 additional minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. YATES. Mr. Speaker, on January 27 I introduced House Joint Resolution 180 proposing that the Government of the United States, in cooperation with the Government of Japan, provide for the construction in the city of Hiroshima, Japan, of a nuclear reactor dedicated to the advancement of peace and progress through the production of power for industrial purposes.

The reception given this proposal by my colleagues has been most encouraging, and I am grateful to my distinguished friend from Mississippi, Representative FRANK SMITH, for filing a similar bill, House Joint Resolution 210.

In the brief period since I last addressed the House in support of the resolution, significant events have occurred which have confirmed the validity of the resolution and underscored the tremendous impact of its underlying thesis upon contemporary international relationships. A few days ago there occurred in the Soviet Union another of those mysterous and precipitate convulsions of government whose import is shrouded in as much secrecy by the Soviets as the explosions of their thermonuclear devises. The change of leadership it produced served as the background for one of Foreign Minister Molotov's periodic major pronouncements.

Mr. Molotov first boasted of the success which has crowned Soviet efforts in the field of hydrogen weapons.

Such success—

He said—

> that the United States could appear backward.

Mr. Speaker, it is known, of course, that Russia has thermonuclear weapons, and while it is open to conjecture that its efforts in this field are as far advanced as Mr. Molotov asserts, one wonders whether the question is really important. For there is a certain stage in the preparation for atomic warfare beyond which only a theoretical advantage is gained, a point at which the potential for mutual extinction is reached. It is possible that the United States and Russia already have reached this point, and the prospect of atomic warfare between the great powers conjures up such horrible visions as to raise serious doubts as to the sanity of those who might consider it a means for the settlement of disputes. Certainly, all possible efforts should be taken to prevent the test which would determine which has the more potent collection of atomic and hydrogen gadgets.

But it was another statement by Mr. Molotov that I found much more interesting and significant:

The Soviet Union—

Declared the Russian Foreign Minister—

> wants competition with the United States, not in the production of atomic weapons, but in using atomic energy for peaceful aims.

With this apparently noble pronouncement, the enigmatic actions for more than a year of Soviet representatives in the United Nations suddenly take on form and content, all of them directly related to the meaning of Mr. Molotov's word "competition."

It all began in the summer of 1953 when Mr. Eisenhower dispatched a memorandum to Chairman Lewis Strauss of the Atomic Energy Commission, in which he suggested the possibility of the initiation by the United States of a joint venture with the other nations of the world for the purpose of developing the peaceful use of atomic energy for the benefit of mankind. Mr. Strauss first expressed doubt, but with the President's insistence, he submitted the question to members of his staff, and to the Department of State for their consideration. After extensive consultations, it was concluded that the idea was feasible. The President penciled several preliminary drafts of a speech he proposed to make on the subject, and then finally he was ready. On December 8, 1953, Mr. Eisenhower delivered his magnificent message before the General Assembly of the United Nations.

He spoke of universal peace and human justice, of the "fearful engines of atomic might," and the "awful arithmetic of the atomic bomb." He protested the "hopeless finality of a belief that two atomic colossi are doomed malevolently to eye each other indefinitely across a trembling world."

My country—

He declared—

wants to be constructive, not destructive. It wants agreements, not wars. * * * It wants * * * to live in freedom * * * in the confidence that the people of every other nation enjoy equally the right of choosing their own way of life.

For the attainment of these ends the President proposed the creation of an international atomic energy agency. This body, he said, would be responsible for receiving contributions of fissionable material from its member states and for devising methods of utilizing this material for peaceful purposes. Experts could be mobilized to apply atomic energy to the needs of agriculture and medicine. Ways could be sought of providing abundant electrical energy in power-starved areas of the world. Such a program, declared the President, would prove to the world our primary interest in human aspirations, rather than in armaments of war.

This was the atoms-for-peace plan of the President of the United States. It was imaginative. It was bold. It was positive. It opened up the vista of an original and thrilling relationship between countries, and a new way of life for the world. The members of the United Nations were inspired; all except the Soviet Union, that is, which seemed to be momentarily stunned.

Subsequently the Department of State drafted a plan of action which it submitted to representatives of various governments, including the U. S. S. R. All of these except the Russians indicated their desire to cooperate. On April 27, 1954, came the inevitable answer from Moscow. The answer was, "No; we won't talk about a plan for peaceful use of the atom until the United States has agreed to an unconditional prohibition, without any safeguards, in the use of atomic weapons."

That was April 1954. Months continued to roll by; and when September arrived without solution, Secretary Dulles determined he would raise the issue at the opening session of the General Assembly. When Soviet leaders were advised of this several days before the speech, they immediately evinced a more friendly attitude. "Of course," they murmured, "we are ready to talk further about the President's plan." Hopes rose again; but then, in the face of Soviet recalcitrance, conversations once more bogged down.

That was September. On December 4, despite several unsuccessful Soviet attempts at amendment, the U. N. General Assembly passed a resolution commending the United States for its initiative in promoting the atoms-for-peace plan and providing for an international atomic-energy conference in the summer of 1955. Plans for this conference, to be held beginning August 8 in Geneva, had not been made public until last week, not in this country, at least. Until last week this information had been made public in only one place—in the Soviet Union, an action which was an outright breach of the promise of secrecy on the part of the Soviet delegate to the Planning Committee. In violation of the confidential nature of the committee's deliberations, articles, in which these proceedings were carefully distorted, began to appear in Pravda and Tass during the meetings of the committee last month. The remarks by the United States delegate, Nobel prize-winner Dr. I. R. Rabi, were so misconstrued that he was forced to object publicly.

It is the conviction of the United States delegate—

He said—

that to interject into the technical conference political questions and political controversies of any sort would be to seal the doom of the conference.

And Mr. Speaker, that is apparently what the Soviets intend—they intend to seal the doom of the conference. Every action their representatives have taken in the U. N. since the President presented his atoms for peace plan has been directed toward that purpose, of sabotaging the proposal rather than helping to make it effective. The meaning of Mr. Molotov's word "competition" as the Soviets conceive that term, now becomes clear. It means bitter, unrelenting obstructionism of every kind, shape, and form.

It is unfortunate that Mr. Molotov has refused to consider the possibility of cooperation with the United States in what must be man's greatest mission of modern time, but this he refuses to do. His words are plain enough: He wants competition—not cooperation, Mr. Speaker, but competition with the United States in the use of atomic energy for peaceful aims. It was my impression when I read his speech, and when I prepared my remarks last Friday, that with his pronouncement began the latest Russian offensive of the cold war.

This is still my impression, Mr. Speaker, despite a report in yesterday's paper that the U. S. S. R. desires an easing of world tensions. That report, based on an interview of the new Russian Premier, Nikolai Bulganin, with William Randolph Hearst, Jr., would offer hope, if Mr. Bulganin's remarks could be accepted at face value, of greater cooperation by the U. S. S. R. in the peaceful use of atomic energy. We would welcome wholehearted evidence of Soviet desire to ease world tensions. But based on previous experience with such cooperation, however, I would say that unless these declarations are followed by positive deeds—such as a contribution of fissionable materials by the Soviet Union to the international atomic pool to which the United States has already given 220 pounds and Great Britain 44—they offer little hope for a reversal of Russia's noncooperative behavior. Bulganin called Molotov's speech "an objective appraisal of facts" which "fully reflects the views of the Soviet Government." One has difficulty in reconciling this approval of Molotov's statements with the Premier's own remarks expressing the desirability of a lessening of tensions. However, this is not the first time that Moscow has played a contradictory theme in counterpoint.

Unless there be a drastic change in Kremlin policy in tune with Mr. Bulganin's interview, we anticipate that having placed every possible roadblock in the path of America's atoms-for-peace plan in the United Nations, the Soviet Union will seek in the next few months, to convince the world that the U. S. S. R., rather than the United States is the initiator and the real protagonist of the atoms-for-peace program. Not only will opposition to the American proposal be continued, but Russia will make every effort to appropriate it bodily and send it out to the world labeled: "Made in the U. S. S. R."

This newest thrust in Communist world strategy took form as early as last July, when Moscow announced that the Soviet Union had put into operation the first atomic plowerplant. This untrue statement, untrue because both we and the British have been generating small quantities of atomic power for several years, was followed by a belated announcement on January 14, that the U. S. S R. intended to reveal to the Geneva Conference some details about this reactor. Three days later, Pravda stated that atomic development data and equipment were going to be given to China, Poland, Czechoslovakia, Rumania, and East Germany, to enable these countries to construct their own cyclotrons and reactors. Assistance to other countries, presumably including nations outside the Iron Curtain, was reported to be "under consideration."

On January 19, Pravda editorialized that the offer of reactor information to the Geneva Conference, and of data and equipment to the five satellite nations, was proof of the good intentions of the U. S. S. R. "The Soviet Union," it asserted, "is seeking consistently and persistently to make atomic energy serve

man" whereas "the ruling circles of the United States of America have not only put atomic energy to the service of military purposes but have also begun working out specific plans for preparing an atomic war."

Last week, this "peaceful use" campaign was carried a step further by the Chinese Communists. Flaying the alleged use by the United States of "the threat of atomic weapons to achieve its goal of the forcible occupation of our territory," they hailed the Soviet Union's "glorious, historic contribution to the peaceful use of atomic energy in establishing the world's first atomic powerplant in 1954."

Mr. Speaker, in the face of this newest Soviet counteroffensive, what should be our attitude? We must not permit ourselves to be deterred by Russian roadblocks or irresponsibility. We must continue along the bold course charted by the President. It is not enough to have told the world we seek peace, and the peaceful use of the atom. We must keep alive, and revive where necessary, the imaginative planning which characterized the original presentment, and take action to carry it out. We must act within the United Nations itself, but more than that we also must take action on a direct, nation-to-nation level, just as we did in the case of the Marshall plan and point 4.

This will supplement cooperative efforts undertaken through the U. N., for it must be recognized that multinational bodies of this type, particularly those with sharp ideological cleavages, function better as instruments of consultation and facilitation, than as actual operating units. This was recognized by our own Government in connection with the proposed International Atomic Energy Agency. Originally the President thought such a body would directly receive and dispense radioactive source materials. Now, however, the administration envisions a clearinghouse structure, which could facilitate, rather than become an operating part of, steps toward international cooperation. Something of this same problem, as well as the related problem of security, was recognized by the Congress in the 1954 Atomic Energy Act. Section 124 of the act, providing for participation in an international atomic pool, stipulates that collective arrangements can be accepted by the United States only on the basis of single nation agreements pursuant to section 123.

Separate, bilateral agreements between nations are already being negotiated by our Government, notably proposed agreements for power reactor construction in Canada, and Belgium, as well as greater exchange of information and assistance between us and the British. Various other exchange information arrangements, as well as training-school plans, are either in the process of creation or presently functionnig. They are commendable, as far as they go. But we need to do more. We can do more.

The President's message spoke of the necessity for providing abundant electrical energy in power-starved areas of the world. This was one of the reasons which impelled me to file House Joint Resolution 180, to make the atom an instrument for kilowatts, rather than killing. In a country such as Japan, which has a critical power shortage, the opportunity is offered to us of making a significant contribution to the well-being of its people. As I stated on January 27, speaking in support of my bill, Japan is a country about the size of California. It has arable land amounting to only 17 percent of its total. It has a population of 87 million people, increasing at the rate of 1 million per year. With available farmland completely occupied, more people are moving to the cities wherein industry must expand in order to permit them to live. Even an expanded power development based upon present type electrical generation will be inadequate for many years to come to provide necessary fulfillment of Japan's power needs. An atomic reactor, occupying a small area and generating large quantities of power would be a logical answer to this problem.

But more important than these is the message to the people of Japan. We would be telling them for the first time in the potent language of the atom that we in the United States come in peace, not in war.

Mr. Speaker, we know that the United States desires no domination over the economic life of any nation. We know this, but sometimes—for one reason or another—our motives and actions are misconstrued. Let us be careful, therefore, in our discussions and dealings with the peoples of other nations for the development of the peaceful atom, that we do not provoke animosities and burning resentments through improvident and unnecessary limitations. It is desirable that they be permitted to build their own industry as they see their best course, and we must not unduly restrict such self-development and progress.

Thomas Jefferson once said:

> Not in our day, but at no distant one, we may shake a rod over the heads of all, which may make the stoutest of them tremble. But I hope our wisdom will grow with our power, and teach us that the less we use our power the greater it will be.

Mr. Speaker, the world stands upon the threshold of a new and wondrous era. We would welcome Mr. Bulganin's cooperation, rather than Mr. Molotov's competition. That choice, however, is the Soviet Union's. As for our part, let the script of history show that it was the United States which led the world toward the renaissance implicit in the promise of the peaceful atom. We have the means within our grasp. Let us move forward now.

I urge prompt consideration of House Joint Resolution 180.

DEADLINE ON DIXON-YATES

The SPEAKER pro tempore (Mr. METCALF). Under previous order of the House, the gentleman from Illinois [Mr. PRICE] is recognized for 10 minutes.

Mr. PRICE. Mr. Speaker, permit me to congratulate my colleague, the gentleman from Illinois [Mr. YATES], for his fine presentation and explanation of the resolution which he has introduced in this Congress. I listened with a great deal of interest to the gentleman from Illinois in his well-chosen explanation, and I want to compliment him on the work he is doing in that regard.

Mr. Speaker, the Atomic Energy Commission has until tomorrow, February 15, to withdraw from the Dixon-Yates contract without further cost to the Government. That is the agreement made between the Government and Dixon-Yates at the time the contract was signed.

The Government can cancel the Dixon-Yates contract at any time, but cancellation would subject the Government to the payment of costs to the company. February 15 is the deadline date for withdrawal without need to pay any cancellation charges.

Mr. Speaker, I urge the Atomic Energy Commission to exercise its privilege before it is too late and to rid itself of this festering sore known as the Dixon-Yates plan.

So long as the AEC remains a party to the Dixon-Yates contract it can never hope to restore its lost prestige in the eyes of the public and the Congress.

With Dixon-Yates on its neck, AEC can never hope to devote full time and attention to the development of atomic energy for national defense and peacetime uses, the mission for which it was established.

Members who are interested can read the documented story of the Dixon-Yates deal, so far as the records disclose, in the report prepared by the gentleman from California [Mr. HOLIFIELD] and myself. The Holifield-Price report appears in a print of the Joint Committee on Atomic Energy dated January 1955 which contains the majority—83d Congress—and minority views on a committee resolution last November to waive a 30-day waiting period prescribed in the law in connection with the Dixon-Yates contract.

The Holifield-Price report begins at page 22 of the joint committee print of January 1955. In 80 printed pages we have set down the whole complicated, sometimes dull and sometimes fascinating, story of Dixon-Yates.

This is the story of a scheme first hatched by Joseph M. Dodge as Director of the Budget Bureau, matured by Dixon-Yates, and executed by Lewis L. Strauss, Chairman of the AEC. The architects of the plan in its developed form were Edgar H. Dixon and Anthony G. Seal, two executives who received their training in Electric Bond & Share Corp.

Indeed, we say in our report that the Dixon-Yates deal, with its interlocking holding companies, its complicated contractual devices, its devious arrangements for supplying power to TVA through AEC as an intermediary, all smack of the genius of utility executives long associated with intricate maneuvers of Electric Bond & Share Corp.

We state in the report our regret that agencies of the Government allowed themselves to become instruments for the promotion of this enterprise.

Mr. Speaker, an opportunity remains for the Atomic Energy Commission to cut short this disgraceful episode and to withdraw from the Dixon-Yates contract without further cost to either party. AEC Chairman Strauss, who did so much

to bring about this deal, can act quickly to set it aside.

If Chairman Strauss fails to act, he must accept the further responsibility of embroiling AEC in political controversy and diversion from its main tasks for years to come.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. PRICE. I am glad to yield to my distinguished colleague from California.

Mr. HOLIFIELD. Is it not true that testimony given under oath to the Joint Committee on Atomic Energy by General Nichols, the General Manager of the Atomic Energy Commission, showed that this would cost the taxpayers $3,850,000 a year minimum more than if the same amount of energy were purchased from the TVA?

Mr. PRICE. Yes; that is the fact as developed in testimony by our committee.

Mr. HOLIFIELD. Totaling $90 million over the 25 years of the contract, I believe.

Mr. PRICE. That is correct.

Mr. HOLIFIELD. And is it not also true that Mr. Wessenauer, of the TVA, testified that their computation of the excess cost to the taxpayers was more than $5 million a year or a total of $140 million?

Mr. PRICE. Yes; the gentleman from California is absolutely correct. On that point I might state that the Atomic Energy Commission has never satisfactorily disproved Mr. Wessenauer's statement.

Mr. HOLIFIELD. And unless this contract is cancelled within the next 2 days—either today or tomorrow—the taxpayers of the United States will be burdened with this excess cost for power from the Dixon-Yates plant?

Mr. PRICE. Yes; that is true. But the more serious thing is the fact that we find the Atomic Energy Commission, which is the most important agency in our Federal Government, embroiled in political disputes and forced to accept a directive which places them in a responsibility far remote from the functions they were established to perform. I think that is the most serious objection to the Dixon-Yates contract. It is a subterfuge; it is a use of the atomic-energy law to force the Atomic Energy Commission into the position of being a power broker to provide industrial power for the Memphis area, power which the Atomic Energy Commission itself does not need and not 1 kilowatt of which it will use now or in the future, as far as we can see.

Mr. HOLIFIELD. I agree with the gentleman. I expect to address my remarks to that point in just a few moments.

Mr. PRICE. I thank the gentleman from California.

Mr. KELLEY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. PRICE. I am glad to yield to the distinguished gentleman from Pennsylvania.

Mr. KELLEY of Pennsylvania. Suppose the Atomic Energy Commission refuses to act. May the Congress cancel that contract?

Mr. PRICE. The Congress could by resolution take action; for instance, that it was the sense of the Congress that this is something remote from the responsibility of the Atomic Energy Commission and is not in the public interest. Also it could take action by denying appropriations to the Atomic Energy Commission in the future to fulfill this contract.

SPECIAL ORDER TRANSFERRED

Mr. ASHMORE (at the request of Mr. FLYNT) asked and was given permission to transfer his special order for Thursday, February 17, to Wednesday, February 16.

ATOMIC ENERGY COMMISSION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from California [Mr. HOLIFIELD] is recognized for 25 minutes.

Mr. HOLIFIELD. Mr. Speaker, during the past year and a half I have watched with growing concern the deterioration of the Atomic Energy Commission. This Commission composed of five men (when fully constituted) has in my opinion the most important managerial function of all of our Federal Commissions. We have depended on this Commission to produce plutonium and other fissionable and fusionable materials for atomic and hydrogen weapons.

We have depended on this Commission to promote the engineering and testing of these weapons—weapons which in my opinion give the free nations the strength for defense or retaliation against Communist aggression. If it had not been for this strength in my humble opinion the Soviet wave of aggression would have long ago inundated the free nations of all Europe and all of Asia. It would in such an event, have inevitably threatened the shores of the free nations of the Western Hemisphere.

As a member of the Joint Committee on Atomic Energy since its inception I want to pay tribute to all of the men who have served on the Atomic Energy Commission—including the present incumbents—for their years of dedication and service to their Nation. In the main they have done a good job. We stand today pre-eminent in the field of atomic-hydrogen weapons. If freedom and liberty is to prevail on this earth, we must maintain that position of strength until sanity prevails, and men realize that self-preservation demands the elimination of atomic-hydrogen war.

If our position of increasing progress and strength is to be maintained in the weapon field, we must take no chances of confusion, obstruction, or diversion of the attention of the Atomic Energy Commissioners from their important and primary mission. This is one Commission which must function efficiently and smoothly or our national interest will be jeopardized.

As of today the Atomic Energy Commission is not functioning smoothly. It is torn by dissension and bitterness. It has been diverted from its statutory function by Presidential directive. It has been plunged into the hot boiling caldron of partisan political controversy which is fired by the public versus private power debate. It has lost its statutory independence and has become subservient to direction from so-called higher authority. The Commission has lost the high regard of many Members of Congress in both legislative bodies. No longer does it occupy a special high level of consideration and confidence, in the minds of the legislators. It has fallen from its high position because it deserted the high mission assigned to it by the Atomic Energy Act of 1946—a nonpartisan, nonpolitical, noncontroversial mission which had as its great objective the production of nuclear weapons for the protection of our Nation.

What are the factors behind this undesirable and undeniable condition of deterioration of the former unity in the Commission? Why has the Commission become embroiled in partisan political controversy?

Why has the Commission been diverted from its primary mission and ordered to assume duties which are strange and unrelated to its atomic duties?

These are the questions which must be answered. These pose the problems which must be solved if the Nation's best interest is to be served.

My speech today will be directed to the evaluation of these problems. I hope that my remarks are objective as I have no personal animosity or bitterness toward any individual officially concerned. I have a high personal respect for their integrity and the contributions of time and thought which they have given in the past to the almost insoluble problems presented. Their present situation is not entirely of their own making by any means, neither can the blame be laid solely at the door of any individual. Nevertheless the situation is serious and unless drastic measures are taken now, the momentum due to past harmonious administration will soon be lost and future progress will undoubtedly be retarded.

To understand the present disunity in the Commission—it might first be in order to explore the reasons why Congress deemed it proper to set up by statute the commission form of administration of the atomic energy development.

The debates and hearings on the Atomic Energy Act of 1946—McMahon Act—show conclusively that Congress realized that we were embarking on a new and revolutionary project. Men of most conservative political and economic views realized that old rules must be suspended in this instance. The military authority was subordinated to Government direction. Government financing only was instituted. Restrictive security provisions were given statutory status. Exclusive Government ownership of atomic plants, nuclear source and finished materials, and many other special legislative authorizations were enacted.

A great deal of thought was given to the type of management of this great new enterprise, which would eventually spend billions of dollars of the taxpayers' funds. It was finally decided that a Commission of five men should be the managerial authority. It was thought then and as late as June 1954, when the revision of the original McMahon Act of 1946 was made, that the Commission form of management was best.

I believe a wise decision was made in 1946 and in 1954 on this point. The scope of duties, the magnitude of the operation and the potential field of development and application in weapon and peacetime uses is indeed beyond the capacity of time and intellect of one person, gifted though he might be.

A great advantage of having a five-man administrative board is the opportunity to bring to bear on major problems the composite judgment of five individuals plus the specialized skill and experience of one or more highly qualified men in the specific field of the problem. Another advantage is that each of the five men can be selected from the major fields of private enterprise which are prominent in the atomic development activities.

In the past, Commissioners have been selected from widely diversified activities, such as management, finance, science, engineering, industrial production, public relations, and so forth. As far as I know, political affiliation was never the requisite for appointment. As a result of representation from these various fields of endeavor and experience, I believe that well-rounded Commissions were appointed. The formula has been successful and has operated, until recently, in a harmonious manner.

During the consideration of the 1954 revision of the 1946 Atomic Energy Act, however, a new and what proved to be a discordant note, was struck. A provision of the new law sought to make the Chairman of the Atomic Energy Commission the principal officer. This was new language. Either it meant something or it was unnecessary.

Subsequent debate and testimony made it clear that this provision was designed to give the Chairman a special position above the other four Commissioners.

The Chairman appeared in public hearings and testified on behalf of the language and offered a recommendation of a task force of the first Hoover Commission, which in his opinion, justified the language. His close friend, Commissioner Joseph Campbell, went further than the Chairman in his testimony on this point. Mr. Campbell, although he had accepted a position on the 5-man commission previously, testified that he doubted if the 5-man commission form of management was the proper one. He preferred a 1-man management.

When I sought to write into the law an amendment to provide equal access to information by each of the five Commissioners in matters pertinent to their atomic duties, it was defeated in committee. Later the same amendment was introduced on the House floor by the then minority leader, the gentleman from Massachusetts [Mr. McCormack]. It was again defeated. I recount these incidents to show that the seeds of disunity and resentment were being planted as far back as early 1954.

Of course the other three Commissioners resented this attempt to subordinate their positions on the Commission to that of the Chairman. They resented the failure to provide a guaranty of equal access to information necessary in the performance of their duties.

Coincident with these matter concerning the prestige and coordinate privileges of Commissioners, the Dixon-Yates controversy was forced upon the Commission.

I do not intend to discuss this controversy in detail at this time. Suffice it to say that the President, through letters and budget directive, forced the unwilling majority of the Atomic Energy Commission into the position of abdicating their independence, as members of a statutory commission—its members approved by the Senate for fixed terms—to follow his directive or to resign.

Mr. Zuchert's term expired about this time. Dr. Smyth subsequently resigned, and Mr. Murray has continued to resist this intrusion on the Commission of a matter foreign to its mission. All of the three last-named Commissioners objected vigorously to this intrusion by higher authority in their regular duties and functions.

The Chairman of the Commission, Mr. Strauss, and Mr. Campbell—since resigned—supported this directive, although they knew then and know now the disruption it caused and will continue to cause.

Small wonder then that the unity and harmony formerly existing between Commissioners under the two former Chairmen, Mr. Lilienthal and Mr. Dean, no longer exists.

This is not to say that differences of opinion have not existed among Commissioners before. This, of necessity, must exist between strong and capable men.

But never before, to my knowledge, did such differences go so far as to be matters of consideration by the Joint Committee on Atomic Energy, in executive or public session.

Never before did such differences, if any, result in violent charge and countercharge in public session.

Never before has the Commission's primary mission been interfered with by Presidential directive, and never before has the Commission been forced into taking sides in a political controversy.

Let the blame rest where it deserves to rest. I do not seek to pillory any individual. I am pointing out the facts today as I see them, let the chips fall where they may.

Mr. Speaker, if the Commission will not rid itself of the extraneous function of acting as power broker for the city of Memphis, Tenn., by canceling the Dixon-Yates contract; if the President will not sanction such withdrawal and refrain from imposing additional duties unrelated to the Commission's primary mission; if the Chairman of the Atomic Energy Commission is unable to participate as part of a five-man team of coequal Commissioners, and participate in such manner as will restore harmony and unity to the Commission's functions; then I cannot see how this situation can be solved. No single solution seems adequate.

Personality clashes between the present Commissioners might be solved by the resignation of the present Commissioners, but if this should occur, we would lose the benefit of men of experience in an already sadly depleted group of experienced Commissioners. Mr. Strauss and Mr. Murray are the only two commissioners left with years of experience in this complicated field. This is no reflection on the other Commissioner, Dr. Libby, an eminent physicist recently appointed.

If one or all resigned, the new Commission would still be involved in the Dixon-Yates controversy.

The transfer of supervision of the Dixon-Yates contract to the Tennessee Valley Authority would not be a complete solution as the 25-year contract rests on the action of the Atomic Energy Commission under section 164 of the new act. It would relieve the Atomic Energy Commission of administrative duties, but the political and economic burden would still remain.

Mr. Speaker, I make this speech today without bitterness or vindictiveness. I make it because I have reluctantly been forced to the conclusion that drastic steps must be taken if this deplorable situation is corrected.

The welfare of the Nation, the public interest, is paramount over persons and personalities. The function of this commission must be restored to its former efficiency.

Unless this can be done by a complete change in relationship between its present membership, then I fear, a change must be made.

The men who are now on the commission are strong and able men. In each case they have rendered valuable service to the Nation. If their differences can be resolved and if they can be relieved of strange and awkward duties foreign to their primary mission, then I believe each of them can render additional valuable services to their Nation.

If the present vacancies on the commission can be filled with competent men with diversified backgrounds of experience, men who are willing to work together, then we can go forward.

Mr. Speaker, I confess I do not have the solution for all the problems posed by this situation.

This much I do earnestly believe:

The Atomic Energy Commission has the most important function today of any Federal Commission;

The Atomic Energy Commission must operate smoothly and efficiently if the public interest is to be served;

The Atomic Energy Commission must devote its function to its principal mission, the production of nuclear materials and the promotion of their statutory uses;

The Commission should be composed of strong, reasonable men with diversified backgrounds of qualifications and experience, so that this project will have the type of management intended by Congress;

The Chairman of the Atomic Energy Commission must be willing to be part of a five-man team of coequal Commissioners. He must be capable of resolving differences of judgment between members of the Commission and himself, without bitterness and clash of personality.

In conclusion, I hope such measures, as are necessary, will be taken soon. The responsibility for a solution is not

legislative, but executive. It lies at the door of the President and the Chairman of the Atomic Energy Commission.

The public interest demands immediate action.

Mr. PRIEST. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I am glad to yield to the gentleman from Tennessee.

Mr. PRIEST. Will the gentleman state whether the position he has just referred to which, in effect, gives the Chairman access to information not available to other members of the Commission is still in effect?

Mr. HOLIFIELD. There is no such language in effect, but testimony before our committee has shown that other members of the Commission have been denied information which was available to the Chairman.

Mr. PRIEST. I thank the gentleman.

Mr. HOLIFIELD. My attempt was to put language into the bill to prevent just such usurpation of authority as I consider has occurred.

Mr. COOPER. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I am glad to yield to the distinguished gentleman from Tennessee.

Mr. COOPER. Mr. Speaker, I congratulate the Joint Congressional Committee on Atomic Energy on its recent action when it voted its disapproval of the controversial Dixon-Yates powerplant contract.

It is my conviction that this contract is indefensible and should be canceled.

I have spoken several times against the Dixon-Yates contract and in support of the Tennessee Valley Authority program.

I think it would be in the public interest for a full and complete congressional investigation to be made of the private power companies and the rates being charged the people of the country.

I want again to thank the distinguished gentleman from California for the outstanding contribution he has made and the great public service he has rendered in this important activity.

Mr. HOLIFIELD. I thank the gentleman from Tennessee for his kind remarks.

Mr. EVINS. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. EVINS. I should like to express my agreement with the statement made by the distinguished dean of the delegation from Tennessee [Mr. COOPER]. The gentleman from California, who is a very distinguished and certainly a most important member of the Joint Committee on Atomic Energy of the House and the Senate, has rendered valuable service on that committee, and last year led the fight on a very important matter which is continuing in controversy. I think that the gentleman has proposed a proper solution to this matter, that the members of the Atomic Energy Commission should address themselves to the nuclear problem and the atomic-energy problem rather than getting into a field foreign to their principal purpose. I am referring to the foreign field of being a power broker.

It would not be necessary for the members of the AEC to resign if they would divorce themselves from that undesirable and improper function. I agree with the gentleman in that regard, that these gentlemen should address themselves to their most important function rather than devoting their time to this field.

I might say further to the gentleman that I think the Atomic Energy Commission has lost national prestige and national standing in the eyes of the people of this country by their continuing bickering and the internal controversy that is continuing to go on because they got into the political field and economic field rather than staying with the important subject of atomic energy to which this Nation wishes they would address themselves in proper fashion.

I want to commend the gentleman for his fine contribution.

Mr. HOLIFIELD. I thank the gentleman for his remarks.

Let me say that my first interest in this matter was that the Atomic Energy Commission was being diverted from its primary function; this is still my primary interest in the matter. I believe this Commission's function is so important that it should not be drawn into the highways and byways of political controversy. It should continue its primary function and devote itself to the examination of new steps and new fields of weapon improvement for the defense of the free world and for peacetime application. Developments this past year have been so fast and comprehensive that I fear that even with the five-man Commission devoting all its time to the subject it could not cover this field.

Mr. BASS of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Tennessee.

Mr. BASS of Tennessee. According to information the gentleman has, based on his study does he believe that the Dixon-Yates contract would have been approved without any pressure from the top executive of the country in this matter?

Mr. HOLIFIELD. I am sure that it would not have been. Three members of this five-man Commission spoke out against this matter. They objected to it on two grounds: That it involved strange and awkward duties for them to perform and to which they were not accustomed or set up to perform. They said, nevertheless, if the President directed it or the Congress directed them to do so, they would do so.

The directive was issued by the Budget Bureau at the instance of the President, and later a letter from the President to the Chairman of the Commission asked that this matter be concluded. Since that time, I might say, while there are only three acting members of the Commission at this time, they have refused to take action on canceling out by a vote of 2 to 1. Mr. Strauss and the new member, Dr. Libby, the physicist, voted, as I understand, against canceling out; Mr. Murray, who has led the fight in the Commission against this strange and awkward mission that they have been asked to perform, offered the motion to have the contract canceled. This 3-man Commission in place of a 5-man Commission finds itself in next to the last day of their grace period; and unless they cancel this contract today or tomorrow, the sworn testimony before our committee shows it will cost the taxpayers of the country between $90 million and $140 million minimum over the period of the contract of 25 years.

Mr. BASS of Tennessee. So we can place the responsibility directly on the doorstep of the White House?

Mr. HOLIFIELD. That responsibility must be placed on the doorstep of the White House, because it was the directive which was given to the Atomic Energy Commission which caused them to depart from their original mission.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Illinois.

Mr. PRICE. I think it would be helpful to the House if the gentleman would point out, in answer to the oft-used defense of the Dixon-Yates contract on the basis of private enterprise, that when they say although this contract will cost the Government more, private enterprise pays taxes. Actually in this case the Dixon-Yates Co. pays no taxes. The Government sets up a fund to pay taxes for Dixon-Yates. So the question of taxation is not involved in this matter.

Mr. HOLIFIELD. I will be glad to comment on that. The Government sets aside $600,000 a year in a special fund to pay the taxes of the Dixon-Yates firm. This is done by a very circuitous method of procedure, but it effects the objective of paying for the first time that I know of, the taxes of a private corporation engaged in civilian service to civilians.

It is a very dangerous precedent, it is a precedent which all of private enterprise should be interested in, because if private enterprise can be established in its capital investment, in this case close to $107 million, by using a contract with the Government to fund its capital-plant investment in this instance, then that same credit of the Government can be issued to grocery-store chains, to clothing-store chains, to filling-station chains, or to any other civilian function.

The argument which is frequently made that this contract is just as good as the Ohio Valley Electric Corp. contract and the Electric Energy, Inc., contract of the previous administration completely passes the point at issue. It is not a question of whether this is as good a contract or a worse contract or a better contract; the real question is, For what purpose does the contract exist?

In the first two instances, the Ohio Valley Corp. contract and the Electric Energy, Inc., contract, it was to make atomic material for weapons for the defense of the Nation. They were defense contracts. In this latter instance, in the instance of Dixon-Yates, it is for a civilian company to render a civilian service to civilians in the Memphis area. It has nothing to do with contracts for defense. Not one kilowatt of it will be used for defense. That is the point at issue.

Mr. PRICE. The gentleman from California anticipated another question which I was about to ask. He has already answered it. I refer to the fact that this contract is not a defense contract, whereas the Ohio Valley and the Electric Energy contracts were for the purpose of supplying atomic energy for defense purposes. In this contract there is not one kilowatt that will actually go into AEC operation.

Mr. HOLIFIELD. The gentleman is right. This is a devious administrative method to put the cloak of national defense around a civilian contract, for civilian purposes, for civilian profit.

Mr. PRIEST. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Tennessee.

Mr. PRIEST. If the purpose of the Dixon-Yates steam plant costing $107 million, according to the estimate, to be built in the vicinity of Paducah, or nearby, were to furnish power for a defense need directly to the Atomic Energy Commission, it would be in quite a different category?

Mr. HOLIFIELD. And I would not be on this floor objecting.

Mr. PRIEST. Neither would I.

Mr. PRICE. Is it not a fact that the closest atomic installation is at least 200 miles from the Dixon-Yates proposed plant?

Mr. HOLIFIELD. I believe that Paducah is something like 200 or 250 miles north. There has been no testimony that the electricity which would be generated in the Dixon-Yates plant will be transmitted anywhere else than to civilian users in the city of Memphis and the surrounding area.

FIFTY-SEVENTH ANNIVERSARY OF THE SINKING OF THE "MAINE"

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. O'HARA] is recognized for 60 minutes.

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, tomorrow is the 57th anniversary of the sinking of the United States battleship *Maine* in the harbor of Habana in Cuba. It is an anniversary always observed by the veterans of the Spanish-American War and by patriotic societies. We shall ever revere the memory of the 266 American sailors whose lives were sacrificed in the diabolical explosion that was the prelude to the march toward destiny of these United States of America.

Since I have been a Member of this body I annually have requested and most graciously have been granted unanimous consent for a special order on February 15 that here in the Congress of the United States this anniversary of the sinking of the *Maine* should have proper observance. Some weeks ago I asked unanimous consent to address the House for 1 hour on February 15, intending after some brief introductory remarks to yield to other Members.

I was especially interested in the 1955 observance of this anniversary in this body because the present commander in chief of the United Spanish War Veterans is the Honorable Lloyd Thurston, who was a Member of the 69th Congress and the six succeeding Congresses.

He served with great distinction in this body as a Representative from the district in Iowa now represented by Mr. LECOMPTE, and during this outstanding service of 14 years he had the unusual honor, an honor enjoyed by only a few in our entire history, of serving on the Appropriations Committee, the Ways and Means Committee, and the Rules Committee. In 1938 he was narrowly defeated for the United States Senate. He is a great American, one of the most distinguished of the sons of Iowa, and the United Spanish War Veterans are proud and happy that he now is giving the great contribution of his genius and of his warm personality to the cause of our organization as commander in chief.

NOT IN SESSION TOMORROW

Unfortunately, the House will not be in session tomorrow. On Wednesday, when we next meet, there will be a special order on the anniversary of the independence of Lithuania and most of us will wish to join with the gentleman from Indiana [Mr. MADDEN] and the gentleman from Illinois [Mr. MURRAY] in paying our tribute of appreciation and affection to the people of Lithuania. For this reason I am making my remarks on the *Maine* anniversary occasion today.

Declaration of war with Spain quickly followed the sinking of the *Maine*. That was 57 years ago. I was then a lad of 15, soon to turn into my 16th year, a sophomore in the high school at Benton Harbor, Mich. With 7 or 8 others from that high school I went to Cuba to participate in the siege of Santiago as a member of the 33d Michigan Volunteer Infantry.

Our late beloved colleague, the Honorable Roy Woodruff, was a member of the same regiment. He was a corporal in Company G. I was a corporal in Company I. In those days a corporal was given an appointment parchment signed by the colonel of his regiment. I have mine hanging on the wall in my office. It is signed by Col. C. L. Boynton, countersigned by the adjutant of the regiment, First Lieutenant Harvey.

I am the last Spanish War veteran in the House of Representatives of the Congress of the United States. I have been interested in knowing how many veterans of the Spanish-American War later served as Members of this body. Unsuccessfully I sought this information and, finding it nowhere available, requested the aid of the ever-accommodating and always efficient Dr. Ernest S. Griffith, Director of the Legislative Reference Service of the Library of Congress. Dr. Griffith has furnished me the names of the 96 veterans of the Spanish-American War who later were Members of this body.

SOUTH AND NORTH REUNITED

In the 55th Congress, which ran into 1899, there were 5 Spanish War veterans, including my late beloved friend, Col. James Hamilton Lewis, later for 2 terms a senator from Illinois. Another name of glory among that group of 5 in the 55th Congress, Gen. Joseph Wheeler, of Alabama.

It has been said, and with truth, that it was the Spanish-American War that really healed the wounds of the war of the sixties. General Wheeler was one of the great heroes of the Confederacy, retiring as a lieutenant general. He took part in over 400 engagements, was wounded 3 times, had 16 horses shot under him. Thirty-three years later, 33 years after Appomattox Court House, he was commissioned a general of volunteers, assigned to command a cavalry division of the United States Army on the foreign soil of Cuba.

He was in command at the Battle of Las Guasimas which marked the first victory in our history of troops of the United States Army in an overseas engagement. He engaged in all the conflicts in front of Santiago, was the senior member of the commission which negotiated the surrender of Santiago, and the Spanish Army in Cuba, and later during the Philippine Insurrection was the commanding general in many engagements in the Far East.

TOTAL OF 96 VETERANS

Other names in this list of 96 veterans of the Spanish-American War who have served in this body are names that are part of our history and are deeply bedded in the hearts of our people.

Coming together to the 60th Congress were Richard Pearson Hobson, of Alabama, and Cordell Hull, of Tennessee.

To the 62d Congress came Thomas Spencer Crago, of Pennsylvania, and Leonidas C. Dyer, of Missouri. Congressman Crago was the 1913 commander in chief of the Veterans of Foreign Wars, and I, then on my way to Scranton, Pa., where Congressman Dyer was elected commander in chief of the United Spanish War Veterans, spent a day and a night in Detroit at the national encampment of the Veterans of Foreign Wars in conference with Congressman Crago, Bob Woodside, Rice Means, and Gus Hartig blueprinting the future of that organization, then of limited membership confined to the veterans of the Cuban and Philippine campaigns and the sailors on the high seas, but now one of the mightiest forces of dynamic patriotism in our country.

To every Congress up to and including the 76th there came new Members who had served in the Spanish-American War. Then came the 77th Congress, the 78th Congress, the 79th Congress, the 80th Congress, and there was no new Member from the Spanish-American War veterans. The years were beginning to catch up on the veterans of this war of 57 years ago. I came to the 81st Congress. I then was 1 of 4 Spanish War veterans remaining in this body. Now I remain alone. No new Spanish War veterans were elected to the 82d Congress, the 83d Congress, or the 84th Congress.

INCREASED PENSIONS FOR WIDOWS

I hope and pray that the 84th Congress will listen with sympathy and with favorable minds to the legislative pro-

posals of the aging veterans of this first overseas war of our country. We are asking nothing for ourselves, but we do feel that something should be done for the widows of our comrades. They are not young women. They are not of a moneyed class. They have lived good lives dedicated to duty, to country, and to God. For the most part they are eking out existences on the pittances given them as pensions.

By designation of the national legislative committee of the United Spanish War Veterans I have introduced a bill to raise the widows' pension to $75 a month. I have the faith that everyone on the Veterans' Committee and everyone in the membership of this body will vote for that measure.

I have also introduced a bill to give a long-delayed recognition to a handful of naval veterans who have been most cruelly discriminated against, all stemming from the fact that in the Spanish-American War there was very little keeping of records and very little adherence to prescribed formalities. These naval veterans served in combat and were in every way wartime servitors of their country as much as were I and other qualified members of the Army.

A third bill I have introduced is to give recognition to veterans in the Philippines who were in actual combat after the date in 1902 arbitrarily set—and I think through an inadvertence—that excluded these veterans from the pension consideration so richly earned by them.

VETERANS WHO SERVED IN HOUSE

Mr. Speaker, thinking it will have some historical interest as furnishing the only list compiled of veterans of the Spanish-American War who have served in this House, I am including in my remarks the following letter from Dr. Griffith:

THE LIBRARY OF CONGRESS,
Washington, D. C.

Hon. BARRATT O'HARA,
House of Representatives,
Washington, D. C.

DEAR MR. O'HARA: In response to your request for the names of all Spanish-American War veterans who have served in the House of Representatives, and your subsequent request for the additional information of the Congresses these men served in, we submit the following list of 96 names.

The names are arranged according to the date of the Congressman's first election to the House of Representatives.

FIFTY-FIFTH CONGRESS

Joseph Wheeler, Alabama, 47th, 49th through 56th.

David Grant Colson, Kentucky, 54th through 55th.

Charles William F. Dick, Ohio, 55th through 58th.

Edwin E. Robbins, Pennsylvania, 55th, 65th, and 66th.

James Hamilton Lewis, Washington, 55th.

FIFTY-SIXTH CONGRESS

William A. Chanler, New York, 56th.

Bertram T. Clayton, New York, 56th.

Henry D. Green, Pennsylvania, 56th through 57th.

Rufus K. Polk, Pennsylvania, 56th through 57th.

FIFTY-SEVENTH CONGRESS

Augustus P. Gardner, Massachusetts, 57th through 66th.

James M. Moody, North Carolina, 57th.

Ariosto A. Wiley, Alabama, 57th through 60th.

FIFTY-EIGHTH CONGRESS

Charles E. Fuller, Illinois, 58th through 62d, 64th through 69th.

Butler Ames, Massachusetts, 58th through 62d.

John Lind, Minnesota, 58th.

Benjamin G. Humphreys, Mississippi, 58th through 69th.

George A. Loud, Michigan, 58th, 64th.

Francis B. Harrison, New York, 58th, 60th through 63d.

William Hughes, New Jersey, 58th, 60th, 61st, 62d.

Wyatt Aiken, South Carolina, 58th through 64th.

FIFTY-NINTH CONGRESS

Edwin Denby, Michigan, 59th, 60th, 61st.

Frank S. Dickson, Illinois, 59th.

Newton W. Gilbert, Indiana, 59th.

Joseph W. Keifer, Ohio, 45th through 48th, 59th through 61st.

John W. Weeks, Massachusetts, 59th through 63d.

SIXTIETH CONGRESS

Richmond Pearson Hobson, Alabama, 60th through 63d.

Leonard Paul Howland, Ohio, 60th through 62d.

Cordell Hull, Tennessee, 60th through 66th.

SIXTY-FIRST CONGRESS

William Allen Oldfield, Arkansas, 61st through 70th.[1]

Thomas Ray Hamer, Idaho, 61st.

Robert Charles Wickliffe, Louisiana, 61st, 62d.

Charles Edward Creager, Oklahoma, 61st.

Zachary David Massey, Tennessee, 61st.

SIXTY-SECOND CONGRESS

William Schley Howard, Georgia, 62d through 64th.

Claudius Ulysses Stone, Illinois, 62d through 64th.

Sydney Anderson, Minnesota, 62d through 68th.

Archibald Chapman Hart, New Jersey, 62d, 63d, 64th.

George Curry, New Mexico, 62d.

Thomas Spencer Crago, Pennsylvania, 62d, 64th through 67th.

Sam Riley Sells, Tennessee, 62d through 66th.

Frank Lester Greene, Vermont, 62d through 68th.

Leonidas C. Dyer, Missouri, 62d, 64th to 72d.

SIXTY-THIRD CONGRESS

Samuel Brashear Avis, West Virginia, 63d.

Robert Gunn Brenner, New Jersey, 63d.

Guy Tresillian Helvering, Kansas, 63d, 64th, 65th.

Willis James Hulings, Pennsylvania, 63d, 66th.

Woodson Ratcliffe Oglesby, New York, 63d, through 64th.

Roy Orchard Woodruff, Michigan, 63d, 67th through 82d.

Matthew M. Neely, West Virginia, 63d through 66th, 69th.

SIXTY-FOURTH CONGRESS

Burnett Mitchell Chiperfield, Illinois, 64th, 71st, 72d.

Franklin Fowler Ellsworth, Minnesota, 64th through 66th.

Richard Patrick Freeman, Connecticut, 64th through 72d.

Reuben Locke Haskell, New York, 64th through 66th.

George Huddleston, Alabama, 64th through 75th.

William Francis James, Michigan, 64th through 73d.

Carl Chester Van Dyke, Minnesota, 64th through 66th.

SIXTY-FIFTH CONGRESS

Tom Connally, Texas, 65th through 70th.

Milton Kraus, Indiana, 65th through 67th.

Edward Campbell Little, Kansas, 65th throught 68th.

George Richard Lunn, New York, 65th.

Benjamin Franklin Welty, Ohio, 65th, 66th.

SIXTY-SIXTH CONGRESS

Patrick McLane, Pennsylvania, 66th.

Charles Franklin Ogden, Kentucky, 66th, 67th.

William Newell Vaile, Colorado, 66th through 70th.

Earle Cory Michener, Michigan, 66th through 72d, 74th through 81st.

SIXTY-SEVENTH CONGRESS

Louis Adams Frothingham, Massachusetts, 67th through 70th.

Ardolph Loges Kline, New York, 67th.

John Charles Speaks, Ohio, 67th through 71st.

Harry McLeary Wurzbach, Texas, 67th through 70th, 72d.

SIXTY-EIGHTH CONGRESS

John Donnan Fredericks, California, 68th, 69th.

Scott Leavitt, Montana, 68th through 72d.

Jonathan Mayhew Wainwright, New York, 68th through 71st.

Joseph Scott Wolff, Missouri, 68th.

SIXTY-NINTH CONGRESS

Edmund Nelson Carpenter, Pennsylvania, 69th.

John Bartholomew Sosnowski, Michigan, 69th.

Lloyd Thurston, Iowa, 69th through 75th.

SEVENTIETH CONGRESS

Joe Crail, California, 70th through 72d.

Henry DeHaven Moorman, Kentucky, 70th.

Conrad George Selvig, Minnesota, 70th through 72d.

SEVENTY-FIRST CONGRESS

Robert E. Lee Blackburn, Kentucky, 71st.

Rowland Louis Johnston, Missouri, 71st.

James Lucius Whitley, New York, 71st through 73d.

SEVENTY-SECOND CONGRESS

William Edward Barton, Missouri, 72d.

SEVENTY-THIRD CONGRESS

Guy Mark Gillette, Iowa, 73d, 74th.

Elmer Ebenezer Studley, New York, 73d.

William E. Traeger, California, 73d.

James W. Wadsworth, Jr., New York, 73d through 81st.

Compton I. White, Idaho, 73d through 79th, 81st.

SEVENTY-FOURTH CONGRESS

Denis Joseph Driscoll, Pennsylvania, 74th.

Joseph Anthony Gray, Pennsylvania, 74th, 75th.

Samuel Chapman Massingale, Oklahoma, 74th through 77th.

SEVENTY-FIFTH CONGRESS

Wade Hampton Kitchens, Arkansas, 75th, 76th.

SEVENTY-SIXTH CONGRESS

Anton J. Johnson, Illinois, 76th through 80th.

Frank Ogilvie Horton, Wyoming, 76th.

Robert L. Rodgers, Pennsylvania, 76th through 79th.

SEVENTY-SEVENTH CONGRESS

None.

SEVENTY-EIGHTH CONGRESS

None.

SEVENTY-NINTH CONGRESS

None.

EIGHTIETH CONGRESS

None.

EIGHTY-FIRST CONGRESS

BARRATT O'HARA, Illinois, 81st, 83d, 84th.

EIGHTY-SECOND CONGRESS

None.

EIGHTY-THIRD CONGRESS

None.

Sincerely yours,

ERNEST S. GRIFFITH,
Director.

[1] Died after being reelected to the 71st Congress.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. REED of New York in two instances, in each to include extraneous matter.

Mr. REUSS.

Mr. Moss and to include extraneous matter.

Mr. REECE of Tennessee (at the request of Mr. BROWN of Ohio).

Mr. REES of Kansas and to include extraneous matter.

Mr. HOPE and to include extraneous matter.

Mr. HOSMER and to include extraneous matter.

Mr. MILLER of Nebraska.

Mr. ZABLOCKI (at the request of Mr. PRICE).

Mr. PRICE.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MACK of Washington (at the request of Mr. TOLLEFSON), for the balance of the week, beginning February 14, on account of official business.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following titles:

S. 145. An act to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; and

S. J. Res. 14. Joint resolution extending an invitation to the International Olympic Committee to hold the 1960 Olympic games at Detroit, Mich.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on February 11, 1955, present to the President, for his approval, a bill of the House of the following title:

H. R. 587. An act to provide that persons serving in the Armed Forces on January 31, 1955, may continue to accrue educational benefits under the Veterans' Readjustment Assistance Act of 1952, and for other purposes.

ADJOURNMENT

Mr. BOYLE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 23 minutes p. m.), under its previous order, the House adjourned until Wednesday, February 16, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

414. A letter from the Chairman, Commission on Organization of the Executive Branch of the Government, transmitting a report on personnel and civil service, pursuant to Public Law 108, 83d Congress (H. Doc. No. 89); to the Committee on Post Office and Civil Service and ordered to be printed with illustrations.

415. A letter from the Chairman, Commission on Organization of the Executive Branch of the Government, transmitting the task force report on personnel and civil service, pursuant to Public Law 108, 83d Congress; to the Committee on Post Office and Civil Service.

416. A letter from the Assistant Secretary of Agriculture, transmitting the report on cooperation of the United States with Mexico in the control and eradication of foot-and-mouth disease for the month of December 1954, pursuant to Public Law 8, 80th Congress; to the Committee on Agriculture.

417. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to amend section 6 of the act of August 30, 1890, as amended, and section 2 of the act of February 2, 1903, as amended"; to the Committee on Agriculture.

418. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to amend the Soil Conservation and Domestic Allotment Act"; to the Committee on Agriculture.

419. A letter from the President, Board of Commissioners, Government of the District of Columbia, transmitting a draft of proposed legislation entitled "A bill to provide for the bonding of certain officers and employees of the Government of the District of Columbia, for the payment of the premiums on such bonds by the District of Columbia, and for other purposes"; to the Committee on the District of Columbia.

420. A letter from the Secretary of Health, Education, and Welfare, transmitting the Fourth Annual Report of the Commissioner of Education for the fiscal year ending June 30, 1954, pursuant to subsection 7 (c) of Public Law 874 and subsection 208 (c) of Public Law 815, 81st Congress; to the Committee on Education and Labor.

421. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to extend the existing authority for the loan of a small aircraft carrier to the Government of France"; to the Committee on Armed Services.

422. A letter from the Administrator, Federal Civil Defense Administration, relative to an interstate civil-defense compact entered into between the States of Utah and Nevada together with correspondence attached; to the Committee on Armed Services.

423. A letter from the Executive Secretary, National Advisory Committee for Aeronautics, transmitting a report that no contracts were negotiated during the 6-month period ending December 31, 1954, pursuant to section 2 (c) 11 and (16) of Public Law 413, 80th Congress; to the Committee on Armed Services.

424. A letter from the Executive Director, Rubber Producing Facilities Disposal Commission, transmitting the ninth report prepared by the Federal Facilities Corporation, with respect to its expenditures for repairs, replacements, additions, etc., of the Government-owned rubber-producing facilities during the 6-month period ending December 31, 1954, pursuant to section 15 of the Rubber Producing Facilities Disposal Act of 1953 (67 Stat. 408); to the Committee on Armed Services.

425. A letter from the Commandant, United States Coast Guard, transmitting a report of contracts negotiated during the period July 1 to December 31, 1954, pursuant to section 2 (c) (1) of Public Law 413, 80th Congress; to the Committee on Armed Services.

426. A letter from the Secretary of Commerce, transmitting a report of surplus property disposed of during 1954 by the Department of Commerce, Maritime Administration, pursuant to Public Law 152, section 404 (d), 81st Congress; to the Committee on Government Operations.

427. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to extend to grazing lessees the right of compensation for losses sustained by reason of the use of the public domain or other property for war or national defense purposes; to the Committee on Interior and Insular Affairs.

428. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession permit to Mark Hamilton authorizing him to conduct charter-boat service for sport fishing in the Everglades National Park, Fla., during the 2-year term beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

429. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession permit to O. P. Patton, to provide charter-boat service for sport fishing in Everglades National Park, Fla., during a 2-year term beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

430. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession permit to the Kings Mountain Little Theatre, Inc., of Kings Mountain, N. C., to authorize the permittee to present a historical drama and sell refreshments at the amphitheater in Kings Mountain National Military Park, S. C., during a 6-month term beginning April 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

431. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with Jackson H. Saunders, authorizing him to rent rowboats, sailboats, and outboard motors, make minor repairs to outboard motors, and to provide related boat services, supplies, parts, and accessories at the South Bay and Meadow picnic areas in the Millerton Lake National Recreation Area, Calif., for a term of 4 years, 8 months, from May 1, 1954, and, in addition, to authorize Mr. Saunders to sell food, beverages, ice cream, etc., at the Meadow picnic area only, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

432. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession permit with Mrs. Clifton D. Rock, authorizing her to sell post cards, souvenirs, photographs, photographic film, curios, and candy bars at Cabrillo National Monument during the calendar year 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

433. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with the Leo N. Levi Memorial Hospital Association to obtain hot waters from Hot Springs National Park for drinking, bathing, and other purposes for a period of 10 years from January 1, 1955, through December 31, 1964, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

434. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession permit to M. E. Nash, authorizing the permittee to conduct sightseeing-boat service in Mammoth Cave National Park during a 3-year term commencing May 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

435. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession permit to Jack Huff, authorizing the permittee to operate a lodge, including the provision of lodging and meal accommodations and to rent cabins, sell meals and lunches to take out, provide horses for hire, sell feed for horses of visitors, and provide related services, at the summit of Mount LeConte in Great Smoky Mountains National Park during a 5-year term beginning January 1, 1955, pursuant to the act of July 31,

1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

436. A letter from the Chairman, Securities and Exchange Commission, transmitting the 20th Annual Report of the Securities and Exchange Commission, covering the fiscal year July 1, 1953, to June 30, 1954, in accordance with the provisions of section 23 (b) of the Securities Exchange Act of 1934, approved June 6, 1934; section 23 of the Public Utility Holding Company Act of 1935, approved August 26, 1935; section 46 (a) of the Investment Company Act of 1940, approved August 22, 1940; section 216 of the Investment Advisers Act of 1940, approved August 22, 1940; and section 3 of the act of June 29, 1949, amending the Bretton Woods Agreements Act; to the Committee on Interstate and Foreign Commerce.

437. A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation entitled "A bill to clarify and consolidate the authority to require the establishment, maintenance, and operation of aids to maritime navigation on fixed structures in or over navigable waters of the United States"; to the Committee on Merchant Marine and Fisheries.

438. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession contract with the Glacier Park Boat Co., to provide boat-transportation service in Glacier National Park, Mont., during the 5-year period beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 473. A bill to authorize an investigation and report on the advisability of a national monument in Brooklyn, N. Y.; with amendment (Rept. No. 47). Referred to the Committee of the Whole House on the State of the Union.

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 607. A bill to provide that lands reserved to the Territory of Alaska for educational purposes may be leased for periods not in excess of 55 years; without amendment (Rept. No. 48). Referred to the Committee of the Whole House on the State of the Union.

Mr. CELLER: Committee on the Judiciary. H. R. 3828. A bill to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes; without amendment (Rept. No. 49). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOPER: Committee on Ways and Means. H. R. 1. A bill to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes; with amendment (Rept. No. 50). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

By Mr. ENGLE:

H. R. 4000. A bill to establish public use of the national forests as a policy of Congress, and for other purposes; to the Committee on Agriculture.

H. R. 4001. A bill to provide for the management and disposition of certain public domain lands in the State of Oklahoma; to the Committee on Interior and Insular Affairs.

H. R. 4002. A bill to provide for issuance of campfire permits and to facilitate the development, maintenance, and operating facilities for public use in the national forests, and for other purposes; to the Committee on Agriculture.

By Mr. FINO:

H. R. 4003. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to deduct tuition expenses paid by him for the education of his children; to the Committee on Ways and Means.

By Mr. HOPE:

H. R. 4004. A bill to provide for the sale of certain lands in the national forests; to the Committee on Agriculture.

By Mr. JARMAN:

H. R. 4005. A bill to amend the Trade Agreements Extension Act of July 1, 1954, so as to assure the availability of materials essential to national security; to the Committee on Ways and Means.

By Mrs. KEE:

H. R. 4006. A bill to amend the Veterans' Readjustment Assistance Act of 1952 to provide that education and training allowances paid to veterans pursuing institutional on-farm training shall not be reduced for 12 months after they have begun their training; to the Committee on Veterans' Affairs.

H. R. 4007. A bill to establish an educational-assistance program for children of servicemen who died as a result of a disability incurred in line of duty during World War II or the Korean service period in combat or from an instrumentality of war; to the Committee on Veterans' Affairs.

By Mr. LANE:

H. R. 4008. A bill to amend the Federal Civil Defense Act of 1950 to authorize the disposal of certain Federal surplus property to State and local units of the United States Civil Defense Corps; to the Committee on Armed Services.

By Mr. McCARTHY:

H. R. 4009. A bill to amend section 206 of the Legislative Reorganization Act of 1946, so as to enable the Comptroller General more effectively to assist the appropriations committees in considering the budget; to the Committee on Government Operations.

By Mr. MOLLOHAN:

H. R. 4010. A bill to amend the Water Pollution Control Act; to the Committee on Public Works.

By Mr. MOSS (by request):

H. R. 4011. A bill to improve the administration of the civil service by providing for the appointment, reappointment, or reinstatement of any postmaster involuntarily separated without fault to a position in the postal field service of the United States; to the Committee on Post Office and Civil Service.

By Mr. MOULDER:

H. R. 4012. A bill to amend the Soil Conservation and Domestic Allotment Act to provide that local and county committees shall have sole authority to select and dismiss their employees; to the Committee on Agriculture.

By Mr. PERKINS:

H. R. 4013. A bill to provide a cost-of-living pay increase for employees of the field service of the Post Office Department; to the Committee on Post Office and Civil Service.

By Mr. QUIGLEY:

H. R. 4014. A bill to amend section 6 of the act of August 24, 1912, as amended, with respect to the recognition of organizations of postal and Federal employees; to the Committee on Post Office and Civil Service.

By Mr. ROGERS of Colorado:

H. R. 4015. A bill to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented; to the Committee on Public Works.

By Mr. YOUNG:

H. R. 4016. A bill to provide for a more effective control of narcotic drugs, and for other purposes; to the Committee on Ways and Means.

By Mr. GUBSER:

H. R. 4017. A bill to provide that the authority of the Commissioner of Education to contract for research in the field of education shall include the authority to contract for research into the narcotic addiction problem; to the Committee on Education and Labor.

By Mr. HOLT:

H. R. 4018. A bill to amend section 11 (a) of the act of June 6, 1933, which provides for a Federal Advisory Council in the Department of Labor; to the Committee on Education and Labor.

By Mr. LANE:

H. R. 4019. A bill to authorize mileage allowance of 10 cents per mile for United States marshals and their deputies for travel on official business; to the Committee on the Judiciary.

By Mr. MOLLOHAN:

H. R. 4020. A bill to provide grants to municipalities in those States which are parties to the Ohio River Valley sanitation compact to aid in the construction of sewage treatment works to prevent pollution of waters in the Ohio River Basin; to the Committee on Public Works.

By Mr. SMITH of Mississippi:

H. R. 4021. A bill to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Friar Point, Miss., and Helena, Ark.; to the Committee on Public Works.

By Mr. WAINWRIGHT:

H. R. 4022. A bill to provide that school districts which filed applications for payments under Public Law 815, 81st Congress, before November 24, 1953, shall not be penalized on account of school-construction contracts made after that date; to the Committee on Education and Labor.

By Mr. WATTS:

H. Res. 140. Resolution creating a position as stenographer to the Postmaster; to the Committee on House Administration.

By Mr. HOSMER:

H. J. Res. 213. Joint resolution authorizing the Territory of Hawaii to be incorporated in the State of California; and authorizing the Territory of Alaska to be incorporated in the State of Washington; to the Committee on Interior and Insular Affairs.

By Mr. JOHNSON of California:

H. J. Res. 214. Joint resolution proposing an amendment to the Constitution of the United States providing for the election of President and Vice President; to the Committee on the Judiciary.

By Mr. O'HARA of Illinois:

H. Con. Res. 84. Concurrent resolution proposing an Atlantic Exploratory Convention; to the Committee on Foreign Affairs.

By Mr. COOLEY:

H. Res. 139. Resolution to authorize the Committee on Agriculture to make investigations into any matter within its jurisdiction, and for other purposes; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States relative to requesting the Sugar Act of 1948 be continued in force and the quota of domestic beet sugar be increased; to the Committee on Agriculture.

Also, memorial of the Legislature of the State of South Carolina, memorializing the President and the Congress of the United States relative to making provision to compensate the counties in the State which have lost revenue by the acquisition of title by the Federal Government to large areas of taxable property; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States urging that a United States ore-purchasing program be set up in Alaska whereby a substantial partial payment may be made to producers of small lots of strategic minerals at point of production; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Utah, memorializing the President and the Congress of the United States relative to reaffirming its support of the Bricker amendment; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADDONIZIO:

H. R. 4023. A bill for the relief of Sylvia Schwarz; to the Committee on the Judiciary.

By Mr. AYRES:

H. R. 4024. A bill for the relief of Carlo Palmieri; to the Committee on the Judiciary.

By Mr. BROWN of Ohio:

H. R. 4025. A bill for the relief of Mrs. Donald A. Howard (nee Miss Elsa Ursula Kuchinke); to the Committee on the Judiciary.

By Mr. CANFIELD:

H. R. 4026. A bill for the relief of James C. Hayes; to the Committee on the Judiciary.

By Mr. COUDERT:

H. R. 4027. A bill for the relief of Mrs. Rosa Yushang Liang Kwok and daughter, Jeanette Chin-ming Kwok; to the Committee on the Judiciary.

By Mr. HOLT (by request):

H. R. 4028. A bill for the relief of Edward Yousif Obeji; to the Committee on the Judiciary.

By Mr. HOSMER:

H. R. 4029. A bill for the relief of Sofronio Molina DeGuzman; to the Committee on the Judiciary.

By Mr. HUDDLESTON:

H. R. 4030. A bill for the relief of Frederick P. Fulmer; to the Committee on the Judiciary.

By Mr. HYDE:

H. R. 4031. A bill to consider residence in American Samoa or the Trust Territory of the Pacific Islands by certain employees of the governments thereof, and their dependents, as residence in the United States for naturalization purposes; to the Committee on the Judiciary.

By Mr. JARMAN:

H. R. 4032. A bill for the relief of Ralston Edward Harry; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H. R. 4033. A bill for the relief of Clara Hendrika Edwina Judith Tollens Foulkes; to the Committee on the Judiciary.

By Mr. KING of California:

H. R. 4034. A bill for the relief of Andrew M. Hanson; to the Committee on the Judiciary.

H. R. 4035. A bill for the relief of Angel F. Madayag; to the Committee on the Judiciary.

By Mr. MAGNUSON:

H. R. 4036. A bill for the relief of John Soudas; to the Committee on the Judiciary.

By Mr. MILLER of California:

H. R. 4037. A bill for the relief of Truck & Axle Manufacturing Co.; to the Committee on the Judiciary.

By Mr. MILLER of New York:

H. R. 4038. A bill for the relief of Joseph E. Miller; to the Committee on the Judiciary.

By Mr. MOSS:

H. R. 4039. A bill for the relief of Julian, Dolores, Jaime, Dennis, Roldan, and Julian, Jr., Lizardo; to the Committee on the Judiciary.

By Mr. PHILLIPS:

H. R. 4040. A bill for the relief of Michele Constantino Pastore; to the Committee on the Judiciary.

By Mr. SCOTT:

H. R. 4041. A bill for the relief of Franciska Gruber; to the Committee on the Judiciary.

H. R. 4042. A bill for the relief of Sang Ho Lee, his wife, Hi Sook Lee, and minor child, Byung Yun (Louise) Lee; to the Committee on the Judiciary.

H. R. 4043. A bill for the relief of Rene Rachell Luyse Kubicek; to the Committee on the Judiciary.

By Mr. WEAVER:

H. R. 4044. A bill for the relief of Burgal Lyden and others; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

89. By the SPEAKER: Petition of the secretary, Mid-Continent Oil & Gas Association, Tulsa, Okla., asking for appropriate legislation to exempt production and gathering of natural gas and the sale thereof from regulations by the Federal Power Commission; to the Committee on Interstate and Foreign Commerce.

90. Also, petition of Marie Bernhardt, Bad Nauheim, Germany, with reference to a claim for release of barred property in the United States, claim No. 46083 Department of Justice, Office of Alien Property; to the Committee on Interstate and Foreign Commerce.

91. By Mr. CANFIELD: Resolution of the Association of State and Territorial Health Officers recommending that legislation be enacted by the Congress designating the Public Health Service as a component branch of the Armed Forces of the United States on an equal status with the Army, Navy, and Air Force, thereby strengthening the ability of the Public Health Service to maintain its existing personnel and recruit additional personnel to meet its expanded responsibilities; to the Committee on Armed Services.

92. By Mr. THORNBERRY: Petition of a group of peanut farmers of Williamson County, Tex., requesting additional acreage allotment to Williamson County for the planting of peanuts; to the Committee on Agriculture.

EXTENSIONS OF REMARKS

Lincoln and Kosciusko

EXTENSION OF REMARKS

OF

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 1955

Mr. ZABLOCKI. Mr. Speaker, last Saturday, February 12, our Nation observed the anniversary of the birth of two great men—Abraham Lincoln, one of our greatest presidents, and Gen. Thaddeus Kosciusko, hero of the Revolutionary War.

The names of these two men shall always remain engraved in the hearts of lovers of liberty and democracy. Both men have fought courageously, in their own ways and in their own times, for the liberty of man and for each nation's right to self-determination. Their nobility of character, devotion to principle, and love of justice shall continue to inspire men of all ages, creeds, and nationalities.

The world is reminded by patriots like Kosciusko—who fought for the independence of the United States and of his native Poland—that the struggle for liberty is endless and that ours is not the only generation that has fought for it and sacrificed in its name. It seems that each period in history has its challenges, its own dictators, and its own despots.

This should not discourage us or lead us to despair. Instead, we should draw courage and inspiration from the example of valiant men like Kosciusko, who defied overwhelming odds and spared no sacrifice where principles in which they believed were involved. Our task, as great as it is, is no more difficult than theirs.

Let us, therefore, rededicate ourselves to the unfinished task to which they devoted their lives.

Questionnaire on Issues Facing the Congress

EXTENSION OF REMARKS
OF
HON. A. L. MILLER
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Monday, February 14, 1955

Mr. MILLER of Nebraska. Mr. Speaker, under leave to extend my remarks, I include in the RECORD my own remarks in the form of a letter-questionnaire, which I am sending to the folks in my district. These questionnaires are helpful in determining the views of my constituents on various problems facing Congress.

DEAR FRIENDS: This is the fifth time I have sent a questionnaire to every boxholder in the Fourth Congressional District of Nebraska. I am seeking your opinion on issues facing the Congress. While I must make my own independent decision as to how I will finally vote on national issues, I do want to say that your answers to the questions listed below will assist me in understanding your views on these national problems.

You will remember that in the off-election years it is my custom to hold government clinics in each of the 38 courthouses in the Fourth District. The first hour is devoted to Youth Wants To Know. I hope to continue that practice this late summer and fall. Here again, I will have an opportunity to meet you personally and to have you ask questions in an open forum. These question-and-answer sessions are interesting and informative.

I trust you will return the questionnaire. You will be taking part in your Government. Your answers will assist me, as a Member of Congress, to do a better job.

Yours truly,

A. L. MILLER,
Member of Congress, Fourth District of Nebraska.

QUESTIONNAIRE

1. What type of farm program do you favor? Flexible ☐, 90 percent ☐, 100 percent ☐.
2. Would you favor a bushel quota on wheat? Yes ☐, no ☐.
3. Would you favor a two-price system on marketing wheat? Yes ☐, no ☐.
4. Should 18-year-olds vote? Yes ☐, no ☐.
5. Do you favor present social security for farmers? Yes ☐, no ☐.
6. Your choice for President in 1956—Eisenhower ☐, Stevenson ☐, others ☐.
7. Should tariffs be lowered ☐, raised ☐, or kept as they are ☐?
8. Do you favor the present foreign policy? Yes ☐, no ☐.
9. Should we grant more foreign aid ☐ or less ☐?

11. Should there be Federal aid for school construction? Yes ☐, no ☐.
12. Do you favor universal military training? Yes ☐, no ☐.
13. Do you prefer the present Selective Service System? Yes ☐, no ☐.
14. Do you favor raising postal rates to meet the cost of service? Yes ☐, no ☐.
15. Should Communist China be admitted to the United Nations? Yes ☐, no ☐.
16. Should Alaska be made a new State? Yes ☐, no ☐.
17. Should Hawaii be made a new State? Yes ☐, no ☐.
18. Do you favor a State sales tax? Yes ☐, no ☐.

Name_____
Address_____
Occupation _____

Gen. Thaddeus Kosciusko

EXTENSION OF REMARKS
OF
HON. HENRY S. REUSS
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, February 14, 1955

Mr. REUSS. Mr. Speaker, yesterday I stood with my four children at the foot of the monument in Lafayette Park which commemorates Gen. Thaddeus Kosciusko, whose birthday was February 12 and whom the Nation's capital paid tribute to yesterday.

General Kosciusko was an early battler for American freedom. He came to our shores when this Nation was in infancy to take part in the American Revolutionary War.

Under Kosciusko's leadership in 1777 the fortifications at West Point were completed, and he served gallantly in the campaigns at Saratoga and the Carolinas.

After his return to Poland, General Kosciusko continued to fight for liberty in his homeland. He led the Polish people in their struggles against Prussian and Russian oppression.

In Milwaukee, as in many other American cities, there is a monument to the great General Kosciusko which I have often visited with my family. These Kosciusko monuments serve as an inspiration to the children of this generation.

Here was a Polish patriot with a restless hatred of tyranny. He threw himself into the cause of liberty here in the New World, earning the gratitude of countless citizens who have flourished in the freedom he helped to establish.

What practical things can we do to commemorate Kosciusko and the Polish people who have suffered so much for the cause of human freedom?

First, we should liberalize our immigration laws to permit more persons of Polish descent to enter this Nation.

Second, we must wage a vigorous program to keep alive the hopes for a democratic government among the Polish people by expanding our Voice of America.

And third, we should promptly ratify the world genocide convention making it a crime against humanity and international law for any dictator to exterminate whole nations, races, or religions.

These are but a few of the steps our Nation can take now to commemorate General Kosciusko.

Age Discrimination in Government Employment

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, February 14, 1955

Mr. PRICE. Mr. Speaker, there are indications that provisions of law, approved by Congress in 1952, supposedly abolishing all age limits for Federal employment except those essential to performance of the work, are being ignored by the United States Civil Service Commission.

This disregard for employment policy established by Congress on the part of the Commission has come to my attention because of the experience of a constituent, Mr. Nick Mlinarich, of East St. Louis, Ill.

Mr. Mlinarich applied for a position as tax collector for the Bureau of Internal Revenue. His application was rejected by the United States Civil Service Commission with a notation that the age limit for this position has been set at 35 years.

There is no question about Mr. Mlinarich's physical capability to perform this particular type of work. It was to take care of just such cases that Congress itself abolished age limits on hiring of personnel for Government positions.

While it is true that the law does not totally eliminate maximum age limits, it states the principle that age limits should not be imposed generally, and implies that the Civil Service Commission should exercise sound judgment to apply age limits on a practical basis. In my opinion, rejecting applicants at the age of 35 for the position of a tax collector within the Bureau of Internal Revenue indicates that the Commission is not applying the principle of the law in a practical way.

It is ironical that the United States Civil Service Commission has approved age limits as low as 35 years on the hiring for Government positions at the same time the United States Department of Labor has been campaigning against age discrimination by private employers.

Under leave to extend my remarks in the RECORD, I include herewith the following article on this subject which appeared in the February 17 issue of the Machinist, the official weekly publication of the International Association of Machinists:

IAM INVESTIGATION REVEALS 35-YEAR HIRING AGE LIMIT FOR MANY FEDERAL POSTS

The United States Civil Service Commission has approved age limits, many as low as 35 years on hiring for thousands of Government jobs during the past 2 years, the

Machinist learned this week. This age discrimination in Government employment policies has occurred despite a law adopted by Congress in 1952 supposedly abolishing all age limits except those essential to performance of the work. At the same time, the United States Department of Labor has been campaigning against age discrimination by private employers.

The inquiry into the age-limit policies of the United States Civil Service Commission was touched off by an IAM member, Nick Mlinarich of IAM Lodge, No. 121, East St. Louis, Ill.

Temporarily laid off his job, Mlinarich sought work elsewhere. One of the jobs he applied for was that of tax collector for the Treasury's Bureau of Internal Revenue. Mlinarich is 36 and a bowler and softball player. He was stunned when his application card was returned from the United States Civil Service Commission office at Chicago recently with a notation in red pencil that the top age limit for applicants is 35 years. The job pays $3,410 a year, about $65.50 a week.

Mlinarich has since been rehired at his old job, but is still interested in seeing that other over-35 jobhunters aren't discriminated against as he was. He wrote The Machinist:

"The Government has been preaching antidiscrimination in employing people and has requested that employers hire handicapped and older people and the like. Unless my conception of a tax collector's job is all wrong, I can't see what age would have to do with fulfilling the requirements. If 36 is too old for job hunting, maybe I should apply for my old-age pension." The inquiry touched off by this IAM member's complaint reveals that, despite the 1952 act of Congress, the Civil Service Commission has chosen to set top age limits on applicants who will be considered for scores of different categories of jobs. These limits are waived only in the case of veterans.

GENERAL RESTRICTIONS

These top limits range from 35 and 40 up to 62 years, which was the general Government age limit for all United States job applicants before Congress passed the 1952 act.

A Civil Service Commission official at Washington told the Machinist that the lower age restrictions were justified from two points of view:

Where the job is hazardous or requires special physical strength or condition, such as various types of Government police work, guard duty, aerial work, and the like.

Where the job is considered to be a trainee-type position in which the individual selected is expected to work up through the service as a career employee.

The tax-collector post which Mlinarich sought falls in the latter category, the Civil Service Commission claims. However, the training period for a career as tax collector is only 6 months.

THIRTY-FIVE OR UNDER

The records show that many other jobs are also restricted to applicants 35 or under, if they are not veterans. These include almost all the so-called GS–5 professional positions including such jobs as agronomist, soil conservationist, physicist, engineer, and historian.

There is also a lower paid category of aids, such as agricultural aid, engineering aid, range management and conservation aid, and similar posts which have the 35-year limit for applicants.

A field assistant trainee in the Social Security Survivors Insurance Division also must be 35 or under to qualify.

Many of the entering jobs in the category of guards, agents, inspectors, and other police-type work have 35-year limits.

OTHER CATEGORIES

Post Office substitute carriers, clerks, and garagemen-drivers are under a 50-year age limit.

At the top of the age scale, the former 62-year-old limit for applicants for a great number of Government clerical positions has been removed. These employees can be hired up to 70, with the possibility of 1-year temporary appointments from year to year thereafter.

However, civil-service records show that this is not true for many of the craft positions—including machinists, still under a 62-year hiring limit. Here are some other categories where jobs are still under the 62-year limit for nonveteran applicants:

Blacksmith, boilermaker, bulldozer operator, carpenter, electrician, laborer, mason, painter, plasterer, plumber, truck driver, welder, sheet metal worker, and many others.

Many jobs, including bookkeepers and typists, in the Panama Canal Zone have a 45-year limit for applicants who are not veterans.

Civil service records show that ever since the law went into effect in early 1953 there has been a steady increase in the number of jobs to which discriminatory age limits have been applied.

NOT CONSISTENT

As frequently happens, the left hand doesn't know what the right is doing. While the United States Civil Service Commission has been placing new age limits on job applicants, the United States Department of Labor is campaigning for the hiring of more older workers. United States Secretary of Labor James P. Mitchell has said:

"By 1975, according to the Census Bureau, the number of persons 45 and over will total more than 63 million, an increase of 40 percent over 1953. This group will constitute one-half the population over 20 years of age.

"Unless something is done to give them job opportunities, an estimated half of our adult population will be condemned to a life of economic uselessness."

Ten Years After Yalta

EXTENSION OF REMARKS

OF

HON. B. CARROLL REECE

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 1955

Mr. REECE of Tennessee. Mr. Speaker, the Yalta Conference of February 1945 fashioned the Roosevelt peace, which now has tormented all of God's children for 10 long years. Some day, Yalta must be undone.

The principals in that tragic conference were Roosevelt, Stalin, and Churchill. Stalin and Churchill, though both older than Roosevelt, were in robust health. Roosevelt, as we now know from recent memories, was a dying man. Alger Hiss and Harry Hopkins were intimate, confidential advisers of Roosevelt at Yalta.

Official State Department publications have summarized the accomplishments at Yalta, so far as they are known; but these publications do not tell the story of Roosevelt's physical and mental disintegration during the 15 months immediately preceding the Conference.

Not until Rear Adm. Ross T. McIntire, United States Navy, retired, published White House Physician, in 1946, did the world learn that President Roosevelt's fatal illness first struck him in December 1943, almost a year before the historic fourth-term election of November 1944, and 15 months before the epochal Yalta Conference.

Churchill quickly recognized Roosevelt's tragic physical condition at Yalta and since has commented on that facet of the conference at some length. Mrs. Eleanor Roosevelt likewise wrote—in 1950—that everybody in the White House family knew that the President was far from well during the summer and fall of 1944. But nobody in the White House ever commented on the President's health because all understood clearly that Mr. Roosevelt felt it his duty to continue in office and those around him could try only to make things as easy for him as possible.

This fixed policy of the court circle was spearheaded by Admiral McIntire, who issued five public statements during 1944 indicating that Mr. Roosevelt was in sound health. These statements by Admiral McIntire were published in the New York Times on March 6, May 8, June 9, September 26, and October 13, 1944.

With the Nation thus reassured on Mr. Roosevelt's robust health, the President was reelected triumphantly for a fourth term on November 7. Immediately after the inauguration, January 20, 1945, he took off on the cruiser *Quincy* from Norfolk, Va., for the fateful Yalta Conference, which saddled Germany with the savage Morgenthau plan for a pastoral economy, betrayed Poland, and delivered China to Kremlin communism. Yalta designed and erected the Iron Curtain.

In The Roosevelt Myth, published in July 1948, John T. Flynn, a competent and respected anti-Communist journalist, meticulously documented Roosevelt's last illness from its inception in December 1943 to the President's death at Warm Springs, Ga., April 12, 1945. Using Mr. Flynn's basic chronology as the framework, I now have buttressed the story with additional details since published in the Churchill memoirs, the Ickes diaries, Frazier Hunt's biography of Gen. Douglas MacArthur, and Mrs. Roosevelt's This I Remember, published in 1950.

President Roosevelt returned from the Tehran Conference in December 1943, and after a brief season in Washington, moved on to Hyde Park for the Christmas holidays. There, Dr. McIntire relates, the President suffered a brief attack of influenza, which was followed by a persistent bronchial infection. From this point until his death in April 1945, the President never regained sound health and normal physical energy.

Flynn records that Mr. Roosevelt was away from the White House 175 days during 1944. Some 30 days were required for his junket to the Pacific to confer with MacArthur and Nimitz; he gave 2 weeks to the presidential campaign; about 10 days to the Quebec Conference with Churchill; and spent something more than 100 days at Bernard Baruch's secluded retreat at Hobcaw

Sound, S. C., at Hyde Park, and at the sheltered Shangri La hideout in western Maryland. The true significance of these extended periods of presidential rest and recuperation was obsured by Admiral McIntire's periodic reassurances to the public throughout the year concerning Mr. Roosevelt's health.

Merriam Smith, veteran White House reporter for the United Press, comments in Thank You, Mr. President—1946—that Admiral McIntire never lied about Mr. Roosevelt's physical condition but, on occasion, has told the truth in language that easily could be misleading to the public.

At Hyde Park several celebrated specialists were called in during January 1944 for a consultation on the President's influenza. Their findings, documented through Admiral McIntire several years later, disclosed a moderate degree of arteriosclerosis—the infirmity which finally produced the fatal stroke at Warm Springs, April 12, 1945. While this Hyde Park consultation occurred in January 1944, the findings were not documented publicly until June of 1946.

History thus records that President Roosevelt's last illness began, and was correctly diagnosed, in December to January, 1943 to 1944, but was concealed from the public, to accommodate the urgent political strategems of the fourth-term campaign in 1944, and further concealed during the critical days of the Yalta Conference with Stalin and Churchill—in February 1945—which gave us the Roosevelt peace, the United Nations, and the deliberate betrayal of China to communism after the carefully plotted Lattimore plan.

Under all the customs and usages of international law the question now arises whether, in the circumstances of President Roosevelt's then advanced infirmity in January 1945, his secret deliberations and vocal one-man commitments at Yalta impose in any degree the slightest moral obligation on the part of the United States Government or the American people?

After the January 1944 medical consultation at Hyde Park, McIntire notes, he placed the President on a regime which limited him to 4 hours work a day. With D-day in Europe only 6 months forward, and the fourth-term presidential campaign already well underway, this 4-hour-day regime—not documented for the public until 1946—marked Mr. Roosevelt as no longer physically fit to discharge the heavy duties of his high office. Nevertheless, 11 months later, he was reelected, in November 1944, for another term of 4 years.

Mrs. Roosevelt confirms Dr. McIntire's account of the limited presidential regime, noting that Mr. Roosevelt on June 6, 1944, had only one significant task on his calendar for the day—delivery of his D-day prayer over a worldwide radio network; after which for hours, all hearts in the White House were with the men on the beaches.

Precisely at this point, Mrs. Roosevelt continues, another election campaign lay immediately ahead. She knew, without asking, that since the war was not over, Mr. Roosevelt, if his health permitted, would run again. It was thereupon decided finally that if the President would agree to certain rules set down by the physicians, he could carry on as Chief Executive—Washington Post, February 1, 1950, page 13–B. Mrs. Roosevelt does not record, however, who made this momentous decision in the summer of 1944, nor why it was not disclosed to the American public until February of 1950, almost 5 years after Mr. Roosevelt's death.

About a month earlier, Dr. McIntire, in May 1944, had brought down from Boston a famous heart specialist, arranged his immediate induction into the United States Navy, and assigned him to President Roosevelt's side. Eleven months later, at the scene of the President's death, this heart specialist, Dr. Howard Bruenn, told newspapermen he had never let Mr. Roosevelt get out of his sight. These fundamental facts of 1944 White House history were not made known to the public until mid-1946.

En route to the Pacific in July 1944, Mr. Roosevelt stopped his special train long enough in the railyards at Chicago to issue his historic dictum, "Clear it with Sidney," to Senators Truman, Byrnes, and Barkley. This dictum related to the Democratic National Convention's then pending selection of a vice presidential nominee for the fourth-term ticket, the southern Democrats having earlier informed the President in Washington that Henry Agard Wallace would not be acceptable for another term. From this situation soon emerged the nomination of Harry Truman, the only other considerable candidate before the convention acceptable to the late Sidney Hillman.

From Chicago, Mr. Roosevelt moved on to San Diego, where he made his acceptance speech for the fourth-term nomination, thence by battleship to his war conference with MacArthur and Nimitz, which lasted only a few hours.

On this trip—

Flynn explains—

his appalling physical condition was revealed to the commanders in Honolulu. They were shocked at his appearance, despite the long, restful, sea trip. Here for the first time, we hear of his conversation falling into intervals of irrelevance.

As he was wheeled from his quarters, officers noted his head drooping forward, his jaw hanging loosely. Mr. Roosevelt did not return to Washington until August 18.

Campaigning in the rain in New York City late in October, he rode in a specially equipped heated limousine, with an electric heater under the seat, and another under the heavy fur blankets thrown over his lap. Three or four stuttering lapses in diction during his radio speech that night were attributed jovially by the newspapermen present to possibly a slight excess of before-dinner martinis.

One week later, on election night, Merriam Smith noted at Hyde Park that Mr. Roosevelt "looked older than I had ever seen him, and he made an irrelevant speech."

After the election, November 7, President Roosevelt dropped out of the news until November 28, then went to Warm Springs until December 23, then to Hyde Park for the Christmas holidays. Just 1 year had passed—as we now know—since his fatal illness had been discovered, diagnosed, and suppressed.

On January 19, 1945, the day before inauguration, Secretary of Labor Frances Perkins tarried after the Cabinet meeting to present her resignation and bid farewell.

The physical appearance of the President shocked her. His deep pallor, apoplectic hands, and sagging facial muscles suggested a man gravely ill. Distraught, she hastened to her office, called in her personal secretary, closed the door, and whispered in a frightened voice that the President appeared near death.

Forty-eight hours later, the inauguration over, Mr. Roosevelt left Washington for the Yalta Conference—the most appalling disaster in modern history.

Someday, somehow, Yalta must be undone. God's mankind will not continue forever in the toils and chains there spun by barbaric communism about the broken body and shattered mind of a President recently elected for a fourth term by the most gigantic and egregious public fraud in the history of the world.

The School Aid Program

EXTENSION OF REMARKS
OF
HON. JOHN E. MOSS, JR.
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, February 14, 1955

Mr. MOSS. Mr. Speaker, as far as the State of California is concerned, the administration proposal on education is completely inadequate. It will not give any material aid in the area where the schools desperately need emergency assistance.

I fear the plan lacks the imagination and boldness necessary to solve the problems of overcrowded and understaffed schools. The program has been publicized as one to aid schools; as far as California is concerned, the plan presented by the administration could only delay until too far in the future any important assistance for education.

I fear local school districts, under the impression they will get some adequate Federal aid, will delay approval of their own necessary bond issues. The program presented by the administration will call for a great deal of local financial participation—too much, I fear, to make the Federal program workable.

Congress should take the lead in proposing right now an aid-to-education program to provide real aid to local school districts—aid that will end the second-class education too many children are receiving.

At my request, Frank M. Wright, the head of the division of public school administration of California, analyzed the administration's proposal on education. His comments, which follow, point up the fact that the program is little more

than a thin veneer on a ramshackle structure:

Members of my staff and I have reviewed the recommendations made by President Eisenhower in his proposal to aid in financing the construction of needed school buildings throughout the United States. His proposal is divided into three parts.

"Part 1, Bond Purchases by the Federal Government," seems to us to be absolutely unworkable in California due to the fact that we have no difficulty in selling bonds that districts authorize. The current district rate runs between 2½ and 3 percent, and I have never known of a single area in California that has had difficulty in disposing of its bonds.

"Part 2, State School Building Agencies," seems to contemplate a type of operation similar to the Pennsylvania plan which sets up a State school building authority. Under this proposal the districts would have the buildings built for them by some sort of combination between the Federal and State governments and then would rent the buildings and be required to pay an amount equal to principal and interest out of their annual operating funds. In California the law would have to be materially changed to provide for special taxes for this purpose in lieu of bond taxes, or the bond authorization would have to be changed in order to permit bonds to be issued for that particular purpose. We do not believe that this is a workable plan at all. The State program which I have attempted to describe briefly in the enclosed statement covers that operation. We do not believe that there is anything in part 2 that would be of any benefit to California.

"Part 3, Grants for School Districts With Proved Need and Lack of Local Income," does not offer any help to our State. In the first place, we do not have a situation where a district has not reached its legal bonding capacity because it could not sell its bonds. If a California district has bonding capacity it naturally would sell its bonds and would be able to use that money. The second part of the proposal concerns a situation where a district has reached its legal bonding limit and is unable to pay rent and would need to obtain additional aid. That is about the only part of the proposal where it appears that California would receive any assistance. Then the degree of assistance would depend almost entirely upon the language of the act, as to whether or not a State building authority was provided which would provide for leasing and paying rent.

Tariff Reductions Authorized by H. R. 1

EXTENSION OF REMARKS
OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 1955

Mr. REED of New York. Mr. Speaker, much has been said about the so-called gradual tariff reductions authorized by H. R. 1.

I have had a list prepared concerning a few items, such as textiles, which shows the maximum rate reductions permissible under H. R. 1.

The list follows:

Extent to which existing rates of duty on specified products could be reduced under the authority that would be given to the President by H. R. 1

Commodity	Ad valorem equivalent [1] of present rate of duty	Ad valorem equivalent [1] of lowest rate of duty permissible under H. R. 1	Extent of reduction which is permissible under H. R. 1 in present rate of duty
	Percent ad valorem	*Percent ad valorem*	*Percent*
Soybean oil	45	23	50
Flavoring extracts, fruit flavors, esters, oils, and essences, containing alcohol	67	50	25
Certain lead pigments	20	10	50
Chrome brick	25	12½	50
Block mica	27	13½	50
Earthenware table and kitchen articles	63	50	20
Decorated china table and kitchen articles	88	44	50
Certain glass containers for toilet preparations	75	37½	50
Lenses with ground or beveled edges (for spectacles)	40	20	50
Certain scientific or laboratory instruments and parts	50	30	40
Thermostatic metal	50	25	50
Power-transmission chains and parts (low-value)	30	20	33
Steel trouser buttons	12	6½	46
Pocket knives (low value)	[2] 85	50	41
Hypodermic syringes (dental)	60	30	50
Slide fasteners (zippers), metal (low value)	66	33	50
Tennis-racket frames	45	22½	50
Scrap tobacco (other than Cuban product)	103	50	51
Cigars and cheroots (other than Cuban product)	116	50	57
Lard compounds and lard substitutes	32	16	50
Turkeys, dressed or undressed	23	11	50
Rosefish, fresh or frozen	49	25	49
Fish, in oil:			
Sardines	[2] 40	[2] 15	63
Tuna	45	38	15
Barley flour	23	11	50
Rice, cleaned or milled	25	12½	50
Cherries, dried or evaporated	39	19½	50
Candied citrons or citron peel	33	25	24
Fresh or dried dates in packages	60	30	50
Raisins	[2] 6	[2] 4	33
Prunes, etc.	14	7	50
Almonds, unshelled	18	9	50
Lemon juice, concentrated	85	50	41
Countable cotton cloth (low value) [3]	[2] 40	[2] 20	50
Cotton corduroys (high value)	30	15	50
Cotton blankets, Jacquard-figured	30	22½	25
Cotton sheets and pillow cases	20	10	50
Gloves and mittens of cotton knit fabric (low value)	60	30	50
Cotton handkerchiefs and woven mufflers	30	20	33⅓
Friction or insulating tape	40	20	50
Cotton rag rugs	75	50	33⅓
Fine clothing wools	30	20	33⅓
Worsteds and woolens (low value)	[2] 60	50	16⅔
Wool blankets, plain or embroidered (low value):			
Hand-woven	64	21	67
Other	63	50	21
Wool felt hats, blocked, trimmed, etc. (low value)	60	42	30
Certain wool tapestries and upholstery goods	48	37	23
Broad silks (wide), Jacquard-figured, bleached, printed, piece-dyed (low value)	65	32½	50
Silk handkerchiefs, hemmed or hemstitched (low value)	60	50	17
Rayon knit underwear (high value)	36	18	50
Copying paper (high value)	29	14½	50
Envelopes, filled or unfilled, lithographed, made from various kinds of paper	[2] 35	[2] 12	66
Wrapping paper, sulfite, machine-finished	20	12½	38
Imitation solid pearls (low value)	60	30	50
Tooth brushes (with handles or backs of materials other than cellulose, etc.) (high value)	31	15½	50
Hair and other toilet brushes (with cellulose handles or backs)	60	30	50
Pearl or shell buttons	[2] 83	50	40
Cork insulation pipe coverings, etc.	22½	11	50
Certain plastic dolls	[2] 90	50	45
Certain abrasives	60	30	50
Dressed furs	12½	7	44
Silver, black, or platinum fox wearing apparel	37½	25	33
Men's and boys' fur or fur-felt hats	[2] 50	[2] 30	40
Women's and girls' fur hats	[2] 45	[2] 30	33⅓
Metal articles, such as compacts, vanity cases, cigarette cases, etc. (low value)	65	50	23
Various kinds of articles (except wearing apparel) in part of machine-made lace	65	45	31
Lace window curtains (except cotton Nottingham lace curtains)	90	45	50
Hat braids (except of straw, paper, grass, ramie, etc.)	90	45	50
Leather footwear (various types)	[2] 20	[2] 10	50
Leather gloves (various kinds)	[2] 30	[2] 20	33⅓
Tobacco pouches (except of leather)	60	30	50
Tobacco pipes with bowls of briar wood or other root, partly finished (medium value)	55	40	27

[1] Based on imports in 1952.
[2] About.
[3] Value bracket established in 1939. Since then, values have increased about threefold, consequently cloth of this value does not exist in normal trade channels.

Opponents of H. R. 1 Outnumber Proponents by 3 to 1

EXTENSION OF REMARKS
OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 1955

Mr. REED of New York. Mr. Speaker, during the public hearings on H. R. 1 held by the Committee on Ways and Means, the opponents of the legislation outnumbered the proponents by approximately 3 to 1.

In spite of this fact, the report of the committee on the bill makes specific reference only to the proponents.

Mr. Speaker, in order to keep the record clear and to avoid any possible distortion of the facts, representatives of the following industries, labor groups, and organizations testified in opposition to H. R. 1:

General Electric Co., qualified opposition.
California Fish Canners Association.
American Manufacturers of Thermostatic Containers.
The Candle Manufacturers Association.
Collapsible Tube Manufacturers Association.
The Industrial Wire Cloth Institute.
The National Building Granite Quarries Association.
The Rubber Footwear Division of the Rubber Manufacturers Association.
The Toy Manufacturers of the U. S. A., Inc.
The Twisted Jute Packing and Oakum Institute.
United States Potters Association.
The American Manufacturers of Toy Balloons.
American Tariff League.
National Federation of Independent Business.
Nationwide Committee of Industry, Agriculture, and Labor.
American Coalition.
Bausch & Lomb Optical Co.
Voland & Sons, Inc.
R. Thomas & Sons, Inc.
California Pottery Guild.
Homer Laughlin China Co.
Vitrified China Association.
International Brotherhood of Operative Potters.
Westinghouse Electric Corp.
Monsanto Chemical Co.
Manufacturing Chemists Association, Inc.
Dow Chemical Co.
Synthetic Organic Chemical Manufacturers Association.
Otto B. May, Inc.
Allied Chemical & Dye Corp.
American Cyanamid Co.
American Glassware Association.
Kent Metal & Chemical Corp.
American Flint Glass Workers Union.
Ohio Glass and Pottery Workers Protective League.
Pennsylvania Glassworkers Protective League.
Indiana Glass Workers Protective League.
Seafarers International Union of North America.
American Tunaboat Association.
Seafood Producers Association.
Massachusetts Fisheries Association, Inc.
Northwest Horticultural Council.
Independent Petroleum Association of America.
National Stripper Well Association.
North Texas Oil & Gas Association.
Independent Petroleum Association of America.
Pennsylvania Grade Crude Oil Association.
New York State Producers Association.
Bradford District Pennsylvania Producers Association.
Southwestern Pennsylvania Producers Association.
Oil Producers Agency of California.
San Joaquin Valley Oil Producers Association.
Independent Oil Producers Agency of California.
Texas Independent Producers and Royalty Owners Association.
West Central Texas Oil & Gas Association.
Lawton Oil Corp.
Oklahoma Independent Petroleum Association.
Kentucky Oil & Gas Association.
Kansas Independent Oil & Gas Association.
Ohio Oil & Gas Association.
Independent Oil Producers & Land Owners Association.
East Texas Oil Association.
National Coal Association.
Pennsylvania Railroad.
United Mine Workers of America.
American Retail Coal Association.
Foreign Oil Policy Committee.
Anthracite Institute.
Norfolk & Western Railroad.
Order of Railway Conductors and Brakemen.
Southern Coal Producers Association.
Brotherhood of Railroad Trainmen.
Women's Patriotic Conference.
American Cotton Manufacturers Institute, Inc.
National Association of Cotton Manufacturers.
Association of Cotton Textile Merchants of New York.
New England Textile Committee and six New England Governors.
National Association of Wool Manufacturers.
Carpet Institute, Inc.
National Wool Growers Association.
Boston Wool Trade Association.
Philadelphia Wool & Textile Association.
National Wool Trade Association.
National Federation of Textiles.
Textile Fabric Association.
Tufted Textile Manufacturers Association.
Forstmann Woolen Co.
CIO Textile Workers.
Linen Thread Co., Inc.
United Hatters, Cap, and Millinery Workers International Union.
National Authority for the Ladies Handbag Industry.
S. Morgan Smith Co.
Pin, Clip, and Fastener Association.
Clothespin Manufacturers of America.
Western Condensing Co.
National Machine Tool Producers Association.
Amalgamated Lace Operatives of America.
American Lace Manufacturers Association.
American Fabric Glove Associates.
American Knit Handwear Association.
National Association of Leather Glove Manufacturers.
Underwear Institute.
Work Glove Institute.
United Wallpaper Craftsmen and Workers of North America International Union.
Lapp Insulator Co.
American Fluorspar.
Mica Fabricators Association.
New England Manufacturing Jewelers & Silversmiths Association.
Clock Manufacturers of America, Inc.
Cigarette Lighter Manufacturers Association, Inc.
Lead Pencil Manufacturers Association, Inc.
Tungsten Institute.
Rubber Manufacturers Association, Inc.
Okonite Co.
Industrial Fasteners Institute.
American Optical Co.
Shears, Scissors & Manicure Implement Manufacturers Association.
American Manganese Producers Association.
White Sewing Machine Co.
Woven Wood Fabric Industry.
Hardwood Plywood Institute.
Hardboard Institute.
California Almond Growers Exchange.
California Walnut Growers Association.
Northwest Nut Growers.
Oregon Filbert Commission.
Sunkist Growers, Inc.

Twentieth Triennial Congress of the General Society of Mayflower Descendants

EXTENSION OF REMARKS
OF
HON. EDWARD H. REES
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, February 14, 1955

Mr. REES of Kansas. Mr. Speaker, during the month of September last, at Plymouth, Mass., the 20th triennial congress of the General Society of Mayflower Descendants was held. The attendance of officers and delegates from the forty-odd State societies of the Mayflower descendants, making up the Congress, was the largest in the history of the general society, founded in 1927. There were many interesting features involved in the 3 days of the congress, one of which was the customary Pilgrims' progress, a procession made up of men and women dressed in the costumes of Plymouth Colony days. This picturesque group, headed by a drummer boy, and followed by impersonated Pilgrims: Elder William Brewster, the role assumed by Rev. Cecil Plumb, of Salem, N. Y., elder general of the general society; Governor Carver, John Howland, John Alden, Priscilla Mullins, Captain Miles Standish, Governor Bradford, and others, marched up to Burial Hill, where some of the earliest Pilgrims repose. The procession stopped at the site of the Old Fort of Pilgrim days, and there Elder General Plumb delivered a very fine and appropriate address to the assemblage present, made up of Mayflower descendants, and others.

At the congress, the following officers were elected for the next ensuing 3 years: Governor General Col. Waldo M. Allen, Lake Forrest, Ill.; secretary general, Mrs. Helen S. Peck, Chicago, Ill.; treasurer general, Merriam Davis, Hartford, Conn.; counsellor general, Maurice H. Thatcher, Washington, D. C.; historian general, Mrs. John Kermott Allen, Boston, Mass.; elder general, Rev. Cecil Plumb, Salem, N. Y.; captain general, Gen. Carl R. Gray, Jr., Hudson, Wis.; and surgeon general, Dr. Jay S. Ruldophy, Wayne, Pa.

The new counselor general, Maurice H. Thatcher, was formerly Representative in Congress from the Louisville, Ky., district. He was also chairman of the committee on resolutions at the recent Plymouth Congress, and had served in the like capacity at the 19th triennial congress of the general society in 1951. In addition, he was the author of a proposed amendment to the constitution of the general society on the questions of eligibility and subversives; which proposal was adopted at the recent Congress.

Hon. Herbert Brownell, Jr., Attorney General of the United States and deputy governor general for Nebraska for the general society, delivered before the 20th triennial congress a fine, informative address on the subject of communism, and narrated the steps being taken by the Congress of the United States and the Federal executive departments in dealing with this grave menace.

Also, the recent congress at Plymouth adopted as the theme song of the general society the composition, Our Mayflower, of Mrs. Marie Rich Rockwood, well-known composer, of Massachusetts, herself a descendant of Gov. William Bradford, of Plymouth Colony fame.

A unique and interesting feature of the program of the congress was the rendition by Harry B. Sherman, of Rhode Island—impersonating Elder Brewster—of the famous fancied speech ascribed by Daniel Webster, at the Pilgrim Festival in New York in 1950, to the spiritual leader of the Plymouth Colony.

The 20th triennial congress, agreeably to long-established custom, was held in the First Parish Church, at Plymouth—an edifice which may be said to be a lineal descendant—the fifth—of the 1st church of the Pilgrims in the Plymouth Colony, which is considered to have been the first Congregational church in the new world.

Under leave accorded, I am very glad to include as a part of these remarks the indicated address of the elder general.

The address of Elder General Cecil Plumb follows:

This representation of Pilgrims who survived the dreadful winter of 1620 is an attempt to honor the memory of the entire company of those immortals whom we hail today. Their endeavors to serve God had large influence in shaping the frame and substance of the America we love. History should make sharper distinction between the fairly tolerant Pilgrim and his more self-righteous Puritan brother.

The object of their pilgrimage was to build a better material living in order to glorify God, preserve ideals, and propagate the redemptive Gospel of Jesus Christ. It was their share of performance in what they regarded as the whole duty of humanity to glorify God and enjoy Him forever. They who earlier had covenanted in a spiritual society to seek God's will and to obey it so far as they saw it, arriving at these ungoverned shores compacted to also form a political society. Through it they planned to choose officers with responsibility to promote the common good. This compact was the earliest written document of constitutional government known to the world. It was an important factor in the establishment of the United States of America, the world's earliest national example of government by and for the people.

Pilgrims departing from Plymouth, England, received a letter from their beloved pastor, John Robinson, in Holland. His advice was most practical. Because of their plan for a civil community, he said, they would find certain things necessary which he urged they never neglect. These were, first, brotherly forbearance; second, placement of the general good above personal advantage; and, third, choosing officers who love and promote the general good, yielding them honor and obedience.

The loftiness of their ideal, the completeness of their investment, the persevering devotion to their calling, the penalty of their sacrifice, the success of their enterprise, the present challenge of its dream is unmatched in the traditional or written annals of mankind.

Our world today is in a sorry state. But we face no greater evil, we have no lesser God, than they knew. Each generation must redeem its liberty, make its own pilgrimage. No discouragement is ours that was not theirs. No resource was theirs that is not ours. Need we be reminded that many times the fortunes of this Plymouth were as like to ebb away as the waves of yonder tide? Here is Bradford's estimate of the considered judgment of his fellows: "The dangers were many, but not desperate; the difficulties were many, but not invincible—all of them through the help of God, by fortitude and patience, might either be borne or overcome."

What a place is this for enlistment of modern Pilgrims. What a time is this for the practice of a Pilgrim's progress in godly faith. Shall we not this day join ourselves to these people of the past whose faith, labors, and memory have enshrined this Plymouth in the hearts of America and the hopes of the world? Shall we not this day join ourselves in spirit with all people who love truth, seek virtue, treasure liberty, and in lowliness of spirit are willing to be led and taught by God their Maker?

This is not a world of chance. This should not be a day of darkness or despair. Men and women who receive God are not vicitims of circumstances, but children of providence. The righteousness of God is revealed from faith to faith, from generation to generation. The just shall live by faith.

Warning on Geology of Huge Upper Colorado River Dam—Rainbow Bridge Periled

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, February 14, 1955

Mr. HOSMER. Mr. Speaker, on January 31, under title of "Plans for Huge Upper Colorado Dam Uncertain, Says Secretary McKay," I revealed in this RECORD the contents of a letter written November 30, 1954, by Secretary of the Interior Douglas McKay to David R. Brower, executive secretary of the Sierra Club. The letter concerned the geology of the site of the proposed $21 million gigantic power dam at Glen Canyon, Ariz.

I explained that this dam would be the key structure depended upon to raise power revenues to pay for a substantial portion of the cost of the multi-billion-dollar upper Colorado River project, H. R. 270, now before Congress. I quote a portion of Secretary McKay's letter with respect to this geology as follows:

The poorly cemented and relatively weak condition of the materials in comparison with the foundations common to most high dams has given the engineers who prepared the preliminary designs of the dam some concern as to the competency of the foundation to support any structure higher than 700 feet.

As a direct result of those remarks, I have just received a communication from Joseph Jensen, chairman of the board of directors of the Metropolitan Water District of Southern California, who is himself a trained geologist, born and educated in Utah, and personally familiar with the location. This communication points out that not only is the site on which the dam is proposed questionable, but that the area behind it, which is supposed to provide a reservoir, may be little

more than a sieve. In short the whole project might turn out to be as useless as a waterpail without a bottom.

Mr. Jensen informs me that the rock in Glen Canyon are essentially sandstone. They have been drained of all underground water to the level of the Colorado River.

As a result they are dry. They do not contain underground water which would prevent the migration of stored water from the reservoir. It follows that when the reservoir is being filled, the water will seep out into these parched sandstones for miles. The seepage will be limited only by the dip of the sandstone formation and the effect of the pressure of the head of water which accumulates behind the dam.

No one can tell how long it would take to fill the porous sandstones nor how many millions of acre-feet of water might be thus consumed before any water could again flow down the river.

The reservoir might never be filled, nor usable for major power development. The country might be stuck with the most enormous white elephant in history.

Any dam that is built in the canyon would extend only a short distance into the canyon walls. Therefore, the water migrating out into the sandstone from the reservoir will create an underground body of water vastly more extensive than the reservoir itself, which is calculated to store 26 million acre-feet of water, twice the average annual flow of the Colorado River at Glen Canyon. It is apparent that eventually, as these sandstones become filled with the vast volume of water, it will migrate around the ends of the dam and thus render it wholly or at least partially ineffective for power purposes.

Although Secretary McKay's letter promised more intensive studies will be made of the foundation conditions after congressional authorization of the project, suppose this more intensive study discloses that no power dam should be built? How then will Congress explain to itself the appropriation of large sums of money for uneconomic projects for which there will be no pay-out from Glen Canyon power?

Further, although the Secretary was quoted in my prior remarks as stating that "appropriate changes will be made in the designs"—of the dam—"prior to construction" if further geological studies warrant, no modifications in the dam or its height can cure the fact that a reservoir built entirely on porous sandstone rock will not hold water.

Certainly this Congress will be well advised not to authorize or appropriate any expenditure on the Upper Colorado project until the safety and certainty of building a dam in Glen Canyon has been fully determined.

The best way of having this determined is to have a committee of three of the best experts in the United States on dam construction, two of whom would be men who have successfully built concrete dams, and the third should be a geologist of national standing and reputation familiar with the texture and character of rocks.

This is precisely what was done before the dam site for Hoover Dam was chosen. Only after three of the best engineers in the country approved the dam site, was that construction authorized.

This committee of experts also should determine whether or not any steps proposed to protect Rainbow Bridge National Monument from waters of the proposed Glen Canyon Reservoir by a barrier dam would provide adequate protection.

There is more than a suspicion that this barrier dam also would be built on nothing other than porous sandstone. Just as the water would seep around the Glen Canyon Dam, so would it seep around the ends of the barrier dam. If the elevation of water in the reservoir is as high as that of Rainbow Bridge, then the water would encroach to the bridge itself. All of these natural bridges owe their lives to the dry climate of the area. Moisture and water in any quantity would be fatal to their future life.

What Nonfarmers Should Know About the Farm Program

EXTENSION OF REMARKS
OF
HON. CLIFFORD R. HOPE
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 1955

Mr. HOPE. Mr. Speaker, under leave to extend my remarks in the RECORD, I submit herewith a copy of an article which I wrote for the magazine Successful Farming and which appeared in the February 1955 issue of that publication:

WHAT NONFARMERS SHOULD KNOW ABOUT THE FARM PROGRAM

The title of this article assumes that nonfarmers are not well informed about the problems of farmers and the various Government programs which deal with those problems. I believe this is a valid assumption.

This is a situation of comparatively recent origin. As late as 1910, a third of our population was directly engaged in agriculture. Many more lived in small rural communities. Under these circumstances, most of our people had a pretty good idea of farming and its problems.

But now, less than 14 percent of our people are farmers. Furthermore, farming itself has changed so much that people who were born and grew up on farms even a few years ago know nothing of modern farming problems.

I am convinced that today perhaps 75 percent of our people have little or no understanding of agriculture as an industry. And worse than that, 50 percent or more have a poor opinion of farmers—to state it in the mildest terms.

Aside from the fact that we don't want people thinking badly of farmers without justification, there is a most important reason at this time why city people should understand farmers and their problems. That is because, like every other industry, agriculture is affected by Government policies more than ever before.

This applies not only to policies dealing with prices but to such questions as export markets, credit policies, conservation, rural electrification and telephones, and research and education programs. And with less than 14 percent of our people on farms, it is obvious that Government policies which fit the needs of agriculture must receive the support of other segments of our population.

I would like to suggest some things which I think you should tell your nonfarmer friends about farming.

What should we tell them? Frankly, the only thing we need to tell them is the truth—the plain, simple truth—about what farmers are up against in these times.

While it isn't the most important point, the first thing that ought to be told is that farmers as a class are not getting rich.

Then there are people who feel that farm prices and food prices are too high and criticize farmers for that reason. These people are obviously mistaken, because no one who has made a fair study of farm prices or food prices can complain that they are out of line with the prices of other commodities.

First, it ought to be pointed out that as far as food prices are concerned, the farmer now gets only 43 percent of the consumer's dollar. The other 57 percent goes for processing, transportation, and distribution costs.

Furthermore, in the case of many commodities, there is little connection between farm prices and prices which consumers pay. In a loaf of bread selling at from 17 to 20 cents, there is 2¾ cents worth of wheat. A cotton shirt selling for $3.95 and up contains about 30 cents worth of cotton.

A study made by the House Committee on Agriculture last July showed that while farm prices had fallen 19 percent since 1951, retail food prices remained right at the postwar peak.

Then there are people who tell me they think farm programs have worked to the disadvantage of consumers. Figures don't bear this out either.

Our first price-support program began in 1929, and if these charges were true, it would mean that consumers were worse off now than they were at that time. Yet the figures prepared by the Department of Agriculture show just the opposite.

In 1929 the average factory worker could buy 6.4 pounds of bread with an hour's earnings. Today these earnings will buy 10.3 pounds. For an hour's wages he could buy 1 pound of butter in 1929 and 2.6 pounds today; 3.9 quarts of milk in 1929 and 7.9 quarts today; 17.4 pounds of potatoes in 1929 and around 30 pounds today; 1.2 pounds of round steak in 1929 and 2 pounds today, and so on.

In other words, consumers have gotten real reductions in food prices during the time price supports have been in effect.

Another complaint which keeps popping up is that agriculture is being subsidized in vast amounts by the Federal Government and to a greater extent than other industries. It is true that agriculture has received subsidies. But I think we should point out to our friends in the cities that subsidies began when our Government was first set up in 1789—and that only in fairly recent years have they been used to any appreciable extent to protect agriculture.

The first Congress set up a subsidy to encourage the development of an American merchant fleet. Since that time many billions in subsidies—both direct and indirect—have gone to business and industry, as well as to labor and consumers. Among other things, these subsidies covered portions of the postal deficit, aids to the shipping industry, various aids to air navigation, flood control, electric-power projects, housing construction, unemployment insurance, public-assistance grants, and many others, including indirect subsidies like tariffs.

The House Appropriations Committee in 1954 published figures indicating subsidies amounting to about $45 billion were paid to business and consumers since World War II. It is fair to say that a part of this was

in business reconversion payments following the war, but nevertheless, it was a subsidy.

As compared with this $45 billion of subsidies to business and consumers, farm-price supports and surplus removal, operations for the 20 years up through 1953 cost only $3½ billion, or 1 percent of the value of crops and livestock marketed.

In order to fairly inform our urban friends of the problems of agriculture and the need for remedial measures, we must point out the tremendous changes that have taken place in farming in recent years.

There was a time when farmers were very largely self-sufficient; and under those circumstances, the prices received for commodities were not particularly important. Today this situation is entirely changed. In 1953 the total assets of agriculture in this country totaled almost exactly the same as the total assets of all manufacturing corporations.

Even more significant is the fact that in 1953 the average investment per agricultural worker was $16,480. That is almost twice as much as the average investment per industrial worker.

Today even the small farmer must make a heavy investment in land and equipment, and in addition requires a large amount of working capital to pay for fuel, fertilizer, labor, insurance, taxes, and other expenses which must be paid in cash. These expenses are constant, and there is little the farmer can do to reduce them. If he is to meet them, he must have a dependable cash income.

But consider the risks that the farmer must take in getting this income. Drought and floods take their toll somewhere each year. He is subject to the ravages of insect pests, and crop and livestock diseases. And when he finally produces a crop, he has nothing to say about the price he will receive for it. If he ships his cattle to Kansas City or Chicago, he takes what the buyers offer. His alternative is to ship them back home again.

Much of the farm legislation of recent years has been for the purpose of adding to the stability of farming. Crop insurance has been tried to partially eliminate the risks of weather and disease. Cooperative marketing has been developed to give farmers more to say about the price of their products. And price-support programs through Government loans have been set up to bring about more orderly marketing. This prevents farmers from having to dump their crops on the market in such quantities as to depress prices.

And that brings us to the question of surpluses and how they affect prices. "Surplus" is a comparatively new term. We did not hear much about surpluses until after the First World War. But we have always had them—that is, except when we had distress and famine.

In past years, surpluses were in the form of reserves which people kept in their storehouses and cellars. Individual surpluses and reserves now are a thing of the past—but for our own safety and protection we must have on hand more food than can currently be used. And yet these surpluses, so destructive to farmers' prices when we do not have farm programs are simply the reserve people used to have in their cellars.

It doesn't seem right that when this surplus is for the protection of all of our people, the farmer should have to bear the whole expense and loss of carrying it. And yet that is our situation when we do not have farm programs.

Nonfarmers also ought to be told that the fact that less than 14 percent of our people can furnish the food and fiber required for all the rest of us is the principal reason why we have what we refer to as our American way of life and high standards of living.

The energies of the other 86 percent of our people can be released to build our automobiles, radios and television sets, our great highway systems, to maintain our educational facilities and our progress in the arts and sciences, as well as our churches and cultural institutions. In some countries it takes 80 to 85 percent of the people to produce enough food for themselves and the remaining 15 or 20 percent.

Certainly one of the greatest problems confronting the country today is the conservation of our soil and water. That is a responsibility that is very largely in the farmer's hands—and yet there is no way on earth the farmer can carry it out unless he, as a businessman, has sufficient income to do like other businessmen and maintain his plant by conserving and rebuilding the soil.

There is one other point. I don't know that farmers can say very much about it because it would sound too much like bragging. That is that here in this country we have always regarded the family-type farm and the people who live on it as our greatest reservoir of social and moral values. There is no way that we can maintain the family-type farm unless farming is at least profitable enough that people who love the land and want to farm can afford to do so.

These are some of the things that nonfarmers ought to know about farming. You can think of others. But that will not do any good unless in some way we get the story told. I think it is up to the farmer to do it one way or another. Perhaps the big part of the work will have to be done through organized effort—that is through farm organizations, the agricultural press, or farm-minded commentators over radio and television.

But every farmer and farmer's wife has some opportunity to dispel the fog of misunderstanding and misinformation that exists in such a large measure among so many of our people. In your own interest and the Nation's interest, you ought to make use of that opportunity.

SENATE

TUESDAY, FEBRUARY 15, 1955

The Very Reverend Msgr. John Balkunas, of the American Lithuanian Council, pastor, Church of the Transfiguration, Maspeth, Long Island, N. Y., offered the following prayer:

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

Divine Father, who in holy love hast created and art sustaining us, we invoke Thy gracious blessing upon the Members of the United States Senate. Fill every mind with wisdom and understanding, every heart with love and compassion, and every soul with trust and holy purpose to do Thy will.

We lift to Thee our broken cries; we turn to Thee our waiting eyes. O God, there are sounds on earth and signs in heaven that quicken all hearts with expectation: nations that long have sat in darkness and the shadow of death, turning to the light; peoples that long have worn the yoke of tyranny rising to shake themselves free; murmurs of the masses too long chained in slavery; thoughts that threaten the order of all things and predict the shaking of the foundations of the world.

Stretch forth Thy hand, we pray, and deliver the suffering nations from slavery and tyranny. Grant freedom to Lithuania; joy and peace to her people. May she rightfully be restored to her place in the family of free nations.

Make America, Thy chosen channel of blessings to the persecuted, Thy instrument of peace. May all peoples live with hope and assurance that the light of freedom which burns in America will reach every dark corner of the earth.

O God give us strength for our burdens, wisdom for our responsibilities, and insight for our times. Through Christ our Lord. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Friday, February 11, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its clerks, announced that the House had agreed to a concurrent resolution (H. Con. Res. 83) authorizing the printing of additional copies of the hearings on H. R. 1, the Trade Agreements Extension Act of 1955, in which it requested the concurrence of the Senate.

ENROLLED BILL AND JOINT RESOLUTION SIGNED DURING ADJOURNMENT

Pursuant to the order of the Senate of February 11, 1955,

The PRESIDENT pro tempore, on February 14, 1955, signed the following enrolled bill and joint resolution, which had previously been signed by the Speaker of the House of Representatives:

S. 145. An act to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; and

S. J. Res. 14. Joint resolution extending an invitation to the International Olympic Committee to hold the 1960 Olympic games at Detroit, Mich.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule there will be a morning hour for the presentation of petitions and memorials, the introduction of bills,

and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

REPORT OF COMMISSION ON ORGANIZATION OF THE EXECUTIVE BRANCH OF THE GOVERNMENT

The PRESIDENT pro tempore. The Chair lays before the Senate the report of the Commission on Organization of the Executive Branch of the Government, dealing with personnel and civil service, which, with the accompanying papers, will be referred to the Committee on Post Office and Civil Service.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters which were referred as indicated:

AMENDMENT OF FEDERAL CROP INSURANCE ACT, AS AMENDED

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Federal Crop Insurance Act, as amended (with an accompanying paper); to the Committee on Agriculture and Forestry.

AMENDMENT OF SOIL CONSERVATION AND DOMESTIC ALLOTMENT ACT

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Soil Conservation and Domestic Allotment Act (with an accompanying paper); to the Committee on Agriculture and Forestry.

IMPORTATION INTO THE UNITED STATES OF CERTAIN CATTLE, SHEEP, AND SWINE

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 6 of the act of August 30, 1890, as amended, and section 2 of the act of February 2, 1903, as amended (with an accompanying paper); to the Committee on Agriculture and Forestry.

REPORT ON COOPERATION WITH MEXICO IN CONTROL AND ERADICATION OF FOOT-AND-MOUTH DISEASE

A letter from the Assistant Secretary, Department of Agriculture, transmitting, pursuant to law, a confidential report on the cooperation of the United States with Mexico in the control and eradication of foot-and-mouth disease, for the month of December 1954 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPRODUCTION AND SALE OF CERTAIN OFFICIAL RECORDS

A letter from the Secretary of the Army, transmitting a proposed amendment to a draft of proposed legislation to authorize the Secretary of Defense and the Secretaries of the Army, the Navy, and the Air Force to reproduce and to sell copies of official records of their respective departments, and for other purposes, transmitted to the Senate on January 7, 1955; to the Committee on Armed Services.

LOAN OF SMALL AIRCRAFT CARRIER TO GOVERNMENT OF FRANCE

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to extend the existing authority for the loan of a small aircraft carrier to the Government of France (with an accompanying paper); to the Committee on Armed Services.

REPORT ON CONTRACTS EXECUTED FOR EXPERIMENTAL, DEVELOPMENTAL, OR RESEARCH WORK, UNITED STATES COAST GUARD

A letter from the Commandant, United States Coast Guard, transmitting, pursuant to law, a report on contracts executed, by negotiation, for experimental, developmental, or research work, for the period July 1 through December 31, 1954 (with an accompanying report); to the Committee on Armed Services.

REPORT ON CONTRACTS NEGOTIATED BY NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

A letter from the Executive Secretary, National Advisory Committee for Aeronautics, reporting, pursuant to law, that no contracts were negotiated by that Committee, pursuant to sections 2 (c) (11) and (16) of the Armed Services Procurement Act of 1947, during the 6-month period ended December 31, 1954; to the Committee on Armed Services.

REPORT OF SECURITIES AND EXCHANGE COMMISSION

A letter from the Chairman, Securities and Lxchange Commission, Washington, D. C., transmitting, pursuant to law, a report of that Commission, for the fiscal year ended June 30, 1954 (with an accompanying report); to the Committee on Banking and Currency.

REPORT OF RUBBER PRODUCING FACILITIES DISPOSAL COMMISSION

A letter from the Executive Director, Rubber Producing Facilities Disposal Commission, Washington, D. C., transmitting, pursuant to law, a report of the Federal Facilities Corporation relating to the expenditures for repairs, improvements, or maintenance of Government-owned rubber producing facilities, for the 6-month period ended December 31, 1954 (with an accompanying report); to the Committee on Banking and Currency.

REPORT ON FOREIGN DISPOSITION OF CERTAIN SURPLUS PROPERTY

A letter from the Secretary of Commerce, reporting, pursuant to law, on the foreign surplus property disposed of by the Maritime Administration, Department of Commerce, for the calendar year 1954; to the Committee on Government Operations.

PROPOSED AWARDS OF CONCESSION CONTRACTS

Three letters from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of proposed awards of concession contracts, in Glacier National Park, Mont., the Millerton Lake National Recreation Area, Calif., and the Hot Springs National Park (with accompanying papers); to the Committee on Interior and Insular Affairs.

PROPOSED AWARDS OF CONCESSION PERMITS

Six letters from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of proposed awards of concession permits in Mammoth Cave National Park, Everglades National Park, Fla., Cabrillo National Monument, Kings Mountain National Military Park, S. C., Everglades National Park, Fla., and the Great Smoky Mountains National Park (with accompanying papers); to the Committee on Interior and Insular Affairs.

DISPOSITION OF MINERAL DEPOSITS UNDER MINERAL LEASING ACT FOR ACQUIRED LANDS

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the Mineral Leasing Act for Acquired Lands with respect to the disposal of mineral deposits in which the United States owns a partial or future interest (with an accompanying paper); to the Committee on Interior and Insular Affairs.

CONSERVATION AND UTILIZATION OF WATER RESOURCES OF ALASKA

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize the Secretary of the Interior to investigate and report to the Congress on projects for the conservation, development, and utilization of the water resources of Alaska (with an accompanying paper); to the Committee on Interior and Insular Affairs.

EXTENDING TO GRAZING LESSEES COMPENSATION FOR CERTAIN LOSSES

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to extend to grazing lessees the right of compensation for losses sustained by reason of the use of the public domain or other property for war or national defense purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

ABOLITION OF OLD KASAAN NATIONAL MONUMENT, ALASKA

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to abolish the old Kasaan National Monument, Alaska, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

ESTABLISHMENT, MAINTENANCE, AND OPERATION OF CERTAIN AIDS TO MARITIME NAVIGATION

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to clarify and consolidate the authority to require the establishment, maintenance, and operation of aids to maritime navigation on fixed structures in or over navigable waters of the United States (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

MCFARLAND COCKRILL

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of McFarland Cockrill, and for other purposes (with an accompanying paper); to the Committee on the Judiciary.

CONTINUATION OF PROVISIONS OF TITLE II OF FIRST WAR POWERS ACT, 1941

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend the act of January 12, 1951, as amended, to continue in effect the provisions of title II of the First War Powers Act, 1941 (with an accompanying paper); to the Committee on the Judiciary.

REPORT OF COMMISSIONER OF EDUCATION

A letter from the Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, the fourth annual report of the Commissioner of Education, dated June 30, 1954, relating to the administration of Public Laws 874 and 815 (with an accompanying report); to the Committee on Labor and Public Welfare.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The PRESIDENT pro tempore appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the committee on the part of the Senate.

PETITIONS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of Utah; to the Committee on the Judiciary.

"Senate Joint Resolution 3

"A joint resolution of the 31st Legislature of the State of Utah reaffirming its support of the Bricker amendment and again memorializing the Congress of the United States to propose an amendment to the Constitution of the United States by passing Senate Joint Resolution 1 of the 83d Congress, 1st session, as proposed by Senator BRICKER

"Be it resolved by the Legislature of the State of Utah (both Houses concurring therein):

"Whereas the Legislature of the State of Utah by joint resolution, passed December 14, 1953, memorialized the Congress of the United States to propose an amendment to the Constitution of the United States relating to treaties and known as the Bricker amendment; and

"Whereas the problems requiring such an amendment still exist: Now, therefore, be it

"Resolved, That we do affirm the joint resolution of December 14, 1953, and again petition and memorialize the Congress of the United States to propose an amendment to the Constitution of the United States by passing the following amendment:

" 'ARTICLE —

" 'SECTION 1. A provision of a treaty which conflicts with this Constitution shall not be of any force or effect.

" 'SEC. 2. A treaty shall become effective as internal law in the United States only through legislation which would be valid in the absence of treaty.

" 'SEC. 3. Congress shall have power to regulate all executive and other agreements with any foreign power or international organization. All such agreements shall be subject to the limitations imposed on treaties by this article.

" 'SEC. 4. The Congress shall have power to enforce this article by appropriate legislation.

" 'SEC. 5. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within 7 years from the date of its submission'; be it further

"Resolved, That copies of this resolution be transmitted forthwith to the President of the United States, United States Senate, House of Representatives, and each congressional delegate from the State of Utah."

A concurrent resolution of the Legislature of the State of Georgia; to the Committee on the Judiciary:

"Resolution memorializing Congress to call a convention for the considering of an amendment to the Constitution of the United States relative to the operation of State schools

"Whereas the National Government, through the use of various funds and agencies has greatly encroached, directly and indirectly, upon the operation of the State schools; and

"Whereas the operation of State schools is, and should remain, an exclusive State function; and

"Whereas the continued exercise of various means and methods by the National Government in controlling the operation of State schools tends to encroach upon an exclusive State right: Now, therefore, be it

"Resolved by the General Assembly of Georgia, That the Legislature of the State of Georgia respectfully petition the Congress of the United States to call a convention for the purpose of proposing the following article as an amendment to the Constitution of the United States:

" 'ARTICLE —

" 'SECTION 1. Notwithstanding any provision in this Constitution, nothing shall, in any way, take away from, or in any manner deprive, the right of the several States of the Union to operate their school systems, and to have exclusive and complete power to regulate and to determine the rules and regulations for the conduct and operation of State schools.

" 'SEC. 2. Nothing herein shall prohibit any State from accepting aid in any form from the National Government.

" 'SEC. 3. This amendment shall be effective upon ratification by three-fourths of the several States'; be it further

"Resolved, That the Congress of the United States be, and it hereby is, requested to provide as to the mode of ratification, that said amendment shall be valid to all intents and purposes, as part of the Constitution of the United States, when ratified by the legislatures of three-fourths of the several States; be it further

"Resolved, That a duly attested copy of this resolution be immediately transmitted to the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, and to each Member of the Congress from the State of Georgia.

"MARVIN E. MOATE,
"Speaker of the House.
"JOE BOONE,
"Clerk of the House.
"S. ERNEST VANDIVER,
"President of the Senate.
"GEORGE D. STEWART,
"Secretary of the Senate.

"Approved this 31st day of January 1955.

"S. MARVIN GRIFFIN,
"Governor."

A concurrent resolution of the Legislature of the State of South Carolina; to the Committee on Government Operations:

"Concurrent resolution memorializing the Congress of the United States to make provision to compensate the counties in this State which have lost considerable revenue by the acquisition of title by the Federal Government to large areas of taxable property within the county bounds

"Whereas the Federal Government has acquired title to considerable areas of land in a number of the counties of the State which have heretofore contributed materially by the payment of annual taxes to maintenance of the governments of the counties; and

"Whereas it is considered that it would be just and equitable for the Federal Government to make some provision to compensate the counties annually for the revenue that they have thus lost: Now, therefore, be it

"Resolved by the house of representatives (the senate concurring), That the matters referred to in the preamble of this resolution be called to the attention of the Members of the Congress from this State and that the Congress be memorialized to make provision to adequately compensate the counties in the State for the loss of revenue which they have sustained by reason of the acquisition of title by the Federal Government of large areas of taxable property in their bounds; be it further

"Resolved, That a copy of this resolution be forwarded to each of the Members of the Congress from South Carolina, to the Clerk of the Senate, and the Clerk of the House of Representatives."

A joint resolution of the Legislature of the State of Montana; to the Committee on Finance:

"Senate Joint Memorial 4

"Joint memorial of the Senate and House of Representatives of the State of Montana to the Congress of the United States, to the Honorable JAMES E. MURRAY and MIKE MANSFIELD, United States Senators of Montana, and to the Honorable LEE METCALF and ORVIN B. FJARE, Representatives in Congress from Montana, and to the Secretary of Agriculture of the United States requesting the Sugar Act of 1948 be continued in force and the quota of domestic beet sugar be increased

"Whereas under the Sugar Act of 1948 sugar marketings from domestic areas of the United States and its Territories are limited to 4,444,000 tons of a total present national consumption of 8,200,000 tons; and

"Whereas these fixed quotas established for our own domestic production have no regard for increases in the population; and

"Whereas foreign areas, principally Cuba, have been allotted all of the increase in sugar consumption resulting from population increase or other factors, which consumption requirement as determined by the United States Department of Agriculture increased from 7,200,000 tons for the calendar year 1948 to 8,200,000 tons for the calendar year 1955, and may be expected to continue to increase at a rate of more than 100,000 tons per year; and

"Whereas the domestic producers in Montana and in other States are as a result restricted in their privilege to grow sugar beets and sugarcane as indicated, particularly in the determination of proportionate shares allotted to Montana sugar-beet growers for 1955 crops to a total of only 50,980 acres, which has reduced such acreage permitted to be planted by 8.7 percent from the acreage actually planted during the preceding year of 1954 and has created hardship on the farmers of Montana: Now, therefore, be it

"Resolved by the Senate of the State of Montana (the House of Representatives concurring), That the Sugar Act of 1948 be continued in force, but that the quota of domestic beet sugar be increased to the extent it will have a fair and equitable share of the increased consumption and in the additional sugar required to meet the growth of the Nation and the needs of its people; and be it further

"Resolved, That copies of this memorial be transmitted by the secretary of the State of Montana to the Congress of the United States of America, Senator JAMES E. MURRAY, Senator MIKE MANSFIELD, Congressman LEE METCALF, Congressman ORVIN B. FJARE, and to the Secretary of Agriculture, Washington, D. C.

"GEORGE GOSMAN,
"President of the Senate.
"LEO C. GRAYBILL,
"Speaker of the House.

"Approved February 5, 1955.

"J. HUGO ARONSON,
"Governor."

A resolution of the House of Representatives of the State of Montana; to the Committee on Foreign Relations:

"House memorial to the President of the United States, Dwight D. Eisenhower; to the Congress of the United States; to Senator James E. Murray, Senator Mike Mansfield, Congressman Lee Metcalf, and Congressman Orvin B. Fjare; requesting the amendment of the North Atlantic Treaty Organization (NATO) Status of Forces Treaty

"Whereas the Congress of the United States of America did on July 15, 1953, approve a treaty with foreign governments where members of our armed services are serving; and

"Whereas the said treaty is known as the North Atlantic Treaty Organization (NATO) Status of Forces Treaty, and, among other things, provides that members of our Armed Forces may be tried in the courts of the nation and by the nation where the offense was alleged to have been committed; and

"Whereas, because of said treaty, members of our Armed Forces are subject in many cases to cruel and inhuman treatment; and

"Whereas the United States of America should administer military justice through its proper officials and not permit members of our armed services to be tried by foreign governments; and

"Whereas the said treaty is repugnant to the principles of the United States of America in that it gives foreign governments jurisdiction over the liberty of members of our armed services and is causing unnecessary suffering among members of our armed services, all of which is not in keeping with our American way of life: Now, therefore, be it

"Resolved by the House of Representatives of the State of Montana, That the Congress of the United States of America be respectfully urged and requested to amend and rescind the portion of said North Atlantic Treaty Organization (NATO) Status of Forces Treaty which provides for the trial of members of our Armed Forces by governments other than the United States of America, at the earliest possible moment; and be it further

"Resolved, That a copy of this memorial be transmitted to the secretary of state of Montana; to the President of the United States of America; to the Senate and House of Representatives of the Congress of the United States; to the Honorable JAMES E. MURRAY and the Honorable MIKE MANSFIELD, Senators from Montana; and to the Honorable ORVIN B. FJARE and the Honorable LEE METCALF, Congressmen from Montana; and that they be requested to use all honorable means within their power to bring about the enactment of the necessary legislation.

"LEO C. GRAYBILL,
"Speaker of the House."

A resolution of the House of Representatives of the State of Washington; to the Committee on Foreign Relations:

"House Concurrent Resolution 9

"Whereas His Excellency, Abba Eban, Ambassador of Israel to the United States, will be the honored guest of the State of Washington on his first visit to the Northwest; and

"Whereas the friendship and understanding between America and Israel are cherished by the citizens of the State of Washington and have inspired and strengthened our mutual love of freedom and the Republic; and

"Whereas the Ambassador of Israel, who is also his country's chief delegate to the United Nations, has been given worldwide recognition as an outstanding spokesman for the young Republic of Israel: Now, therefore, be it

"Resolved by the Senate and the House of Representatives of the State of Washington in legislative session assembled, That they hereby extend their cordial greetings to the Ambassador of Israel, His Excellency, Abba Eban, and respectfully request that he address a joint session of the senate and the house of representatives on Thursday, February 24, 1955; and be it hereby further

"Resolved, That copies of this resolution be transmitted to the President of the United States, to the Vice President of the United States, to the Speaker of the House of Representatives of the United States, to each Member of the Washington congressional delegation, to the Secretariat of the United Nations, to the secretary of the Israel delegation to the United Nations, to the President of Israel, and to His Excellency, Abba Eban, the Ambassador of Israel to the United States.

"Adopted by the house February 1, 1955.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Adopted by the senate February 2, 1955.

"EMMETT T. ANDERSON,
"President of the Senate."

A resolution of the House of Representatives of the Territory of Alaska; to the Committee on Interior and Insular Affairs:

"House Memorial 2

"To the Honorable Dwight D. Eisenhower, President of the United States; to the President of the Senate, and the Speaker of the House of Representatives of the Congress of the United States; and to the Honorable Douglas McKay, Secretary of the Interior:

"Your memorialist, the House of Representatives of the Legislature of the Territory of Alaska, in 22d session assembled, respectfully submits that:

"Whereas the development of the public lands in the United States historically has followed quickly after ownership and possession of these lands by the several States; and

"Whereas the Territory of Alaska is ready and able to assume responsibility of using and developing the public lands therein.

"Now, therefore, your memorialist, the Legislature of the Territory of Alaska urges that H. R. 246, now pending before the House of Representatives of the Congress of the United States be passed and approved.

"And your memorialist will ever pray.

"Passed by the house, January 28, 1955.

"WENDELL P. KAY,
"Speaker of the House.

"Attest:

"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House."

A joint resolution of the Legislature of the Territory of Alaska; to the Committee on Interior and Insular Affairs:

"Senate Joint Memorial 2

"To the President of the United States; the Congress of the United States; the Secretary of the Interior; United States Bureau of Mines; Defense Minerals Exploration Administration; and Territorial Delegate to Congress:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d session assembled, respectfully represents that:

"Whereas the mining industry is at a very low ebb in Alaska while it is advancing in Canada and the United States; and

"Whereas the Defense Minerals Exploration Administration program has caused the development of only one mine in Alaska into an economical operation; and

"Whereas there are innumerable deposits of strategic minerals in Alaska; and

"Whereas many of these mineral deposits are of such a size that the tonnage therefrom cannot be economically shipped separately to the States, and the miners cannot survive the lengthy waiting time for payment for their ores; and

"Whereas miners could open and mine these deposits if purchasing points were near at hand where their ore could be exchanged for a substantial partial payment immediately; and

"Whereas the General Services Administration operates ore purchasing depots in the States, but which are too far removed from Alaska to benefit Alaskan miners; and

"Whereas there is an agency ready and willing to perform or assist in performing the sampling and evaluation of such shipments from Alaska for the United States Government, namely the Territorial Department of Mines; and

"Whereas a Federal ore purchasing program in Alaska would give the Federal taxpayers and the United States Government a definite value returned for their money, which at present under the Defense Minerals Exploration Administration in most cases they do not; and

"Whereas the mining economy so much needed in Alaska would be given a definite incentive and boost by such a program.

"Now, therefore, your memorialist, the Legislature of the Territory of Alaska, respectfully urges that a United States ore purchasing program be set up in Alaska whereby a substantial partial payment may be made to producers of small lots of strategic minerals at point of production.

"And your memorialist will ever pray.

"Passed by the senate January 28, 1955.

"JAMES NOLAN,
"President of the Senate.

"Attest:

"KATHERINE T. ALEXANDER,
"Secretary of the Senate.

"Passed by the house February 1, 1955.

"WENDELL P. KAY,
"Speaker of the House.

"Attest:

"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Approved by the Governor February 7, 1955.

"B. FRANK HEINTZLEMAN,
"Governor of Alaska."

A resolution adopted by the board of supervisors, Erie County, Buffalo, N. Y., favoring the enactment of legislation to increase the dependency exemption to $1,200 for income tax purposes; to the Committee on Finance.

A letter, in the nature of a petition, from Usualdo F. Laguitan, Ormoc City, P. I., relating to compensation of certain guerrillas in World War II (with accompanying papers); to the Committee on Armed Services.

A letter from the Administrator, Federal Civil Defense Administration, Battle Creek, Mich., transmitting a copy of an interstate civil defense compact, entered into between the States of Utah and Nevada (with accompanying papers); to the Committee on Armed Services.

Petitions, signed by Thomas F. Callahan and sundry other citizens of the State of New York, favoring the enactment of Senate Joint Resolution 1, relating to the treaty-making power; to the Committee on the Judiciary.

A resolution, adopted by the Long Island General Assembly, fourth degree, Knights of Columbus, Long Island, N. Y., favoring the enactment of Senate Joint Resolution 1, relating to the treatymaking power; to the Committee on the Judiciary.

By Mr. KERR:

A concurrent resolution of the Legislature of the State of Oklahoma; to the Committee on Interior and Insular Affairs:

"House Concurrent Resolution 504

"Concurrent resolution memorializing the Congress of the United States to act promptly and favorably upon the Canton irrigation distribution system

"Whereas the Congress of the United States did approve and provide funds for construction of Canton Reservoir on the North Canadian River at Canton, Okla.; and

"Whereas the reservoir was constructed to include outlet works and sufficient storage for the irrigation of 16,000 acres of land in the Canadian River Valley; and

"Whereas in 1945 the landowners in the valley below Canton Dam did organize and perfect the Canton irrigation district under Oklahoma law, comprising aforesaid 16,000 acres of land, and have continuously urged the Secretary of the Interior to forward to the Congress project plans and specifications

for the necessary distribution system to bring water to the aforesaid lands; and

"Whereas the Secretary of the Interior has, through the Bureau of the Budget, presented to the Congress the Canton project for its consideration and approval: Now, therefore, be it

"Resolved by the House of Representatives of the 25th Legislature of the State of Oklahoma (the honorable Senate concurring therein), That we respectfully request the Congress of the United States of America to consider at the earliest practical date its favorable approval and authorization for construction of the Canton irrigation project's distribution system.

"Adopted by the house of representatives the 19th day of January 1955.

"B. E. HARKEY,
"Speaker of the House of Representatives.

"Adopted by the senate the 24th day of January 1955.

"PINK WILLIAMS,
"President of the Senate."

A concurrent resolution of the Legislature of the State of Oklahoma; to the Committee on Finance:

"Senate Concurrent Resolution 3

"Concurrent resolution declaring that the continued excessive importation of foreign oil and its derivatives is inimical to the well-being of the United States of America and the State of Oklahoma

"Whereas Oklahoma for many years has been a leader in the production of oil and gas and an advocate of the conservation of oil and gas; and

"Whereas the economy of the citizens of the State of Oklahoma is closely allied and dependent upon the production of oil and gas in this State; and

"Whereas by reason of continued high imports of oil and its derivatives into this country from foreign markets, Oklahoma has been forced to reduce its current production much lower than its ability to produce oil within the standards of proper conservation of oil and gas, resulting in great losses in taxes which are used for the benefit of the schools, highways, and general revenues to the State of Oklahoma, and resulting in great losses to the economy of the State of Oklahoma and its citizens; and

"Whereas by reason thereof the incentive to discover new reserves in the State of Oklahoma has been destroyed, which reserves are vital to the defense of this country: Now, therefore, be it

"Resolved by the Senate of the 25th Legislature of the State of Oklahoma (the House of Representatives concurring therein):

"That the continued import of foreign oil and its derivatives into the United States is detrimental to the citizens of the United States; and

"That if the importation of foreign oil and its derivatives is continued, it is the opinion of the Senate and of the House of Representatives of the 25th Legislature of the State of Oklahoma that adequate domestic petroleum reserves, which are vital to the defense of this country, will not be discovered and will not be available for use in this country in a time of emergency; and be it further

"Resolved, That in addition thereto great and serious losses are resulting to the economy of the citizens of the State of Oklahoma by reason of foreign oil and its derivatives supplanting the traditional market of oil and gas that can be produced in the State of Oklahoma under sound conservation practices.

"Adopted by the senate the 1st day of February 1955.

"PINK WILLIAMS,
"President of the Senate.

"Adopted by the house of representatives the 3d day of February 1955.

"B. E. HARKEY,
"Speaker of the House of Representatives."

SUGGESTED INCREASE IN AMOUNT OF INCOME CERTAIN VETERANS MAY EARN—RESOLUTION

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD, a resolution adopted by the Lozar-Mrace-Loushin Post, No. 248, of the American Legion, with regard to the amount of income a single veteran receiving non-service-connected disability pensions may earn.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

ELY, MINN., *February 10, 1955.*

The Honorable HUBERT H. HUMPHREY,
The United States Senate,
Washington, D. C.

DEAR MR. HUMPHREY: The following resolution was adopted at the last meeting of our post of the American Legion:

"Whereas certain veterans are eligible to receive non-service-connected disability pensions; and

"Whereas one of the requirements is that a veteran who otherwise qualifies and who has no dependents, is allowed to have other income up to $1,400 per year in addition to such pension; and

"Whereas the cost of living has gone up considerably during the past years and is still rising: Therefore be it

"Resolved, That the amount which a single veteran without dependents is allowed as income in addition to such disability pension, be increased to $1,800 per year, as this amount would then enable the veteran to live more comfortably and relieve him from the hardships as is now the case under the present income limitations of the Veterans' Administration regulations as set by Congress."

We respectfully request that you do everything within your power to have this limitation on other income raised to $1,800 per year in the case of a veteran without dependents. Our World War I veterans are now coming to the age where they will be laid off their regular jobs because of age and will then be looking for this non-service-connected disability pension, to help with their social security benefits or other pension to care for them the rest of their lives.

Respectfully yours,

RAY HOEFLER,
Adjutant, Lozar-Mrace-Loushin Post, No. 248, the American Legion.

REHABILITATION OF FEDERAL HOG CHOLERA EXPERIMENT STATION, AMES, IOWA—RESOLUTION

Mr. THYE. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Minnesota State Veterinary Medical Society favoring the rehabilitation and expansion of the Federal Hog Cholera Experiment Station near the city of Ames, Iowa.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas our American swine industry represents an animal-husbandry enterprise amounting to over three and a half billion dollars annually; and

Whereas diseases and parasites cause an annual loss amounting to many millions of dollars each year; and

Whereas a great number of these problems traceable to diseases and parasites can only be solved by research: Therefore be it

Resolved, That the Minnesota State Veterinary Medical Society urgently request that the Federal Hog Cholera Experiment Station near the city of Ames, Iowa, be rehabilitated and expanded into a fully equipped and staffed national or regional swine diseases research center and that the Agricultural Research Service of the United States Department of Agriculture exert all possible efforts in attainment of this objective.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. FREAR (for Mr. SPARKMAN), from the Committee on Banking and Currency:

S. J. Res. 42. Joint resolution to amend the National Housing Act, as amended; without amendment (Rept. No. 33).

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on February 14, 1955, he presented to the President of the United States the following enrolled bill and joint resolution:

S. 145. An act to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; and

S. J. Res. 14. Joint resolution extending an invitation to the International Olympic Committee to hold the 1960 Olympic games at Detroit, Mich.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. IVES (for Mr. KENNEDY):

S. 1060. A bill for the relief of Rosina Livia Ferrante; to the Committee on the Judiciary.

(See the remarks of Mr. IVES when he introduced the above bill, which appear under a separate heading.)

By Mr. ELLENDER (for himself and Mr. LONG):

S. 1061. A bill to provide for minimum 1955 State rice acreage allotments; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. ELLENDER when he introduced the above bill, which appear under a separate heading.)

By Mr. SMITH of New Jersey:

S. 1062. A bill for the relief of Renato Noe and Angela Noe; and

S. 1063. A bill for the relief of Masanori Ikebe; to the Committee on the Judiciary.

By Mr. THURMOND (for himself and Mr. JOHNSTON of South Carolina):

S. 1064. A bill to direct the Secretary of Agriculture to release on behalf of the United States conditions in two deeds conveying certain submarginal lands to Clemson Agricultural College of South Carolina so as to permit such college, subject to certain conditions, to sell, lease, or otherwise dispose of such lands; to the Committee on Agriculture and Forestry.

By Mr. KEFAUVER:

S. 1065. A bill for the relief of Colette Marie Brown;

S. 1066. A bill for the relief of Harry B. Girdley;

S. 1067. A bill for the relief of Tibor Horvath; and

S. 1068. A bill for the relief of Mareanthe Baicou; to the Committee on the Judiciary.

By Mr. CHAVEZ:

S. 1069. A bill to amend section 2 of the act of March 2, 1945, pertaining to the Columbia River at Bonneville, Oreg.

(See the remarks of Mr. CHAVEZ when he introduced the above bill, which appear under a separate heading.)

S. 1070. A bill to amend section 5 of the Flood Control Act of August 18, 1941, as amended, pertaining to emergency flood-control work;

S. 1071. A bill to provide for the preparation of plans and specifications for a museum building for the Smithsonian Institution; and

S. 1072. A bill to revise the Federal-aid highway laws of the United States; to the Committee on Public Works.

(See the remarks of Mr. CHAVEZ when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. DIRKSEN (by request):

S. 1073. A bill to limit the acquisition and use by agencies of the Federal Government of equipment for reproducing documents, drawings, papers, etc., on sensitized materials; to the Committee on Rules and Administration.

(See the remarks of Mr. DIRKSEN when he introduced the above bill, which appear under a separate heading.)

S. 1074. A bill for the relief of J. A. Ross & Co.; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 1075. A bill to encourage the improvement and development of marketing facilities for handling perishable agricultural commodities; to the Committee on Agriculture and Forestry.

S. 1076. A bill to assist voluntary nonprofit associations offering prepaid health-service programs to secure necessary facilities and equipment through long-term, interest-bearing loans; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HUMPHREY when he introduced the above bills, which appear under separate headings.)

By Mr. DANIEL (for himself and Mr. JOHNSON of Texas):

S. 1077. A bill to provide for settlement of claims for damages resulting from the disaster which occurred at Texas City, Tex., on April 16 and 17, 1947; to the Committee on the Judiciary.

By Mr. BEALL:

S. 1078. A bill for the relief of Mrs. Nellie White Houck; to the Committee on the Judiciary.

By Mr. AIKEN (by request):

S. 1079. A bill to provide for the sale of certain lands in the national forests; to the Committee on Agriculture and Forestry.

By Mr. HENNINGS:

S. 1080. A bill for the relief of Howard Carl Kaiser; to the Committee on the Judiciary.

By Mr. MONRONEY (for Mr. SMATHERS):

S. 1081. A bill to amend section 401 (e) of the Civil Aeronautics Act, as amended; to the Committee on Interstate and Foreign Commerce.

S. 1082. A bill for the relief of Ramon Notario Boytell; to the Committee on the Judiciary.

By Mr. HICKENLOOPER (for himself and Mr. MARTIN of Iowa):

S. 1083. A bill for the relief of Carroll O. Switzer; to the Committee on the Judiciary.

By Mr. BIBLE:

S. 1084. A bill for the relief of Santiago Landa Arrizabalaga; and

S. 1085. A bill for the relief of Maria de las Nieves Dufurrena; to the Committee on the Judiciary.

By Mr. HRUSKA:

S. 1086. A bill for the relief of Anna Ilona Purins; to the Committee on the Judiciary.

By Mr. HENNINGS (for himself and Mr. KEFAUVER):

S. 1087. A bill to authorize aftercare payments by the Youth Division of the United States Board of Parole; to the Committee on the Judiciary.

S. 1088. A bill to assist the States to return runaway children to their own communities in another State; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HENNINGS when he introduced the above bill, which appear under separate headings.)

By Mr. LEHMAN (for himself, Mr. LANGER, Mr. CLEMENTS, Mr. MAGNUSON, Mr. NEELY, Mr. GREEN, Mr. MURRAY, Mr. PASTORE, Mr. DOUGLAS, Mr. KENNEDY, Mr. HUMPHREY, Mr. MORSE, Mr. HENNINGS, and Mr. NEUBERGER):

S. 1089. A bill to extend to uniformed members of the Armed Forces the same protection against bodily attack as is now granted to personnel of the Coast Guard; to the Committee on the Judiciary.

By Mr. KEFAUVER:

S. 1090. A bill for the relief of Mrs. Jo E. Inglett and Don Ramon Inglett; to the Committee on Labor and Public Welfare.

By Mr. HENNINGS (for himself and Mr. KEFAUVER):

S. J. Res. 44. Joint resolution to give the consent of the Congress to interstate compacts or agreements dealing with the cooperative supervision of juvenile probationers and parolees, the return of runaway juveniles, the return of juvenile delinquent escapees, and for other purposes; to the Committee on the Judiciary.

(See the remarks of Mr. HENNINGS when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. BUTLER:

S. J. Res. 45. Joint resolution proposing an amendment to the Constitution of the United States relating to the composition and jurisdiction of the Supreme Court, and for other purposes; to the Committee on the Judiciary.

ROSINA LIVIA FERRANTE

Mr. IVES. Mr. President, on behalf of the junior Senator from Massachusetts [Mr. KENNEDY], who is unable to be present, I introduce, for appropriate reference, a bill for the relief of Rosina Livia Ferrante.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1060) for the relief of Rosina Livia Ferrante, introduced by Mr. IVES (for Mr. KENNEDY), was received, read twice by its title, and referred to the Committee on the Judiciary.

INCREASED RICE ACREAGE ALLOTMENTS

Mr. ELLENDER. Mr. President, on behalf of myself, and my colleague, the junior Senator from Louisiana [Mr. LONG], I introduce, for appropriate reference, a bill to provide for minimum 1955 State rice acreage allotments. The bill provides that the State rice allotment for any State for the crop year 1955 shall not be less than the 1950 acreage allotment for that State. The bill provides further that any additional acreage required to provide such minimum allotment shall be in addition to the Nation, State, and county allotments for this crop year, and that the additional acreage shall be prorated among the counties of the States on the same basis as their initial 1955 allotments bear to the State total.

Finally, the bill provides that the additional acreage made available by this measure to the States shall be made available to the counties, or parishes, and used by the county committee to provide fair and equitable increases in farm allotments.

Mr. President, the bill seeks only to do what is equitable and right, so far as the historic rice-producing States are concerned. As the Senate well knows, last month American rice producers voted overwhelmingly in favor of controlling production of rice, in return for guaranteed high price supports during the 1955 crop year. As a result, a national allotment of some 1,850,000 acres has been prorated among the rice-producing States. In most States this process of prorating has brought about equitable results. However, in the case of the historic rice-producing States—particularly Louisiana and Arkansas—the results have been in the nature of a hardship.

The law presently provides that in computing State acreage allotments for rice, equal weight shall be given to both historical production and trends in production. This provision was written into the law in order to prevent the working of hardships on States whose total rice production during the base allotment period may have been small, but whose rice industry was still growing. It was not the intent of the Congress to penalize the older, historic rice-producing areas. Let me emphasize that the 50-percent weight given to trends definitely invokes a penalty upon the historic rice-producing areas, even as it seeks to do justice to the newcomers. I do not believe that the Congress wishes to, nor that it should, impose an unreasonable hardship on any agricultural area of the Nation in allocating acreage to be planted to any controlled crop. In the case of Louisiana, rice production has remained at a relatively stable level since the 1920's. In the period 1928–32 Louisiana rice producers harvested an average of approximately 465,000 acres; by 1952, this had increased to only a little more than 588,000 acres. Incidentally, the 1952 figure of 588,000 harvested acres is precisely the same as the 10-year average for the period 1941–50. In 1953, about 613,000 acres were planted to rice. A similar situation obtains in Arkansas and in the other historic rice-producing areas, though not to the same extent.

In other words, Mr. President, Louisiana and the other historic rice-producing States receive only half as much consideration as do the newer areas, since, for all practical purposes, our acreage allotments are determined on the basis of history alone. Since the saturation point on plantings has been reached, the trend-factor carries but little weight in the historic rice-producing areas. It is to correct this inequitable situation that my colleague [Mr. LONG] and I introduce this bill.

There is one other injustice which our bill seeks to eliminate. In order to fix domestic allotments, it was necessary for the Department of Agriculture to ascertain the acreage actually planted to rice in the rice-producing States. Unfortunately, this planted acreage had not been physically measured since 1950. The only bases the Department of Agriculture had, upon which this production

could be determined, were, first, acreages as reported by the farmers; and, second, a survey acreage which was determined by the Department of Agriculture on a highly theoretical basis, and subsequently was evaluated on the basis of field surveys conducted in selected areas.

In determining the base acreage of the rice-producing States—that is, the acreage used as the starting point in imposing allotments—the Department of Agriculture did not see fit to accept the estimated production, as submitted by the farmers; nor did it actually measure the planted acres for 1954, at the time when controls for the 1955 crop became necessary. Instead, it accepted the Agricultural Marketing Service estimate, which in effect is an arbitrary and substantial reduction of the acreage figures supplied by our farmers. The basis for the Department's action seems to be that all rice producers of the Nation were guilty of overestimating their plantings. In some cases, Mr. President, acreages may have been overestimated. But I dare say that in the majority, estimated plantings were not too far wrong. The result has been to force an unrealistic allotment upon some farmers who, in good faith, sought to do the right thing by their Government. They are being injured because some of their fellows may have wrongly estimated their plantings.

Of course, Mr. President, at this time it is too late to require a physical measurement of rice acreage; it is too late to attempt to reapportion State allotments. We are faced by a fait accompli; but it is one which can be remedied, at least in part, by the simple expedient made available by the bill my colleague [Mr. LONG] and I have introduced today.

I must emphasize that the total acreage which our bill would add to the national quota is inconsequential when weighed against the hardship its nonenactment would cause and the inequities which would be worked if we were to fail to act. This is not a special-privilege bill. It is not designed to circumvent the acreage allotments proclaimed and approved by the recent farmer referendum. This measure seeks to do only justice to farmers who did not overestimate their plantings, but who had them arbitrarily reduced by the Department of Agriculture; our bill seeks to do only equity to the States which are historic rice producers—the States whose fields have been yielding rice since the turn of the century.

I ask unanimous consent that the bill which I have introduced be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, will be printed in the RECORD.

The bill (S. 1061) to provide for minimum 1955 State rice acreage allotments, introduced by Mr. ELLENDER (for himself and Mr. LONG), was received, read twice by its title, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That section 353 of the Agricultural Adjustment Act of 1938, as amended, be amended by adding a new paragraph (3) to subsection (c) thereof, reading as follows:

"(3) No State acreage allotment for 1955 shall be smaller than the 1950 acreage allotment for such State. Any additional acreage required to provide such minimum allotment shall be in addition to the national, State, and county allotments of rice for 1955 and shall be prorated among the counties in such State on the basis of their respective shares of the State acreage allotment computed without regard to this paragraph. The additional acreage made avilable to counties under this paragraph shall be used by the county committee to provide fair and equitable increases in farm allotments on the basis of such of the factors set forth in subsection (b) hereof as the county committee deems appropriate."

AMENDMENT OF ACT OF MARCH 2, 1945, RELATING TO COLUMBIA RIVER, BONNEVILLE, OREG.

Mr. CHAVEZ. Mr. President, on March 2, 1945, Congress passed a law pertaining to the Columbia River at Bonneville, Oreg. The law authorizes an appropriation of $50,000 for the benefit of the Indians who lost their fishing rights in that area. It is now deemed proper that the law be amended so as to raise the authorization to $185,000. I introduce, for appropriate reference, a bill to accomplish that purpose.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1069) to amend section 2 of the act of March 2, 1945, pertaining to the Columbia River at Bonneville, Oreg., introduced by Mr. CHAVEZ, was received, read twice by its title, and referred to the Committee on Public Works.

THE FEDERAL-AID HIGHWAY ACT

Mr. CHAVEZ. Mr. President, recently we have been hearing a great many comments on the subject of the highways of the United States. So much has been said on the subject that the Committee on Public Works feels it would be proper and helpful to enact legislation to codify the Federal highway laws of the United States. I therefore introduce, for appropriate reference, a bill which would bring about that result.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1072) to revise the Federal-aid highway laws of the United States, introduced by Mr. CHAVEZ, was received, read twice by its title, and referred to the Committee on Public Works.

LIMIT OF REPRODUCTION OF CERTAIN PAPERS ON SENSITIZED MATERIALS

Mr. DIRKSEN. Mr. President, by request, I introduce, for appropriate reference, a bill to limit the acquisition and use by agencies of the Federal Government of equipment for reproducing documents, drawings, papers, and so forth, on sensitized materials. I ask unanimous consent that a statement, prepared by me, in explanation of the bill be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 1073) to limit the acquisition and use by agencies of the Federal Government of equipment for reproducing documents, drawings, papers, and so forth, on sensitized materials, introduced by Mr. DIRKSEN (by request), was received, read twice by its title, and referred to the Committee on Rules and Administration.

The statement presented by Mr. DIRKSEN is as follows:

STATEMENT BY SENATOR DIRKSEN

I am introducing today legislation which would limit the acquisition and use by agencies of the Federal Government of blueprint and photocopy equipment under all unnecessary circumstances and I sincerely hope that this legislation will receive the careful consideration of my colleagues.

As we know, the private, taxpaying blueprint industry of the Nation does not, individually or collectively, make up one of our largest industries. But it is a vital industry—in the production of a battleship or in the building of a home. It has been an expanding industry, growing in importance year by year. As my colleagues know, the blueprinters and photocopymen in the various communities throughout the land are fine citizens, hard workers, and upstanding, taxpaying, civic-minded individuals. Perhaps many Americans would be surprised to learn of the relatively large investment which the blueprinters and photocopy operators of the Nation, altogether, have in their buildings, equipment, and supplies. I assure you it runs into the tens of millions of dollars.

Yet, as we know is true in so many other fields of activity, Federal competition has become a factor—a worry—to these small businessmen, just as truly as it long has been a worry to businessmen in other fields of endeavor. As the Federal Government has expanded, so has the blueprint and photocopy industry inside the Federal establishment expanded. This growth has been marked particularly in the past decade.

While exact figures are difficult to obtain, according to studies made by the private blueprint and photocopy industry, much of the expensive equipment which Uncle Sam has acquired is not being used economically. When it is used, the actual costs involved in Federal blueprinting and photocopying are not taken into account. It seems that no accurate accounting is made of the space used by the Federal blueprinters and photocopy operators, or of the investment in the machinery, which depreciates just as fast in Federal hands as it does in private hands. Many other cost factors inherent in any production job are overlooked when the cost of Federal blueprinting and photocopying is computed by those in the Government itself.

As a result, private, taxpaying blueprinters in all parts of the country, who are able to do virtually all of the work done by Uncle Sam in this country, except for a small amount in the Department of Justice and in the armed services that must be carried on as a governmental activity, have lost much business that rightfully should be theirs. No one ever has argued that there is a lack of capacity in the private industry to do the job.

The private, taxpaying blueprinters and photocopy operators say frankly that they can do this work for Uncle Sam more cheaply than he can do it for himself, and all the evidence gathered so far indicates that this indeed is the truth. They also point out that Federal competition with their industry, besides being a subsidized competition, is an unfair competition. They can see no

reason why the huge Federal Government should try to compete with a relatively small, private, taxpaying industry such as theirs.

There are thousands of these blueprint and photocopy operators from coast to coast. Their plants dot the countryside, as we all know. They believe that if relations between the huge Federal establishment and private, taxpaying businessmen are to be of the best, there must be constant vigilance by both the Congress and by the executive branch to keep down subsidized competition with private business.

As all of us know, the members of the Cabinet, the President himself, and the Bureau of the Budget are of one accord in wanting to get Uncle Sam out of competition with private, taxpaying businesses in every possible way consistent with the public welfare. Certainly, that is the purpose of the majority of us in the Senate, regardless of our party, although I do believe that the Republicans are more anxious to make headway in this direction than some of our Democratic brethren. There is no reason for Congress to fight the executive branch on this issue, or vice versa. The two branches should vie with each other to see which can work most swiftly toward the goal of getting the Federal Government out of the hair of private, taxpaying businesses at every good opportunity.

I believe that if this bill is enacted, it will go a long way toward helping the Bureau of the Budget to get a better picture of the blueprint and photocopy operations of the Federal Government and to chart a better course for cutting the amount of such work which Uncle Sam has been doing for himself, to the detriment of the taxpayer and of the private, taxpaying blueprint and photocopy industry. If the men who are in charge of the Bureau of the Budget then do their duty—and I believe they will—we will see a diminishing of the work along this line done by the subsidized Federal blueprinters and photocopy plants and an increase in the amount of work given to the private, taxpaying companies in all sections of the Nation.

IMPROVEMENT OF MARKETING FACILITIES

Mr. HUMPHREY. Mr. President, I introduce for appropriate reference, a bill, to be known as the Marketing Facilities Improvement Act, to encourage the improvement and development of marketing facilities for handling perishable agricultural commodities.

This bill is a companion to a measure which will be introduced in the House of Representatives tomorrow by Representative HAROLD COOLEY, of North Carolina, the distinguished chairman of the House Committee on Agriculture. It is an outgrowth of the long interest and study Mr. COOLEY has made into improved terminal marketing facilities with the cooperation of marketing experts in the Department of Agriculture. While it was my intent to help press for action on this constructive measure by introducing it in the Senate simultaneously with the introduction of the companion bill in the House, I am introducing the bill in the Senate today rather than tomorrow only because the Senate will not be in session tomorrow.

My own interest in seeking improved facilities for the marketing of perishable agricultural products has led me to the conclusion that this measure developed after careful study and research by Representative COOLEY is entitled to consideration and action by this Congress.

It is the purpose of this proposed act to facilitate, encourage, and assist municipalities and political subdivisions of States, public agencies, and instrumentalities of one or more States or municipalities, public corporations and boards, and private enterprise in the creation and development of modern and efficient public wholesale markets for the handling of perishable agricultural commodities in areas where such markets are found to be needed, and where Federal assistance is requested and authorized as prescribed in the bill. Our aim is that unnecessary costs and burdens attendant upon the marketing of perishable agricultural commodities, caused by inadequate or obsolete facilities, may be eliminated and that the spread between the amount received by producers and the amount paid by consumers may be reduced. We hope that purpose can be achieved by the use of insured mortgages under a revolving fund created by this bill.

Marketing of perishable agricultural commodities affects the public welfare, and is quite properly a matter of grave national concern.

Vast quantities of fruits, vegetables, and other perishable agricultural commodities shipped from various producing areas located throughout the United States and foreign countries pass through and are handled in public marketing facilities located in large consuming areas, which are, in most instances, inadequate and obsolete. The handling of perishable agricultural commodities in such facilities results in many uneconomic practices, greatly increasing costs and causing undue losses, excessive waste, spoilage and deterioration, which in turn, cause producers to receive prices far below the reasonable value of their products, unduly and arbitrarily enhances costs of operations in such markets, and increases the price of food to consumers.

The prices of all perishable farm commodities are directly affected by the prices made on these public markets, and are adversely affected by the unduly burdensome costs resulting from obsolescent and inadequate facilities. Such antiquated facilities create an undue restraint and unjust burden on interstate commerce, and make it imperative that appropriate measures be taken to free such commerce from such burdens and thereby protect producers and consumers alike against oppressive costs.

Modern facilities would make possible the saving of millions of dollars annually, by removing the cause of many of the unnecessary costs and burdens.

In spite of the great need for improved facilities efforts in the past have failed to bring about a satisfactory solution to the problem. This failure has been due largely to the inability of farmers, dealers, brokers, commission merchants and others, individually or collectively, to obtain through regular financial channels the relatively large amounts of capital necessary for the construction of modern facilities.

As a result, this bill proposes to confer upon the Secretary of Agriculture power to aid in establishing such public marketing facilities for the wholesale handling of fresh fruits and vegetables, poultry, eggs, dairy products, and other perishable agricultural commodities and seafood, as will be conducive to orderly and efficient distribution, increased consumption, and a reduction in the spread between prices paid by consumers and those received by farmers.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1075) to encourage the improvement and development of marketing facilities for handling perishable agricultural commodities, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

ASSISTANCE IN PROVIDING VOLUNTARY HEALTH SERVICES FACILITIES

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, a bill to assist voluntary nonprofit, prepaid health service associations by providing for long-term, interest-bearing loans. This is a bill which should be enacted by the 84th Congress and I intend to press for action on it. It is my hope that the Senate Labor and Public Welfare Committee will hold hearings on the bill shortly and move it to the floor with a favorable report.

It is a matter of real personal satisfaction to me to note, for the information of the Senate, that during the last Congress the then chairman of the House Committee on Interstate and Foreign Commerce, the Honorable CHARLES A. WOLVERTON, introduced a companion bill to accomplish the same objective. I am delighted to be associated with him in this bipartisan move to improve health facilities of the American people.

The constant fear which faces many Americans is how to pay doctor bills. Countless Americans also face the problem in their communities, particularly in rural America, of how to find a doctor even if the means for paying the bills are available.

All over America there have been developing the institutions providing prepaid health services and the group practice of medicine. All over the Nation there are American citizens who have found by experience that, if they pool their potential need for medical care and agree to prepay the cost of such care through a medical fund, they can accomplish in a voluntary group what they cannot accomplish individually.

My own State of Minnesota has been the home of many such prepaid services operated on a group and cooperative basis. I have in recent years discussed the question of medical care with many of my fellow citizens. They tell me that there are two prerequisites for an effective and well-operated voluntary health program. First is the need to establish a modern medical office and laboratory which will induce physicians to locate in the community where the citizens need and desire medical service. Second is the necessity to obtain a community pool of funds, derived from prepayments which will insure adequate income for

the physicians in bad times, as well as in good times.

Modern medicine is complicated. It demands good facilities for the doctor. When such facilities are not available, it is difficult to induce good physicians to come to a community and practice medicine. In a number of the smaller communities and even in a number of the larger ones, adequate medical facilities are simply not available; neither are minimum hospital facilities available to care for minor medical and surgical cases.

On December 18, 1952, the President's Commission on the Health Needs of the Nation reported the results of their intensive study. One of their recommendations was that "Federal loans be made to local organizations desiring to institute prepayment plans associated with group practice, for the purpose of encouraging the establishment of group practice facilities." That is the object of the bills I have introduced since the 81st Congress and of the bill which I introduce again today. I welcome the support of the Commission for my bill.

My bill provides that if a group of people in a community where health facilities are inadequate get together and form a voluntary health-plan organization and are prepared to assume the financial responsibility for working out their own problem, then they may apply for low-interest repayable loans from the Department of Health, Education, and Welfare to enable them to finance the physician's facilities which their community requires.

This is the essence of my bill and is the essence of voluntary association. Its basic aim is to encourage groups of people to take direct responsibility for the solution of their health-care problems. The plan which these people develop must, of course, be sound and gain the approval of the Surgeon General.

The successful operation of this bill would attract doctors to areas where they are needed and would make it easier for the American people to pay their medical bills. It would bring health facilities to American people, just as the principles of cooperative voluntary association brought electricity to rural America.

Voluntary association is the foundation of a democratic society. We are a nation of joiners. Our citizens belong to churches, Rotary clubs, women's organizations, trade unions, junior chambers of commerce, Knights of Columbus, sewing circles—indeed, to many thousands of religious, fraternal, political, and social organizations. This is what creates the democratic spirit in our country. The process of voluntary association is the essence of freedom. A good government is one which stimulates that kind of association.

If freedom and democracy survive the crisis of today, it will, in my judgment, be due primarily to the vigor of the people directing their own efforts through voluntary organizations for the solution of their pressing day-to-day problems. The partnership of government with people acting through voluntary associations is the inspiration of practical democracy.

We can apply this principle as we seek to solve the health needs of the American people.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1076) to assist voluntary nonprofit associations offering prepaid health-service programs to secure necessary facilities and equipment through long-term interest-bearing loans, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

LIMITED TEMPORARY ASSISTANCE TO CERTAIN JUVENILES

Mr. HENNINGS. Mr. President, on behalf of myself and the Senator from Tennessee [Mr. KEFAUVER], I introduce, for appropriate reference, a bill which would authorize the Youth Division of the United States Board of Parole to give limited temporary assistance, when needed, to juveniles and youthful offenders placed on parole from the several Federal institutions involved.

In the course of our work over the past 2 years one of the responsibilities of our subcommittee was to examine Federal programs for the handling of juveniles and young people who violated Federal laws. In conducting our investigation, we became aware of certain conditions which handicap the operation of these programs. At least one of these handicaps is subject to remedial action by the Congress. Specifically, I refer to the total lack of funds available for making small advances which many juveniles and youthful offenders need when leaving one of the Federal institutions. Indeed for the want of very limited financial assistance, it is sometimes necessary for paroles to be delayed, or to accept a second or third best plan for a particular boy or girl as the only possible alternative.

This bill authorizes the Youth Division of the United States Board of Parole to make payments out of the appropriation for "Support of United States Prisoners" in order to give juveniles and youthful offenders financial assistance upon placement from a Federal institution. Payments are restricted to a total of not more than $200 to any one parolee and to the first 90 days of parole supervision.

The sum of money needed for this purpose would be quite small, Mr. President. We estimate that not more than $15,000 would be required each year and we recommend that the Congress authorize the necessary expenditure to meet this vital need.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1087) to authorize aftercare payments by the Youth Division of the United States Board of Parole, introduced by Mr. HENNINGS (for himself and Mr. KEFAUVER), was received, read twice by its title, and referred to the Committee on the Judiciary.

CARE OF JUVENILE DELINQUENTS

Mr. HENNINGS. Mr. President, on behalf of myself and the Senator from Tennessee [Mr. KEFAUVER], I introduce for appropriate reference a bill and a joint resolution dealing with the perplexing and damaging problems confronting and presented by runaway children. These proposals grow out of the extensive explorations of these problems which we have made in the Subcommittee on Juvenile Delinquency.

It requires no expert knowledge to know that a child loose on the roads is a child in serious danger. The runaway child quickly exhausts his meager funds—if he had any to start with—and, hungry and homeless and usually subjected to wrong companions, he is an easy and ready prey to delinquency. Apprehended as destitute or delinquent, thousands of these youngsters are annually thrown into jail where they are exposed to every form of vice and schooling in crime.

I am not talking about a small handful of children. The survey conducted by our subcommittee reveals that at least 200,000 children become runaways each year. More than half of these youngsters go from one State to another, a factor which complicates the problem and makes Federal action imperative.

The aim of society in behalf of the runaway youngster should be to apprehend him and get him back to his own community as quickly as possible, avoiding jail detention or any other injurious practice in the process. Achievement of this aim is presently defeated by two conditions. The first is a lack of ready funds to pay the costs of transportation and care for the runaway. The second is that of the unresolved legal questions arising out of lack of uniform laws and procedures and reciprocal agreements among the States.

In view of the pressing demands for child welfare funds, it is not surprising that a State is reluctant to spend for out-of-State children, money which is badly needed to help and care for their own children who are in need. The fact is that expenditures for handling out-of-State runaways involve substantial sums for many localities. Some communities receiving large numbers of youngsters spend tens of thousands of dollars to render even poor and inadequate services.

The first measure we are introducing is a bill to provide for financial grants to the States for the development of procedures and services designed to get the runaway child back to his community as quickly as possible, and to provide such interim care as will protect his welfare.

In our judgment, however, the Federal Government should not go on ad infinitum paying these costs. Rather, they should be shifted as rapidly as possible to the States where the youngsters live. For this reason, the proposed program has a 10-year time limitation.

For this reason, too, we are introducing a second measure—a joint resolution giving consent to States to enter into compacts providing for the detention and care of children who run away and cross

from one State to another. We believe that as uniform measures, including reimbursement for expenditures, are developed and agreed upon among the States, the Federal Government can withdraw from participation in the program.

The joint resolution also gives consent to the States to enter into compacts providing that a child on probation or parole in one State and moving into another may continue to be given needed supervision by the authorities of the second State. At the present time, children on probation and parole either are refused permission to leave the State or, more frequently, are, for all practical purposes, discharged from probation or parole irrespective of their need for continued guidance and supervision. This resulting lack of supervision permits many boys and girls to drift quickly back into delinquency.

We believe that both the bill and the joint resolution, if enacted, will contribute immeasurably to better protection for that group of our children who are particularly vulnerable to juvenile delinquency.

Mr. President, I ask unanimous consent to have printed in the RECORD brief analyses of both the bill and the joint resolution.

The PRESIDENT pro tempore. The bill and joint resolution will be received and appropriately referred; and, without objection, the analyses will be printed in the RECORD.

The bill and joint resolution, introduced by Mr. HENNINGS (for himself and Mr. KEFAUVER), were received, read twice by their titles, and referred as indicated:

S. 1008. A bill to assist the States to return runaway children to their own communities in another State; to the Committee on Labor and Public Welfare.

The analysis of the bill (S. 1088) presented by Mr. HENNINGS, is as follows:

ANALYSIS OF BILL TO ASSIST STATES TO RETURN RUNAWAY CHILDREN

TITLE I

Authorizes the appropriation of $300,000, to be available until expended, for making payments to States to assist them in (1) surveying their needs for provision to return runaway children to their own communities in another State; (2) studying the adequacy of resources to meet those needs; and (3) developing State plans for programs to return such runaways. The program is to be administered by the Department of Health, Education, and Welfare. To obtain funds, a State must, under section 102, submit an application to the Secretary of Health, Education, and Welfare. Such application must, among other things, designate either the State public-welfare agency or a State agency whose primary functions relate to the welfare of children to carry out the above purposes. Allotments of funds appropriated are to be made on the basis of the ratio of the State's child population to the total child population, except that the minimum allotment for each State is to be no less than $2,000. The State is required to match the Federal funds on a 50–50 basis. Provision is made in section 104 for withholding certification from a State by the Secretary for certain specified reasons and for the right of the State to appeal to the United States District Court of Appeals in the event of such withholding.

TITLE II

This title provides for a 10-year program to assist States to return runaway children under 18 years of age to their communities in another State. The sum of $2 million is authorized to be appropriated for the first year and thereafter for such sums as Congress determines. Allotments are to be made on the same formula as under title I, except that they are to be made annually from the sums appropriated and no minimum sum is specified for each State. A reallotment provision is also included so that sums allotted to States which cannot use them may be reallotted to States with need for such additional funds. Provisions for withholding certifications of the Secretary and for appeal to the United States District Court, similar to those in title I, are also included in this title.

TITLE III

The provisions contained in this title deal with general administration, including appropriations, definitions, and regulations.

S. J. Res. 44. Joint resolution to give the consent of the Congress to interstate compacts or agreements dealing with the cooperative supervision of juvenile probationers and parolees, the return of runaway juveniles, the return of juvenile-delinquent escapees, and for other purposes; to the Committee on the Judiciary.

The analysis of the joint resolution (S. J. Res. 44), presented by Mr. HENNINGS, is as follows:

ANALYSIS OF PROPOSED JOINT RESOLUTION TO GIVE THE CONSENT OF THE CONGRESS TO INTERSTATE COMPACTS OR AGREEMENTS DEALING WITH THE COOPERATIVE SUPERVISION OF JUVENILE PROBATIONERS AND PAROLEES, THE RETURN OF RUNAWAY JUVENILES, THE RETURN OF JUVENILE-DELINQUENT ESCAPEES, AND FOR OTHER PURPOSES

Section I gives consent of the Congress to the several States to enter into compacts to the end that:

1. Juveniles placed on probation or parole by the authorities of one State and moving with the family to another State to be given probation or parole supervision by the authorities of the second State.

2. A child who has run away from one State to another may be returned to his parent, guardian, or agency having custody of such child in such manner as will best safeguard his welfare.

3. A juvenile violating probation or parole while residing in a State agreeing to provide probation or parole supervision for a juvenile from another State to be returned to the sending State.

Such compacts would do much to safeguard the welfare of both runaway juveniles and juveniles who need continuing probation or parole supervision and whose families are leaving the jurisdiction where such supervision may presently be provided.

Section II requires approval of the legislatures of the States entering the compact.

Section III defines "State" to include all States, Territories, and possessions of the United States and the District of Columbia.

PROTECTION OF MEMBERS OF THE ARMED FORCES AGAINST BODILY ATTACK

Mr. LEHMAN. Mr. President, on behalf of myself, the Senator from Kentucky [Mr. CLEMENTS], the Senator from Illinois [Mr. DOUGLAS], the senior Senator from Rhode Island [Mr. GREEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from North Dakota [Mr. LANGER], the Senator from Washington [Mr. MAGNUSON], the senior Senator from Oregon [Mr. MORSE], the Senator from Montana [Mr. MURRAY], the Senator from West Virginia [Mr. NEELY], the junior Senator from Rhode Island [Mr. PASTORE], and the junior Senator from Oregon [Mr. NEUBERGER], I introduce, for appropriate reference, a bill to extend to uniformed members of the Armed Forces the same protection against bodily attack as is now granted to personnel of the Coast Guard.

The bill would extend to members of the Armed Forces the protection of Federal law against unprovoked violence while such personnel are on duty or on account of the performance of their duty. It would amend title 18 of the code, and would give members of all the armed services the same protection that is now accorded to a long list of Federal officers and employees, including members of the Coast Guard.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1089) to extend to uniformed members of the Armed Forces the same protection against bodily attack as is now granted to personnel of the Coast Guard, introduced by Mr. LEHMAN (for himself and other Senators), was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. LEHMAN. I ask unanimous consent that a statement I have prepared in explanation and support of this bill be printed in the RECORD.

I also request that a letter I have received from the Department of the Air Force, outlining the incidents of unprovoked violence against members of the Air Force during the calendar year 1954, be printed in the RECORD.

There being no objection, the statement and letter were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LEHMAN ON INTRODUCTION OF A BILL TO MAKE UNPROVOKED VIOLENCE AGAINST UNIFORMED MEMBERS OF THE ARMED FORCES, WHILE THEY ARE IN DUTY STATUS, A FEDERAL OFFENSE

We have been working on this bill for almost 5 years. I first introduced a similar measure as an amendment to the universal military training bill in the spring of 1951. During the 83d Congress, this identical bill was introduced as S. 703. A similar measure was introduced in 1944, with the active support of the then Secretary of War, Henry L. Stimson. At that time the bill in question was favorably reported out of committee but never acted upon. In its present form this proposal has overcome a number of technical difficulties which arose in regard to earlier versions.

In the past the Department of Defense has formally endorsed this proposal, and I hope that similar endorsement will be forthcoming from the Department at this time.

The simple effect of this bill would be to provide Federal sanctions against unprovoked physical assault on uniformed military personnel if committed while such personnel are engaged in performance of duty or on account of the performance of duty. Persons charged with such assault could be tried in a Federal court.

This bill, if enacted into law, would be especially effective in protecting servicemen belonging to minority groups or who might otherwise be the objects of prejudice in particular localities of our Nation. This law

would make clear that the uniform of our country extends to all its wearers the protection of Federal law in the performance of duty. We already extend such protection to many categories of Federal officers and employees, including members of the Coast Guard. These officers range from marshals and deputy marshals to game wardens and meat inspectors. Certainly we should give our servicemen the same protection we now give food and drug inspectors.

It is common knowledge that in many of our localities where there are large numbers of servicemen in training camps and base installations the police protection which can be provided by the local enforcement officers is very inadequate.

Many local authorities have neither the personnel nor the resources to provide sufficient protection to our servicemen against violence and bodily attack. A military policeman or other military personnel who is on duty to protect servicemen and maintain order must be given adequate legal protection against bodily harm if he, in turn, is to be an effective instrument of law and order. He must be assured that persons assaulting him or other personnel on duty will be promptly apprehended and prosecuted.

The need for this type of legislation seems to me to be increasingly important as we approach the consideration of any modified type of universal military training program or expanded reserve program as recommended by the President.

The evidence over the past few years shows that there is often an increase in incidence of attacks on military personnel in areas where local enforcement is lax in apprehending those who provoke the assault.

I have in mind a small town near a large Army camp where, within the last year or two, a Federal grand jury has accused the entire police force for failing to provide protection for the soldiers on leave in the town, and where unprovoked attacks against military police were frequent. According to press reports, the local police force was involved in importing illegal liquor, protecting prostitutes, and maintaining gambling establishments. The military police were seriously hampered in carrying out their mission in this community, and the final result was the closing of the community to all military personnel.

Such cases are not typical, but a law which would extend the protection of the Federal Government to those officers and men who have been assigned the task of protecting soldiers on leave, seems to us to be only a prerequisite for providing adequate protection to our men and women in the service, regardless of race, creed, color, or national origin.

I have asked the Departments of the Army, Navy, and Air Force to supply me with data for the calendar year 1954 on the number of instances of unprovoked attack against their uniformed personnel. I am including with my remarks the report of the Secretary of the Air Force, and expect to place in the CONGRESSIONAL RECORD the reports from the Department of the Army and the Department of the Navy when they are received.

I should like to point out that this proposal has the support of Senators from all parts of the Nation, and in many of the sponsors' States there are large military installations where the need for this type of legislation constantly arises.

I hope that this year Congress will be able to act swiftly in providing the protection which our military personnel need.

DEPARTMENT OF THE AIR FORCE,
Washington, February 3, 1955.

HON. HERBERT H. LEHMAN,
United States Senate.

DEAR SENATOR LEHMAN: Reference is made to your recent letter concerning unprovoked attacks by civilians against Air Force personnel stationed within the United States.

The attached list includes only those incidents serious enough to arouse public interest, concern, or other reaction. No statistics are maintained on cases which do not cause a reaction to the extent that counteraction by the Air Force is warranted. Incidents that have been invited or precipitated by Air Force personnel have not been included.

Sincerely yours,

HAROLD E. TALBOTT.

Assaults on airmen by civilians, calendar year 1954

Date	Nature of charge	Location	
		Air Force area	Army area
Feb. 22, 1954	Assault with intent to murder (4 airmen attacked by unknown assailant).	10	5th.
Mar. 23, 1954	Assault, airman hospitalized.	1	1st.
Apr. 24, 1954	Murder of technical sergeant.	4	6th.
May 18, 1954	Aggravated assault with deadly weapon.	4	6th.
June 17, 1954	Manslaughter	14	3d.
July 4, 1954	Assault, airman hospitalized.	14	4th.
July 5, 1954	Murder of airman	1	2d.
July 24, 1954	Assault	1	1st.
Aug. 7, 1954	Homicide, airman killed by deputy sheriff.	14	4th.
Aug. 17, 1954	Assault with intent to murder.	14	4th.
Aug. 27, 1954	Robbery with intent to murder.	14	3d.
Sept. 11, 1954	Murder of airman	14	4th.
Oct. 18, 1954	Assault with deadly weapon.	14	3d.
Oct. 24, 1954	do	14	4th.
Nov. 5, 1954	do	14	4th.
Nov. 6, 1954	Assault with deadly weapon (airman shot trying to prevent robbery).	4	6th.
Nov. 17, 1954	Assault and robbery	1	2d.
Dec. 2, 1954	Assault with deadly weapon (4 airmen assaulted by 3 civilians armed with knives. 2 airmen hospitalized.	14	3d.
Dec. 3, 1954	Felonious assault	14	4th.
Dec. 13, 1954	do	14	4th.
Dec. 14, 1954	Assault with deadly weapon.	4	6th.
Dec. 30, 1954	do	14	4th.

Mr. LEHMAN. I expect to receive similar reports from the Department of the Army and the Department of the Navy within the near future. Together with the Air Force report, these reports will indicate the extent of the problem with which this bill attempts to deal.

FEDERAL AID TO SCHOOL CONSTRUCTION — ADDITIONAL COSPONSOR OF BILL

Mr. SMITH of New Jersey. Mr. President, in the absence of the senior Senator from South Dakota [Mr. MUNDT], and at his request, I ask unanimous consent that his name be added as cosponsor of S. 968, a bill to carry out President Eisenhower's program for emergency Federal aid to school construction which was introduced on February 8, 1955.

The PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF PAY READJUSTMENT ACT OF 1942—AMENDMENT

Mr. KEFAUVER submitted an amendment, intended to be proposed by him to the bill (S. 362) to amend the Pay Readjustment Act of 1942, as amended, which was referred to the Committee on Armed Services, and ordered to be printed.

ADJUSTMENT OF SALARIES OF JUDGES OF MUNICIPAL COURT OF APPEALS AND MUNICIPAL COURT OF THE DISTRICT OF COLUMBIA—AMENDMENTS

Mr. KEFAUVER submitted amendments, intended to be proposed by him to the bill (S. 727) to adjust the salaries of judges of the municipal court of appeals for the District of Columbia and the salaries of the judges of the municipal court for the District of Columbia, which were referred to the Committee on the District of Columbia, and ordered to be printed.

ADJUSTMENT OF SALARIES OF MEMBERS OF CONGRESS AND THE JUDICIARY—AMENDMENT

Mr. WILLIAMS. Mr. President, I submit, for appropriate reference, an amendment intended to be proposed by me to the bill (S. 462) to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes. I ask unanimous consent that the amendment may be printed in the RECORD.

There being no objection, the amendment was received, ordered to lie on the table, to be printed, and to be printed in the RECORD, as follows:

On page 9, strike out lines 2 and 3 and insert in lieu thereof the following: "the first day of the first fiscal year—

"(1) following a fiscal year for which the receipts of the Government have exceeded the expenditures of the Government, as determined by the Director of the Bureau of the Budget."

CONDOLENCES OF CONGRESS TO FAMILIES OF OFFICERS AND MEN WHO LOST THEIR LIVES ON THE U. S. S. "BENNINGTON"

Mr. IVES submitted the following concurrent resolution (S. Con. Res. 13), which was referred to the Committee on Armed Services:

Whereas the people of the United States have been inspired by the heroic and gallant action of the officers and crew members of the United States ship *Bennington* in combating the emergency created when such vessel was damaged by explosions on May 26, 1954; and

Whereas witnesses of the tragic incident have given numerous accounts of feats of heroism performed by the officers and crew members of the United States ship *Bennington* in carrying out rescue operations following such explosion; and

Whereas clear thinking, positive leadership, and cooperative spirit prevailed among the officers and crew members of the United States ship *Bennington* during such emergency evidencing the fact that such officers and crew members conducted themselves in keeping with the highest traditions of the United States Navy: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress hereby tenders its condolences to the families of those officers and crew members of the United States ship *Bennington* who lost their lives when such vessel was damaged by explosions on May 26, 1954, and expresses its

appreciation of, and its commendation for, the gallantry and devotion to duty of the officers and crew members of the United States ship *Bennington*.

SEC. 2. The Secretary of the Navy is authorized and directed to transmit a copy of this resolution to the next of kin of each of the deceased, and a copy to each officer and crew member of the United States ship *Bennington* who was serving aboard such vessel on May 26, 1954.

REVISION AND REPRINTING OF ADDITIONAL COPIES OF PAMPHLET ENTITLED "OUR AMERICAN GOVERNMENT"

Mr. DIRKSEN submitted the following concurrent resolution (S. Con. Res. 14), which was referred to the Committee on Rules and Administration:

Resolved by the Senate (the House of Representatives concurring), That the Joint Committee on Printing is hereby authorized and directed to revise, by bringing up to date, the pamphlet entitled "Our American Government," as set out in House Document 465, 79th Congress.

SEC. 2. Such revised pamphlet shall be printed as a Senate document, and there be printed 100,000 additional copies, of which 24,750 copies shall be for the use of the Senate; 66,150 copies for the use of the House of Representatives; 3,100 for the Senate Document Room, and 6,000 for the House Document Room.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. KEFAUVER:

Statement issued by him discussing the action of the Virginia Electric & Power Co. in circulating Dean Clarence Manion's proposal that the TVA be sold.

By Mr. PAYNE:

Statement prepared by him on the 57th anniversary of the sinking of the United States battleship *Maine* in Havana Harbor.

By Mr. MCNAMARA:

Statement prepared by him dealing with unemployment and production.

NOTICE OF HEARING ON NOMINATION OF TREVOR GARDNER TO BE ASSISTANT SECRETARY OF THE AIR FORCE

Mr. STENNIS. Mr. President, on February 8 the junior Senator from Georgia [Mr. RUSSELL], as chairman of the Committee on Armed Services, announced that the committee would hold a public hearing on Thursday, February 17, on the nomination of Mr. Trevor Gardner to be an Assistant Secretary of the Air Force.

Subsequent commitments have made it necessary for the Secretary of the Air Force, Mr. Talbott, to be absent from the city on February 17. The chairman of the committee has therefore agreed to postponement of consideration of Mr. Gardner's nomination until the following week, Thursday, February 24, and has requested that this announcement be made.

PRINTING OF ADDITIONAL COPIES OF HEARINGS ON H. R. 1, RELATING TO THE TRADE AGREEMENTS EXTENSION ACT OF 1955

The PRESIDENT pro tempore laid before the Senate House Concurrent Resolution 83, which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 2,500 additional copies of the hearings on H. R. 1, the Trade Agreements Extension Act of 1955, held by the Committee on Ways and Means for the use of the said committee.

Mr. GREEN. Mr. President, I move that the Senate agree to the concurrent resolution.

Mr. KNOWLAND. Mr. President, this matter was taken up with me by the acting majority leader, the Senator from Kentucky [Mr. CLEMENTS], and by the chairman of the Committee on Rules and Administration, the Senator from Rhode Island [Mr. GREEN]. I have also discussed the subject with the ranking Republican member on that committee, the Senator from Wyoming [Mr. BARRETT]. He has no objection to the resolution being considered at this time. It is a matter of comity between the two Houses of Congress, and the additional copies of the hearings should be made available. Therefore, I have no objection to the concurrent resolution being acted upon now.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Rhode Island [Mr. GREEN].

The motion was agreed to.

THE COMMUNIST PROBLEM

Mr. KNOWLAND. Mr. President, I ask unanimous consent that there be printed in the body of the RECORD, as a part of my remarks, portions of the radio broadcast to be made February 19, 1955, before the World Affairs Council of Northern California, on the topic "Is Peaceful Coexistence Possible?" The broadcast gives the viewpoint of Prof. Robert J. Kerner, director of the Institute of Slavic Studies at the University of California, in Berkeley, Calif.

I might say, Mr. President, I believe Dr. Kerner is one of the outstanding experts on Russian history. More than a year ago he wrote me a memorandum in which he predicted that the service of Mr. Malenkov, as the headman in the Soviet hierarchy, would be limited to a fairly short time. He predicted that Khrushchev would rise to power in the Presidium. Over the years I think his observations on the Soviet Union have been as clear as those of any living person, and his remarks are worthy of the attention of all Members of the Senate on this vital subject.

There being no objection, the broadcast was ordered to be printed in the RECORD, as follows:

IS PEACEFUL COEXISTENCE POSSIBLE?

(Prepared by R. J. Kerner)

(Notes for radio broadcast, February 19, 1955, KGO, World Affairs Council of Northern California on topic "Is Peaceful Coexistence Possible?" Participants: J. H. Adam Watson, Counsellor at the British Embassy in Washington, and Robert J. Kerner, director of the Institute of Slavic Studies and Sather professor of history, University of California, Berkeley.)

1. Is peaceful coexistence possible? On the basis of the Kremlin definition and practice of "peaceful existence," well known to competent students, the answer is "No." According to the Moscow definition of the formula, "peaceful coexistence" is possible only when both sides want it. If, according to Stalin, "one side does not want cooperation, the result will be conflict, war." In other words, if one side does not accept the proposals and terms of the Moscow Presidium or yields enough to satisfy them that they are making progress in their world revolution (Molotov's "our great cause," Malenkov's "invincible cause"), it is lacking in "the desire to cooperate." To put it in still another way, the Kremlin's "peaceful coexistence" means they will coexist with the western powers, until they can subvert them or overrun them militarily. Hence, to cooperate, the western powers must continually retreat, until they have their backs to the wall and until Moscow is ready to fight the third world war, after having previously obtained everything it could by subversion and peaceful coexistence and at last attained such preponderance that it can win that war. The peoples of Poland, Czechoslovakia, Hungary, Bulgaria, Albania, and China, as well as Korea and Indochina, know what "peaceful coexistence" means.

In this cycle of Kremlin foreign policy, begun when Moscow instituted the cold war in the spring of 1945 before the Second World War was ended, the time may come, say in a year, or 2, or 3, when the virile portion of the Western Powers, in desperation and at great disadvantage, will finally stand and fight, while the anemic portion of the Western Powers will seek refuge in neutrality along with the remainder of the still non-Communist world.

2. Under what conditions or terms could there be peaceful coexistence as understood in the West? The answer is also clear. These conditions or terms would presuppose an entirely new Russia which would have to disavow and cease the practice of spreading the world revolution, give up its subversive policies through its controlled 40 to 50 Communist parties all over the world, at least permit really free elections in the satellite countries and give independence to Austria and Germany. Some would go even further and demand that the political monopoly of the Communist Party in the Soviet Empire be abolished and real opposition parties be established.

3. Once any set of conditions or terms is formulated, it is seen that both peaceful coexistence on the Kremlin's terms and peaceful coexistence on the terms of Western democracy are unrealistic and, at best, wishful thinking.

4. Is there a road to durable peace which the Western Powers can take? To this question the answer is still "yes" during the period indicated above—i. e., until Moscow decides upon the final showdown. The formula for this is not only to talk from strength—which among other things means no cutting of the military budget—but a real and effective policy of liberation of the peoples behind the Iron Curtain, standing up to indicate that no other free nation or part of it will be sacrificed to the aggressive world revolutionary policies of Moscow or Peiping. In such a vigorous policy a European Locarno or Asiatic Locarno, as advocated by London is a setback, a retreat. To be free of such an obligation that a Locarno-type pact would impose on their known objectives, Moscow and Peiping resolutely rejected the proposal. Such a policy would also oppose what had been done outside the United Nations at the recent Geneva Conference about Indochina and is now being attempted by Britain, India, and Soviet Russia regarding Formosa. Allies, to remain allies, should not deliver ultimatums to each other. By this

behind-the-scenes activity, they have and will do so. This is in accord with the Kremlin tactic for bringing discord among the allies. No ally should fall for that and still insist it is an ally. East-West trade should be regulated with the objective in mind to slow down Moscow's war preparations.

5. One of the sadest observations among competent students of Soviet Russia is to see statesmen and diplomats still unaware after 37 years that the rise of Soviet Russia is an entirely new phenomenon in international relations because of its world revolutionary objectives which are being attained only in part by the old-fashioned conventional diplomacy but largely and chiefly by unconventional or subversive policies. To ignore the latter is the road to disaster. The chief exponents of Western diplomacy still hang on to conventional diplomacy, and wink at the subversive policies or refuse to bring them into their calculations, out of fear or sheer ignorance.

6. The most recent events in Soviet Russia indicate that Khrushchev is fast becoming its No. 1 man, which in turn means the faction which he heads consisting of Molotov, Voroshilov, Bulganin, and Kaganovich, is definitely forging ahead of Malenkov, Saburov and Pervukhin in the nine-man Presidium of the central committee of the Communist Party and in its reorganization of that committee, as well as the regional and autonomous province committees. The party, under the control of the Khrushchev faction, directs the government which is headed by Malenkov, who was deprived of the prize post of first secretary back in March, 1953. The Khrushchev faction, therefore, at this time is supreme and has ended the honeymoon of the government and the populace regarding consumer's goods promised them after the death of Stalin. The transformation of the peasant from collective farm worker and part-time worker on his tiny farmstead to that of day laborer is on the way, while Soviet leaders have visions of the inability of grain production and animal husbandry to feed the populace. Labor productivity in industry lags, while the party steps up heavy industry and tapers off light industry or consumers goods, all in the rush of preparations for a third world war, if that is deemed necessary.

7. Difficult as it is to chart the course of a vigorous American foreign policy these days, the task confronting the British Foreign Office is much more difficult, if not impossible. In the face of nuclear annihilation in England, it is Sir Anthony Eden's task to make a unified and harmonious policy out of widely divergent interests and motives—out of Britain's internal political setup, Britain's security position in Europe, the divergent interests of the British Commonwealth of Nations, and of the British Empire. How effective and vigorous can such a policy be after all? This in spite of the fact that the British have in the past fought successfully in two world wars. One can scarcely blame them, if their policy vis-a-vis Soviet Russia shows signs of weakness and continuous compromise. In spite of our understanding of these difficulties and the definite change since May, 1953, in this direction instituted by Sir Winston Churchill, American foreign policy can scarcely be expected to weaken down to the level indicated. Rather the reverse should be true, for the United States, regarded as the last great bastion which Moscow must subvert or conquer, is also exposed to nuclear annihilation. The American people will not yield to Communist China's recognition and admission to the United Nations or to any surrender or decisive weakening, however covered up, of Formosa. Such policies will inevitably lead to the loss of all Asia and most of Africa. The failure to achieve the West German rearmament in Europe would expose Western Europe to easy aggression. The 12 German divisions called for under the agreement are, in fact, only a token of the hope and the will of Western Europe to defend itself against Soviet forces many times superior.

Moscow is fully informed on the reasons for Sir Winston's shift of policy in May, 1953. Is it likely to become less aggressive when it knows that British policy is inspired by fear of nuclear attack? Actually the experience has been just the reverse and the "change of attitude" which he anticipated has not materialized. Soviet Russia will soon be in a position to deliver nuclear attacks by airplane and submarine, if it is not in a position to do so now.

Mr. KNOWLAND. Mr. President, I also ask unanimous consent that immediately following the printing of the radio broadcast there may also be printed in the body of the RECORD, as a part of my remarks, a memorandum from the Czech Christian Democratic Movement in Exile, addressed to the administration and the Congress of the United States, pointing out, from the point of view of the Czechs and Slovaks, who ultimately hope to be free of the Communist tyranny, certain views which they have, and expressing the hope that ultimately the people behind the Iron Curtain will be liberated from the oppression under which they now suffer.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

CZECH CHRISTIAN DEMOCRATIC MOVEMENT,
New York, October 28, 1954.

To the Administration and the Congress of the United States of America:

The Czech Christian Democratic Movement in Exile expresses its profound conviction that communism, so long as it exists as a political power, will remain a menace to the liberty and security of the free world. We agree wholeheartedly with the Committee on Communist Aggression of the United States House of Representatives that any policy of containment, appeasement, or coexistence must be rejected. Such a policy denies the duty of the Christian toward all those who are victims of slavery, terror, or criminal aggression. As we have learned from the bitter experience of our own country, the attempt to coexist with communism leads inevitably to the destruction of human freedom.

We look to the United States for leadership in a crusade of freedom-loving peoples to restore freedom throughout the world. Since coexistence is morally and politically impossible, measures of mere defense, however urgent they may be, are the best temporary expedients. The fight for liberation is a matter of common interest: in helping other peoples to regain their fredom, the American people will secure their own.

Behind the smokescreen of coexistence, the Communists are arming for a third world war, which they will unleash as soon as they are confident of victory. The only way to prevent this war is through a dynamic program of liberation which will weaken the Communists' warmaking power. Based on our knowledge of political conditions and public psychology in Central Europe, in the Czech lands in particular, we take the liberty of suggesting the following policies which we consider essential:

1. American radio propaganda, such as the Voice of America and Radio Free Europe, should not limit itself to attacking the particular groups of conspirators now in power in Communist countries. Such propaganda, to have more than superficial effect, must develop a broad campaign against the entire system of Marxian socialism. It must show why communism as well as socialism as an intermediate step to communism destroy human freedom in the spheres of politics, economics, sociology, culture, and religion.

2. Such propaganda should not be entirely negative, but should support positively and actively the free-enterprise system. By presenting simple facts it can be shown that free-enterprise countries such as the United States, Belgium, and West Germany have gone farthest toward a classless society and in affording the workers a high standard of living. Conversely, it can be shown that socialism and communism increase class distinctions, and that the poverty and fear in Communist countries is caused directly by the Socialist order.

3. The total aim of American propaganda should be to intensify the dissatisfaction of the workers behind the Iron Curtain with the Socialist order and to make them want a free-enterprise system. Such propaganda cannot, of course, be carried on by those who are themselves Socialists and collaborators of the Communists.

4. Broadcasts for Czechoslovakia should be divided into three sections: Czech, Slovak, and Sudeten German. These broadcast programs should stress the right of the Slovak nation to self-determination, the right of the Sudeten Germans to return to the Sudetenland, as well as the need for the Czechs, Slovaks, and Sudeten Germans to work out a federal solution for living together.

5. As a first step toward actual liberation, military forces of the free world in Europe should be built up until they are at least capable of withstanding available Soviet forces. This includes German armed forces freed from arbitrary limitations as to quantity and quality of armament, as well as contingents from the nations behind the Iron Curtain. The latter should be organized in terms of nationality without regard to existing states.

6. As the balance of military power in Europe is restored, American and other western propaganda can make its objective increasingly specific. The ultimate objective is to cause the enslaved peoples to revolt against the Communist puppets and their Soviet masters. The events of June 1953 in Eastern Germany and other satellites have shown that the victims of communism are quite ready to do so with even the least hope of success.

7. As the first basic step in any program of liberation, it is necessary to decide how much and what kind of help will be given to the enslaved peoples when they make their bid for freedom. American broadcasts already encourage opposition to the Communist satellite governments, and such opposition is senseless unless it aims at the ultimate overthrow of Bolshevist tyranny. Since Americans are now asking the Czechs and other captive nations to resist Soviet terror, we as Czech exiles, ask the American Government and people: what will you do to help us against the puppet governments and against the Soviets should they intervene to quash a revolt which gives promise of success? American psychological warfare can never be more than superficially effective until this basic question has been answered.

8. At the appropriate time, general strikes should be called against the Bolshevist tyrants. As Lenin pointed out, the general strike is a revolutionary weapon and should be used only for revolutionary ends. Therefore, such a strike should not be called until all factors, including the amount and kind of help to be expected from the West, are such that the enslaved people has a reasonable probability of regaining its freedom.

9. Propaganda to Iron Curtain countries is not made in a vacuum. It is part of total policy, and must be related to a long-term program with a definite objective. Since such programs involve commitments which only Congress can make, it is our belief that

more active congressional participation in the shaping of United States propaganda policy would lend the authority needed for effective appeal to the peoples of Czechoslovakia and other enslaved European countries.

JOSEF KALVODA,
Vice President.

Mr. KNOWLAND. Mr. President, I also ask unanimous consent to have printed in the body of the RECORD, immediately following the memorandum, a declaration on the crisis in the Far East by the executive council of the American Federation of Labor, in which there are pointed out some of the dangers involved in certain of the steps which are being proposed in certain countries of the world, namely, the admission of Communist China into the United Nations, and other acts of appeasement. I ask unanimous consent that the declaration be printed as a part of my remarks.

There being no objection, the declaration was ordered to be printed in the RECORD, as follows:

THE CRISIS IN THE FAR EAST—DECLARATION BY THE EXECUTIVE COUNCIL, AMERICAN FEDERATION OF LABOR

The Moscow-Peiping axis continues its direct and indirect aggression on every front. All efforts of the free world to lessen international tension by appeasing the Communist war lords have only served to whet their appetite for more conquest, intensify their subversive activities, step up their drive against democratic collective-security plans, and resort to new frontal military assaults.

While we indorse President Eisenhower's proposal, approved by the Senate and House, for invigorated defense measures to halt further Moscow-Peiping axis aggression in the Chinese theater of conflict, we strongly warn against any attempt, under cover of pursuing the armistice pattern set in Korea and Indochina, to grant the Russian-imposed Mao Tse-tung terror regime American recognition and to smuggle it into the United Nations. The issue in this theater of strife and combat involves far more than the possession of any particular island. The fate of all Asia, and consequently the fate of the entire world, is at stake here.

If the free peoples should yield piecemeal to the Communist aggressors, if retrenchment and retreat, under the guise of disengagement, be the policy of the democracies, then only catastrophe awaits the free world. If democratic governments will be neutral in the struggle between aggressionist totalitarian slavery and human liberty, they will only weaken the freedom-loving peoples and further the sinister aims of the Moscow-Peiping axis. Then the prospects for national independence, improved conditions of life and labor, and the advancement of human liberty and social justice would, indeed, be very dark.

The hour calls for the highest effort by all freedom-loving peoples to increase their military, economic, and political strength and joint action in order to deter and, if need be, defeat Moscow-Peiping military aggression. In the interest of preserving peace and freedom, the executive council of the A. F. of L., therefore, proposes:

1. Toward a peaceful and democratic conclusion of the Chinese civil war, which has been inspired and organized by Moscow and which has become a source of profound international tension, the U. N. should accept and supervise the execution of the following proposal made by Mao Tse-tung, in his pledge to the Chinese people, in 1937, "to submit to a democratic decision of the whole country the question of whether the Soviet system of society is to be adopted by the whole of China or not."

2. Until such time as the entire Chinese people will have the opportunity to elect freely their own government, the Republic of China should be recognized as the only legitimate government and the Mao Tse-tung dictatorship should be kept out of the U. N. as a foreign-imposed regime convicted of military aggression against the United Nations and guilty of violating the basic principles of international law.

3. Toward deterring further Moscow-Peiping aggression against any territory or people in Asia, our Government should (a) step up its economic and military aid to the Republic of China, Republic of Korea, Thailand, Philippines, South Vietnam, Laos, and Cambodia; (b) enter into a mutual aid pact with every country willing to defend itself against Communist aggression and subversion; (c) strive to strengthen and transform SEATO from a consultative into an effective body for joint action in defense of peace and freedom.

4. Toward saving the Republic of Indonesia from losing its national independence and democratic liberties through Communist infiltration and subversion, our Government should invite President Soekarno and Vice President Hatta to visit our country and seek agreement for preparing joint action to preserve and strengthen the democracy, promote the economic well-being and protect the national freedom of the people of Indonesia.

5. Toward advancing the cause of national independence in Africa and Asia and preventing the extension of neutralism as an aid to Communist imperialism in these areas, our country should actively support the aspirations to national freedom by the peoples of north Africa and should immediately seek to have the U. N. set up a permanent commission charged with the task of promoting the self-determination of the colonial people and setting a definite time limit within which they will attain their complete national sovereignty.

6. Toward the free world discontinuing all economic aid—trade, credits, etc.—to the totalitarian dictatorships now facing serious political and economic difficulties caused by Communist policies and the burdens of huge aggressive military establishments, toward replacing such Iron Curtain markets and toward strengthening the free nations' economy by expanding trade relations among them, stabilizing basic raw material prices, improving productivity and raising the purchasing power of the people—thereby, enlarging the domestic markets and the importing capacities especially of countries like Japan, Korea, Pakistan, India, the Philippines, and the population of southeast Asia—our Government should take the initiative in convoking a free world economic conference to establish a 5-year international consumers' credit and installment buying of $10 billion.

LITHUANIAN INDEPENDENCE DAY

Mr. IVES. Mr. President, tomorrow, February 16, will mark the 37th anniversary of Lithuania's independence. On this noteworthy occasion, I join with my fellow Americans of Lithuanian descent in its observance.

The plight of the people of Lithuania and of her Baltic neighbors, Estonia and Latvia, suffering under the subjugation of the Soviet invaders, is of deep and abiding concern to every American. As Lithuania looks to the free world for help, we in the United States reaffirm our traditional friendship with this gallant country. Our Government remains firm in nonrecognition of the forcible annexation of the Baltic nations by the Soviet Union.

May this independence day bring Lithuania closer to her liberation from Soviet tyranny.

Mr. DIRKSEN. Mr. President, I should like to associate myself with the statement made by the Senator from New York regarding Lithuanian Independence Day. Of the many holidays which are celebrated annually in all countries throughout the world perhaps none are more meaningful, more significant, or evoke more profound human sentiments than the anniversaries of national independence days.

This is because the idea of independence is closely related to, if not synonymous with, certain noble human ideas, the ideas of freedom and liberty. Nations have generally believed that only in complete political independence can they enjoy full freedom and liberty, and for that reason have striven for their independence. Lithuania has been no exception to this rule.

In the past Lithuanians possessed national independence and enjoyed it for centuries, but unfortunately, for more than 100 years prior to World War I their country had been a part of the Russian Empire. One would suppose that in the course of such a long subjection to the Russian Czarist regime these people might have lost their national identity and become submerged in that vast polyglot empire. That might have been the case with some other less steadfast people, but the proud and brave Lithuanians were not the type to abandon their national traditions and their aim of gaining independence.

They reached their goal in 1918 when they proclaimed their independence on February 16 of that year. Unfortunately, they were not allowed to enjoy it for long. At the end of only two decades, early in World War II, independent Lithuania became a casualty of aggression. Throughout the war the Lithuanian people suffered under both the Nazi and Communist tyrannies, but their sufferings did not come to an end after their so-called liberation by the Red army. Instead, their liberators made them prisoners in their homeland by sealing them off from the free world. However, even under such severe curbs as the Communists impose, and even under the almost unbearable conditions they create, the indomitable and undaunted Lithuanian spirit for freedom and independence will certainly survive and win against the tyrants.

On this day, in celebrating the 37th anniversary of Lithuanian independence let us all hope that that victory will soon be within the grasp of all those suffering under Communist tyranny.

Mr. PAYNE. Mr. President, tomorrow, February 16, is the 37th anniversary of the independence of Lithuania. This anniversary focuses our attention on the fact that 3 million Lithuanians continue to suffer under the frightful yoke of Communist domination.

From 1918 to 1940, Lithuania was an honored member of the family of free nations. Great strides were made in its economic development, and the literacy of its people was raised appreciably.

Since the Russians seized Lithuania in 1940, a rigid screen of censorship has concealed developments in that country; but we continually hear rumors of the efforts of the Communists to Russify completely the Lithuanian people. The United States must never be a party to official recognition of the enforced annexation of Lithuania and her neighbors, Latvia and Estonia, by the Soviet Union.

On the 37th anniversary of Lithuania's independence, it is a privilege to join with the 1 million Americans of Lithuanian descent in paying tribute to the valiant Lithuanians behind the Iron Curtain. We all look forward to the day when Lithuania will once again be free and independent.

Mr. SMITH of New Jersey. Mr. President, tomorrow, February 16, marks the 37th anniversary of Lithuania's independence.

I should like to take this opportunity to join with the Lithuanians in this country in tribute to the memory of that brave little country, which for over 20 years served as a model of enlightened and progressive self-government.

Today, the Russians are attempting to plow under the spirit and culture of that country by every ruthless device, including mass extermination and deportation. Thus have the Communists proceeded to demonstrate to the world what they mean by liberation.

Yet the spirit of free Lithuania lives on, both here in America and in the minds of those in the home country who cannot today express their feelings publicly.

Today, as we honor this country and its people, let us once again resolve never to recognize the forced annexation of Lithuania and its neighbors, Latvia and Estonia. With prayerful hopes, we look to the day when the flag of freedom will again be raised over this tragic land.

Mr. LEHMAN. Mr. President, the Senate was privileged today to have the invocation delivered by the Reverend Monsignor John Balkunas, pastor of the Church of the Transfiguration in Maspeth, Long Island, N. Y.

His moving prayer has reminded us all of the valiant history of the Lithuanian people, and has caused us to reaffirm our belief in freedom and liberty for all enslaved peoples.

I should like to call the attention of the Senate to the fact that February 16, in the State of New York, has been proclaimed Lithuanian Independence Day by Gov. Averell Harriman. It was so proclaimed for many years while I was Governor of New York.

Mr. President, I ask unanimous consent that a statement I have prepared, noting the commemoration of Lithuanian Independence Day on February 16, be printed at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LEHMAN

February 16 marks the anniversary of the proclamation of Lithuanian independence in 1918, after 123 years of Russian rule. Along with independence, there was a great resurgence of national culture and political freedom. The new Republic of Lithuania flourished under its new-found freedom until the tragic occupation and enslavement of its people by the Soviet Union in 1940.

We in the United States must give more than mere lipservice to the cause of freedom and liberty for the people of Lithuania. For example, we must continue to work for the liberalization of our immigration and refugee laws to provide a haven in the United States for some of the escapees and refugees from Lithuania.

We must strengthen the Voice of America, so that the voices of freedom will continue to penetrate the Iron Curtain and bring encouragement to the enslaved peoples.

We must press for the ratification of the Genocide Convention, in order to demonstrate to the world our conviction and determination that the destruction of national, racial, or religious groups must be placed beyond the pale of international law and punished accordingly.

Through these, and many other acts of faith in freedom, we in these United States will be fulfilling the eternal principles upon which our Nation was founded, and to whose advancement the American Republic is dedicated. In this way, America will continue to shed its light—the light of freedom—among all the tragically oppressed people whose hearts yearn for the return of independence and a rebirth of liberty.

Mr. MCNAMARA. Mr. President, on Sunday I made a brief address to a gathering of Lithuanian organizations in the city of Detroit, and in the course of my remarks I reminded them that after 123 years of Russian rule, Lithuania was proclaimed an independent kingdom 37 years ago, on February 16, 1918, and later in the same year became a republic.

Because of the tenacity of the Lithuanian people to their cultural and political background, there was a fine flowering of progress in the newly constituted nation. But darkness fell again in 1940, when, the Communists fearing the existence of a free nation at the border of the Soviet Union, Lithuania was occupied by Soviet troops. So fell the three Baltic States, Lithuania, Estonia, and Latvia.

But the desire for freedom and the unfaltering belief that eventually the Red yoke will be thrown off has never departed from Lithuanian hearts. The United States of America has never given the least recognition to Soviet domination of the Lithuanian territory, and we, too, hold in our hearts the hope and the belief that Lithuania will be free again.

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement prepared by me in commemoration of the 37th anniversary of Lithuanian independence.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

As we view the shifts and changes in personalities in the Soviet regime and speculate as to what this means to the nations of the free world, these same developments are anxiously watched by people beyond the Iron Curtain—people subjugated by the Kremlin dictatorship. Their basic question is: Is there hope? Is there a better future dawning?

On this the 37th anniversay of the independence of Lithuania we must ask the people of that fine country to continue in the spirit which they have exhibited in the past, to hope rather than to give up in despair. Contrary to Marxian theory, it is the Communist dictatorship which carries the seeds of its own destruction within it. As our constitutional government stands, firm and secure, as it has stood for 166 years, Communist rulers topple and fall. Their system cannot bear the strain of intrigue and counterintrigue indefinitely. It must ultimately fall and thus bring the dawn of freedom for the people of Lithuania as well as for all other people now suffering under Kremlin rule.

Mr. DOUGLAS. Mr. President, on February 16, 1918, or just 37 years ago, Lithuania became an independent country. She threw off the control of Russia and divided the big estates which had been owned by the Baltic barons into small farms with peasant proprietors. Lithuania thus led the way in the great wave of land reforms which followed World War I. A democratic form of government was established which actually worked for the welfare of the people. Schools were created and by 1940 had reduced the number of illiterates from nearly two-thirds of the population to less than one-sixth. Farm cooperatives not only helped the farmers economically in the dairy and other farm industries, but also improved human relations.

Lithuania, like the rest of her free Baltic neighbors—Latvia, Estonia, and Finland—made rapid economic progress during this period, and the standard of living of her people rose markedly. This was a tribute to her democratic political system, her wide diffusion of property, and the general emphasis upon individual drive and initiative, tempered and sweetened by cooperation and by the welfare activities of government.

In sharp contrast to this, Soviet Russia, with its political terror and its deadening of initiative, failed to improve the standard of living of the Russian people after 1928.

Lithuania, like the other eastern European nations, led a precarious political life between the two powerful police states of Soviet Russia to the east and Nazi Germany to the west. The infamous Hitler-Stalin Pact of August 1939 brought about her conquest. In 1940 Russia moved in, while the Nazis in 1941 and 1942 took over the country. Terror was practiced by both states. Toward the close of the war the Russian armies again occupied Lithuania and once again initiated a reign of terror. Thousands of Lithuanians were executed and hundreds of thousands were deported to Siberia. At the same time an equal number of Russians were settled inside Lithuania and the attempt was made to obliterate the national sentiment of the Lithuanians. All the terrible methods of the modern police state are now being practiced by the Russians.

We have reason to be proud of the past record of our Government in its dealings with Lithuania and the other Baltic democracies. President Roosevelt steadfastly refused to recognize the Communist seizure of these countries. This policy has been continued by President Eisenhower. Last year the Senate adopted a resolution which was sponsored by me and which put the Senate on record as being opposed to any such recognition and reaffirmed our dedication to the cause of a free Lithuania.

Russia is now making efforts to have her conquests recognized. I hope we shall continue to oppose any such recognition and that we may stand fast.

GEN. BREHON BURKE SOMERVELL

Mr. SMITH of New Jersey. Mr. President, it was with genuine sorrow that I read in yesterday's newspapers of the death of my personal friend and a great patriot, Gen. Brehon Somervell.

I first had the privilege of knowing General Somervell over 20 years ago when he, as Major Somervell, became the operating head of the staff of the late Walter D. Hines, with whom I was associated in the practice of law. Mr. Hines was invited by the Turkish Government, headed at that time by the famous Kemal Atatürk, to make an economic survey of Turkey. Our law firm took over the job; and because of General Somervell's effective and vigorous work in settling some of the disputes on the Rhine and the Danube Rivers after World War I, Mr. Hines asked him to go to Turkey to head the investigation on the ground.

Since that time I have had the privilege of knowing General Somervell intimately, and have watched his rapid rise from a major to a four-star general. Aside from my business connection with him, a warm personal friendship grew up between Mrs. Smith and myself and the general's family, to all of whom we were devoted.

General Somervell's service to his country covered a span of more than 30 years. Graduating from West Point sixth in his class in 1914, he served in the Mexican Expedition and then in France during World War I, where he won the Distinguished Service Cross for reconnaissance behind the German lines.

In 1925 he made a study for the League of Nations of navigation on the Rhine and Danube Rivers. As I have stated, in 1933, at the request of the Turkish Government, he was associated with the Hines mission to make an economic survey of that country. Three years later General Somervell was assigned to head the Work Projects Administration in New York; and he did much to improve the efficiency of that organization. La-Guardia Airport and many roads and parks around New York City remain monuments to General Somervell's engineering and administrative talents.

Early in World War II, under the leadership of General Eisenhower, General Somervell organized the supply of the North African invasion. In 1942 he became commanding general of the Services of Supply, later known as the Army Service Forces. His task was to supply our farflung Armies with every item they needed—from men, food and clothing, to airfields and weapons. Altogether, during the war, General Somervell was responsible for the disbursal of $172 billion worth of supplies. Of this gigantic task he is credited with saying:

> The impossible we do at once; the miraculous takes a little longer.

In March 1945 his nomination as a full general was confirmed by the Senate. The following year he retired from the Army, and at the time of his death he was chairman of the board and president of Koppers Co., Inc., of Pittsburgh.

In 1919 he married Anna Purcell. They had three daughters, Mary Anne, Susan, and Constance. In 1941 Mrs. Somervell died. In 1943 General Somervell married Mrs. Louise Hampton Wartman, of Ocala, Fla.

Mrs. Smith joins me in our expression of deep sympathy to Mrs. Somervell and to his daughters.

Mr. President, I ask unanimous consent to have printed at this point in the body of the RECORD, an editorial entitled "Brehon B. Somervell," published in the Washington Post and Times Herald of February 15.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BREHON B. SOMERVELL

Gen. Brehon B. Somervell was one of the ablest officers the United States Army has produced. In World War II, as commander of the Army Service Forces, he had one of the most complex assignments ever given a military man and his execution of it was brilliant. He was tough and impetuous and impatient. He knocked heads together unmercifully. But he performed the impossible. The success of the Allied effort was made possible by America's industrial strength, and General Somervell was the guiding genius mobilizing that strength for the Army. Under his direction more than $170 billion was spent inducting, feeding, clothing, sheltering, and arming more than 8 million men. He organized the supplies for the North Africa invasion and later for the Normandy invasion.

General Somervell did not seek popular acclaim and he made many enemies. Sometimes he seemed to drive too hard or to insist on too much for the Army. But he was responsible for supplying the Army and he thought very little about the effect on civilians or about the sensibilities of civilian administrators; if he sometimes seemed to run roughshod, it was largely because his civilian counterparts lacked the same force of character. He generally had the backing of the White House, which appreciated his driving energy and ability to cut through redtape. From 1936 to 1940 he had been Works Progress Administrator in New York, and thus had come in close contact with Harry L. Hopkins. This relationship proved of immense value to both men during the war—two men who understood in full measure the meaning of total war.

Like General Eisenhower, General Somervell was a West Pointer and a product of the intensive Army training and staff schools. Because he graduated near the top of his West Point class, he became an Army engineer, and this was the proper training for his wartime assignment. The Nation owes a debt to this distinguished soldier. Without him the Army would not have been fully prepared as early as it was for its main task overseas.

Mr. SMITH of New Jersey. Mr. President, I now ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, an editorial also entitled "Gen. Brehon Somervell," which was published in the New York Herald Tribune of February 15.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GEN. BREHON SOMERVELL

To Gen. Brehon Somervell was attributed the famous saying of World War II: "The impossible we do at once, the miraculous takes a little longer." This slogan was applied to the Services of Supply, later known as the Army Service Forces, which General Somervell commanded during the war. In a sense it also fitted the general himself, for he was one of the most remarkable organizers and expediters in military history. He was the man charged with setting up and operating the supply lines for the invasions of North Africa and of Europe, with seeing to it that the Allied armies had the equipment, ranging from food and clothing to barracks and airfields, that were essential to victory. And he performed his tasks with brilliant success.

New Yorkers gained a firsthand acquaintance with General Somervell's abilities long before the war, for in 1936, when he was a lieutenant colonel, he was put in charge of the WPA in New York City. He improved its efficiency and tightened its operations so that it left the city many facilities which still endure, such as La Guardia Airport.

General Somervell's busy career took him to Mexico, France, central Europe, and Turkey, as well as throughout the United States. When this country's Army began to expand in 1940, it was General Somervell who had the responsibility of building its barracks, and afterward there was hardly a major war operation in the European theater that did not depend largely upon his contribution. His life was a dedicated and a supremely useful one, and his passing is mourned by the Nation he served so well.

ISRAEL—AN ADVENTURE OF THE HUMAN SPIRIT

Mr. LEHMAN. Mr. President, on January 11, 1955, His Excellency, Ambassador Abba Eban, Ambassador of Israel, delivered an extraordinary speech at a convocation of the University of Notre Dame at South Bend, Ind.

The speech is a moving expression and exposition of the spirit of Israel and of the motives which led to the establishment of that state.

This speech can be widely read with profit by those who seek to understand the situation in the Middle East.

I ask unanimous consent that the speech be printed in the body of the RECORD at this point in my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ISRAEL—AN ADVENTURE OF THE HUMAN SPIRIT

(Address delivered by Abba Eban, Ambassador of Israel to the United States, at the University of Notre Dame, South Bend, Ind., January 11, 1955)

Four thousand years of history have extended their span between Israel's first ascent to nationhood and her restoration to freedom at the turning point of the century. The redemption from Egyptian bondage must be regarded in any serious conception of history as one of the authentic points of climax in the progress of mankind. In the words of Henry George: "From between the paws of the rock-hewn Sphinx rises the genius of human liberty; and the trumpets of the Exodus throb with the defiant proclamation of the rights of men."

These forceful phrases do not overstate the case. The flight across the Red Sea and Sinai preserved a revolutionary idea, which could never have evolved in the idolatrous despotism of the Pharaohs. The idea was the sovereignty of God, the Ruler of the universe, omnipotent, one and indivisible, the embodiment of righteousness and the loving Father of all creation. From this idea there flowed acceptances and rejections which

came to dominate life amongst the children of man. Recognizing this event as the beginning of their true destiny, the descendants of those fleeing slaves have, in all succeeding ages, commemorated the ancient saga. Our tradition exhorts every Jew to recite the story of the Exodus from Egypt at the appointed season as though he personally had experienced redemption from servitude to freedom.

The narrative of this rebellion against idolatry by men charged with the custody of an irreplaceable idea also occurs in the history of thought in a more secular aspect. This is the original and classic episode of national liberation. The memory of Israel's first struggle for freedom has inspired and consoled many subsequent movements of national independence. When Benjamin Franklin and Thomas Jefferson were consulted on the emblem of the future American Union they suggested that the seal of the United States should represent the children of Israel fleeing across the parted waters of the Red Sea on their way to freedom. This portrayal was to be surmounted by an uncannily Hebraic slogan: "Resistance to tryants is obedience to God."

THE DIMENSIONS OF HISTORY

It is not presumptuous to believe that future generations will conserve the memories of Israel's modern revival with a similar reverence and tenacity. This will certainly come to pass in the particular domain of Jewish history. Nothing since the miraculous redemption 4,000 years ago can compete in that history with this recent transition from martyrdom to sovereignty, this sudden ascent from the depths of agony to new peaks of opportunity and pride. The attainment of Israel's independence 7 years ago is already more than a political or secular event in the Jewish consciousness. The date is bound to be numbered amidst the festivals of a people whose other temporal milestones have endured with rare constancy.

I have come to this abode of Christian faith and learning to suggest that Israel's resurgence is an event to be conceived in the highest dimensions of history. It evokes from the past and may portend for the future a deep lesson concerning the potency and nature of spiritual impulses. The attention which this enterprise has already received in the thought and writing of our age is itself a proof of some special quality within it. It is evident, however, that if Israel's rebirth comes to inherit this eternal renown, it will not be because of the material dimensions which belong to it. There is nothing global, or even massive, about the State of Israel in political terms. The territory in which our independence has been fulfilled is great in history, but pathetically meager in geography. It is the bridge between the three continents of the ancient world. It looks out over the highway across which have marched the fateful migrations and invasions of history's pageant. But in the strategic calculations of this atomic century this piece of earth is of humble measure. The bridge is fragile; the highway is narrow and in the age of air transportation, it no longer obtrudes itself inevitably athwart the paths of conquest and empire.

The population directly affected falls short of 2 million. Even when we portray this event in its true essence, as a collective climax in the history of the entire Jewish people, it still remains true that the direct subjects and objects of Israel's revival are but a small fraction of the total human family. Clearly, if modern Israel is to be regarded as a historic incident of universal scope, this is because of a stature to be ascribed to it in a completely different dimension. If modern Israel is to have any elements of greatness then this quality must be vindicated in the spiritual realm.

THE RECORD OF ACHIEVEMENT

To say this is not to deny that some of Israel's material achievements are impressive and sometimes deeply moving. The collective survival of the Jewish people is itself a rare event of history. Many other peoples have lost their independence under the heel of invading empires; but no people, other than this, having been so engulfed has shown such a capacity for recuperation as to preserve amid martyrdom and dispersion, all the elements of its union and identity—its language and tradition, its consciousness of attachment to the land of its origin, and the undying hope of eventual restoration. For long centuries this people, whithersoever it wandered, continued to regard its inner life as rooted in a distant land which few could ever hope to see with their own eyes. This connection, which for so many generations was an act of mystic faith, became transformed, against all material calculations, into one of the political realities of our age. The banner of a free Israel now flies proudly again in the family of nations from which it had been absent for so many tragic generations.

There is something here to arrest the attention of those who study history in terms of national politics and international relations. Nor are these the only achievements which may be accounted remarkable in secular terms. There is the pioneering toil and sacrifice which have transformed the wilderness to a semblance of its ancient fertility. There is the epic of mass immigration which has brought hundreds of thousands of returning newcomers to our shores. There are great efforts, and at times, serious results, in the increase of industrial and agricultural resources. There is the formation of a new culture, welding many varied immigrant traditions, tongues, and experiences into the unified tapestry of a distinctive civilization, in the image of the ancient Hebrew past. There is the struggle against the ravages of pestilence and erosion which had debased the physical aspect of the land and degraded its historic reputation as "the perfection of beauty, the joy of the entire earth." There is the adventure of establishing within a region dominated by despotism and autocracy a sanctuary for the democratic way of life and the principles of free government. There are advances in literature, the sciences, and arts, which without yet reaching the peaks of the ancient revelation, are yet significant and promising in relation to the circumstances of time and of space in which they have been accomplished. Nor can we omit from the positive record of Israel's achievement the turbulent struggle for physical security of a small people besieged on all its embattled frontiers by an unyielding and comprehensive hostility. To have achieved so large a volume of international recognition within so brief a time and against such heavy challenge is not the least surprising of Israel's modern victories.

THE POWER OF WILL

If despite all this, we concentrate our gaze upon the spiritual aspects of Israel's achievement and destiny, it is not because we renounce our claim to sympathetic appraisal in political, economic, social, or even military history. But when all is said and done, there have been greater battles, more far-reaching economic upheavals, vaster irrigation projects, broader revolutions of physical power than those which we have recorded, memorable as they are for us. Moreover, even these achievements by Israel, while being political, economic, or social in their outward aspect, are primarily significant as illustrations of spiritual forces. They are spectacular testimony to the power of the human will. Rarely in history has any achievement been recorded against heavier calculations of chance. All the circumstances of time and of place argued against its success. A few decades ago the prospect that an independent Jewish state could be established in its ancient homeland appeared so fantastic, as to bring its advocates under the suspicion of insanity. Statesmen and diplomats to whom the idea was broached in the early years of the First World War were startled at hearing so eccentric an idea even submitted to their official attention. A British Ambassador in Paris to whom our first president, Dr. Weizmann, summarized this project in 1915 reported to London that he had encountered a remarkable contradiction—a man of eminent scientific attainments with a keen power of rational analysis who on this particular issue appeared to have gone completely off his head. Back in London, Prime Minister Asquith expressed surprise that one of his cabinet colleagues of Jewish faith, normally regarded as a man of excessive rationalism, was afflicted with delirium on this special point.

Today, with the third Jewish commonwealth in tangible existence, it is the skeptics and the rationalists who seem incongruous to our eyes. Yet their skepticism seemed then to rest on strong foundations. After all, the Jewish people was dispersed and divided, split up into countless divergent fragments, lacking any element of distinctive political unity. The greater part of them dwelt thousands of miles away from the prospective scene of their national revival. The land itself appeared to be sucked dry of all its pristine vitality and to offer no prospect of successful resettlement. Moreover, it was neither empty nor available. It was controlled by some nationalisms and imperialisms and coveted by others, all of which had a far stronger chance of acquiring it than a dispersed and politically anonymous people. The concept of a Jewish nationhood or of a special link between the Jewish people and its original homeland was completely unrecognized in the law and jurisprudence of nations. It seemed unlikely that the Zionist program could overcome such an accumulation of hostilities and natural adversities.

Yet within a single lifetime we had passed from a world in which the existence of an independent Israel seemed inconceivable into a world which seems inconceivable without its existence. I know of few more tangible testimonies in history to the power of the human will to assert itself against material odds. This is, perhaps, the primary value of Israel's rebirth to all who are concerned with the vindication of faith against the fatalistic or deterministic theories of history, which see the human being not as the primary agent of historic processes but merely as their helpless subject matter. Thus, quite apart from its context in the history and culture of the Jewish people, the rebirth of modern Israel would earn its place in history as a crushing argument in the eternal discussion between the claims of faith and the doctrines which deny the human will any central part in governing the world's destiny. Those doctrines would have an impossible task in trying to explain Israel's revival in material or economic terms.

This belief in the power of the human will is a recurrent theme in Israel's history. The most distinctive attribute of Israel's character, the source of some weakness but of greater strength is this stubborn, tenacious refusal to recognize the distinction between imagination and reality. In the grammar of classical Hebrew there is none of the sharp differentiation possessed by modern languages between that which is and that which shall be. This deliberate confusion between imagination and reality, between the will and the fact, has been illustrated at many stages of our history. In 1918 our first founding father, Dr. Weizmann went up to Mount Scopus, overlooking Jerusalem, to perform the ceremony of opening a new university. In its outward forms this resembled similar ceremonies whereby

universities have been opened and dedicated in many parts of the world. There was only one incidental circumstance which made this particular solemnity in any way distinctive. This was that the university did not exist at all. It was unrepresented even by a cornerstone. There were no plans or means for its erection, and indeed no rational certainty that those who aspired to its establishment would be able to live in the country at all. Yet because the establishment of a university in Jerusalem was for us a matter of intense and passionate will, the absence of the physical conditions necessary for its fulfillment was not an adequate reason to abstain from all the acts and gestures which should mark its dedication. Surely enough, within two decades the university existed, and the ceremony, even in retrospect, no longer appears quixotic. The confusion between imagination and reality marks all our religion and folklore. Alas, there are some who see its traces in our economic and financial planning.

Just as the establishment of Israel proves the dominant power of the human spirit, so is this theme illustrated by many acts which have unfolded themselves within the general process. The most vivid example is to be found in our immigration movement. The dispersed Jewish communities from which this immigration came were utterly divergent in all material things. Their social, economic, political, and linguistic backgrounds had nothing in common. Unity and solidarity existed only in the plane of spiritual allegiance. Here then was a convincing experiment for proving the relative strength of the material and the spiritual forces. If the material elements were really decisive then the influences of division and alienation would prevail. The spiritual unity had not merely to exist but actually to overcome a great aggregate of divisive material forces. That it did so triumph, and that hundreds of thousands responded by immigration to the call of Israel's sovereignty proved that unity will prevail against divergence, provided that the unity is truly spiritual and the divergence only material.

THE HEBREW TRADITION

Thus far I have spoken of Israel's establishment as a general victory for spiritual forces. But we also owe attention to the particular lineage of Israel's spiritual history. The tradition which was here saved from extinction and endowed with a new birth of freedom had played no ordinary role in the evolution of the human spirit. All that is essential and authentic in modern theistic traditions can be traced back ultimately to the achievements and insights of Israel in the previous era of her independent national life. The consciousness that the Hebrew mind had had such a strong impact on human thought caused millions throughout the world to be exalted by the prospect that this tradition was now to be reinstated in the shelter of free political and social institutions. The union of this people with that land, through the medium of its incomparable language, had once given mankind its deepest experience of revelation. Ancient Israel had taught individual morality, social justice, and universal peace. That the conditions in which that florescence had been achieved should once again be restored was a prospect that could not fail to appeal to any sensitive imagination.

THE FAMILY OF CULTURES

The community of nations is also a society of cultures and civilizations. Many modern states, whatever their formal relationship to established religion, exemplify and embody the Christian civilization in its various forms. Some 15 modern states are dominated by the heritage and outlook of Islam. Three or more sovereignties in the Far East are cast in the mold of Buddhist tradition. There are many states, as we know too well, which exemplify the various materialist heresies of our age. But until 1948 there was one culture, and one alone, which had no distinctive representation in the family of nations; one civilization which nowhere on earth had the opportunity to express its ideals by response to the challenge of statehood, society, and international relations. No single state spoke as the conscious champion or exemplar of the Hebrew tradition. When we think of the influence which this civilization has exerted on the currents of historic progress, this was surely an intolerable paradox. In our age, for the first time since the legions of Titus subjugated Jerusalem, the Hebrew tradition has become embodied in free political institutions, on a level of equality with all other nations in the human family. By this act of remedy, the family circle of the world's free cultures has become complete. The community of nations is now a comprehensive symphony of the traditions and cultures of mankind.

It is, of course, true that the concepts of Hebraism continued to affect history after the destruction of the Jewish kingdoms. Working through Christianity and Islam, and within the national traditions of countless peoples, the Jewish civilization continued its creative course. It would be unduly restrictive to limit the story of the Hebrew mind to those expressions of it which were realized in conditions of separate political independence. Nevertheless, it is a fact that it was in conditions of separate nationhood in the land of Israel that the spirit of the Hebrew people rose to levels of inspiration which it never subsequently achieved in conditions of exile and dispersion. The stream of Hebrew civilization nourished the great rivers of Christianity and Islam: but its own native waters continued to flow perennially fresh. We have escaped from the great handicap and reproach of homelessness. No longer need we poignantly recite: "They have appointed me to keep many vineyards, but mine own vineyard have I not kept."

ISRAEL IN INTERNATIONAL EQUITY

There are many aspects of Israel's revival which belong to the domain of political history, but which cannot be denied their place in a spiritual appraisal. The homelessness and martyrdom of the Jewish people was not merely a source of international political tension: it was also a heavy burden upon the Christian conscience. The weight of this burden became heavy beyond endurance by any sensitive mind in the aftermath of the Second World War, when the curtain went up on the burnt and mangled bodies of 6 million Jews including a million children. The Jewish people had fallen victim to the most fearful agony which had ever beset any family of the human race. A whole continent was saturated with its blood and haunted by its unexpiated sacrifice. As the world rose from the ravages of the Second World War, it came perilously near to creating an injustice more heinous than any which had been illuminated by the triumph of the Allied cause. It became horribly but seriously possible that every nation would be granted its freedom, amongst those which had suffered under the heel of Fascist tyranny, except the people which had suffered the most. All the victims of tyranny would be established in sovereignty, except the first, and the most sorely ravaged amongst the targets of totalitarian persecution. If the world order had been established upon this discrimination, it would surely have been conceived with an intolerable measure of original guilt.

From this spiritual peril the community of nations cleansed itself belatedly, perhaps a little too grudgingly, but nevertheless decisively, when it ordained and later recognized the establishment of Israel. A postwar international society including a Jewish state, and an international society excluding any satisfaction of the Jewish claim to equality, would have been two totally anti-ethical concepts from the spiritual and ethical point of view. The establishment of Israel's sovereignty, though ostensibly a fact of political organization, was, in the deeper sense, an act of universal equity.

REGIONAL EQUITY

The same consideration arises with particular force when we examine the problem of equity in its regional aspect. No people benefited more lavishly than the Arabs from the new inheritance of independence bequeathed by the Allies' victory in two world wars and the establishment of the United Nations. In an area where not a single free Arab or Moslem had lived in conditions of political independence 4 decades ago, there were now to be created 7, 8 or 9 separate Arab sovereignties extending over a vast subcontinent from Pakistan to the Central Mediterranean, from the Taurus Mountains to the Persian Gulf. This region of new Arab independence was immeasurably rich in physical power. Great fertile valleys spread out within it. Abundant rivers flowed across its lands. Unlimited resources of mineral and natural wealth lay beneath its soil. Never since the golden age of the Caliphate, a full millenium ago, had the Arab world commanded such elements of power, strength and opportunity as those which now came within its grasp.

Here again the international conscience was faced with a burning problem of equity. Was it considered right for the Arab people to hold sway over a continent, and wrong for the Jewish people to establish its independence in a tiny fragment of that huge domain? Would it be the decree of history that the Arabs must be independent everywhere and the Jewish people nowhere—not even in the land which owed all its luster in history to its connection with the ancient Hebrew tradition? This was the problem of conscience which underlay the turbulent political discussions in international forums and in the chancelleries of the powers. Here again there was the peril of an award so one-sided, so monopolistic, and discriminatory in its nature as to weigh down the international conscience for generations to come. After many hesitations the world community cleansed itself of any such reproach. It rightly established and encouraged the emancipation of the Arab people on an almost imperial scale. But the benefit, nay the elementary right, which is conferred upon the Arab people in such abundant profusion, was also bestowed upon the Jewish people, albeit within meager and austere limits. This picture of an Arab liberation beyond the wildest dreams of recent generations, side by side with an immeasurably more modest satisfaction of the principle of Jewish independence should be before us whenever we consider the spiritual implications of the controversy between Arab and Israel nationalism. It would have been an indelible disgrace to the cause of international justice if a world which had bequeathed this vast liberation to the Arab people had begrudged the Jewish people its minute share of that inheritance. The morality expressed in the parable of Naboth's vineyard would have clouded the constitutional and political structure of the Middle East.

ISRAEL'S CULTURE

As we survey the origins of Israel's independence in spiritual terms, we cannot fail to let our minds linger in speculation on the question of Israel's cultural destiny. In the final resort, modern Israel will vindicate the efforts, sacrifices and longings invested in its rebirth to the degree that it strives toward high levels of intellectual and cultural progress. As a military power, a political force or an economic unit, Israel's horizons are restricted by deficiencies of material power. Much remains to be achieved in political organization, in the

strengthening of security and in economic consolidation. But in these realms Israel will never compete with the might and influence of the continental or imperial powers. The only domain in which we are free to soar to the highest peaks available to any nation are those of scientific, cultural, and spiritual progress. However pressing are Israel's preoccupations with physical security and economic welfare, the challenge of cultural achievement cannot be set aside. Would we not be an extraordinary people if we were to devote all our efforts to those material fields in which, after all, our limitations are inexorable, and stand aside from the only areas in which, at least, the potentialities of greatness lie open before us.

These are the considerations which invite special attention to Israel's efforts and aspirations in religion, literature, science, and art. Our unusually intensive effort in these fields is not something marginal or secondary to our concern: it touches the very core and essence of our destiny.

Three elements are available to us in the formation of Israel's new culture. First, there is the Hebrew Biblical tradition expressed in our incomparable language and evoked by the physical associations of the country itself. This is no new Esperanto nation writing its history on a clean slate. Modern Israel is, in its own consciousness and in that of the world, the direct lineal descendant of the ancient Hebrew civilization which has exercised such a potent influence on the thought and spirit of mankind. It is no small thing for the citizen of modern Israel to speak the same Hebrew language as that in which Amos wrote the prophecies of social justice, in which Isaiah proclaimed the vision of universal peace, and Ezekiel contemplated the process of regeneration and resurrected hope. In our educational process a great source of enrichment is to be found in the historic memories evoked by the very hills and valleys in which our new State resumed its ancient inheritance. The sentiment of belonging, in the most intimate sense, to the great sweep of Israel's history in this immortal land has a far greater influence than is commonly realized in the formation of our national character. Our literary movement and recent discoveries in archeology constantly remind our people of this primary element in their spiritual formation.

A second element in Israel's culture is the accumulated experience acquired by the Jewish people in its wanderings after the period of national independence. The generations of dispersion and persecution were also a period of constant interplay between the Hebrew mind and the cultures of Europe and the New World. The Rabbinical and Talmudical literature, the post-Biblical Hebrew poetry and philosophy, the traditional attachments of the Jewish people to the arts and sciences of the Western World, are all part of the reservoir from which modern Israel draws its sustenance.

The third element available for our cultural development is western civilization, with special reference to its political institutions and its scientific and technological progress. It is Israel's fortune to be the sole representative in its immediate region of political democracy and scientific progress, which are the two most distinctive achievements of European and American civilization. This western civilization is strongly expressed by the Anglo-Saxon tradition with which Israel has two links of special intimacy. First, the great bulk of the free and extant Jewish people is a part of the English-speaking world. Second, the tradition of the English-speaking people is not something alien or external to Israel's life and experience. It is itself morally derived from the original Hebrew tradition of which Israel is the modern representative and embodiment.

From the effervescence of these three elements—the Hebrew Biblical tradition, the broader Jewish experience, Western science and political organization—the culture of modern Israel will emerge. There is no way of insuring that the result will be of universal significance. Still less can we promise a new period of revelation. It is not for us to command by our will the inscrutable sources of inspiration. All that we can do is to create the opportunities and conditions whereby to express the potentialities which lie within our soul, as it seeks communion with the mysteries of intellectual and spiritual creation. We have at least restored to our people the conditions of a creative culture—pride of soil; the sense of continuity; deep roots in a superbly aristocratic cultural tradition; and the special exaltation which attends a people in the formative hours of its national revival. Who can be certain that these conditions will not bring a message in the spirit and quality of our original inheritance.

THE CHRISTIAN ATTITUDE

I am certain that your invitation to me to discuss these high themes within this Catholic sanctuary reflects your conviction that the unfolding of Israel's new career as a nation is a matter of moment and concern to the Christian world. The great issue in this generation is drawn, not between Christianity and Judaism, or between Israel and the Christian nations. The frontier lies rather between those who assert and those who deny the supremacy of faith and of freedom. You and we occupy different areas of tradition, experience, and outlook; but we occupy them on the same side of that fateful demarcation. Our differences are not insignificant, and we should not be disposed to obscure them. It may well be that those elements of our personality which are separate and distinctive are precisely the most creative elements in our contribution to the common cause. But if the rise of Israel is a victory of the human spirit, a triumph of international integrity, a burden removed from the universal conscience, the addition of a new voice to the symphony of human freedom, then this is a victory for the Christian cause as well as a direct salvation for the Jewish people.

It is memorable and significant that the Christian world lent its sympathy to Israel's revival. The great Catholic countries of Europe and Latin America were amongst those who most ardently sustained Israel's struggle for independence and recognition. Our devotion to a kindred heritage, our common respect for human values, our unremitting resistance to tyranny, are unifying forces which transcend all secondary divergences of judgment or interest. The people of Israel who first in history rebelled against the might of barbarian and pagan empires, which raised the first voice against idolatry—this people in its new life of independence will never bow the knee to dictatorship.

These common ideals of Judaism and Christianity command us to assert our underlying fraternity. A distinguished prelate of the Catholic Church, Msgr. Gustave Franceschi, wrote of his visit to Israel in these terms:

"We understand that the Hebrew people has a spiritual connection with us, that their strange survival goes beyond the customary norms by which the life of an ordinary nation evolves; and we Christians, if we have not lost the sense of Christianity, cannot but perceive to what a profound extent Israel is linked to our own salvation. One merely has to read St. Paul's Epistle to the Romans to see this."

THE HOLY PLACES

These solidarities can serve as a bridge across controversies which sometimes disturb our essential kinship. An understanding of the spirit of the Christian world ranks very high among Israel's chief aspirations. We are fully aware that many causes and assets sacred to Christianity lie within our control and demand our most vigilant reverence. This consideration has led us constantly in recent years to proclaim our readiness to place under international influence the holy places in Jerusalem which are the cradle and inspiration of the Christian faith. By such a solution, reconciling the full political independence of the people of the Holy City with international interest in that which is truly universal in Jerusalem, we could achieve a double purpose. We should prevent an encroachment on the political liberties of Jerusalem's population while, at the same time, acknowledging the moral authority of the world community over the sanctuaries of your faith. Need I remind you that political freedom and national self-expression are themselves spiritual objectives of the highest importance; that Jerusalem, the cradle of democratic thought, is the last place on earth in which citizens should be deprived of freedom and national devotion; and that no religious purpose could triumph over a discontented political community alienated from its national allegiance. These are the considerations which have caused the Governments of the United States and of Israel to cooperate so constantly within the United Nations on behalf of solutions which respect both the sovereignty and secular independence of Jerusalem's population and the rights of the Christian world to see its holy places kept immune from turbulence and desecration. I am satisfied that this attitude is now shared by a majority of the members of the United Nations.

In the same spirit, you will understand how devoutly we have welcomed the warm praise expressed by Msgr. Antonio Vergani, representative of the Latin Patriarch in Israel, by the Very Reverend Father Brunet, and by visiting cardinals and prelates to the efforts of my Government to ease the journeys of pilgrims, to effect a road link to Mount Tabor, and to repair the ravages inflicted by war on some of the buildings and properties of the Catholic Church in Israel. In paying this tribute to the Government of Israel for its "substantial subventions, enabling the rehabilitation of the Hospice of Notre Dame de France in Jerusalem," Father Brunet eloquently and devoutly concludes: "May God vouchsafe to us to see this edifice risen from its ruins and pilgrims coming once again to recite their prayers on the soil of this holy land, where spiritual interests should bring all hearts together in peace."

This is the goal of Israel's spiritual adventure, in the freedom of its ancient home—to live a national life consecrated to the universal vision of fraternity and peace. If we serve this ideal, within the limits of our human imperfection, the new era of Israel's freedom will be not unworthy of the inheritance of the fathers.

POSTAL PAY RAISES

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a part of an article which appeared in the Washington Daily News of Thursday, February 10, 1955.

This article which is entitled "More on Postal Pay Raises, and an Apology," was written by John Cramer. It was written as a followup of a previous article by Mr. Cramer which was printed on page 1378 of the RECORD of February 9.

I ask that only the first eight paragraphs of the article be printed since the remainder does not refer to the previous story.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

MORE ON POSTAL PAY RAISES, AND AN APOLOGY

(By John Cramer)

An article in this column Tuesday about the Post Office Department's job classification plan, used the phrases "job classification racket" and "typical classifier's fraud."

Department officials say the individuals responsible for the plan have interpreted this as an attack on their personal and professional integrity.

No such attack was in any way merited or intended. The phrasing was unfortunate.

Your Government reporter is happy to offer this correction—and apology.

MORE HEARINGS

Senate Post Office and Civil Service Committee planned to resume its hearings on postal pay raises today with additional testimony from employee unions.

Meantime, the strategy of congressional leaders apparently has shifted—and the tentative word now is that Congress will act on postal and classified (white collar) pay raises before it acts on congressional raises.

This could speed employee raises. It also will give Congress one additional justification for its own raise. And in the long run, of course, the congressional raise will benefit Federal employees, too, because it will pave the way for lifting of the $14,800 ceiling on Federal executive pay.

THE PRESIDENT'S FOREIGN ECONOMIC POLICY

Mr. BUSH. Mr. President, one of the most important issues before the 84th Congress is the question of tariffs and trade and America's foreign economic policy. In a television program broadcast this week by Connecticut stations, WKNB, New Britain; WGTH, Hartford; WNHC, New Haven; WICC, Bridgeport; and WATR, Waterbury, I had the privilege of discussing these matters with Mr. Clarence Randall, special consultant to President Eisenhower in this field.

In the belief that this discussion may contribute to public understanding of the problems involved, I ask unanimous consent that a transcript of the program be printed in the RECORD at the conclusion of these remarks.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

TRANSCRIPT OF A DISCUSSION OF PRESIDENT EISENHOWER'S FOREIGN ECONOMIC POLICY BY SENATOR BUSH AND HON. CLARENCE RANDALL

Senator BUSH. Hello everybody. It's good to be with you once more for another Report from Washington, and today I want to consider with you President Eisenhower's foreign economic policy.

We are very much honored to have as our guest, Clarence Randall, who served as Chairman of the President's Commission on Foreign Economic Policy and is now his special consultant. I know of no one who is better qualified to help us in a discussion of these problems than Mr. Clarence Randall. He is a businessman of broad experience. He is known as the statesman of steel because of his leadership in working out peaceful labor-management relations in that industry and because of his interest in problems affecting the general welfare of our people. He is a man who calls a spade a spade. Clarence, it's a great pleasure to introduce you today to the people of Connecticut.

Mr. RANDALL. Well, thank you, Senator, very much, for the extremely gracious introduction. We're very old friends and it's a pleasure for me to be on this program and say to you and to my friends, and your friends in Connecticut, what a fine job you did as a member of the Commission on Foreign Economic Policy last year. We did not have a man that did his homework as thoroughly, worked as hard, or accomplished as much in our total results as you did, and I am grateful.

Senator BUSH. That's very generous of you. You know, foreign economic policy sounds like very high-level stuff. But the facts, when you boil them down, are essentially simple, and we, as citizens, should know them because they have, and will continue to have, a profound effect upon our lives, our jobs, and our future as a nation. Involved in the whole question of foreign economic policy are these things:

First, the survival of the United States of America as a nation of free men.

Second, the maintenance of a steadily rising standard of living in the United States, with increased opportunities for employment.

Now, we in Connecticut have a great deal at stake. As loyal, patriotic Americans, we want our country to be strong in the struggle against international communism in which we, with the other free nations, are engaged. As citizens of a highly industrialized State, we want to make sure that our own economy in Connecticut is maintained at a high level and that opportunities for jobs will increase.

Now, Clarence, in a recent talk with a Connecticut audience I described the President's foreign economic policy as a hard-headed practical way of fighting communism. I said it hits the Communists where it hurts. So, let's start the ball rolling by discussing that part of the problem. Do you agree with——

Mr. RANDALL. I agree with you, Senator, 100 percent and I am sure that President Eisenhower does.

Senator BUSH. That's good.

Mr. RANDALL. I know he regards his program this year in foreign economic policy of top priority to the welfare of our country. In the first place, I don't think that any thoughtful American need to be told that the cold war is deadly serious. And I think Americans understand that in this complex modern world, the United States just can't go it alone. We have to have friends; we have to have allies; and it isn't enough to have friends—we must have friends who are strong, who can bear their burden. Now, postwar, we have helped a great many nations in the efforts they have made in our behalf, and that time has stopped. Now the time has come when the other nations of the world must earn their own way. The President's foreign economic policy, in terms of our own security, is directed toward getting us allies that are strong in the fight against communism.

Senator BUSH. Clarence, that's wonderful. I admire the way you phrase these things. Now, Clarence, you and I know that foreign economic policy includes many things besides the tariff. But most of the controversy over the President's program seems to have arisen because of his recommendations for authority to negotiate tariff reductions. I would like to discuss that for a few minutes—why the President felt it necessary to ask for this authority to reduce tariffs. I would like to have your views on that. As a Senator from Connecticut, I have a very real obligation to the thousands of working men and women in our factories. Many of our industries grew up under tariff protection. Under that protection, guaranteed to them by our Government, they brought people here from Western Europe, brought them from Poland, they brought them from Italy, and they settled down in the Naugatuck Valley and elsewhere and they raised their families. Now, we have families there of first, second, and third generations of people who have their roots in the grounds of these communities. So it is a matter of very, very vital concern to them. Other Connecticut industries, of course, do a substantial amount in the export trade. I think 10 percent of our employment in Connecticut depends on export of goods to other nations. So ours is a highly industrialized economy. We're proud of the contribution to the national defense we made in both World Wars I and II—contributions so great that others have called Connecticut the arsenal of democracy.

My point is this, that we don't want to throw any monkey wrenches into that economy—that sensitive economy. I don't think the President does; I don't think you do, Clarence. The President has insisted—and those recommendations were really based on yours, Clarence—that any tariff reductions be made on a gradual, selective, and reciprocal basis. I feel certain that the President will not use any permissive authority granted him so as to cause loss of jobs in any industry in Connecticut. On the contrary, I think it is his belief, which I share, that any action taken will have a stimulating effect on our whole economy and create more jobs. I would like you to comment on that.

Mr. RANDALL. Well, it's a great pleasure to comment on that. I have had the privilege of discussing this program many times with President Eisenhower. I know he believes, as you have just expressed, that no President could fail at all times to have close to his heart the welfare of American business and the welfare of the American worker. Now the problem arises from what is called imbalance in trade. The whole world is a potential market for American goods. Other people want our gadgets, but they haven't had the wherewithal to pay. Until now we have given them large sums of money with which to buy products of our farms, and of our factories; but that period of economic aid has terminated. Therefore, they must earn their own way. Of course, it is difficult to bring about in the world a steadily rising volume of trade and production. Just as Connecticut now ships its goods to every State in the Union, Connecticut can find a market in every country in the world. It's trade can become a little freer.

Senator BUSH. Clarence, would you care to comment a little on GATT—General Agreements on Trade and Tariffs—conference which I believe is just about to start or started in Geneva, Switzerland?

Mr. RANDALL. Those mystic letters should become familiar with every American. Because GATT is simply a medium by which all nations—I think there are 31 in the free world that are involved—sit around at a table and trade off concessions. One country will permit more American goods to enter their border if we in exchange do something for them. It is called reciprocal trade. And it's simply a way by which men of goodwill may gradually, in a moderate, and steady way, reduce the barriers to trade.

Senator BUSH. I think we're going to hear more about that subject before the winter is over and I know that what comes out of the GATT Conference will be of great interest to us here in Connecticut.

Clarence, with respect to these recommendations for tariff reductions and the authority which the President has asked for and which the Congress will consider giving him very shortly, how do you visualize that those recommendations will be used—how will they be put into effect, so to speak—and what will be the effect on different classes of American industry?

Mr. RANDALL. Well, Prescott, the essence of the President's program is that it will be gradual, moderate and selective—commodity

by commodity. I suppose that in Connecticut there are the three principal types of industry: First, where little labor is employed; second, where a good deal of it is employed; and third, where the product involves principally labor.

Senator BUSH. When you say little labor—do you mean the mass production industries?

Mr. RANDALL. Exactly. The automobile industry for example, and perhaps the aircraft industry in your State. Now, actually the situation in each one of those industries will be carefully studied. And everyone concerned, in my judgment, will have ample opportunity to be heard. And it will be done selectively, so that the impact upon our domestic production will be the least possible.

Senator BUSH. Well, Clarence, in our State, I think we don't have so much of the mass production industry, but we do have a lot of that middle group that you speak of. How do you visualize that the President will look at that class of industry? That's the one I think will affect us the most.

Mr. RANDALL. In the first place, I think the President will think they're awful smart and that they're first class industries and they don't need any particular coddling. But if they have a problem, you may be very certain they will be thoughtfully considered even before the gradual reductions contemplated here are put into effect.

Senator BUSH. In other words, the President is going to use the determinations of the Tariff Commission respecting the "peril point" with a great deal of consideration.

Mr. RANDALL. In addition to which there will be the same special interagency group in the Government—involving nine different departments—which sits as a committee and the commodity selected must pass that committee; they then must go to the senior level of the Government for consideration. It is a very thoughtful serious approach to the problem.

Senator BUSH. Well, I think that's a matter of very considerable comfort for us to hear that because our people do, in certain areas of our State, we do have a very high unit labor cost, so to speak. And as they see goods that come in from places like Hong Kong where they pay 8 cents an hour instead of $2.08 as we do in Naugatuck Valley, they get worried about the possibility of competition. I think you have given us a good deal of comfort and a good deal of inspiration today, Clarence, and I want to express to you our very real appreciation for being with us. And also for the leadership which you have shown in tackling this great national problem.

ONE HUNDRED AND NINETY-FIRST ANNIVERSARY OF FOUNDING OF THE CITY OF ST. LOUIS, MO.

Mr. HENNINGS. Mr. President, this week the city of St. Louis, the Gateway to the West, celebrates its 191st birthday. Mayor Tucker has proclaimed the week of February 7–13 as Founders' Week, and the entire community, including many business, farm, church, school, and civic organizations, coordinated by the Council on World Affairs, has joined in a citywide celebration of this significant occasion. The week-long series of programs commemorating the founding of St. Louis included, as one of the highlights, a foreign-policy address by André Philip, of France. Because of the long French tradition in St. Louis, the choice of this distinguished French statesman to participate in the program was especially appropriate.

In honor of the great history of the city of St. Louis from its earliest beginnings through the periods of its growth and progress and because of its notable achievements over the years, I should like to say a few words about its founding.

In February of 1764, Monsieur Pierre Laclede Ligueste sent Monsieur Auguste Chouteau and a small company to found a settlement at the St. Louis location. The men selected for that purpose arrived in boats from Ste. Genevieve on St. Valentine's Day, February 14, 1764. Among the papers left by Monsieur Chouteau, who died in 1829, was his personal recital of the dramatic story.

According to his account, Ligueste had said to him:

> You will land at the place where we marked the trees; you will commence to have the place cleared, and build a large shed to contain the provisions and the tools, and some small cabins to lodge the men. I give you two men on whom you can depend, who will aid very much, and I will rejoin you before long.

Auguste Chouteau continues:

> I arrived at the place designated on the 14th of February and, on the morning of the next day, I put the men to work. They commenced the shed, which was built in a short time, and the little cabins for the men were built in the vicinity. In the early part of April, Laclede arrived among us. He occupied himself with his settlement, fixed the place where he wished to build his house, laid a plan of the village which he wished to found (and he named it St. Louis in honor of Louis XV, whose subject he expected to remain for a long time; he never imagined he was a subject of the King of Spain); and ordered me to follow the plan exactly, because he could not remain any longer with us.

Thus it was that on the 15th day of February 1764 the first trees were felled and the first constructive blows struck on the west bank of the Mississippi River at the point called St. Louis.

The site selected by those pioneers was about 18 miles below the confluence of the two great rivers, the Missouri and the Mississippi. The ground rose above the rivers and leveled off toward the west in wide, rolling lands covered with mighty forests. In addition, the beauty of the terrain and the magnificent views in all directions made Monsieur Ligueste and his associates decide that this would be the most favorable location for the development of a settlement and a future great city. That their judgment was sound, as were their predictions that upon this ground a great city would grow, are amply demonstrated by the progress over 191 years during which St. Louis has come of age. From trading post for Indian traffic, from embarkation point leading to the settlement and development of the great Northwest, from the center of river traffic and commerce before and during the Civil War days, St. Louis has grown to be a mighty city, rich in manufacturing, commerce, and finance.

Within its immediate environs dwell nearly 2 million Americans. Over the years it has made important contributions to our Nation, not only in material advancement, but in social, cultural, and religious achievements that strengthen our democracy.

I am sure, Mr. President, that the Members of the United States Senate, and all the people of our country, will join with me in saluting the city of St. Louis on its 191st birthday.

PROBLEMS OF SCHOOL CONSTRUCTION—ARTICLES BY ROSE McKEE

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a series of three articles on school construction problems in the United States, written by the distinguished Washington correspondent of the International News Service, Rose McKee. I commend the articles to the attention of the Senate for their clarity and for the testimony they afford as to the need for intelligent action if we are to fulfill our responsibility to our children and to our Nation.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

YOUR CHILDREN'S SCHOOLS—KENNELS USED AS CLASSROOMS IN SHADOW OF NEW YORK CITY

(American children in the mid-20th century are going to school in abandoned dog kennels and discarded garages—in such places as Long Island, N. Y. This problem dramatizes the issue of America's classroom shortage which educators and mothers call a national disgrace. The crisis, soon to be debated in Congress, is explained in the first of a series of three articles by INS correspondent Rose McKee.)

(By Rose McKee)

WASHINGTON, February 7.—American children are going to school in dog kennels and in such abandoned buildings as an old laundry or discarded garage.

This is not the state of things in some far-off mountain or desert area. It is happening, for one place, in the very shadow of New York's famous and multi-billion-dollar skyline.

It is what worried mothers and educators mean when they tell Congress that the classroom shortage is a national disgrace and a scandal.

For 6 years they have been telling their alarming story. It may move Congress this year to vote Federal aid to school construction.

Perhaps the most vivid account of mid-20th century school conditions was related to the Senate Labor Committee the other day by Mrs. Edward R. Gray, of the National Congress of Parents and Teachers. Here are her words:

"In one community a dog kennel had been reconverted into a school and four classes are being held here. That is in New York State.

"To put children in the place that originally housed dogs seems deplorable. Yet the need for classroom space in an adjoining community is so acute that the superintendent was heard to say, 'I only wish that I, too, had dog kennels to use.'

"In another community, it is an abandoned laundry that has become a schoolhouse. In still another, a commercial garage has been turned into a school.

"This is ingenuity, yes, but these conditions are not conducive to the best teaching, nor are such buildings completely safe."

Mrs. Gray told an interviewer that the schools she described were all on Long Island, N. Y. The dog kennels that serve as a school are at West Islip, Long Island, she said. The children who go to school in an old laundry live at Babylon, Long Island. The garage school is at Glencove, Long Island.

She drew on the suburban New York area for examples because the PTA's national legislative chairman lives on Long Island and has first-hand knowledge of conditions.

But Mrs. Gray said information coming to the PTA reveals that the same type of makeshift schools are being used from Maine to California and from Washington to Florida. Other testimony before the Senate Labor Committee confirms her statement.

Back in 1949 Senate hearings told the incredible disrepair of the Nation's schools. The same story—only progressively worse—has been unfolded periodically in the intervening 6 years.

Many lawmakers are now alarmed over the downhill slide of the public schools. The Eisenhower administration wants action.

Bills to provide as much as $500 million in emergency aid for each of 2 years for school construction have started through the legislative mill. The next month or so should spell their fate, though the bills still could be killed by quibbling over how the money is to be divided up among the States or by an antisegregation rider.

YOUR CHILDREN'S SCHOOLS—WINDOWLESS QUARTERS USED DUE TO CLASSROOM SHORTAGE

(By Rose McKee)

(Second of a series)

WASHINGTON, February 8.—The little one-room schoolhouse of yore might look like a splendid structure to some of America's children of today.

At least it had windows.

Testimony before congressional committees on the acute classroom shortage includes various accounts of children trying to learn their ABC's in cramped, forgotten quarters without windows.

Take, for example, the testimony of Walter Jackson, school superintendent at Decatur City, Ala. He said: "We have one classroom under the steps of the auditorium. It is a classroom without windows where the water seeps in when it rains."

The shortage of classrooms throughout the Nation is such that few in Washington are surprised when they hear of windowless schools.

School buses are being used as classrooms in Kentucky, according to information given the National Education Association.

An NEA spokesman said also that he hears that a 1910 lodge hall is being utilized as a school in the Bloomington, Ind., area, and that a shack about to fall down has been turned into four classrooms in the same vicinity.

The Senate Labor Committee heard testimony the other day that one-third of America's children are today in grave physical danger because they are housed in unsafe and unsanitary schools, Selma M. Borchardt, of the American Federation of Teachers, who made the statement, stressed that the danger was nationwide.

Prof. John K. Norton, of Columbia University's Teachers College, testified that "more than a million and a half children are attending school in barracklike buildings, in rented churches, garages, and other makeshift quarters. They are in basement rooms and hallways and obsolete firetraps that are a threat to their safety."

The reason for the incredible situation is easily understood. Construction of schools came to a halt during World War II. The Korean war put a brake on any attempt to get construction going again.

In the meantime the birthrate climbed. Senate Labor Chairman LISTER HILL (Democrat, Alabama), put it graphically when he said: "Every 15 minutes of every day our tremendous birthrate is bringing 30 more children into the population, * * * creating the need for another classroom and another teacher."

States claim they need Federal aid because they do not have the taxing power to get the entire $10 to $11 billion that is needed for new schools.

Schoolmen say also that with Federal aid for new buildings, States will have enough of the burden lifted from their backs so that they will be able to do more about raising teachers' pay.

Congress as a whole has never looked too favorably on Federal aid to education. Some lawmakers fear it will be a foot in the door toward Federal control of what is taught.

But the prospects of Federal aid being voted this year look brighter than they ever have before. Headlines of the next couple of months will tell the story.

YOUR CHILDREN'S SCHOOLS—SOME PUPILS COMPLETE EIGHT GRADES ON PART-TIME BASIS

(By Rose McKee)

(Last of a series)

WASHINGTON, February 9.—"There are children now graduating from the eighth grade who have never been to school except on a part-time basis."

This is the testimony of Prof. John K. Norton, of Columbia University's Teachers College, before the Senate Labor Committee. The date is 1955.

William Hinkley, school superintendent at Aurora, Colo., testified that in the last 3 years the number of children on split shifts has been doubled.

Nassau County, N. Y., has started—according to another witness—running operations on the triple and quadruple shifts. So far, this has affected only kindergarten classes but educators feel it could come to be the accepted thing for other grades.

At Decatur City, Ala., there have been as many as 90 pupils cramped into one classroom.

Overcrowded classrooms is an alarming problem all over the Nation, according to Senate witnesses. It ranks right beside worry over the physical safety of children. The trouble, of course, boils down to the fact that the United States lacks sufficient school buildings for its ever-mounting school population.

What kind of an education are children getting when they are jammed up 50, 60, and even 90 to a room? Senate witnesses said, "Very poor."

Some students do not get called on to recite even once a month. The interest of the brighter pupils fades and their minds turn to other matters. The average student is apt to fall so far behind he just can't catch up.

Selma M. Borchardt, of the American Federation of Teachers, put it this way: "Overcrowded classes tend to mechanize teaching, depriving the individual child of his right to a personal relationship with a teacher and depriving the teacher of the inspiration which comes from working closely with the individual child."

The National Education Association said many good teachers are leaving the public-school system because of frustration. They find no joy in such mass operations.

The Columbia University expert remarked bitterly in his testimony, "And yet there are those who blame the schools for not giving more individual attention to children and for not playing a stronger role in the prevention of juvenile delinquency."

United States Education Commissioner Samuel H. Brownell directly connected overcrowded schools and youth crime.

Many children on the morning school shift have to leave home shortly after 6 a. m. Those on the afternoon shift do not finish their school day until 6:30 p. m.

Mrs. Edward R. Gray, of the National Congress of Parents and Teachers, said that mothers in Nassau County, N. Y., are up in arms because their children have to come home after dusk through dark areas that give genuine concern for their safety.

There is no Aladdin's lamp answer to the classroom shortage. But educators feel that with Federal aid, the States can start erecting new buildings. A vast, 10-year construction program is needed. The Eisenhower administration wants Congress to pass an aid-to-schools bill.

Senate Labor Chairman LISTER HILL, Democrat, of Alabama, declared that our national strength, indeed, our national security is at stake in the school issue, which should come to a head in Congress in the near future.

THE CHINA LOBBY

Mr. BUTLER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an editorial from the Baltimore (Md.) Sun entitled "'China Lobby' and All That."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

"CHINA LOBBY" AND ALL THAT

(By C. P. Ives)

In January of 1950 a Senator from Ohio, named Taft, proposed that the United States Navy patrol the Strait of Formosa to keep the Chinese Reds from seizing that strategic island. At once a derisive voice from high in the State Department denounced Mr. Taft as a backward pupil.

The term backward pupil, as it happened, was among the mildest of the epithets that were tossed at Mr. Taft in this as in other junctures of the foreign-policy debate in those years. Not a few of Mr. Taft's critics then and thereafter resorted to a kind of abuse which Mr. Taft, even in his occasional wrongheadedness, hardly deserved.

Now 5 years later almost to the week the Senate of which Mr. Taft is no longer a Member has voted twice on Formosa. In the first vote it resolved, 85 to 3, to "secure and protect * * * Formosa and the Pescadores against armed attack." In the second it voted 64 to 6 for a treaty of mutual defense with the political regime that holds Formosa.

Now examine a press photo of the Senators who surrounded the President when he signed the resolution for the defense of Formosa. Looking concerned and solemn, as is his habit, but at the very center of the tableau, was Senator KNOWLAND, of California.

If anything, Senator KNOWLAND had been on the receiving end of more derision, more contempt, more systematic abuse even than Mr. Taft. The tone of much of this comment was set by the critic who at one point in the Formosa debate expressed his derisive hope that a then pending proposal of caution would not "agitate Mr. KNOWLAND'S bleeding ulcer."

In these later years the myth of the "China Lobby" has been invented as a hammer to use on men like KNOWLAND. KNOWLAND was bent on a witless war in Asia, we were told, he was the tool of secret machinations out of Taipei, he was, indeed, the senator from Formosa. But when the Senate took the Formosa votes, KNOWLAND stood with the majority.

Another key figure in the press photo of the Formosa resolution signing was Senator GEORGE, of Georgia. It was GEORGE who, with a look and a short speech, had silenced Democratic opposition in the debate.

Senator GEORGE had not figured much in the earlier China controversy. But he had sympathized with Senator BRICKER'S wish to limit the Presidential power to make Yalta-type compacts. It was GEORGE'S version of the Bricker amendment that passed the Senate by a majority only one vote short of the two-thirds needed to prevail.

Senator GEORGE had suffered only less name calling than had Bricker, Knowland, and Taft. But the President's request for congressional backing in the Formosa resolution was a clear concession to the Bricker-George point of view. Certainly GEORGE had

stood as firmly as the others against certain recent manifestations of foreign policy.

Of this policy, one responsible and qualified commentator has recently remarked that "from 1945 on the United States suffered perhaps the greatest disasters in her diplomatic history." These were due to "the American Government's confusions, its wishful thinking, its original failure to recognize that the free world was being attacked, its tardiness in realizing that force as well as high principles was needed."

The commentator was Mr. A. A. Berle, Jr.—neither an isolationist, nor a nationalist, nor a primitive, nor a conformist, nor an antiintellectual, nor a China Firster, nor the senator from Formosa, nor a backward pupil.

The moral? Perhaps it is suggested in something Prof. Herbert Butterfield was saying recently about the British constitution. "There is a common error," said Professor Butterfield, "into which the Whig historian is bound to fall as a result of his misconceptions concerning the historical process.

"He is apt to imagine the British constitution as coming down to us by virtue of the work of long generations of Whigs, and in spite of the obstructions of a long line of tyrants and Tories. In reality, it is the result of the continual interplay and perpetual collision of the two. It is the very embodiment of all the balances and compromises * * * that were necessitated by this interplay."

What an American student of recent foreign affairs might gather from Professor Butterfield's words is that foreign policy, too, may be enriched by contributions from more than one school of thought.

Not, obviously, that the Tafts, Knowlands, Brickers, Georges are infallible now or were invariably right in the past. "None of those who have held action posts in foreign affairs through a stormy period can claim a perfect score," wrote Mr. Berle. He added: "Experience teaches those who have, to temper hindsight with sympathy."

Certainly mere recrimination in a situation as grave as our own would be a kind of frivolity. But the Berle survey does suggest that the foreign policy after 1945 gave its architects little license to treat their adversaries with contempt. And that suggestion may have some use from now on out.

ADVERSE IMPACT OF EISENHOWER SCHOOL PROGRAM UPON STATE OF OREGON

Mr. NEUBERGER. Mr. President, it is entitrely possible that the present administration's so-called school-aid program may turn out to be a school setback program instead.

I have received a letter from the office of the State superintendent of public instruction in my own State of Oregon, which indicates that the program could result in boosting the interest rates paid to banks and other lending agencies by the hard-pressed school districts in my State.

It is possible that the Eisenhower program may be of greater aid to banks than to school children and their teachers by stimulating a wave of borrowing at higher interest levels. The President mentions 3⅛ percent, but the average school-interest rate in Oregon now is 2.45 percent.

The people of my State of Oregon are enlightened and courageous citizens. They do not agree with any narrow view taken toward our schools.

During the past week a prominent Republican member of the Oregon State Senate, Gene L. Brown, was quoted by the United Press as saying that "Oregon is simply not wealthy enough to support the Nation's best schools." Senator Brown also said that Oregon "will have to be content with some second-rate services for awhile if it is to balance its books."

When we try to synchronize this defeatist attitude with the feeble and utterly inadequate program of school aid proposed by the Eisenhower administration nationally, it looks as if the young men and women of Oregon are being consigned to some sort of educational limbo for the next few years.

Do the national administration and State Senator Brown expect to put a generation of children in the deep-freeze while we have inadequate schools? Are they going to tell these young citizens of Oregon to come back in 15 or 20 years and take refresher courses, providing we have sufficient funds for proper schools by that time?

Our young people come this way but once. I reject the defeatist policies of both the national administration and of reactionary members of the Oregon Legislature. I believe this rich and wealthy Nation—a nation capable of building the world's mightiest war machine—can construct sufficient schools for its children.

This is why I am acting as a cosponsor of realistic and effective bills to provide $500 million in school-construction funds now, and to use the income from the outer-Continental Shelf oil reserves to help support schools in all 48 States. These measures represent the minimum which this vast and resourceful Nation should do for its students, today.

There actually is the grave possibility that the President's program could mean far more Federal interference in our schools than ever before, although the present administration pretends to be opposed to such interference.

Dr. Edgar Fuller, executive secretary of the Council of State School Officers, points out that special State school-building agencies, reliant on Federal funds, could tell local districts what kind of schools to construct—perhaps even the school program itself, warns Dr. Fuller.

Dr. Fuller also claims that a special State agency for school construction, as advocated by President Eisenhower, would violate the traditional educational policy that separate agencies should not be set up outside the regular Department of Education in each State.

It is significant, I think, that such programs as school lunches and school-construction aid in defense areas were carried out during the Roosevelt and Truman administrations without Federal intrusion into local responsibility for schools. Yet the Eisenhower program threatens such intrusion, according to the Nation's leading educational officials.

I ask unanimous consent to have printed in the RECORD at this point in my remarks a letter I have received from Mr. A. L. Beck, of the State superintendent of public instruction's offices in Salem, Oreg.; my reply to Mr. Beck; also a dispatch from the Medford Mail-Tribune which was received from the United Press in Salem, Oreg.; and a timely article from the New York Times of February 13, 1955, by the educational editor of that newspaper, Benjamin Fine.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATE OF OREGON,
DEPARTMENT OF EDUCATION,
DIVISION OF GENERAL EDUCATION,
Salem, Oreg., February 9, 1955.

Hon. RICHARD L. NEUBERGER,
United States Senate,
Washington, D. C.

DEAR SENATOR NEUBERGER: We have received the message of President Eisenhower with considerable interest. One item covered in the message may produce an undesirable effect in our State.

Since June 1954 the average interest rate on bonds to the school districts in Oregon has been 2.45 percent with a low of 1.476 percent and a high of 3.25 percent. This latter figure was on one small issue. We feel that if the Congress should approve a 3⅛-percent interest rate on school loans, regular commercial agencies will in turn increase their interest rates to some figure slightly below this, possibly 3 percent.

During the 1952–53 biennium, Oregon spent $45,556,352.60 on school construction. In case interest rates should be increased to 3 percent, this would mean an added cost to the taxpayers of Oregon of over $100,000 during a comparable biennium.

We felt that this matter would be sufficiently serious to warrant bringing it to your attention. Thank you for the copies of Senate bill 5.

Sincerely yours,

REX PUTNAM,
Superintendent of Public Instruction.
By A. L. BECK,
Director, Schoolhouse Planning.

FEBRUARY 14, 1955.

Mr. A. L. BECK,
Director, Schoolhouse Planning,
Department of Education,
Division of General Education,
Salem, Oreg.

DEAR MR. BECK: I share with you the fear that the prevailing interest rate on school-district bonds may rise under the so-called school-aid program proposed last week by President Eisenhower.

This program, I am afraid, promises to contain more benefits for bankers and money-lenders than for schoolchildren and teachers.

I think it is entirely possible that the guaranteeing by the Government of school bonds at 3⅛ percent interest, as envisioned by the President, may help to raise interest rates to a figure higher than the current average rate on school bonds in Oregon, which you state presently to be 2.45 percent.

I think you will recall that a good many of the policies proposed in the past by the Eisenhower administration have had a tendency to increase the interest rates charged by banks and other lending agencies.

The so-called school-aid program of this administration actually amounts to no genuine aid at all. Districts already heavily in debt are merely encouraged to go further into debt. The direct aid is only to really stricken districts and amounts to about $200 million over a period of 3 years—an average of about $66 million annually. When you think that our own State of Oregon, with a mere 1 percent of the national population, needs approximately $100 million for school construction in the next 5 years, it is obvious how weak and feeble is the program now proposed by the President for the entire nation.

You may be sure that I will do all in my power as one of Oregon's United States Sen-

ators to oppose a program that would raise the interest rate on school bonds to the numerous school districts forced to borrow funds in our State.

For this reason, I am supporting, as a cosponsor, not the President's inadequate program, but the $500-million bill for direct aid to school construction drafted by Senator LISTER HILL. I also am a cosponsor of the Hill bill to use revenues from the outer Continental Shelf oil deposits for support of the school systems in all 48 States of the Union.

With good wishes, I am,

Sincerely,

RICHARD L. NEUBERGER,
United States Senator.

[From the Medford Mail Tribune of February 9, 1955]

SPECIAL ELECTION ON OREGON BUDGET BEING DISCUSSED—INCREASED SERVICES, BUILDINGS PROBLEM

SALEM.—The four legislative committees charged with balancing Oregon's budget met in joint session today amidst increasing talk of a special election that would put the State's financial dilemma in the laps of the people.

Oregon must find $65 million in new revenue if it is to maintain increased services and provide the new buildings asked for by State institutions. Senator Rudie Wilhelm, Jr., Republican, Portland, told the senate and house joint ways and means committee and the senate and house taxation committees it was his opinion a tax program of such magnitude could not be built without referring it to the people.

PEOPLE SHOULD DECIDE

Senator Francis Ziegler, Republican, Corvallis, said the people should decide at a special election how many State services they want and then be asked to vote the increased revenue measures necessary to pay for them. Otherwise, he said, the legislature faces the chance that it will have its decisions for raising new money overturned by a public challenge at the polls. But Representative Alfred Corbett, Democrat, Portland, said he thought a referral to the people was an abrogation of the legislature's responsibility.

NOT WEALTHY ENOUGH

Senator Gene Brown, Republican, Grants Pass, told the committees that Oregon is simply not wealthy enough to support the Nation's best schools, top welfare support payments, and the best institutional and public health care. Oregon, he said, will have to be content with some second-rate services for awhile if it is to balance its books.

Meanwhile, there were more indications of greater pressures on State finances. Bills by individual legislators would cost the State in excess of $11 million above the budget requests if they are passed by the legislature.

[From the New York Times of February 13, 1955]

EDUCATION IN REVIEW — EISENHOWER'S SCHOOL-AID PLAN IS CRITICIZED AS INADEQUATE BY MANY EDUCATORS

(By Benjamin Fine)

Although willing to adopt a wait-and-see attitude, most educators and spokesmen for educational organizations reached by this department last week were skeptical of President Eisenhower's plan to help the States meet the school crisis. The general feeling was that the White House program was inadequate and that the local communities would be in serious trouble before any real help could reach them. Many schoolmen expressed fear that the President's plan would bring about more Federal control and interference in education.

In essence the White House proposals are designed to help States help themselves in constructing much-needed school buildings. Although the message called for a $7 billion building program, only a minor portion of this would come from the Federal Government. The bulk of the money would come from the States themselves, and the States, in turn, would, through special agencies, help local communities.

MAJOR FEATURES OF PROGRAM

Here are the four major provisions of the proposed program:

1. The Government would buy school bonds if the communities themselves could not sell them at a reasonable rate of interest—set at 3⅛ percent. The Federal Government would have an appropriation of $750 million to be spent over a 3-year period, for the purchase of school bonds.

2. The Federal Government would encourage the creation of State agencies to build $6 billion worth of schools during the next 3 years. Districts that had exceeded their borrowing powers would, through the new State agencies, be able to get more funds for school buildings. The agencies would build the schools, then rent them to the local communities. The initial Federal and State grants would thus be repaid.

3. The Government would help hardship communities, to the extent of $200 million, over a 3-year period. This sum would be given on a matching basis; the States would contribute an amount equal to that supplied by the Federal Government. However, only those communities that could not finance their own school-building program would be eligible to receive any Federal assistance.

4. The Federal Government would provide a $20 million fund to pay half the administrative costs of special studies by the States. These studies would be designed to plan long-term financing programs free of obsolete restrictions or other outmoded practices.

That President Eisenhower intends to back his program became evident when, at his Wednesday news conference, he read a 600-word statement, reiterating the need for Federal support of education with a minimum of Federal control. He stressed that public schools must always reflect the character and aspirations of the people of the community.

The chorus of disapprovals, voiced by prominent educators and representatives of educational groups, was not against the President's thesis that the schools should be free of Federal control or interference. The educators supported that position wholeheartedly. Rather, the disagreement came with the actual methods by which the plan was to be implemented.

"Too inadequate and too cumbersome," was the general reaction to the White House program.

FEDERAL INTERFERENCE

In the opinion of Dr. Edgar Fuller, executive secretary of the Council of Chief State School Officers, the President's program meant more, rather than less, Federal interference in the Nation's public schools. He pointed out that the State agencies, supported in part by Federal funds, would be able to dictate to the local communities as to the type of building to be constructed and perhaps the school program itself.

Moreover, the special State-school building agencies, Dr. Fuller said, would violate the generally accepted school policy that agencies should not be set up outside the department of education in each State.

"Out of $2 billion issued in bonds for schools constructed by the communities last year," he continued, "only $76 million worth were sold at more than 3⅛ percent. The Government guaranty, then, would have almost no effect in increasing the number of buildings to be constructed."

The amount of Federal assistance offered by the White House program is totally inadequate, Dr. Hollis L. Caswell, president of Teachers College, Columbia University, declared. The communities, he said, are just barely able to keep up with the tremendous population growth. To meet the needs of an accumulated backlog, substantial Federal help will be necessary, Dr. Caswell declared. The stopgap program, he added, simply will not do the job.

Although New York City has a tremendous building program now underway, the city needs additional help if the obsolete schools are to be replaced, and if overcrowding is to be reduced. This view was voiced by Charles H. Silver, president of the board of education. The suggested program from the White House will prove of little help to the city in actually getting more buildings underway, he said. The problem in New York City, as in many other communities that are not poverty stricken, is not that of selling bonds. Rather, it is one of trying to find means to meet the school crisis without overburdening the taxpayers, Mr. Silver emphasized.

Mr. Silver suggested that the board of education create a committee to study and evaluate the Eisenhower program. He said that the committee might go to Washington to discuss the plan with the proper officials, in an attempt to cooperate still further.

CALLED INADEQUATE

The President's program is inadequate, in the opinion of Carl J. Megel, president of the American Federation of Teachers. Although it is gratifying that President Eisenhower has recognized the need for Federal aid to education, he said, the recommendations for carrying it out are disappointing. Mr. Megel called the plan a "new reconstruction finance project, more for the benefit of bankers than a practical program for the benefit of the Nation's children."

According to Dr. George D. Stoddard, former president of the University of Illinois and now head of the New York University evaluation committee, the proposed Federal aid program will not meet the current school emergency. The communities that most need the money, he said, may not be able to meet the requirements set up in the White House plan.

The President's program does not go far enough, said Dr. Francis J. Brown, staff associate of the American Council on Education. The concern of the Federal Government, he declared, should be in terms of the overall need of the Nation for educational facilities.

Similarly, Dr. Worth McClure, executive secretary of the American Association of School Administrators, a department of the National Education Association, said the President's program is far too limited. He declared that educators would find it hard to reconcile the school plan with the $100 billion road-building program. He expressed the fear that the rental of the buildings to the community would, in effect, put the school system in the position of a lessee.

OTHER NEEDS STRESSED

Every one of those interviewed by this department agreed that the need for assistance could not be ignored. The classroom shortage is critical. A survey conducted by the United States Office of Education showed that the country must build a minimum of 50,000 new elementary and high school classrooms each year to keep up with growing enrollments. There is a shortage of more than 300,000 classrooms today, and at the present rate of building this deficit will not be erased.

But buildings alone do not make a good school system. Teachers are needed, and needed at once. It is difficult to estimate the exact number of teachers that could be used in the schools today. But it is known that 80,000 teachers are on an emergency basis, serving on substandard licenses. The teachers' colleges prepared about 35,000 elementary teachers last year. According to reports from the school superintendents, at

least 135,000 teachers were needed. The deficit is a growing one, again caused by the skyrocketing enrollments. The schools of the Nation are growing at the rate of more than 1 million children a year. This probably will continue for at least another 10 years.

The PRESIDENT pro tempore. If there be no further morning business, morning business is closed.

THE IMPRISONMENT OF AMERICAN SOLDIERS IN COMMUNIST CHINA

Mr. KNOWLAND. Mr. President, if the United Nations is not to become as impotent and futile as the League of Nations became, I think it is very important that it be able to function in all matters of importance which come before that international body.

Apparently on the basis of its action in seeking a cease-fire in the area of the islands off the coast of China, the United Nations is not prepared to take the necessary steps to see to it that the aggression of the Chinese Communists will be resisted if it is persisted in. I hope that in the discussions which are taking place, since the proposed cease-fire is a subject which has perhaps loomed larger in the public eye in the United States and throughout the world than has the issue of the prisoners of war, the 15 Americans who are still held in the Communist jail in Communist China are not to become forgotten men.

The 4 pilots and the 11 other American airmen who were sentenced to prison terms of from 4 to 10 years are all being held in a prisoner-of-war enclosure in violation of the terms of the Korean armistice. They should have been exchanged under the terms of the Korean armistice at the time of the little switch or the big switch of prisoners of war. They were deliberately held back by the Chinese Communists, and no one can be absolutely certain of the number of American GI's or airmen, nor, indeed, of the number of military personnel of some of our allies, still being held as prisoners contrary to the terms of the Korean armistice.

I have checked with the Department of State to ascertain when it was that this Government first received information relative to the specific group of 15 Americans who are being held as prisoners by the Chinese Communists. I understand that while there were indications earlier, and while we had considerable suspicion earlier, that the prisoners were alive and were being held contrary to the armistice terms, the first direct confirmation of such information was received on June 21, 1954, at the Geneva Conference, when the Chinese Communist delegation, through Mr. Wang, who was secretary general of the Chinese Communist delegation, confirmed to the cordinator of the United States delegation, Mr. U. Alexis Johnson, that the Communists were holding the 15 airmen. This number includes, as I have previously pointed out, the 11 who were already sentenced and the 4 jet pilots who presumably are being held merely in a prisoner-of-war enclosure rather than a prison, if there be, in fact, a great deal of difference.

It seems to me that the conscience of the United Nations should be deeply troubled by this clear violation of the Korean armistice terms. Quite properly, the Department of State and our representatives at the United Nations suggested that until Mr. Hammarskjold's visit to Peiping had been completed—a visit the wisdom of which some persons seriously questioned, but the decision as to which, after all, was in Mr. Hammarskjold's hands—there should be a period of relative silence on the part of this Government as to the American prisoners of war.

Considerable time has now elapsed since Mr. Hammarskjold returned and reported on his mission to Peiping. Because it is apparent from the report of his visit that Mr. Hammarskjold did not bring back the prisoners of war with him, and, what is more, did not state an estimated time in the future when it might reasonably be supposed that they would be returned, and also because the prisoners are still being held in violation of the Korean armistice terms, I say on my responsibility as a Senator of the United States that I believe the American people have a right to ask the United Nations as a whole what that organization intends to do about the problem.

Are the men who are being held, clearly in violation of the armistice terms, to be allowed to rot in Communist prisons for from 4 to 10 years, while the United Nations merely continues to debate other subjects? This is a question which, in my judgment, the American people will not allow to remain unanswered. I think the morale of our Armed Forces is deeply involved in this question.

I have had numerous communications from both enlisted and officer personnel, some of them serving in Korea, some serving in other sections of the world, and others serving in the United States. I have also had communications from veterans of the Korean war. All these persons have expressed great concern that the United Nations, under which the Korean action was carried out, has not taken effective steps to secure the release of these men and others who are being illegally held.

Because the attention of the United Nations has been directed to other matters, which perhaps in a sense are more urgent, and which temporarily have caused the subject of the American prisoners to be laid aside, I did not want the occasion to pass without expressing the view that the United Nations should not feel that the Congress of the United States, the Government of the United States, or the American people intend to remain silent while the United Nations is endeavoring to decide that a violation of the armistice is worthy of the taking of some effective steps.

HANDLING OF WELFARE AND PENSION PLANS

Mr. BENDER. Mr. President, I should like to commend the Senate Committee on Labor and Public Welfare and the Senator from New York [Mr. IVES] for the fine, well-balanced report which has been filed as a result of the Ives subcommittee's investigations into the handling of welfare and pension plans.

It is a report that points up the responsibilities of labor union officials, representatives of management, and of insurance companies in safeguarding funds which have been earmarked for millions of members of labor unions throughout the Nation.

These funds have been set aside as a result of collective bargaining. They are dedicated to the purchase of health and welfare insurance or pensions for the workingmen and their families. It is a serious offense when these funds are depleted through mismanagement, or just plain dishonesty.

The law now provides for trustees to guard these funds—trustees named from the ranks of labor and from management. However, as President Eisenhower stated in his message to Congress of January 11, 1954:

> These standards are not adequate to protect and conserve these funds that are held in trust for the welfare of individual union members. It is my recommendation that Congress initiate a thorough study of welfare and pension funds covered by collective-bargaining agreements, with a view to enacting such legislation as will protect and conserve these funds for the millions of working men and women who are the beneficiaries.

As a Member of the House of Representatives, I had the opportunity to become familiar with this problem. As chairman of a House Government Operations Subcommittee, I conducted investigations that touched on this problem in Minneapolis, Minn., Cleveland, Ohio, Chicago, Ill., and here in the District of Columbia.

Those investigations were in the broad field of labor racketeering, but invariably our investigators ran across the trail of a new racket, namely, the looting of health and welfare insurance funds and pension funds. Because of a jurisdictional problem, my Government Operations Subcommittee did not find it possible to delve deeply into all of the indications of corruption or loose management of union health, welfare, and pension funds.

I recommend that Senators read the Ives report, as well as the hearings and reports of House committees which went into this subject.

In the investigations to date the surface has only been scratched, but I am sure that any Senator who reads the hearings will be as shocked as I was at the loose handling of these funds.

I was disturbed that insurance agents and brokers would engage in questionable practices to get the job of writing health and welfare insurance policies.

It irked me to find that many employers who were named as trustees were not fulfilling their responsibility, but were allowing the vast sums collected to come under the full control of a few labor leaders.

I was shocked when I found that powerful and influential labor leaders were not doing their utmost to obtain for their union members the maximum benefits from the funds which had been obtained

in collective bargaining for pensions or welfare funds.

The money belongs to the union members—the workingmen. However, a few labor leaders refuse to tell their membership how these funds are handled, who gets the big fees, and who is borrowing money from the funds.

In Minneapolis, my investigators found that Eugene Williams, business agent for Local 544 of the Teamsters, had borrowed $10,000 from a pension fund created for union members. Williams and several members of his family were receiving regular paychecks for administering the fund.

It amazed me when Eugene Williams claimed the protection of the fifth amendment when he was questioned relative to the $10,000 he borrowed from a union pension fund.

It shocked me when an international vice president—Sidney L. Brennan—refused to tell a committee of Congress anything about the positions he held as trustee of pension or welfare funds.

Williams and Brennan were within their rights in pleading the constitutional privilege of the fifth amendment when they felt their testimony might implicate them in crimes. But it is a sorry situation, indeed it is a shocking situation, when highly placed officials of a labor union refuse to testify when there are indications that the pension funds or welfare funds of their union members are being dissipated either by mismanagement or corruption.

It is not a partisan matter when union officials refuse to tell how they are handling the funds established for the benefit of union members. This is not a question of being prounion or antiunion. It is a simple question of honesty.

I am sure that every Member of this body is interested seeing to it that the welfare and pension funds are protected so that they may bring the greatest benefits to the union members.

I am hopeful that the Senate Committee on Labor and Public Welfare will find it possible to pursue the mismanagement in Minneapolis and in other parts of the country, so that the evil will be dramatized, and labor union members, the general public, and Congress will be able to see the full import of this activity. Then it will be stamped out.

In connection with my statement on this subject, I was pleased to read in the newspapers today an Associated Press dispatch indicating that the A. F. of L. has shown its interest in this question, and that a number of responsible labor leaders have indicated that they want this matter checked fully. That manifestation, which has recently developed, is to be commended, and I hope it will be pursued by the union executives. I trust the matter will be aired fully by proper committees, not only of the other body of Congress but of the Senate as well.

ADJOURNMENT TO FRIDAY

Mr. STENNIS. Mr. President, if no other Senator desires the floor, I, as the acting majority leader, expect to move that the Senate adjourn until next Friday at noon. I shall withhold the motion for the time being, so Senators who desire to do so may indicate that they wish to speak.

Apparently no Senators now desire to speak. Therefore, Mr. President, I move that the Senate adjourn until Friday next at 12 o'clock noon.

The motion was agreed to; and (at 1 o'clock and 6 minutes p. m.) the Senate adjourned until Friday, February 18, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 15, 1955:

DEPARTMENT OF THE NAVY

Rear Adm. James S. Russell, United States Navy, to be Chief of the Bureau of Aeronautics in the Department of the Navy for a term of 4 years.

DEPARTMENT OF COMMERCE

Louis S. Rothschild, of Missouri, to be Under Secretary of Commerce for Transportation.

NATIONAL LABOR RELATIONS BOARD

Boyd Leedom, of South Dakota, to be a member of the National Labor Relations Board for a term of 5 years expiring December 16, 1959, vice Albert Cummins Beeson, term expired.

DISTRICT OF COLUMBIA REDEVELOPMENT LAND AGENCY

John A. Remon, of the District of Columbia, to be a member of the District of Columbia Redevelopment Land Agency for a term of 5 years from March 4, 1955. (Reappointment.)

IN THE ARMY

Maj. Gen. Laurin Lyman Williams, O8425, United States Army, for appointment as Comptroller of the Army, with the rank of lieutenant general and as lieutenant general in the Army of the United States, under the provisions of sections 504 and 515 of the Officer Personnel Act of 1947.

The following-named officers for promotion in the Regular Army of the United States, under the provisions of sections 502 and 508 of the Officer Personnel Act of 1947. Those officers whose names are preceded by the symbol (×) are subject to physical examination required by law. All others have been examined and found physically qualified for promotion:

To be first lieutenants

×Aiken, Francis J., Jr., O65919.

EXTENSIONS OF REMARKS

Fewer Jobs, the Same Production

EXTENSION OF REMARKS

OF

HON. PAT McNAMARA

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES

Tuesday, February 15, 1955

Mr. McNAMARA. Mr. President, I ask unanimous consent to have printed in the RECORD a comment about the sharp decline in employment in manufacturing industries revealed by figures from the Department of Labor and by Federal Reserve Board data. These figures show a loss of more than a million jobs among production workers in manufacturing employment alone in the past 14 months.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MCNAMARA

The Federal Reserve Board index of manufacturing production for January of this year was the same as in November 1953, 14 months before. The index number was 132.

The dramatic and challenging thing about this figure is not alone the evidence that manufacturing production is in the doldrums. When this index is placed beside the Department of Labor employment figures for the same 2 months, the data show that this level of production has been maintained with a loss of more than a million jobs among the production workers in these industries. In January 1955, about 12½ million workers were able to produce as much as 13½ million produced 14 months before.

Employment drops while production is maintained, manufacturing industries

Date	Index of production [1]	Production worker employment [2]	Index of man-hours [2]	Indicated output per man-hour
November 1953	132	13,534,000	110	120
January 1955	132	12,528,000	102	129
Change	0	1,006,000	(3)	(4)

[1] Federal Reserve Board of Governors; monthly releases.
[2] Department of Labor, Bureau of Labor Statistics; monthly report on employment and earnings.
[3] Minus 7 percent.
[4] Plus 8 percent.

Taking into account the number of hours worked, we find that the number of man-hours put into the job has declined by 7 percent. Those who prefer to talk in terms of man-hour output will find that there has

been an increase of about 8 percent during this short time.

I think these figures show very dramatically how fast our technological revolution is moving.

I would like to see evidence that the administration is conscious of what this means, and has the plans to turn this technological progress into higher living standards for all people, instead of for only those lucky enough to keep their jobs. I hope there are plans for protecting the workers whose jobs are melting away, so that they and their children are not forced to pay a heavy price in unemployment and the destruction of their living standards. So far, I have seen no such plans.

The job is not an easy one. If the administration takes it on, it will have the sympathy and help of all of us. If the administration continues to fiddle with optimistic forecasts about increasing production while unemployment continues to grow in our major industries, the cost to all of us will be great.

Why VEPCO Wants TVA Sold

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE SENATE OF THE UNITED STATES

Tuesday, February 15, 1955

Mr. KEFAUVER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement I issued discussing the action of Virginia Electric & Power Co. in circulating Dean Clarence Manion's proposal that TVA be sold.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KEFAUVER

A shareholder of the Virginia Electric & Power Co.—known as VEPCO—has sent me a piece of literature being circulated by the company among its shareholders.

It consists of a printed copy of an address delivered by Dean Clarence E. Manion on last November 28, in which he urges the immediate sale of TVA, recalls that he once before proposed this before he was fired as Chairman of the Intergovernmental Relations Commission, after which President Eisenhower said he was "shooting from the hip," and stated that if this "be treason to the TVA brand of socialism, then Senator KEFAUVER can once more make the most of it."

In their letters to the shareholders J. G. Holtzclaw, president, and D. C. Barner, chairman of the board of VEPCO, refer to Dr. Manion's address as a "forthright statement of facts," and a statement of "the fundamentals of the American way of life."

The statement is not a statement of facts by any means, but I believe the shareholders of VEPCO, and even more the ratepayers of VEPCO, would be interested in why this utility wants the TVA sold.

One can get an inkling of why by examining their rate structure. VEPCO users in Alexandria, for instance, pay $7.25 per 250 kilowatt-hours, while right across the Potomac River in Washington—an actual stone's throw for George Washington according to legend—ratepayers of another private utility pay $5.84 for the same amount.

At the other end of the VEPCO system, the TVA end, the same bill for TVA users is $5. Naturally, along with their allies on the western side of TVA—the Dixon-Yates combination—VEPCO is set on destroying this example of what is a fair bill for power.

Prior to merger of the two companies which formed VEPCO—and took over substantial domination of power in Virginia—the Federal Power Commission required them to write off more than $28 million of inflationary items—mostly water—on their books. "Inflationary items" is another way of saying items used for the purpose of building up a high-rate structure and milking the public.

That the day of inflationary items is not entirely over would be indicated by the fact, which also should be called to the ratepayers' attention, that they pay for the printing and mailing of the misleading and nonfactual propaganda which I am talking about when they pay their power bills. It all becomes a part of the expense of operation.

It might also be mentioned in passing that this propaganda being circulated by VEPCO, while so many of our friends are out making speeches eulogizing Abraham Lincoln, is the statement of a man who says he doesn't agree with Lincoln.

On the broadcast at which Dean Manion proposed sale of the TVA, he was asked by Mr. William Wise, one of the panel: "Dr. Manion, I wonder if you agree with my favorite Republican of all times that the Government should do for the people that which they cannot do for themselves or that which they cannot do so well for themselves; I refer, of course, to Abraham Lincoln."

And Dr. Manion's reply was: "No. I do not agree with Abraham Lincoln."

Apparently VEPCO doesn't either.

It is highly important that the Senate Antimonopoly Subcommittee, which did such fine work in this field under the chairmanship of Senator WILLIAM LANGER last year, move rapidly ahead with the investigation under Senator HARLEY KILGORE'S chairmanship this year, and I am confident it will.

A thoroughgoing inquiry should be made into possible savings of hundreds of millions of dollars annually to the ratepayers of the Nation.

Fifty-seventh Anniversary of the Sinking of the Battleship "Maine"

EXTENSION OF REMARKS

OF

HON. FREDERICK G. PAYNE

OF MAINE

IN THE SENATE OF THE UNITED STATES

Tuesday, February 15, 1955

Mr. PAYNE. Mr. President, I ask unanimous consent to have printed in the RECORD a brief statement I have prepared on the 57th anniversary of the sinking of the United States battleship *Maine*, in Habana Harbor.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR PAYNE ON THE 57TH ANNIVERSARY OF THE SINKING OF THE BATTLESHIP "MAINE"

Today is the 57th anniversary of the sinking of the battleship *Maine* in Habana Harbor. It was a peaceful Sunday evening when an explosion tore that great ship apart as it lay peacefully at anchor. Two hundred and sixty-six officers and men died in that tragic event.

The *Maine* was in Habana on a friendly visit to protect American interests while the people of Cuba struggled for independence against tyranny.

A great wave of patriotic fervor swept the country. The sinking of the *Maine* aroused and united the Nation to intervene and help the Cubans gain their freedom and independence. The cry "Remember the *Maine*" echoed across the land.

The Spanish-American War was our first overseas war in the cause of freedom. In the past 57 years Americans have fought and given their lives for the cause of freedom in the fields of Flanders and on far off Pacific isles in world wars and police actions.

Today, four veterans of the Spanish-American War still serve in the Congress of the United States. Three are Members of the Senate—the Senator from Pennsylvania [Mr. MARTIN], the Senator from Rhode Island [Mr. GREEN], and the Senator from West Virginia [Mr. NEELY]. One is a Member of the House—Representative BARRATT O'HARA, of Illinois.

It is particularly fitting today that we pay tribute to those who lost their lives on the valiant *Maine* and to all those who served in our Volunteer Army in the Spanish-American War. They served the cause of freedom well. Oppressed people everywhere can take courage from the fact that the spirit of the *Maine* lives on in America today.

HOUSE OF REPRESENTATIVES

WEDNESDAY, FEBRUARY 16, 1955

The House met at 12 o'clock noon.

The Very Reverend Francis M. Juras, St. Francis Church, Lawrence, Mass., offered the following prayer:

O God, the supreme Lord of the world and the sovereign ruler of mankind, enlighten our minds that we may know the way to Thy peace and strengthen our souls that we may firmly follow in pathways of justice and charity.

Give an abundance of Thy wisdom, prudence, and fortitude to discover what is best for the welfare of our country and of the world.

As the ruthless forces of atheistic communism seek to extinguish the flame of freedom in the hearts of men and the dark clouds of war threaten to black out our entire world, when the freedom loving people of Lithuania and many other enslaved nations mourn under the bondage of heartless communistic regime and many souls are disturbed by fear and uncertainty of the future, we pray Thee, O most merciful Father, to direct our President, presiding officers, Members of Congress, and all others, who share with them the responsibility of leadership, to bring light to those in darkness, relief to those in chains, and freedom, peace, and happiness to our troubled and tortured world. Amen.

The Journal of the proceedings of Monday, February 14, 1955, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries, who also informed the House that on February 15, 1955, the President approved and signed a bill of the House of the following title:

H. R. 587. An act to provide that persons serving in the Armed Forces on January 31, 1955, may continue to accrue educational benefits under the Veterans' Readjustment Assistance Act of 1952, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 83. Concurrent resolution authorizing the printing of additional copies of the hearings on H. R. 1.

The message also announced that the Vice President had appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 55–7.

TRUE INDEPENDENCE FOR LITHUANIA

Mr. SEELY-BROWN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. SEELY-BROWN. Mr. Speaker, it seems appropriate, on the 37th birthday of Lithuania's emergence as a free and independent nation after many years of subjection, to pay a deserved tribute to the brave men and women of that noble country now behind the Iron Curtain, as well as to those in our country who are bound to Lithuania by ties of blood and affection.

The tragic facts about the impressment of the Baltic countries in the orbit of Soviet imperialism, some of which are known in many details by families in the United States who have loved ones in the homeland, are about to be brought out for all the world to know by a committee of the House of Representatives.

We know, in general, what has been done. We can suspect the details of what is going on in Lithuania today.

We know, too, that the wicked and shameful acts which are but a small part of the whole story of aggression by Soviet imperialism are piling up a debt, not in dollars, but in human misery, which must be discharged on that day of reckoning which surely is to come.

I am sure that I speak for the people of my district, as well as for the people of my State, where those who are of Lithuanian birth represent the ninth largest group of foreign-born citizens, when I express assurances of continued sympathetic interest in the cause of true independence for Lithuania, and the determination of our people, as well as those of Lithuania, to strive with every practical resource to achieve it fully at the earliest date.

LITHUANIAN INDEPENDENCE

Mr. CARRIGG. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CARRIGG. Mr. Speaker, as we recall the early history of our own country, however great were the hardships the early settlers endured, however unbearable were their sufferings, the idea that at one time America would be a fine country was never eradicated from their minds.

We are sure that such thoughts run through the minds of the Lithuanian people today, and years of oppression have never dimmed their desire for freedom.

Taking this page from our history, today we send our warm and heartfelt greetings to our Lithuanian friends, and we bid them take courage, for one day with God's help and the prayers of their American well-wishers, their aspirations will be realized.

VETERANS OF FOREIGN WARS FIVE-POINT PROGRAM

Mr. MOULDER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. MOULDER. Mr. Speaker, many Members of Congress enjoyed the annual congressional dinner sponsored by Veterans of Foreign Wars of the United States. It was my honor to be one of the guests of the Missouri Department of the Veterans of Foreign Wars and enjoy the dinner at the table with the Missouri delegation composed of Primus F. Majda, State commander; J. C. Bosch, adjutant quartermaster; Steven Maravick, of St. Louis; John Skriski, of St. Louis, and Eugene Wilder, of Ste. Genevieve.

Mr. Speaker, I am proud to present to Congress the following five-point national security program of the Veterans of Foreign Wars:

THE VETERANS OF FOREIGN WARS FIVE-POINT NATIONAL SECURITY PROGRAM

Without adequate security, all other American values, including representative government, individual freedom, social benefits, and economic resources would be jeopardized.

Members of the Veterans of Foreign Wars, as citizens and taxpayers, insist on intelligent economy in the operation of government but oppose pinch-penny economy at the expense of security for the United States and care for those who have borne the brunt of battle, and their widows and orphans.

The following VFW five-point program is themed to that objective:

1. Security for the United States: A free economy, social benefits, and economic resources—

(a) To adopt a system of universal military training or, in lieu thereof, a workable reserve program by amendments to existing law.

(b) To maintain the most powerful offensive and defensive Air Force in the world, together with an adequate Army, Navy, and Marine Corps.

(c) To promote stockpiling of strategic and critical materials.

(d) To support the National Guard plan of defense against sneak enemy air attacks.

(e) To enforce the Monroe Doctrine if and when any foreign nation intervenes in the internal affairs of any nation of the Western Hemisphere.

(f) To develop a strong merchant marine.

(g) To encourage participation in civil-defense programs.

2. Veterans' rights: Recognition for service to security—

(a) To maintain and expand the VA hospital and medical program so as to insure to veterans of all wars adequate hospital care and medical treatment.

(b) To develop plans for educational and vocational training for dependent children of deceased veterans.

(c) To increase rates of compensation and pensions; liberalize pension eligibility requirements, including VA regulations on unemployability; and reaffirm the traditional VFW demand for liberalized World War I pension.

(d) To protect and strengthen veterans preference in Federal employment, together with a demand for sufficient funds, properly allocated, to be made available for public employment agencies.

(e) To establish a standing committee on veterans' affairs in the United States Senate.

(f) To liberalize and protect housing loan programs.

3. Armed Forces personnel: Adequate and competent personnel, with good morale, promotes security—

(a) To renegotiate any treaty with a foreign nation under which members of the United States Armed Forces serving therein are subject to criminal laws and trial in foreign courts with respect to offenses committed against foreign citizens or foreign property.

(b) To restore benefits previously granted members of the Armed Forces and to expand hospital and medical care for their dependents.

(c) To seek release of all Americans held as prisoners of war by the Communists.

(d) To study benefits provided under Federal law for the surviving dependents of deceased members and former members of the Armed Forces.

(e) To effectuate a program to fortify servicemen against enemy brainwashing.

4. Americans: Promotes internal security—

(a) To maintain the sovereignty of the United States through opposition to all efforts to convert the United Nations into some form of world government or Atlantic Union.

(b) To use vigilance in combating Communist infiltration and subversion in all phases of American life.

(c) To tighten Government regulations on security risks.

(d) To oppose admission of Red China to the United Nations.

(e) To prevent international treaties and executive agreements from superseding the United States Constitution and domestic laws unless implemented by legislation approved by both the United States Senate and the House of Representatives.

(f) To designate, by Federal legislation, May 1 of each year as Loyalty Day.

5. Domestic economy: A strong domestic economy depends upon and promotes security—

(a) To provide full productivity and employment through the construction of highways, schools, hospitals, and other projects in the public interest.

(b) To conserve and develop the natural resources of the United States.

(c) To provide for the creation of a self-liquidating Veterans' Employment and National Development Corporation for the purpose of creating jobs and economic opportunities through broad lending powers and technical service to self-liquidating projects and business that will agree to employ veterans and to qualified veterans themselves.

(d) To provide adequate loan funds and personnel to enable a greater number of worthy and qualified veterans to become established on farms.

THE CONGRESSIONAL SALARY ISSUE

Mr. POLK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. POLK. Mr. Speaker, I am opposed to the provisions in the bill H. R. 3828 which will increase the salaries of Members of Congress by $10,000 per year, and I shall vote "no" on this bill when it is considered in the House of Representatives.

I shall also vote "no" on any proposal to increase congressional salaries when so many of our people are overburdened by heavy taxation and so many persons are struggling to support themselves and their families on reduced incomes due to the agricultural depression and industrial unemployment.

I realize that many cogent arguments can be made in support of some salary increases for Members of the legislative branch of the Government, but the amount of salary increase specified in the bill H. R. 3828 for Members of Congress seems to me to be very extravagant.

I am well aware that the cost of living has increased substantially since 1946 when the present congressional salary schedule was established. However, the cost of living has not increased by an amount sufficient to warrant the very substantial salary increase carried in this bill.

The portion of the bill which relates to the salaries of judges of Federal courts and United States attorneys, I believe should have been considered separately and apart from congressional salaries.

From the information I have, judicial and attorneys' salaries are presently far too low and I have no objection to the parts of the bill which relate to salary increases for Federal judges and United States attorneys.

COTTON ACREAGE ALLOTMENT

Mr. ROBERTS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. ROBERTS. Mr. Speaker, I appreciate this opportunity to call the attention of the Members of the House to the serious nature of the cotton acreage allotment program and the way in which cutbacks in cotton acreage allotments are being made. Many of the cuts which are being made, though perhaps small in the total number of acres, represent a very big loss to the small farmers and are resulting in a serious social problem.

This problem is caused partially by the fact that the Department of Agriculture in making acreage cuts is taking some of the cutback from the planted acres of 1954 instead of only from the allotted acres of 1954.

As an example, let me use a county in my own district—Talladega. Talladega's allotted acres for 1954 totaled 18,000. Its planted acres in 1954 totaled 14,500. The Department of Agriculture has now allotted it 14,000 acres for 1955. In my opinion the cut should have been taken only from the allotted acres figure of 1954—18,000—instead of taking some cut in the actual planted acres of 1954—14,500.

The average cut in the Cotton Belt has been about 12 percent. If a 12-percent cut were taken from the figure 18,000, it would result in 15,840 instead of the 14,000 which the Department has allotted. This would mean an increase over the present allotment of 1,840 acres. The sum of 1,840 acres divided into the 4- and 5-acre farms would mean that about 300 farms in Talladega County could get some cotton and it would alleviate the present necessity for these destitute farming families to depend on Government rations. The extreme cotton acreage cuts which the Eastern Belt has had forced upon it are resulting in an unpleasant social problem of displaced farmers.

I want to take this opportunity to commend the gentleman from Arkansas [Mr. GATHINGS] and his colleagues on the Agriculture Committee for the action taken in reporting out favorably a bill to insure a minimum of 5 acres to each cotton farmer.

It is my understanding that the Gathings bill embodies the principles of the bill which I have introduced, House Joint Resolution 130, along with other Members from the South, which would increase the 1955 cotton allotments on farms receiving 5 acres or less. I feel that this resolution may do much to help the small, suffering farmer and I sincerely hope that it will soon have the favorable consideration of the Comittee on Agriculture and the full House of Representatives.

AMENDMENT TO ROBINSON-PATMAN ACT—EQUALITY OF OPPORTUNITY BILL

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, January 5 of this year, I introduced H. R. 11, a bill to strengthen the Robinson-Patman Act. Forty-six Members of the House joined me as coauthors and cosponsors. My statement concerning the new bill and the list of coauthors and cosponsors appear on pages 128 and 129 of the January 6 CONGRESSIONAL RECORD.

On January 6, Senator ESTES KEFAUVER, of Tennessee, on behalf of himself and 29 of his colleagues, introduced an identical bill, S. 11, in the Senate.

Since that time, interest in this proposed legislation has increased daily. From every section of the country I have received communications favoring the bill and urging its early passage. Many Members of Congress have assured me of their full cooperation.

Following is an additional list of Members of the House, who have joined us as coauthors and cosponsors: JOHN A. BLATNIK, Minnesota; DANIEL J. FLOOD, Pennsylvania; HENRY S. REUSS, Wisconsin; KENNETH A. ROBERTS, Alabama; WALTER ROGERS, Texas; B. F. SISK, California; and HARRISON A. WILLIAMS, JR., New Jersey.

The following Members have introduced similar bills themselves: LESINSKI, H. R. 2611; HOLIFIELD, H. R. 2850; WILLIAMS of New Jersey, H. R. 2690; CURTIS of Missouri, H. R. 89; ROGERS of Colorado, H. R. 1840; and DAWSON of Utah, H. R. 2577.

Additional lists will be inserted in the RECORD as the names are received.

SPECIAL ORDER GRANTED

Mr. BASS of Tennessee asked and was given permission to address the House for 30 minutes on Monday next, following the legislative program of the day and the conclusion of any special orders heretofore entered.

JUDICIAL AND CONGRESSIONAL SALARIES

Mr. DELANEY. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 141) providing for the consideration of the bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. No amendments shall be in order to said bill except proposals to strike out any of its provisions or to increase or decrease the amounts authorized therein. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. DELANEY. Mr. Speaker, I yield one-half of my time, 30 minutes, to the gentleman from New York [Mr. LATHAM]. I now yield myself such time as I may consume.

Mr. Speaker, House Resolution 141 makes in order the bill H. R. 3828, the salary-increase bill. This bill provides increases for our Federal judges, for the Members of Congress, and for other committee members. The rule provides the right to raise or lower the amounts included herein, and also to strike out any

section in the bill. I do not have to extoll the merits of this bill. An independent committee appointed to fix salaries of Congressmen and judges came back with the findings that the salary of Members of Congress and Federal judges should be $27,500. However, the bill calls for a salary of $22,500 for Members of Congress and Federal judges. For members of the United States Supreme Court it goes as high as $35,000.

It also provides for salary increases for members of the Department of Justice, mainly United States attorneys and assistant United States attorneys, on a sliding scale.

I know of no objection to the rule. It provides for 2 hours' general debate. I urge the adoption of the rule and I urge the final passage of the bill.

Mr. Speaker, I reserve the remainder of my time.

Mr. LATHAM. Mr. Speaker, I yield myself such time as I may require.

As the able gentleman from New York [Mr. DELANEY] has said, the provisions of this bill are very simple and very clear. They provide increases for Federal court judges and for attorneys general, and for Congressmen. I think the membership of the House, at least in this instance, is presumed to have some degree of familiarity with the terms of the bill, because they have been discussed in the newspapers, and no long discussion about them is required at this point.

Certainly in the case of Federal court judges, this Congress has been lax for many years in not raising their salaries. In New York a State judge, with corresponding jurisdiction, receives $32,500 a year, while Federal court judges receive a mere $15,000. We all know that attorneys general of the United States who represent the United States in the courts of our land must be able men, and should be adequately compensated for their work. They have to face in the courtrooms some of the best and highest-priced lawyers in the country.

As far as congressional salaries are concerned, we know that the expressed opinion of most newspapers, and of the special Commission appointed in the last Congress, and of the President himself, has been almost unanimous that the Congress should tackle the problem of congressional salary increases.

Mr. Speaker, I urge the adoption of the rule.

I now yield such time as he may consume to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I do not know of any particular reason why I should be among the first to take part in this debate except possibly because in the last Congress I was majority leader when we enacted legislation that provided for the creation of a commission to make recommendations on this very important matter.

Another reason that would be of interest only to my colleagues and my side of the aisle is that I am going down to the Statler Hotel with some of our folks who raise the money to help Republicans win elections. So I hope you will approve of my leaving, although I will be back for the vote.

It is an unfortunate fact, in a way, but true, that the Congress of the United States as the legislative branch has the responsibility of fixing the pay of all of the people in the Government, including our own. We fix the pay of the President, the Vice President, the people in the executive department, and the people in the judicial branch. Because we have that responsibility of fixing our own pay, of course any time we seek to increase it there will be those who will say, "You should not do it."

There was one well-meaning person, who does not even live in my district, who wrote me saying that this matter should be submitted to a referendum of the people of the United States. I do not think it would take much calculation to figure that that would cost more to the Government, or to somebody, than this increase would cost if it were in effect for a hundred years. So of course that is a completely unreasonable attitude to take.

However, we know that the people in the State legislatures confront the same problem. I have noticed on many occasions they have met the issue with fairness and, may I say, with courage; and I have not noticed any particularly bad repercussions in any direction.

Another thing that has been said is that the percentage increase is greater than some other percentage increase of somebody else in the Government. I have done some checking on that. The clerks in our offices have had 4 or 5 of those percentage increases since we have had any. Most of the people in the Government likewise have had increases. I know within my own personal experience that the congressional pay has not kept pace.

We also know that in recent years many, many people in responsible positions have recommended this action. Presidents have recommended it; President Eisenhower has very vigorously recommended it, and has said to us many times that he is perfectly willing to do anything that is necessary to bring about a proper understanding if that should be necessary.

The Hoover Commission is one of the bodies that favors an increase in pay for Members of Congress. Labor organizations, farm organizations, and all people, so far as I can discover, who have given serious consideration to the matter have come to the conclusion that an increase should be voted. We recognized that last year. There were some who thought we should meet it with direct action, but finally it was decided that it might be well, since the initial responsibility is on us, to bring about the creation of a Commission of public-spirited citizens, people with no ax to grind, who would thoroughly go into the matter and come up with a recommendation. That Commission was appointed; it did a magnificent job. They held exhaustive hearings; they had people from all walks of life, all segments of the economy from all over the country appear and testify; and this Board made the recommendation that the pay be increased to $27,000 a year.

The committee having this matter in charge has given it careful study. They have not seen fit to recommend an increase to the extent that the Commission recommended—and I find myself in no position to quarrel with that. The gentleman from New York [Mr. LATHAM], has spoken of the necessities of the judges, and I think there, too, we must be very well convinced that their pay scales have fallen below what they should be.

If you will pardon just a personal reference, my district in Indiana honored me 20 years ago by sending me down here, and I have been here through the years since. Our twins then were 5 years old; they had not started school. I know something of the struggle it is to maintain two homes, to educate your children. You get to the point after they get in the fourth or fifth grade where you cannot have them in school part of the year in Indiana and the rest of the year in Washington; you have got to have them in school one place or the other, and that further complicates the matter. Those youngsters, of course, are grown now, but as I consider this matter I do look at it from my own personal position. I was fortunate enough to buy a couple of good farms out in Indiana years ago, when property was cheap, and I can make a few speeches for a fee now and then—but there are lots of people who do not look with too much favor on that—so Mrs. Halleck and I can make out. But I look around here and see this Chamber filled with young fellows who are facing the same problems that we faced, and for them, certainly, the doors of the Halls of Congress of the United States should not be closed.

The salary was $10,000 when I came here. I got out one of my returns to see the taxes I paid then. Why, it was a revelation. I had forgotten. I am not going to quote the figure except to say that the increase to $12,500 has been more than cancelled out by the additional taxes that I have to pay. We all understand and know that our costs have gone up as have the costs of everybody else. With two homes—I have one in Indiana and one in Washington, and every winter the fires burn in both and I pay the bill—some people might say: "Move to Washington, give up your Indiana house." Well, that would mean I would not come back here. A Member has to have a home in both places.

Finally, I do not think our people expect us to live in any sort of manner except one in keeping with the position we hold. I do not object to spending a little money on my constituents—I like to, I am happy to do it—but the plain fact remains it does cost a little money.

I do not think our people want this to be a rich man's club. I think they want the salaries to be somewhere near commensurate with the duties and responsibilities of our job and the necessities of our job and the expenses incident to the carrying on of our jobs.

Again referring to the time 20 years ago when I first came here, we had difficult problems to face in the Congress, but the sessions were much shorter. However, they lasted long enough that I had to completely forego my law practice. I have not made a single fee for legal services since I came to Congress

and I had been doing pretty well before I came here. Even at the risk of inviting somebody to run for this job of mine on the basis of what I have said—I think about everybody here could make a pretty good living doing something else, and most of them did before they came here or they would not be here—it just gets down to this: I do not believe we should devalue our own services to the Government. I think we ought to be fair with ourselves as we have tried through the years to be fair with everyone else.

As far as I am concerned, I propose to vote for this legislation. I take it that the bill is open for amendment if there are provisions which are not acceptable. As I understand the rule, any such provisions can be eliminated from the bill. But for myself, I sincerely hope that insofar as these principal provisions are concerned, the pay for Members of Congress and the judges of the United States District Courts, there shall be no departure from the recommendations that have been made.

Mr. DELANEY. Mr. Speaker, I yield 10 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, I recognize that it is somewhat difficult for Members of Congress to vote in favor of raising their own salaries. It is not a pleasant thing to do. But the responsibility is placed upon us by the Constitution of the United States. The only question is whether we believe that it is in the best interest of the country that the salaries of the men and women who represent this great Nation in Congress shall be raised.

Personally, I think that the salary ought to be at least $25,000 a year for a Member of Congress. I wrote an article in October last for the Saturday Evening Post in which I set forth my reasons for believing that Members of Congress should receive $25,000 a year. The letters I received were all in support of the views which I expressed. I believe that the overwhelming majority of the people of the State of Texas that I have the honor to represent in this body expect me to vote for a living salary.

I came here first in 1931, at which time we were paid $10,000 a year. My income tax at that time was about $200 a year, which left me $9,800. That was equivalent to about $25,000 a year today in terms of the purchasing power of the dollar. I bought a home for $8,800 at that time which would cost $25,000 or $30,000 today. Unfortunately, when I left Congress in 1945 I sold it for a small profit.

During the 14 years I served in Congress, I never received a dollar's contribution from any source. I had made some wise investments before I became a candidate for Congress, and I made some money, and, fortunately, while I was in this body I was able to supplement my income by lecturing and by writing. But I know what the average Member of Congress faces. I know what a Member with 4 or 5 or 3 or 2 children and a wife faces in an attempt to live upon the salary today.

Now, if you raise the salary to $25,000, that is, $22,500 and $2,500 expense, you are simply placing the Member of Congress in the same financial position he was in in 1931. In fact, I think that the dollar has depreciated more than 50 percent in respect to some things—houses, food—and perhaps, on the whole, 50 percent as stated by the Government is correct.

Now, I know there are those who hesitate to vote because they fear some demagog in the district will take advantage of it. Well, I am not the best politician in the world, but I think the way I am going to answer that is to say, "Well, I think I am worth $25,000, and the man who does not think he is worth $25,000 should not vote for the bill and should not take the increase." I do not want this House to become a rich man's club or the stooges of rich men. I think the interests of this Nation will be promoted by giving the Members of Congress a living wage.

Now, there are many in this House who are worth far more than $25,000. I never did consider myself a very great lawyer; as a matter of fact, I am not. But, when I left the Congress, the first year I practiced law I made four times as much as I did in this body, and I know there are many Members in this body who are abler than I am. There are men with whom I have been associated many years who, in any industry, in any corporation of this country, would be a tremendous asset; men who have devoted their years, their efforts, their abilities to the understanding of great public issues, and I do not pretend that we ought to pay those men what they are worth. No one expects us to make a lot of money in politics. We cannot do it honestly. It is like a preacher's profession. If you are going to preach or try to follow a political career, you ought to expect simply a decent living. But, when I see young doctors in my hometown the third year of their practice make 2 or 3 times more than I am paid for representing a great State, perhaps the greatest in the Union, I feel, Mr. Speaker, sort of an inferiority complex, and I know that the people of my State expect me to exercise some courage and some decency in casting this vote.

Now, if I have got to demagog on a question as important as this to our Republic in order to stay here, then it would perhaps be better for the people of Texas to select someone else, though I think it would be most unfortunate for the State. To you Members who fear that this may be a bad political vote, I can assure you that the people will have very little confidence in you if you lack the courage to place your salary commensurate somewhat, not wholly but somewhat, with the tremendous responsibilities that are on your shoulders.

Now, I know some of my friends will say, "Well I am not going to vote for a raise until you balance the budget." I am as much in favor of balancing this budget as any man who serves in this Congress. If every Member had voted as I voted in the last session, this budget would be balanced, and I will support a program of reductions or of increased taxation, whatever is necessary, to balance the budget and prevent inflation, because I believe that of all the evils which face free government, inflation is the worst. But, you and I know that the four or five million dollars involved in this bill is not going to affect the budget one way or the other. We vote for assistants to secretaries and Cabinet officers to receive more than our own salaries.

We vote billions of dollars out of the Treasury to build things all over the world. To say that we shall not place ourselves economically in the same position we were in 15 or 20 years ago seems to me so uttery ridiculous that I am convinced that any man who votes that way will be condemned rather than praised for his action.

This is not a selfish vote on my part, because I happen to have a substantial income in addition to my congressional salary. I may not serve here long, because the Legislature of the State of Texas may redistrict the State. I am not actuated by any ulterior motive in making this speech. But I want this House to attract the best men possible. I want young men who have vigor and imagination and ability, to aspire to serve in Congress. I want it to be the greatest job in every congressional district and if, by my vote, we attract someone to succeed me, while I shall regret it very much, nevertheless I shall feel that I have served my country by making it possible to replace myself with someone who is abler than I to serve this great Nation.

I hope, Mr. Speaker, that this bill will pass just as it is written and that we will provide the $2,500 expense allowance, which you and I know is a very small amount. There is not a corporation in the country that pays such salaries to their executives. Most excutives of corporations and businesses have fat expense accounts and they have offset the depreciation of the currency by tremendous increases in salaries and bonuses. There is not a section of this country where our people are not receiving, in terms of dollars, if not purchasing power, substantial increases; some far more than others. So I think that this is a measure that is in the public interest, and I shall vote proudly for this bill.

Mr. DELANEY. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. LANE] such time as he may consume.

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, a 66⅔ percent pay raise above present salary plus allowance, or an 80-percent boost if figured on the basis of salary alone, is a leap that would arouse resentment among our constituents.

I want to make it plain, at the start, that I favor comparable increases for judges of the United States courts, and for United States attorneys, because their situation is different from ours.

We find ourselves in a position where we have the power to raise our own salaries, which is unique, to say the least.

The fact that we authorized an impartial commission to study the facts and make recommendations for an adjustment in congressional salaries, was an effort to make it acceptable to public opinion. I have nothing but the highest praise for the honesty and sincerity of the public-spirited citizens who served on the Commission. With this face-saving maneuver completed, however, we find ourselves right back where we started from. To raise or not to raise our own salaries, that is the question.

All the objective facts may be on the side of those who will vote for this measure, but the psychological reaction will not.

A number of us represent labor-surplus areas, where thousands have no income whatsoever.

Mindful of the Government's glacial indifference toward their bread-and-butter needs, we cannot, in all fairness, put our self-interest first.

If the Government had been as considerate and as prompt in supporting measures to relieve unemployment among textile workers, fishermen, miners, among others, and if it had put its weight behind a pay increase for all Federal workers, without making it contingent upon another issue, then there would be understanding and approval of a reasonable increase for Members of Congress.

As long as these conditions have not been met, we cannot go blithely forward to take care of ourselves with a king-sized pay hike.

We are not owners of a private business, or engaged in an enterprise where salaries may be increased without any regard for what outsiders may think.

Public office is a public trust.

We are servants of the people.

Of course I realize that no Member of Congress can make financial progress, or set aside something for his future, from the modest salary that he presently receives.

But I submit that our position is not similar to that of a man who is trying to make a fortune in private enterprise.

We have a duty. We enjoy the honor that goes with it. And we are receiving compensation that must seem very large to most of our fellow citizens.

As I said before, this is subject to rebuttal on the facts, but I doubt if it can be explained to the satisfaction of a husband and wife who are trying to raise a family on $5,000 a year or less. And it will not sit well with the unemployed who consider that the Government is unconcerned with their elemental problems.

I have no hesitation in saying that there has not been sufficient education of the public as to the merits of a reasonable raise for Members of Congress.

Until this is done, I believe that we should make haste slowly.

Perhaps the better approach would be to increase travel allowances, provide for extra office expenses, and legislate a formula that would set aside funds to cover a portion of election campaign costs.

To my way of thinking, the question of judicial and congressional salaries should be considered separately.

Within the field of Government itself, it can be shown that one State—New York—pays its judges more than the Federal judges receive, and by this comparison I believe that United States judges and attorneys are entitled to a substantial increase.

No similar comparison can be made concerning legislators, to demonstrate that Members of Congress are underpaid.

Therefore, I must go on record as supporting the proposal to increase judicial salaries, but must oppose the recommendation to increase the personal budget for Members of Congress.

Mr. DELANEY. Mr. Speaker, I yield 10 minutes to the majority leader, the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Speaker, there is no question but what there is a justification for an increase in the salaries of Members of Congress and the judges of the Federal courts. I do not think there is any Member who will take issue with that statement. The question is whether or not we are going to exercise that degree of judgment and courage by voting for the passage of this bill which represents justifiable legislation and which is supported by all elements of our citizenry.

On three occasions in past years I have taken the well of the House urging an increase in our salaries to $25,000.

Last year I offered an amendment to an appropriation bill to increase our salaries to $22,500 a year. When I offered the amendment I knew it was subject to a point of order on that particular bill. The point of order was made and of course was sustained; but if the point of order had not been made the amendment would have come before the Committee of the Whole.

I have complete confidence in the judgment of the American people. I have complete confidence that the great majority of our people recognize the justice of an increase in salary for Members of Congress and for the judges of the Federal courts.

I might also say that in supporting an increase as carried in the bill reported out I do not do so from any angle of complaint on my part but because I think there is a complete justification for such action on the part of the Congress.

I have been a Member of Congress for 27 years. I like public service. I like public service in the legislative or judicial branch. I prefer it to service in the executive branch. That is the way my mind thinks and operates. I like the consideration of broad legislative questions concerning our people and concerning the world. I like to feel that I am a part of it. I thank God that I have been a Member of this body for the past 27 years, and I am grateful to the people of my district for permitting me to be here. I am not afraid to go back to the people of my district in favor of a salary increase.

As a member of both branches of the Massachusetts Legislature and as a Member of Congress I have yet to vote against any bill increasing my salary, because each time it came up, whether in the legislature or in Congress, I felt that it was justified and I had confidence that the people of my district would recognize that fact.

The total increase for Members of Congress amounts to $4,527,000 a year and for members of the judiciary $2,981,000 a year. The total amount is one one-hundredth of 1 percent of the Federal budget.

The last time the salary of the Members of Congress was increased was in 1946, nearly 9 years ago. I do not think I have to argue that the cost of living has increased since then, and I do not believe I have to argue that the people of the country generally recognize that fact.

When I first came to Congress 27 years ago I did not assume office, unless a special session was called, for approximately 14 months after I was elected. When I was elected in November of one year I actually took office, as far as being physically present in the House of Representatives was concerned, a year from the following December.

We are now sitting throughout the entire year. The sessions are now continuous. We will probably sit here until sometime the latter part of July, no matter how speedily we may perform our business. When we leave here and go home, we all have our problems, not only legislatively, not only public questions, but the problems that confront us when we are at home.

I doubt that there is a Member of Congress who works less than 12 hours a day, and most of us work 16 hours a day.

The Members of this branch and the other branch, as the years progress, become experts in the different legislative fields. We must legislate on everything and be conversant with everything. In practical operation, by reason of the committee assignments we receive, we become experts in the fields of finance and revenue as members of the Committee on Ways and Means, and on agriculture in the case of the Committee on Agriculture. In connection with all the other committees, we become specialists.

We do not expect to receive the salary or the compensation of the specialist in private industry. Certainly we are entitled to receive reasonable, fair, and adequate compensation consistent with the situation which confronts us and in the interests of the country generally. It is not beyond the realm of possibility that sometime in the future unless Congress votes its Members adequate salaries that this might well become, as the gentleman from Texas [Mr. DIES] has said, "a rich man's club." I always want to see the House of Representatives representing a cross-section of American life and American thinking. I am proud of this body. In this chamber are represented all shades of opinion and thought in American life, and that is as it should be. We get a cross-section of American thinking in the House of Representatives. In our consideration of important legislation in this body, compromises are almost always made recognizing that there is logic to the positions advanced by different schools of thought represented in

this great body, schools of thought representing 165 million Americans. Thus is progress made by justifiable and reasonable compromises brought about by honest men and women honestly differing in their opinions. I never want to see the day that this great legislative body represents substantially only one line of thought in America no matter what that line of thought might be.

You and I are aware that the cost of campaigning has increased tremendously, and while that has nothing to do directly with our salaries, there is a relationship because every 2 years Members of this body must go before the people of their districts both for renomination and reelection. I would regret exceedingly if the day ever arrived when only those of substantial wealth—or another group subsidized from the outside—constituted the majority of this great body. And yet that is within the realm of reasonable probability unless we have the courage to take the action and to do the things that we ought to do, and which I respectfully submit the great majority of the people not only expect us to do but want us to do. As a matter of fact, if the bill were before the House today providing for $27,500, I would be supporting it. It is before the House today for $22,500. This is a conservative figure when compared to that which was recommended by the special commission appointed by the last Congress, and which has made its report and recommendations to the Congress of the United States. The figure of $22,500 is a compromise in committee, and I am supporting the committee report although personally I would support just as vigorously a bill carrying with it a salary of $27,500 for Members of Congress. So there is our case. There is no case against it. Under the Constitution, we should do it. I have too much confidence, Mr. Speaker, in the courage of my colleagues to think that with the justifiable case that we have, this bill will not pass this body today.

Mr. DELANEY. Mr. Speaker, I yield 3 minutes to the gentleman from Oklahoma [Mr. WICKERSHAM].

Mr. WICKERSHAM. Mr. Speaker, I think my position on this bill is known. At no time have I hesitated in my support of this legislation, which has for its purpose salary increases for the judiciary and Members of Congress. I do not believe that the American people would want the highest offices in this Government jeopardized by the loss of men and women of proper ability to adequately and faithfully serve them nor do I believe that the American people would want these high offices of honor to be bestowed upon only the very rich. I am a poor man, and I like to serve the people of my district.

Both Republican and Democratic administrations and the special Commission appointed by the President and the Congress to study and make a report on this situation have recommended the enactment of this legislation into law.

In my present district I have taken over what was formerly represented by three Members. I have 800 communities surrounded by 5 other States and 10 other Congressmen. Some of you have similar problems either in area or in population. Most of the people feel that a Congressman gets his transportation paid to and from the departments of Government on official business in behalf of his constituency. He does not. Most people think surely that a Congressman gets his printing done for nothing. He does not. Out of the $15,000 annually I have received, in the last 2 years I have had to spend all that, plus $4,900 a year, to pay the necessary expenses of running my office, without one dime of take-home pay.

Along with many other of you Members, I work 80 hours a week. I receive 9,000 letters a month. I am at the service of my people all the time, and I like to serve my people. In my case, I get the equivalent of about 1 long-distance telephone call every other day and 1 wire a day paid for by the Government for the 500,000 people I represent. It usually takes about 6 long-distance telephone calls a day and at least 6 wires a day to properly serve my constituency only in emergency matters. These 6 extra calls per day and 6 wires per day must be paid for by me personally out of my salary. Members of Congress receive an allowance for only one trip home each year. I make nine trips home a year in order to keep myself informed and to better serve my district.

In my case, I represent two-thirds of the cotton-growing area in Oklahoma, two-thirds of the grain sorghums, one-third of the cattle, one-third of the wheat, 50 percent of the soya beans, 12 Indian tribes, a big irrigation district, soil-conservation districts, a big artillery schools, 2 big Strategic Air Command bases, 211 towns and 650 farming communities, hundreds of oil wells, dozens of refineries and other strategic natural resources, as well as nearly one-half million of the finest people in the world.

During the time I have advocated this legislation in the last few days I have received very few unfavorable letters on this matter. I have received twice as many for it as those against it. One of those against it was one who thought I was using $15,000 a year for living expenses. I wish to reiterate that $15,000, plus $4,900 yearly, has been used to serve the people of my district in the last few years, and I have no private business. Consequently, I have gone into debt.

In closing, I again wish to call to your attention that the congressional district which I now represent was formerly represented by three different Members of Congress concurrently. However, due to redistricting legislation by the Oklahoma State Legislature, 2½ districts were combined into 1, and I was chosen by the people to represent this area which comprises over one-third of the State of Oklahoma and one-fourth of its population. Upon assuming the additional responsibilities that came with this enlarged territory, formerly represented by 3 Members of Congress, I did not receive any part of their official allowances, nor any additional salary or office help, even though my duties were extended almost 3 times their former scope. It has always been my policy to serve my people beyond the call of duty, and I freely tell them, "When I may be of service, just phone, wire, or write."

Mr. DELANEY. Mr. Speaker, having no further requests for time, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

ANNUAL REPORT OF UNITED STATES CIVIL SERVICE COMMISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 13)

The SPEAKER laid before the House the following message from the President of the United States, which was read; and, together with the accompanying report, referred to the Committee on Post Office and Civil Service and ordered printed with illustrations:

To the Congress of the United States:

I transmit herewith the annual report of the United States Civil Service Commission for the fiscal year ended June 30, 1954.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *February 16, 1955.*

JUDICIAL AND CONGRESSIONAL SALARIES

Mr. CELLER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 3828, with Mr. SMITH of Virginia in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule general debate is fixed at 2 hours. The gentleman from New York [Mr. CELLER] will be recognized for 1 hour and the gentleman from Illinois [Mr. REED] for 1 hour.

The gentleman from New York is recognized.

Mr. CELLER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, by this bill in general we raised the salaries of the judges of the United States courts and the Members of the House and the Senate $7,500 with few exceptions. We do not disturb the allowance made to us for expenses involving $2,500.

I herewith set forth our various salaries since 1795 to date. As standards of living and living costs advanced, our salaries were increased:

Seventeen hundred and ninety-five: $7 per day for Senators, $6 per day for House Members.

Seventen hundred and ninety-six: $6 per day for both Senators and House Members.

Eighteen hundred and sixteen: $15 per day. This sum repealed in 1817 and salary went back to $6 per day.

Eighteen hundred and eighteen: $8 per day for both.

Eighteen hundred and fifty-six: $6,000 per Congress; i. e., $3,000 per year.

Eighteen hundred and sixty-six: $5,000 per year.

Eighteen hundred and seventy-three: $7,500 per year. Repealed 1874. Salary went back to $5,000 per year.

Nineteen hundred and seven: $7,500 per year.

Nineteen hundred and twenty-five: $10,000 per year.

Nineteen hundred and thirty-three: $8,663 per year.

Nineteen hundred and thirty-six: $10,000 per year.

Nineteen hundred and forty-six: $12,500 per year plus $2,500 expense allowance.

As has been indicated, the cost of all these present increases is comparatively minuscule: They would be less than one-one hundredth of 1 percent of the entire Federal budget. The salary increases of judges would be about 2¼ million dollars, whereas the congressional increase would be a trifle over $2 million. There would be little unbalancing of budgets.

The question has often been asked: Can the Members of the House and the Senate increase their own salaries applicable to the terms of their service? To set at rest a lot of misinformation on the subject I wish to indicate that the only provision in the Constitution with reference to increasing salaries or setting salaries is to be found in article 1, section 6, which reads:

> The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States.

"Ascertained by law" means that we have the right to increase or decrease our salaries at any time. We "ascertain" and pass the law.

It is interesting to note that 12 constitutional amendments were submitted way back in 1789; 2 were rejected and 10 passed, and became the Bill of Rights. One of those rejected amendments read as follows:

> No law varying the compensation for services of Senators and Representatives shall take effect until an election of Representatives shall have intervened.

The mere fact that amendment was rejected is proof positive that we have the perfect right to increase our salaries during our term of office to cover that particular term of office.

This bill has been universally accepted. The President has approved the increase, as have the President's Commission, the CIO, AFL, the railroad brotherhoods, and the leadership on both sides of the aisle. Industry all over the land approves. Chambers of commerce, North, East, South, and West, agree to these increases. I have just been handed a wire from the American Farm Bureau Federation, addressed to me as chairman, reading as follows:

> The American Farm Bureau Federation believes that the best qualified persons should be elected to office and that they should be adequately paid. We recommend that congressional salaries be increased.
>
> CHARLES B. SHUMAN,
> *President,*
> *American Farm Bureau Federation.*

Mr. Chairman, I have lived through debates in this Congress involving two distinct increases. In 1925 we increased the salary from $7,500 to $10,000 and in 1946 from $10,000 to $15,000. I advocated the increases then, I voted for the increases at that time, and no harm came to me whatsoever in my district. I can assure you no harm will come to any Member of this House if he votes for the increase involved in the instant bill.

It has always been as hard as pulling teeth to get the membership to realize that they are entitled to additional compensation. There has always been difficulty. The occasions are piled high with difficulties, as is the situation now. But we must rise high for the occasion. I am sure all of us believe that the laborer is worthy of his hire. The Congressmen, the judges are worthy of their hire. If we deny ourselves increases, if we assume a pinch-penny attitude toward ourselves, we deny the addage that we are worthy of our hire.

Compare our work with similar work of men in industry and men in labor, and you will find we are woefully inadequately paid. In a way, we sort of treat ourselves like harridans. Such treatment must cease, and our salaries no longer should be a matter of untouchability.

We must have action now. It is either now or never.

Some say, "Let us wait until next year"; others say, "Let us wait until the 85th Congress"; others say, "Let us wait until the budget is balanced."

> "If it were done when 'tis done,
> then 'twere well
> It were done quickly."

I remember the story told about Alice in Wonderland. Alice, you may remember, attended the Mad Hatter's tea party. Alice asked the White Queen for some jam. The White Queen stated: "Jam? Jam yesterday, jam tomorrow, but never jam today."

So it is with the objectors to this bill. They want to give us a salary increase tomorrow, they want to give it to us yesterday, but they never want to give it to us today. Well, we want it today.

Who are the objectors? Objectors in and out of the House? There are always some timid souls, some Milquetoasts. They are always unduly alarmed. They are constantly seeing ghosts under the bed. There are the cynics who oppose, who always inveigh against salary increases. They weigh the cost of everything but know the value of nothing. This is what I say of those cynics who oppose: It is high time we understand the value of our own services. There are some who object out of sheer demagogery. To them I will say it is a question only of lots of sound and fury signifying nothing. Finally, there are those who are sincerely and honestly disturbed. Well, we should not be disturbed at justice to ourselves or to the judges. We should not be disturbed when we try to deal fairly with the judges and with ourselves, and to them, those who honestly fear and are disturbed, I say this—I tell them what their mother knows: "The baby that never cries never gets suckled." It is high time that this membership did some crying; otherwise they will never be suckled.

Some of these objectors remind me of a Scotch story. Jock said to his wife one night, "Well, Maggie, I think I am going to pay my respects to the neighbor on the hill"; and upon returning somewhat later, Maggie said, "Well, Jock, what kind of a man is the new neighbor?" He said, "He is a verra guid mon; a guid mon and very liberal with his liquor, but very bad quality; in fact, Maggie, the quality was so bad I nearly left some." I can assure you that those who object to this bill are not even going to leave any of the increase; they are going to take it and they are going to enjoy it; they will not leave any, I assure you.

We must adequately compensate ourselves, otherwise in time—I say in time—we shall have only two classes of Members: political hacks and the very wealthy—and then all the benefits of a cross section of democratic representation of the people will have been lost, and so with the judges—they too, finally, will only be hacks or millionaires.

Finally, a Congressman and a judge must receive such a salary as to prevent suffering of financial loss and to be able to resist severe economic pressure. The bill is a real series of compromises to enable the judge or the Congressman to resist the blandishments of pressure groups and, as well, so that finally they can have security for themselves and security for their loved ones. I personally, would want the salaries of judges fixed higher. I am realistic enough to know, however, that all progress is the result of compromise. We just could not succeed finally in getting more for the judges.

You know as well as I do that the 1954 dollar, comparing the statistics of 1939 with today, buys only about 50 percent of the value of that dollar in 1939, so in effect the judges and the Members of Congress a decade or so ago were actually receiving more money, receiving more money in purchasing power, then, than they are receiving now. We should not be able to say that the Members of Congress in 1939 or 1930 actually received more purchasing value in dollars then than they are receiving today, I hope therefore that this bill will pass intact.

Mr. REED of Illinois. Mr. Chairman, I yield myself 7 minutes.

Mr. Chairman, as ranking minority member of the Committee on the Judiciary and as the sponsor of a companion bill, I am in favor of this bill, H. R. 3828, and I hope that it will receive favorable action.

When the Commission on Judicial and Congressional Salaries filed its report at the last session of the Congress I intro-

duced a bill to effectuate that report. Despite the fact that the Commission recommended more substantial increases than are set out in the present bill, the public reaction to my bill was phenomenally favorable. Of all the letters of comment that I received, only one—I repeat, only one—was not in accord with the proposed adjustments, and that one was from a person who did not reside in my district; in fact, was not a resident of my State.

It is important that we consider this bill in an objective manner, in an atmosphere divorced from untoward fear and pressure, in conformity with our obligation as members of this great legislative body. Without exception, so far as I know, every legislative body in the United States from the Congress of the United States to municipal councils is charged with the responsibility of fixing the compensation of its own members. This responsibility is almost invariably approached with trepidation that is unbecoming to Members of the United States Congress. We must exercise our obligations as legislators without fear or favor regardless of whether the proposed legislation affects the executive, the judiciary, or the legislature. As Edmund Burke once said:

> There is a limit at which forbearance ceases to be a virtue.

Our Constitution provides that the Senators and Representatives shall receive a compensation for their services, to be ascertained by law—article I, section 6. Can we refuse to enact such a law any more than we can refuse to enact some other needed legislation merely because it concerns us personally at this moment? An outstanding commission carefully studied the situation and strongly called attention to the validity of such legislation. It is our duty to act upon the proposed legislation.

This is not a hasty or unsupported proposal. The Commission on Judicial and Congressional Salaries—from whose recommendations this bill stems—was appointed by the President with meticulous regard to representation of all facets of the American economy—agriculture, labor, the professions, and business. Few commissions have ever entered upon their task with greater talent or with more care to achieve a true understanding of the situation which would be reflected in their recommendations. The Commission deserves the gratitude of the people for a painstaking and forthright performance of its assignment.

One of the members of that Commission, Loyd Wright, is now the president of the American Bar Association, and in the current issue of the American Bar Association Journal he expresses concern because the pending bills set forth compensation less than that recommended by the Commission.

Throughout history, as today, the Congress has lagged considerably behind the rest of the national economy in adjusting its own compensation and that of the judiciary. As the Commission pointed out, in line with the recommendations of the Hoover Commission, the compensation for all other employees of the Federal Government has been adjusted upward no less than five times since the last increase for Congressmen and members of the Federal judiciary. A similar situation, as everyone is aware, exists with relation to increases by labor and business.

Recently, in reading about the time when Abraham Lincoln was a Member of this House in the 30th Congress, more than a hundred years ago, I learned that while his compensation was $8 a day there was a movement to transfer the Capital from the District of Columbia to Georgetown because at Georgetown room and board could be obtained for $8 a week instead of the prevailing $10 a week in the District. Except for 1 year, the post-Civil War congressional salary of $5,000 per year remained in effect from 1866 to 1907, at which time it was increased to $7,500, so to remain until 1925, when it was increased to $10,000. The current compensation was established 21 years later, in 1946. It seems to me quite obvious that this eloquently bespeaks the reticence of the Congress to adjust its own compensation in keeping with the rest of the national economy.

Why this reluctance? If a Member refuses to accord justice to the legislative and judicial branches in this matter solely out of fear of the reaction of his constituents I say that he is doing an injustice to those constituents. For my part I have more faith in my own people. I believe it is highly significant that, at the time of the adoption of the first 10 amendments to the Constitution, the States refused to ratify a proposed amendment that no law varying the compensation of the Congress shall take effect until an election shall have intervened. The rejection of that proposed amendment has, I believe, two meanings. First of all it reflects the recognition on the part of the people that occasion may arise requiring adjustments in compensation without procrastination. That situation is here today. Further it removes the baseless conception held by a few persons that it is unconstitutional to increase compensation during the term. That misconception that has been voiced on several occasions is, of course, unsupported by any provision of the Constitution.

Mr. Chairman, it is my firm conviction that no Member need have any undue fears regarding a forthright affirmative vote on this bill. It is a just bill; it is a needed bill; it is long overdue; and I urge the support of the Members with the view of obtaining speedy enactment.

Mr. WALTER. Mr. Chairman, I yield myself 8 minutes.

I cannot let this opportunity pass without paying my respects to the Commission on Congressional and Judicial Salaries, under the exceptionally able leadership of the great Philadelphia lawyer, my friend, Bernard G. Segal. The members of the Commission and their Chairman have worked with devotion to solve a problem with which we have been struggling for several years.

Mr. Chairman, this is a very delicate question. I am sure, for most of you, but I ask you to look at it objectively, remembering that in 1954 the Congress adopted a resolution directing the erection of a commission to study this question.

I think we could safely approach the question by assuming that the major premise is that we are entitled to an increase in compensation and that the judiciary of the United States is entitled to additional compensation.

As the only Member of the House to have served on that commission, I am going to ask you to sit as a jury in judgment of the work that body did.

In the first place, I should like to call your attention to the personnel of the Commission. There were representatives of agriculture, six of them. There were five representatives of business. There were six representatives of the great labor organizations. This group of 18 people conducted many hearings throughout the United States for the purpose of determining what in their judgment our compensation should be.

Of course, we are not bound by the findings of this Commission. But, it certainly seems to me that any other approach to this problem might well lay us open to the charge of attempting to justify a position. This Commission found among other things that the type of work done by the Congress, our duties and responsibilities, were of such an unusual, extraordinary character that we should be compensated commensurate with the decisions we are called upon to make. It was not until I served on this Commission, I say this quite frankly, that I realized exactly how much of a responsibility is attached to this position—which I have never taken lightly I assure you. In the first place, the Congress has the power to levy and collect taxes; the power to borrow money on the credit of the United States; the power to regulate commerce with foreign nations and so on. The powers are all enumerated, of course, in the Constitution. But, until you look at those powers and think the whole matter out, you do not realize that the type of person called upon to make these decisions must possess unusual qualifications. Both the gentleman from New York [Mr. CELLER] and the gentleman from Illinois [Mr. REED] touched on the political phase of this problem. With that, I am not disturbed in the least, and I say that because the leaders in every walk of life recognize the fact that the judicial and legislative branches of our Government are underpaid and have been underpaid for a long while.

I shall place in the RECORD with my remarks editorials taken from the length and breadth of the Nation not with any ideal of making out a case because they were all selected haphazardly. As a matter of fact, this morning our distinguished colleague from Oregon [Mr. NORBLAD] made available to me an editorial from a small town which I had never even heard of in which the writer expressed the hope that the Congress would have the courage to correct this untenable situation. I think this provides the most effective argument as to the attitude of the people coming from communities where $15,000 is regarded as a large salary. I think that runs through all of the editorials the Commission on Judicial and Congressional

Salaries got together throughout the period when the problem was under consideration.

It has been interesting to me to compare the purchasing power of the dollar with the purchasing power in 1939. I shall place in the RECORD some tables showing just exactly what that means. I do not know of any real opposition to this bill. Of course, you are going to have demagogs in your political campaigns. We have all had them, and they are going to pick this up and use it as an issue. But we have all weathered such storms, and it has been my experience that people of that kind do not make much of an impression on the thinking of people who, after all, are the people who send you and me to the Congress of the United States.

The report of the Commission covers this problem fully. It is available to all of you, and the report of the Committee on the Judiciary has carefully gone into all of the factors. I call it to your attention so that you may be fortified with the kind of arguments that can be attacked. I ask you to support this bill as it was reported, so that the injustice that has existed for too long can be corrected.

The editorials and tables are as follows:

[From the McMinnville (Oreg.) Daily News-Register of February 11, 1955]

A WORRISOME STEP

Congress, encouraged by general sentiment in the upper echelons of officialdom in Washington that pay for top Government positions is too low, is rather timidly leaning toward an increase in the stipend, now $15,000 a year. A Senate committee proposes to raise it to $22,500. The figure most widely favored in the House is $25,000.

Timidity springs from congressional fear that the voters might react with hostility to such a move, despite the fact that the $25,000 figure, converted into terms of buying power, would be much lower than salaries paid by the Government 50 years ago.

It is the misfortune of Members of Congress that their pay can only be increased by congressional action. This is why salaries of Members has lagged far behind general increase in incomes over the years.

Members of Congress should display the courage needed to vote themselves the pay their way of life demands to make ends meet. Voter demands for services from Senators and Representatives is great, and these lawmakers should not be asked to engage in a myriad of extracurricular activities for their constituents without adequate recompense.

[From the CONGRESSIONAL RECORD of February 1, 1955]

UNDERPAID OFFICIALS

(Extension of remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Tuesday, January 25, 1955)

Mr. MULTER. Mr. Speaker, I am pleased to direct the attention of our colleagues to the following editorial which appeared in the New York Times of February 1, 1955:

"UNDERPAID OFFICIALS

"The amazing disparity between the salaries of Federal and New York judges has been referred to on this page in recent weeks; and we are glad to see Attorney General Brownell advert to it once again in urging an increase in the compensation of both United States judges and Congressmen.

"Judges of the United States district court now receive $15,000, exactly half the salary in this area of judges of the somewhat comparable New York State Supreme Court. Associate Justices of the United States Supreme Court receive $25,000, while judges of the highest New York tribunal, the court of appeals, are paid a total of $37,500 each. The point isn't that New York judges are overpaid, but that Federal judges are underpaid. The rise in the cost of living has of course had the effect of reducing their income even below the levels at which it had been set. It has been calculated that the purchasing power in 1939 dollars of a Federal district judge's salary after taxes amounts to less than $6,500.

"Members of Congress receive a total of $15,000 a year. The commission that investigated these matters correctly observed a year ago that 'Members of Congress and the judiciary have responsibilities as great as those of top executives in business or industry or greater.' Yet the top officials of 100 of America's largest corporations average over $100,000 a year in salary. No one is recommending anything like that for Congressmen, but surely the proposed $27,500 is reasonable compensation for so onerous a job. The difficulty in granting adequate pay to Congressmen comes from Congressmen, who fear the political effects of giving themselves even an entirely justified increase. Senator DIRKSEN, of Illinois, with whom we do not often find ourselves in agreement, has urged on his fellow Members an end to their 'timidity' on this matter; and we think he is right.

"Increased salaries obviously will not guarantee better judges or better Congressmen, but public freedom from economic pressures will prevent some good public servants from leaving their jobs for private life and will indicate to all of them that their Government is not really trying to get something out of them for nothing."

[From the CONGRESSIONAL RECORD of January 31, 1955]

OUR CONGRESSMEN DESERVE A RAISE

(Extension of remarks of Hon. WALTER NORBLAD, of Oregon, in the House of Representatives, Monday, January 31, 1955)

Mr. NORBLAD. Mr. Speaker, under leave to extend my remarks, I include herewith the following editorial from the Oregon Journal, Portland, Oreg., the largest afternoon newspaper in the State:

"OUR CONGRESSMEN DESERVE A RAISE

"Under a bill proposed by Representative FRANCIS E. WALTER, Democrat, of Pennsylvania, the salaries of Congressmen would be boosted from $15,000 to $22,500. He also proposes that Supreme Court Justices be given a $10,000 raise, and other Federal judges a $7,500 boost.

"Congressmen always have been supercautious about raising their own salaries. They are afraid, of course, that the voters will throw it up to them at the next election, and that it will cost them votes—perhaps even defeat. Political opponents of the Congressmen are almost certain to bring it up at the next election.

"But the fact remains that a salary increase is justified. The Walter bill is a compromise, running $5,000 a year less than the amount recommended by the special salary commission.

"Now, $22,500 sounds like a very nice salary for Congressmen. But when it is realized that most of them must keep 2 homes—1 in Washington, D. C., and 1 in their hometown, are subjected to the extremely high living costs of Washington, and have uncertain tenure, the take-home value shrinks considerably. Some Congressmen have maintained they could not stay on the job unless they had other income.

"Well, they probably could with a few economies. It isn't quite that bad. One thing is sure, these are important jobs that should have salaries commensurate with the activities, abilities, and demands of the job.

"Congress should vote a substantial increase, as suggested by Representative WALTER. We think that most people, looking at the problem fairly, will approve."

[From the CONGRESSIONAL RECORD of January 26, 1955]

CONGRESS DOES EXCELLENT JOB, MEMBERS DESERVE SALARY HIKE

(Extension of remarks of Hon. EDWARD MARTIN, of Pennsylvania, in the U. S. Senate, Wednesday, January 26, 1955)

Mr. MARTIN of Pennsylvania. Mr. President, I ask unanimous consent that there be printed in the Appendix of the RECORD comments by Roscoe Drummond in an article entitled "Congress Does Excellent Job, Members Deserve Salary Hike."

There being no objection, the article was ordered to be printedd in the RECORD, as follows:

"WASHINGTON.—It is time somebody stepped up and said a good word for Congress. When cartoonists and columnists need a filler, we find it pretty easy to draw a short bow and let Congress have it. This permits us to attack everybody in general but nobody in particular. What I am saying is that while Congress is criticized more often than it deserves, it rarely gets the praise it deserves.

"It seems to me that the 83d Congress does deserve praise, does deserve to be put down as a Congress with a record of accomplishment substantially above average.

"I would cite two major attainments:

"It has been a 'do-something Congress.' It has to its credit a sizable, significant, budget of important legislation and it has worked hard to produce it. No Congress of recent memory has been as productive as the 83d.

"Congresses as narrowly divided as this one, with a whisker-thin Republican majority in both Houses, have usually ended in legislative stalemate. To have avoided stalemate under such circumstances is a considerable achievement. Both parties deserve credit. On any compartive basis, the Democratic opposition conducted itself responsibly. It disagrees on some bills, like amending the Taft-Hartley law. That makes a two-party system. The opposition rarely voted captiously, seeking to block the administration merely as a partisan tactic.

"It strikes me that on the basis of this record and after the midterm elections, Congress ought to come back and do something for Congress. I mean put something in the pay envelope as former Presidents Hoover and Truman, President Eisenhower, and a Commission of distinguished citizens recommended earlier this year.

"You don't have to agree with everything Congress has done to agree that Congress has done a good job and an expeditious job. You may not like parts of this bill or that, or think, as I happen to think, that it seriously botched the anti-Communist law in a frantic partisan boxing match in the frenzied hours of preadjournment. But the solid accomplishments of the 83d Congress remain and are clearly visible. To mention only a few:

"It approved the St. Lawrence Seaway after a 30-year delay.

"It produced a 1,000-page modernization of the whole Tax Code—a careful, constructive, monumental streamlining of the whole internal revenue structure for the first time in 78 years.

"It enacted basic changes in the atomic energy law primarily to take account of the fact that we no longer have the monopoly we possessed when the McMahon Act was passed. The new law permits sharing of information with our allies on the use of atomic weapons, offers private industry opportunities to develop atomic power.

"It passed, with bipartisan support, the most wide-ranging social security and unemployment insurance measures since the early days of the New Deal.

"A pay raise for Congress is long overdue. The case doesn't rest on what Congress has done in any particular session but its record this year would make action by Congress to raise its salaries more politically graceful.

"Senators and Representatives are now paid $15,000 in salary and expenses. The Commission on Judicial and Congressional Salaries recommended that the figure be increased to $27,500. Such an increase would add only $0.00717 to the budget and cost the country only 3.4 cents per capita. Members of the Cabinet receive $22,500 and some ambassadors' salaries are $25,000.

"Congressional salaries have never kept abreast of inflation. Because of inflation Congressmen actually receive a lower compensation than they did in 1939, when salaries were $10,000."

[From the CONGRESSIONAL RECORD of February 2, 1955]

AN EDITORIAL FROM THE CHICAGO AMERICAN

(Extension of remarks of Hon. BARRATT O'HARA, of Illinois, in the House of Representatives, Monday, January 31, 1955)

Mr. O'HARA of Illinois. Mr. Speaker, I am extending my remarks to include an editorial from the Chicago American of January 31, 1955. The editorial follows:

"TIMIDITY OF CONGRESS

"We've contended that Members of Congress, and Federal judges as well, deserve an increase in pay.

"Men of good caliber should not have to serve their country at financial sacrifice. Or, to put it more significantly, these important jobs should pay enough to attract men of great ability and not just the independently wealthy or broken-down hacks who want to get in out of the rain.

"But the timidity of Congress. Its fear of the voters. These factors have prevented action in past Congresses. Now, as it seems probable a raise will be voted, they emerge in a ludicrous way.

"It is reported that proposals will be made for a $10,000 pay hike (from the present $15,000 to $25,000) so that, on the floor, Members may humbly vote to reduce the increase and wind up with $22,500.

"For goodness' sake, men, the people aren't that dumb. They know Congressmen have to maintain two homes and contribute to everything from the smallest raffle to the party campaign chests.

"They know Federal judges, at $15,000, make only a fraction of what they could command in private practices.

"Please, gentlemen, just fix a fair figure. The people will understand and respect."

[From the CONGRESSIONAL RECORD of January 6, 1955]

JUDICIAL AND LEGISLATIVE PAY INCREASES

(Extension of remarks of Hon. BARRATT O'HARA, of Illinois, in the House of Representatives, Thursday, January 6, 1955)

Mr. O'HARA of Illinois. Mr. Speaker, by unanimous consent, I am extending my remarks to include editorial comment from the two morning newspapers of Chicago on the legislation to increase judicial and legislative salaries proposed by the Citizens' Committee.

The Chicago Sun-Times of December 31, 1954, said:

"Pay raises for the legislators, and especially for the judges, are long overdue. Congress should have the courage to do something about it in 1955."

The Chicago Tribune of December 31, 1954, said:

"In our opinion, it is a good idea. * * * The incomes of a body of men and women who can vote themselves a raise any time they feel like it have rather lagged behind the average increase in a period of rising salaries and wages. * * * It proves that they (men in public office) are timid. In this matter, we suspect, they were needlessly alarmed, because the great majority of the voters will approve the proposed increase."

[From the CONGRESSIONAL RECORD of January 21, 1955]

PAY RAISE FOR CONGRESSMEN

(Extension of remarks of Hon. EDWARD MARTIN, of Pennsylvania, in the Senate of the United States, Friday, January 21, 1955)

Mr. MARTIN of Pennsylvania. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "Pay Raise for Congressmen," published in the Pittsburgh Post-Gazette of January 10, 1955.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

"PAY RAISE FOR CONGRESSMEN

"Of all the melodies piped by President Eisenhower in his state of the Union message, none could have come more sweetly to congressional ears than this: 'I also urge the Congress to approve a long-overdue increase in the salaries of Members of Congress and of the Federal judiciary, and in my opinion this raise should be substantial because I believe it should be to a level commensurate with their heavy responsibilities.'

"This part of the Eisenhower program seems certain to enjoy full, bipartisan backing, especially the congressional feature. Congressmen are very touchy about voting themselves raises, fearing the scorn of those at home. But the President has graciously given them an out; they can vote themselves a raise and say in truth it was the President's idea.

"Actually, they deserve a raise, and a good one. Lawmakers in the House and Senate get a little over $15,000 a year, practically all of it taxable. That doesn't go far, what with their heavy expenses. They have to maintain two residences; they have to entertain; they have to pay campaign expenses; they have to keep fences mended, which means, among other things, trips to and from home at their own expense; they have to kick in to all sorts of political and community causes. No wonder the New York Times found 2 years ago that the Congressman's pay falls short of his job expenses by at least $3,000 a year.

"Obviously, Congressmen have to get other income. The Times found that 80 percent of the Representatives and 67 percent of the Senators carry on a private business or profession back home or have income from investments. Some Congressmen add to their income—but detract from their legislative time—by writing articles or lecturing.

"The Congressman, for all the public's jokes and jibes, is an important man in our society. He ought to be paid accordingly. He ought to get enough to keep well ahead of the dogs of debt, so that he can think more about his legislative job and, above all, devote more time to it. He ought to get enough so that he can more easily withstand proffered bribes—or should we say contributions—by special interests?

"Last year, mainly because it was an election year, Congress turned down a pay raise for its Members. This year it should not be so skittish. Every reasonable voter, including the President himself, appreciates that the lawmakers have long deserved a healthy hike in pay."

[From the Burlington (Iowa) Hawk-Eye Gazette of June 29, 1953]

PAYING FOR BRAINS

Brains always have and always will command higher wages than brawn.

So Uncle Sam has found. Faced with all of the Truman administration's scandals over 5 percenters, mink coats, refrigerators, and diamond necklaces, President Eisenhower set out to surround himself with Cabinet members and other advisers who would not be financially dependent on current governmental salaries as such. In other words, most of them had already made their wads and could afford to work for Uncle Sam for far less than they had been accustomed to in business life.

However, this brought forth some criticism. Democrats attacked the Republicans with the cry, "Big business is running our Government. Eisenhower is catering to the rich."

But it's a well established fact that few men in key Government positions such as Cabinet posts, Congress or diplomatic jobs can live on their incomes unless they supplement such with other income or from savings. A very frugal Member of Congress told us once that he hadn't been able to save a cent while in Congress 10 years, although he and his wife lived very frugally and seldom entertained guests. The scale of living men in public have to maintain in keeping with protocol is outlandish, but it can't be escaped.

This subject was dealt with at length in the famous Hoover report which was prepared and submitted by the former President Herbert Hoover, during the term and at the request of President Truman. Higher salaries were recommended to attract more capable men rather than mere political hacks looking for something better than they ever knew before.

A bill is now in Congress providing various salary increases. Justices of the Supreme Court would get a $10,000-a-year boost—from $25,000 to $35,000 annually. The Chief Justice would be upped $14,500 to a total of $40,000 a year.

Other members of the judiciary also would come in for higher salaries. Federal judges of the circuit and district courts, the court of claims, customs, and patents appeals judges, and the jurists of the military appeals court would draw $27,500 instead of $17,500. Customs and tax court judges would go from $15,000 to $25,000.

In the Justice Department, salaries of United States attorneys would not be less than $12,000 nor more than $20,000, except the Deputy Attorney General who would receive $21,000.

Members of Congress—both Senators and Representatives—now receive $12,500, plus $2,500 for travel expenses, annually. Under the proposed new rates, they would be advanced to a gross of $25,000.

Prior to 1939, Federal officers were exempt from State income taxes. Now they pay. However, a new act just adopted this year exempts them, up to $3,000 annually, for living expenses. Even so, no Member of Congress can possibly approach a living expense as low as $3,000 a year. When an MC gets his Federal and State income taxes paid, after living as he is forced to do, he can't have much left out of the present $15,000.

Democrats are trying to make some hay out of the proposed increases. However, they, too, hiked salaries of Federal officers and, furthermore, jumped the number of people on the Federal payroll from 502,000 in 1930 to more than 2 million 20 years later.

Perhaps it would be wiser and far more economical to pay stiff salaries for fewer able men than to have a horde of low-priced hacks not really qualified for what has been paid in the past.

As we said in the beginning, brains always command higher rates of pay than mere muscle.

[From the Wausau (Wis.) Record Herald of August 26, 1953]

JUDICIAL SALARIES

Among the important unfinished tasks confronting the 83d Congress when it returns in January is that relating to salaries

of the Federal judiciary and Members of Congress.

In neither case are the salaries commensurate with the responsibilities involved and the abilities required to do the job well.

Let's take the case of Federal judges by way of illustration.

The American Bar Association has noted "an alarming increase in resignations of experienced judges from the bench" because of inadequate salaries. That's a serious situation. The American judicial system requires the highest type of judge. It has difficulty getting or keeping enough such judges under the conditions which now exist. It has the effect of weakening the judicial system.

The prestige, tenure, and desire to serve cannot offset the loss of income entailed through sacrifice of lucrative private practice.

The salaries of Federal judges, ranging from $15,000 for Federal district judges to $25,000 for Associate Justice of the Supreme Court, probably look pretty good to the average person. It should be noted, however, that while the incomes of most people have kept pace with or exceeded the rapid rise in the cost of living, the incomes of Federal judges have been taking a beating ever since 1939 when their salaries were ruled subject to the Federal income tax.

Despite a raise from $10,000 to $15,000 for district judges and increases for other judges accordingly in 1946, a district judge's salary today is worth but about $6,000 in terms of the purchasing power he had in 1939.

The situation is such that various members of some State judiciaries receive more than Associate Justices of the United States Supreme Court. That serious imbalance is without justification.

Legislation introduced in the first session of the 83d Congress (S. 1663) proposed to increase the compensation of United States judges and Congressmen by $10,000 a year, boost the salary of the Chief Justice to $40,000 and create a salary range for United States attorneys from $12,000 to $20,000 annually. The measure has the unanimous approval of the Senate Judiciary Committee.

It is hoped that with the support of the public that or similar legislation is brought to final passage in order to make it possible to obtain and keep the best qualified people in the Nation's service.

[From the Butte (Mont.) Standard of August 29, 1953]

ON RAISES FOR JUDGES

The Senate is considering a bill, supported by the American Bar Association, which would raise the salary of Federal judges from $15,000 to $25,000. The Chief Justice of the Supreme Court would get $40,000 instead of his present $25,000. His associates would receive $35,000. Judges of lower Federal courts would have their salaries raised from the present $15,000 and $17,500 to $25,000 and $27,000.

To many the present salary scale for judges seems adequate. But witnesses at Senate Judiciary Committee hearings on the new bill told of Federal judges who had to write magazine articles or teach in night law schools to supplement their incomes and support their families. It would seem that such were living on a lavish scale, but the fact remains that if they found outside earnings necessary they would be unable to devote their entire attention to the task of interpreting the laws and performing their important judicial functions.

No branch of our Government is more important than our courts. The decisions made there are the safeguards of our liberty. We need the most able and experienced men in the country as judges. But it is argued that the bench cannot hope to attract such men when places in industry or private law practice carry a much higher financial reward.

In a sense a man who sits as a judge is rewarded with the knowledge that his work is one of the highest forms of public service. But his fellow citizens have no right to expect that he will sacrifice his own financial security and that of his family in addition.

(Same editorial in Decatur (Ind.) Democrat of August 31, 1953.)

[From the Newport News (Va.) Times Herald of August 13, 1953]

BAR GROUP BACKS BILL TO RAISE JUDGES' SALARIES

BOSTON, August 13.—Unless salaries are raised, Federal judges in the future must be selected from two groups:

1. The independently wealthy.

2. Lawyers so unsuccessful in private practice that they cannot earn the equivalent of the present salary.

That's what the American Bar Association's standing committee on judicial selection, tenure and compensation reports in the advance program for the 50th annual meeting of the association here this month.

The ABA committee backed a bill before the 83d Congress for $10,000 a year salary increases for all Federal judges, except the Chief Justice of the United States for whom a $14,500 raise was proposed, but Congress adjourned without approving the bill in its entirety.

Congress passed only part of the bill giving more moderate increases to assistant United States attorneys.

The bill backed by the ABA also proposed $10,000 a year increases for United States Senators and Representatives along with the Federal judges.

"It became apparent during the year to those interested in Federal judicial salary increases, that the best means of accomplishing this objective was to support a bill which included increases in the salaries of United States Senators, Representatives, and United States attorneys, as well as increases in Federal judicial salaries," the committee's report said.

The committee, in its supporting memorandum filed with a Senate judiciary committee hearing, said there had been "many instances in recent years where skilled, experienced and highly qualified National Legislators have been forced to leave their legislative service in order to make a living for themselves and their dependents."

"This is not in the interest of the national welfare," the committee commented.

The report asserted that Federal judges are facing the same income problems that plague Members of Congress: Their salaries have remained static while the cost of living has risen 92 percent since 1939.

"The result has been (1) to cause financial hardship to many Federal judges; and (2) to make it difficult to get first-rate lawyers to accept appointment to the Federal bench," the report said.

[From the Boston (Mass.) Globe of July 11, 1953]

SHOULD CONGRESS GET A RAISE?

How much pay a Member of Congress should receive has provided arguments among the electorate almost every decade since our Government was instituted. It still does. And when the pending recommendations of the Senate Judiciary Committee for salaries of $25,000 a year reach the floor, it is probable that the ancient debate will be resumed.

Reasons behind the timidity of Members of Congress on this matter of voting themselves a raise are not difficult to identify. Every legislator recognizes that the issue is strewn with hazards; these, exploited by an opponent in the next elections, migh cost him his job.

When the First Congress decided each Member should get $6 a day while on duty in the Capital, irate citizens denounced the idea. It would, they insisted, permit a man to stay away from home, go to the theater, and "drink fine wines." The first attempt by Congress in 1816 to put itself on an annual salary—$1,500 a year—brought similar protests, and the law was repealed.

In 1873 public wrath over what was termed "a salary grab" brought defeat to the party sponsoring it in the next elections. And only a dozen years ago another attempt to adjust congressional pay rates elicited a "bundles for Congress" movement, forcing repeal.

This sensitiveness of National Legislators has found expression in the caution which Senator Taft and leading members of the minority party have displayed toward the latest attempt to raise congressional pay schedules. Mr. Taft's comment was: "Somebody outside Congress better make a study."

The staggering deficit facing the Government today is not likely to moderate this attitude of caution among Members of our National Legislature.

Yet the hard facts of life which the Members face in this matter merit more consideration than they commonly receive. Were the total maximum pay of Members set at $25,000 a year, as proposed, the cost to the Eisenhower budget would be but .00717 percent, or about 3.4 cents per capita for the Nation.

During the thirties, Members spent an average of but 198 days on duty in Washington. Since 1950, the average exceeds 279 days. Congress has not had a pay raise since 1946, when compensation was fixed at its present rate—$15,000; and in terms of actual purchasing power, given present depleted dollar values, the Members of the United States Senate and the House of Representatives are actually getting today about $1,000 a year less than their predecessors received in 1907.

While a $3,000 tax deduction for living expenses was added by the 82d Congress, and proposals for total exemptions covering all living expenses in Washington have been offered, this approach to the problem leaves much to be desired. Large special tax exemptions for Congressmen and Senators are not likely to sit well with a hard-pressed citizenry.

The better approach would appear to be the direct one of dealing openly with this problem through an impartial body. Senator DIRKSEN, of Illinois, has proposed exactly that step. He seeks to have a commission instituted, the 18 members of which would be named by the President, the Chief Justice, the President of the Senate, and Speaker of the House. This group would study the question and make recommendations next year.

The traditional attitude of the public—and it is sound—is that election to Congress is a privilege and not a right; and that Members should not expect luxury salaries. There is little evidence, however, that any do. Analysis of typical Members' budgets made recently show them running more than $3,000 a year into the red.

[From the Springfield (Ill.) Journal of July 20, 1953]

PAY FOR CONGRESSMEN

As a result of the publicity given the NIXON "political contribution" issue last summer and the subsequent explanation by the vice presidential candidate, it was clearly demonstrated that most Congressmen, unless wealthy, have a hard time making ends meet on the present $15,000-a-year salary. This is especially true of Senators who have more expenses campaignwise ordinarily than do Congressmen.

To alleviate this situation, a bill has been introduced in Congress which would give Senators and Representatives a yearly pay of $25,000. It has been unanimously reported by the Senate Judiciary Committee, and is now on the Senate Calendar.

However, there is one element that plagues the bill's supporters. It is public opinion, the kind that would say, "They voted to give themselves a pay raise. What a soft deal."

To date there has been a great deal of congressional timidity on the issue and this public-opinion factor probably accounts for it. As far as economy is concerned, there is no big question involved. It would add only .00717 percent to the Eisenhower budget of 74 billions, and would cost the country 3.4 cents per capita.

President Eisenhower and both former Presidents Truman and Hoover have endorsed the pay raise on the theory that it would encourage more highly qualified men to seek legislative careers. Many high-caliber persons, who would make good lawmakers would rather work for private organizations now because the pay is higher and security better. Some inducement must be offered this type to try for office. Congress would be strengthened, surely, if more of this type were to come to Washington.

[From the Walla Walla (Wash.) Union Bulletin of July 5, 1953]

FEDERAL SALARIES

The Hoover Commission on the reorganization of the Federal Government recommended, in 1949, that there be substantial increases in the pay of employees in all three branches of the Government.

This was followed by action in Congress increasing the executive salaries. Those in the judiciary and in the legislative branches were left unchanged and to this day are at old levels.

The American Bar Association, which supplies a considerable amount of legislative timber and all of the judicial material, recently came out in favor of higher pay, as recommended by the Hoover Commission, in both categories.

The salary scale proposed in the recommendation, the bar contends, would produce better government, better administration of our courts, and better enforcement of our criminal laws. The last-mentioned point is particularly pertinent in connection with the suggested higher scale for United States attorneys, the broad inference being that a realistic schedule of pay would attract stronger men to the position, and tend to discourage mediocre chaps from becoming applicants.

Some comment has previously been carried regarding the proposed higher compensation for our Senators and Representatives, and the same general line of thinking prevails. Under today's living costs, service in behalf of the public is sharply limited. Because it is difficult to make ends meet, there are, to some types, constant temptations to take on outside commitments which might not be for the best interest of the public. Conscientious men of limited means are frequently unwilling, as well as financially unable, to make the sacrifice that their idea of public service entails.

Experience indicates that we seldom scale down much from a standard attained after a long period of rising costs and prices. If that holds good, there is little danger that, in considering higher salaries for Federal judges, attorneys and legislators, we shall be fixing a scale which, in a short while, might be unreasonably high.

[From the Albany (Oreg.) Democrat Herald of July 21, 1953]

MORE PAY FOR CONGRESSMEN

One of the problems occupying the attention of Congressmen is the matter of their own salaries, which, they generally agree, are too low. Members now draw $15,000 a year, with a deduction from income-tax basis, of $3,000 for living expenses.

This indirect method of hiking pay is not particularly popular among the Members, who would prefer a straightout salary boost. The proposed salary is $25,000 a year. This may look pretty high to a man irregularly employed at day wages; but for the nature of the job it isn't out of line. Men of the needed ability and experience are reluctant to subject their private affairs to the interruption involved in a term in Congress. This involves, not infrequently, a risk to an established business or practice.

The work itself if done as it should be done is well worth the $25,000. (Extreme partisans might contend that the blundering of members of the other party could be valued at a minus quantity.) The proposed advance, it is figured, would cost the country 3.4 cents per capita. President Eisenhower and both of the living ex-Presidents favor the advance.

Senator EVERETT DIRKSEN of Illinois has proposed, with the backing of Senator Robert Taft, legislation to create an outside commission to study the problem of congressional salaries. Report could not be expected before 1954, an election year. Objection to this hints a fear that the general citizenry would not be warm to the increase.

Another plan, suggested by the Committee for Strengthening Congress, proposes a commission of 3—Herbert Hoover, Bernard Baruch, Adlai Stevenson—to study the problem and report to Congress. The report could be adopted without a vote after submission to the presiding officers of the 2 Houses—unless one or the other of the Houses just rose up and voted it down. We like the other way better and don't think the Congressmen ought to be afraid to up their pay in an election year.

We can't prove that the quality of service would be improved by a hike in pay, but the advance should be made because it is due the hardworking Congressmen—and we do mean hardworking.

The proposed $25,000 is $2,500 more than is paid members of the Cabinet. Probably the Cabinet men themselves could be upped to $25,000 without our having to cut down the amount of foreign aid.

[From the New Martinsville (W. Va.) Republican of July 10, 1953]

CONGRESSIONAL PAY

Congress controls its own purse strings. The only way Members of the House and Senate can get more pay is for Congress itself to authorize the increased payments.

Too, each Member of the House and Senate is a politician. Each 2 years House Members are elected; each 6 years Senators are chosen. Perhaps that explains the somewhat devious and underhanded method the House recently employed in whooping through what amounts to a pay raise.

The House passed a bill which would let Congressmen deduct their full costs of living in Washington from their taxable income.

We personally feel that, in accordance with the findings of the Hoover Commission, executive, judicial, and congressional salaries be increased. Congressmen now are paid $12,500 per year. In addition, they receive $2,500 which is not subject to income tax for expenses. Congressmen also are allowed to deduct up to $3,000 for their costs of living in Washington from their taxable income.

There is no question that expenses of Congressmen are heavy. Most must mainmain 2 residences, 1 in their district and another in Washington. They are expected to live in keeping with their rank.

However, we feel that the way to correct the situation is for Congress to increase its pay, honestly and openly, without monkeying with the tax laws. Nobody else is allowed to deduct living costs from taxable income. Congressmen should not be granted special privileges over other taxpayers.

[From the Rockford (Ill.) Register-Republic of August 7, 1953]

GETTING CONGRESS OFF SPOT

Reluctance of Members of Congress to increase their own salaries is understandable. With taxes being extended, spending only moderately reduced, and an effort made to increase the national debt limit, Senators and Representatives do not want to go home and face such comments as, "Well, I see you raised your pay."

The Senate and House have approved a method of deciding the issue which may settle the problem in fairness to all concerned. The matter of salaries for Federal judges is also hanging fire, and so a nonpartisan commission has been proposed to make a report to Congress.

The commission would be composed of 18 members, 6 appointed by the President, 6 by the Chief Justice of the United States Supreme Court, 3 by the President of the Senate, and 3 by the Speaker of the House. No present or former Congressman or judge could serve on the commission. Members would be selected from leaders in business, labor, agriculture, and the professions.

An advisory committee composed of legislators and judges would help the commission determine salaries for the Vice President, Speaker of the House, Members of Congress, and Federal judges. And Congress, in appropriating funds for higher salaries, could fix salaries at any point between the present level and those recommended by the commission.

Although this method is complicated, as Congressmen have admitted, it would free Senators and Representatives from tackling a subject on which they are vulnerable. The merits of pay raises for Members of Congress have been debated for many months, and fairminded citizens agree that higher salaries are necessary unless congressional service is to be limited to those with independent means.

[From the Watertown (S. Dak.) Public Opinion, July 14, 1953]

CONGRESSIONAL SALARIES

One of the chief recommendations of the Hoover Commission 4 years ago was that Federal Government salaries be increased to bring better men into Government service. Salaries were raised at that time in the case of key officials in the executive branch, but not in the cases of judges and Members of Congress.

A bill is pending in Congress now to carry out the Hoover Commission proposal by raising judicial and congressional salaries $10,000 a year. The same bill would allow the Attorney General to set the compensation of United States district attorneys between $12,000 and $20,000 yearly. It has been approved unanimously by the Judiciary Committee of the Senate.

The bill has been free from partisan controversy. It isn't a partisan issue. The sole issue involved is whether higher salaries would attract stronger, abler men to the Congress and the bench. The American Bar Association, and various other organizations supporting the bill, believe it would. They argue that Government service should not be confined by economic circumstances to the independently wealthy, or to incompetents. President Eisenhower said much the same thing in his press conference recently when he observed that, with taxes what they are, we are approaching a time when only people of independent means could enter public life.

What would the proposed increase cost? The net cost, after taxes, would be $3,465,000 in the case of Members of Congress, and $2,240,000 in the case of Federal judges, a total of $5,700,000 a year. That figures out as only a tiny fraction of 1 percent of the total cost of the Federal Government.

That would be a small price to pay for more Government efficiency and better courts. If the present level of congressional salaries is, actually, a deterrent to getting top-level men into office and the mere elevation of congressional pay would be all that is necessary to accomplish that and keep them there, then there is absolutely no question that the increase should be authorized as soon as possible.

And, even if it will only help produce such a result, it is still well worth while. And probably it would.

But no one should be deceived that we can procure the kind of service we want and which the country assuredly always needs merely by paying higher salaries. There are many other factors which enter into the practical politics of electing public officials, than just the remuneration they will receive. There are other motives than monetary reward which inspire men to seek congressional office and serve in the Senate and House.

Let's pay our public servants in Congress what they need and should have to make it possible for them to undertake public service without too great material sacrifice. But let's remember, also, that the greater the material reward, the more seekers there will be, and among them will be many who will place personal material gain ahead of consideration for the national and public welfare.

When compensation is adequate—and it should be—we still must remain forever vigilant to carefully evaluate the candidates for office, to see that names of the "right kind" of men get on the ballot and that those of the highest integrity and understanding of our philosophy of government and the public welfare are elected. That is the eternal responsibility of the American voters as well as to provide the compensation that the office and its duties merit.

[From the Billings (Mont.) Gazette of July 7, 1953]

HIGHER SALARIES FOR CONGRESS

A bill to increase the annual salaries of Members of Congress to $25,000 has been bypassed for the current session. There is but little doubt that most of the Members favor the increase but are fearful that, should they vote for it, they might be subjected to criticism when they come up for reelection. The House Members sought to obtain some relief by passing a bill exempting them from provisions of the Federal income tax on all of the living expenses incurred while living in the National Capital. They are already accorded a $3,000 exemption but this covers only a portion of the cost of a residence in Washington, where living expenses stand near the peak for the entire country.

The American Bar Association, of which the well-known Billings attorney, W. J. Jameson is the upcoming president, has gone on record favoring the bill to increase Government salaries in many higher level brackets. They would up the pay, not only of Members of Congress by $10,000 annually, but of Federal judges as well. They would also add $8,000 a year to the salaries of United States district attorneys. The association believes it is "false economy, and dangerous to the country's future, if salaries are not realistic enough to attract the wisest and ablest men to assume the immense responsibilities of Government."

During a recent press conference, President Eisenhower made the observation that, with taxes what they are, we are rapidly approaching the time when it will be difficult to get the best men to remain in Government unless they have independent financial means. Former President Truman referred to the same difficulty before he relinquished the office. It isn't a question of getting people to fill the jobs at the present salaries but of getting men and women of the required ability and sufficient experience.

(Same editorial in Great Falls (Mont.) Tribune, July 15; Havre (Mont.) News, July 8; Lewiston (Mont.) Daily News, July 9.)

[From the Duncan (Okla.) Banner of July 6, 1953]

We don't care for the plan proposed by Congressmen to allow all of their expenses in Washington to be tax free. It is subterfuge for a salary increase which the Congressmen apparently do not have the courage to ask at this time.

The pay for Congressmen probably isn't enough. It amounts to $15,000, of which $2,500 is a tax-free expense item. That is only half as much more than Congressmen used to get, and it undoubtedly doesn't cover living costs today. Expenses probably have doubled.

Consider the plight of a Congressman. He just about maintains two homes, one in Washington, and one back in his district. The Representatives make frequent trips home, and run for office every 2 years, against every 6 years for a Senator.

A $10,000 salary back in the depression days of 20 years or so ago may have been enough. Most of us have to have twice as much now to meet our living standards, and we do not have to entertain visitors from our district and State who are constantly coming to Washington.

But there is another bill before Congress to do something about salaries of Congressmen and Federal judges. The judges are in the same plight as the Congressmen. This bill proposes to increase their salaries by $10,000 a year. Perhaps it would be better.

We dislike the idea of special tax concessions to any group of people. Somehow the taxpayer feels that, if his Congressman is to be allowed certain tax-free expenses, then the taxpayer who foots the bill should have concessions, too. It's hard to argue against that.

Let Congress pass a bill to pay its Members, and Federal judges, a reasonable salary. And let the same tax exemptions apply on that salary as those which any other persons with the same amount of income would have to pay. That comes nearer putting all on the same basis.

[From the Greensburg (Pa.) Review of July 14, 1953]

SENATOR WILLIAMS RIGHT

Senator JOHN J. WILLIAMS, the Delaware Republican who has done such good work in exposing irregularities in the Bureau of Internal Revenue and other departments of the Federal Government, has come out four-square against Members of Congress voting themselves any salary increases under the disguise of tax-exempt allowances or expense accounts which they can pocket.

He is not opposed to Members of Congress getting higher pay, but he says it should be in the form of salary raises and subject to the income tax. And he is right. Members of Congress should be saddled with the same burden as they have imposed on other people. And when they are so saddled, they know the tax problem of other people at first-hand. Explaining his stand against Members of Congress voting themselves any tax-exempt raises, Senator WILLIAMS said:

"I think that anything Congress does for its Members in the way of salaries should be on a straight salary basis, with whatever the amount is to be 100 percent taxable.

"I believe that the salaries of Members of Congress should be sufficient so that a man need not to have outside income to be able to afford to serve his constituents. I think we should do all we can to prevent Congress from becoming a rich man's club.

"With that in mind, I am making a study of salaries and allowances from congressional records back to the time of George Washington. Undoubtedly, some of the present allowances are outmoded and should be corrected. When I have completed my investigation, I intend to offer legislation to correct the inequalities and injustices—to everyone, including the taxpayers."

One of the injustices, he says, is the way allowances are figured for clerical salaries of a Senator. For example, he said he, as a Senator from Delaware, has an annual allowance of $39,540 for clerical salaries and it figures out to more than 12 cents per capita in his State. He adds: "But Senators EDWARD MARTIN and JAMES H. DUFF, from Pennsylvania, with more than 30 times Delaware's population, get only $49,680 each, which figures out to slightly less than one-half cent per capita."

[From the Pottsville (Pa.) Republican of July 9, 1953]

HIGHER PAY FOR FEDERAL JUDGES

The Journal of the American Judicature Society, in endorsing the McCarran bill to increase salaries of Congressmen and Federal judges, has this to say:

"Of course, Federal judges could get along on their present salaries, or on lower ones. Millions of people live on less. One reason most of them do, however, is that they do not have the ability to earn more. The men to whose judgment is entrusted the disposition of our properties, our liberties, and even our lives surely ought to be men of superior attainments. Unless we spend on judicial salaries the amount of money necessary to get that kind of men, we need not expect the caliber of the Federal judiciary to remain at its present high level. To fail to spend that money, even in these times, would be a false and dangerous economy."

The legal Journal is merely saying what we said before. You can't get good men without paying good salaries.

[From the Louisville (Ky.) Times of July 13, 1953]

SO CONGRESS ISN'T GOING IT ALONE IN THE MATTER OF PAY

Through its president, Robert G. Storey, of Dallas, the American Bar Association is warmly and persuasively advocating the passage of Senate bill 1663. We are glad to see the organized lawyers working for this measure, and we are certain that the Members of Congress are glad, too. The fact is that Members of Congress planned it that way.

Senate bill 1663, already unanimously approved by the Judiciary Committee of the upper House, is a proposal to increase the salaries of Members of Congress, Federal judges and Federal district attorneys. The proposal is wholly meritorious. But do you ask why pay raises in two separate branches of the Government—legislative and judicial—are not presented as separate matters? Then you do not know with what delicacy the lawmakers approach the question of voting larger incomes to themselves.

Thus Senate bill 1663 is a package deal, contrived to enlist the support of the lawyers, who naturally have a professional interest in maintaining high standards on the Federal bench and elsewhere in that branch of the Government. The argument for better judicial salaries is quite as impressive and unanswerable as the argument for better congressional salaries. In other words, this is a sound package all the way through.

And it serves to illustrate the fallacy, in congressional opinion, of the principle: He travels the fastest who travels alone.

[From the Elkhart (Ind.) Truth of July 1, 1953]

DOLLAR LURE FOR BETTER OFFICIALS

Businessmen often say you have to spend money to make money. Perhaps you have to spend money to save money, sometimes.

At any rate that is the contention of the American Bar Association, and others who have come out strongly for Senate bill 1663.

This bill would increase annual salaries in the legislative and judicial branches of Federal Government.

Congressmen, who now get $15,000 (which includes a $2,500 expense allowance) would get $25,000. Federal judges would also get $10,000 more apiece; for instance, Supreme Court Justices would go from $25,000 to $35,000. United States attorneys and assistants also would get more.

Such increases were recommended for executive, legislative, and judicial branches 4 years ago, by the Hoover Commission on Economy in Government. Congress, at the time, raised executive salaries only.

It is always a question exactly what attracts qualified persons to the public service.

We like to think it is primarily patriotism and a sense of duty. In many cases this is certainly a factor.

On the other hand, it is also probable that many other qualified persons have not felt they could make the sacrifice.

Elkhart has seen one example of this, for our post of county health unit director has gone unfilled more than 2 years, even though the position pays more than other local government jobs.

It is likely the Federal Government also faces this dilemma.

Looking at it negatively, we may wonder to what extent Government inefficiency has been due to substandard officeholders.

Would some of the log jams in Federal court dockets be cleared up, for example, if we had an influx of more qualified judges and attorneys?

Would we even be able to avoid establishing some of the proposed new court districts? Would Congress act with greater dispatch and efficiency if it consisted of better qualified personnel?

We don't know that these things would happen. But it is significant that the economy-minded Hoover Commission thought so.

[From the Fort Atkinson (Wis.) Daily Jefferson of June 29, 1953]

CHEAPER GOVERNMENT BY BIGGER SPENDING

The American Bar Association has come out in support of President Dwight Eisenhower, who made the observation the other day that, with taxes what they are, we are rapidly approaching the time when it will be difficult to get the best men to enter and remain in Government unless they have independent financial means.

The President added that he believed that Government salaries should be raised so that the best qualified people, poor or rich, could enter and stay in public life.

The American Bar Association agrees emphatically with that view. The association believes it is false economy, and dangerous to the country's future, if salaries are not realistic enough to attract the wisest and ablest men to assume the immense responsibilities of government.

Furthermore, the association believes it would be entirely consistent with the President's program of Government economy if the Congress were to enact, at this session, the pending bill (S. 1663) to increase by $10,000 per year the salaries of United States judges and Members of Congress, and to authorize the Attorney General to establish district attorneys' salaries between $12,000 and $20,000 per year.

The association points out that the cost of such an increase would be a minute fraction of 1 percent of the Federal budget, and adds that it is confident the future benefits, in terms of better government, better administration of our courts and better enforcement of our criminal laws, would far outweigh the comparatively small cost.

Four years ago the Hoover Commission recommended substantial increases in Federal salaries in all branches—executive, legislative, and judicial. The Congress did raise executive salaries, but not those in the judicial and legislative branches. We believe the time has come to put into full effect the Hoover Commission salary recommendations, which the pending bill would do.

It doesn't sound logical to cut expenses by raising salaries, perhaps. Yet, higher pay could save billions at the cost of thousands.

[From the Fairmont (Minn.) Daily Sentinel of July 3, 1953]

ON THE RIGHT TRACK

The American Bar Association is making a concerted effort to have the salaries of Members of Congress, judges of United States courts and United States attorneys increased.

The bar association agrees with a statement made recently by President Eisenhower that with constantly increasing taxes, it will be more and more difficult to get good men to leave better paying positions in private business, the professions, and industry to take Government jobs.

The Sentinel can agree with President Eisenhower and the bar association. For years it has contended that the pay offered for critical positions in governmental affairs is inadequate, especially in our courts and in our law enforcement departments of our Government.

United States attorneys, State attorneys, county and city attorneys often are forced to face lawyers who get as much for a single appearance as they do for an entire year's services. There isn't much argument to the claim that underpaid officials are easier prey for crime syndicates, gangsters, crooks, politicians, influence peddlers than would be a well-paid, financially independent official.

There was a time when $10,000 a year wasn't too bad for a Congressman or a Federal judge, even though they had to maintain 2 residences and run for reelection every 2 or 4 years. But that time has passed.

Those interested in breaking and evading the law pay more. The American people, whose security and well-being depend upon having incorruptible representatives, prosecuting attorneys and courts can't afford to pay less.

The McCarran bill should become law.

[From the Belleville (Ill.) Advocate of July 1, 1953]

SALARY INCREASES FOR JUDGES, SENATORS, AND REPRESENTATIVES

United States Senate bill 1663 proposes a substantial salary increase for Members of Congress and United States judges.

The increase in each category, by terms of the bill, would be $10,000 annually. The only exception is in the case of the Chief Justice of the United States, whose salary increase would be $14,500, bringing his salary to $40,000 annually.

Associate Judges would receive $35,000; United States circuit, Court of Claims and Custom Patent Appeal and Military Appeals Court judges, $27,500; United States district Customs Court and Tax Court judges, $25,000.

The proposal, which has the endorsement of the American Bar Association, does not seem unreasonable.

In every instance the duties of office are of the utmost importance to our welfare.

To be sure, a higher salary does not necessarily mean better men will be named to the offices. But there is this to be said for it that men who have achieved outstanding success in their professions and business will find the offices more attractive.

There are many instances where men who seek congressional posts actually have no business or profession but depend upon politics for their existence. These have found any emoluments of office attractive.

Is is not possible that men and women who have been successful outside of politics would find being a Representative in Congress or a Senator worth while under such conditions? Not that they would make more money, but that they would at least be compensated in part for lending their energy and their talents to the enactment of legislation which so often falls under the spell of the mountebank.

It might even give them heart for the rigors of an election campaign.

Judges, of course, do not face this ordeal.

Do not be deluded, however, that it is possible to buy talent and integrity in one package as you might get a double bargain in breakfast food and chewing gum.

Talent and integrity combined sell for only one price in the market place: The sole satisfying conviction of the necessity for doing well whatever comes to hand regardless of emoluments and honors.

[From the Wausau (Wis.) Daily Record-Herald of June 30, 1953]

A BETTER WAY

The manner in which the Senate Judiciary Committee proposes to increase the remuneration of the Nation's lawmakers is a much better and more straightforward way of doing it than that voted by the House.

The Senate group proposed raising the salaries of all Members from $15,000 to $25,000. The House voted to allow its Members to deduct from their taxable income the total cost of living expenses in Washington.

The purpose in either program is laudable. The job is an extremely important one and the remuneration should be adequate if not munificent. The $25,000 salary suggested by judiciary group would give the lawmakers but slightly more purchasing power than the $10,000 salary in effect in 1939, considering the great drop in the value of the dollar.

The public, however, would prefer that it be done openly and aboveboard, we believe, rather than through the device of avoiding taxes.

Presumably, the House preferred to be coy about the matter because of the economy drive. However, failure to provide proper compensation for the Nation's lawmakers is an instance of false economy. Increased pay for lawmakers and others in highly responsible positions in Government is consistent with the President's program of economy and has his support.

The American Bar Association has pointed out that salary increases for Congressmen, United States judges and others under the Senate Judiciary Committee proposal would amount to but a small fraction of 1 percent of the Federal budget.

The small cost of such pay increases would be far outweighed by the future benefits in terms of better government and better administration of justice.

[From the Newton Kansan Republican of June 29, 1953]

BAR ENDORSES PAY HIKE

The American Bar Association agrees with a recently expressed view of President Eisenhower, that with taxes what they are, we are approaching the time when it will be difficult to get the best men to enter and remain in government, unless they have independent financial means. The association construes that he was saying he believes Government salaries should be raised so that the best qualified people, poor or rich, could enter and stay in public life.

A statement by Robert G. Storey, president of the ABA, in part, follows:

"The American Bar Association agrees emphatically with that view. The Association believes it is false economy—and dangerous with the country's future—if salaries are not realistic enough to attract the wisest and ablest men to assume the immense responsibilities of government.

"Furthermore, we believe it would be entirely consistent with the President's program of Government economy if the Congress were to enact, at this session, the pending bill (S. 1663) to increase by $10,000 per year the salaries of United States Judges and Members of Congress, and to authorize the Attorney General to establish district attorneys' salaries between $12,000 and $20,000 per year. The cost of such an increase would be a minute fraction of 1 percent of the Federal budget. We are confident the future benefits, in terms of better government, better administration of our courts and better enforcement of our criminal laws, would far out-weigh the comparatively small cost. As one editor recently put it, higher pay could save billions at the cost of thousands.

"Four years ago the Hoover Commission recommended substantial increases in Federal salaries in all branches—executive, legislative and judicial. The Congress did raise executive salaries, but not those in the judicial and legislative branches. We believe the time has come to put into full effect the Hoover Commission salary recommendations, which the pending bill would do."

[From the Huron Plainsman of September 4, 1953]

ADEQUATE PAY FOR RESPONSIBLE POSTS

The present salaries of the Chief Justice of the United States on down through the hierarchy of circuit judges, district judge, lower Federal court judges, district attorneys, and Members of Congress, when they were established were adequate salaries.

But in these inflated times they are not.

The law of the land rests upon the interpretation placed upon it periodically through court cases by Federal judges applying the Constitution to the cases. It is essential that these arbiters not have financial worries. Naturally, that does not mean either that they should be wealthy men as a prerequisite to the position. The solution is adequate pay.

The same logic applies to the Federal district attorneys, who handle the governmental prosecution of cases. It is essential that they not be paid so inadequately that they are targets for temptation. It becomes even more necessary now because district attorneys are not allowed to have any other private business.

The makers of our laws, the Members of Congress, the ones who not only legislate but debate the fundamental political and economic issues of our day, also need adequate pay so as to reduce the influence of pressures from without.

Congressmen, both Senators and Representatives, receive a gross salary of $15,000 a year. The average net after taxes is about $13,000. That must support a residence in Washington and one in the home State. It must finance reelection campaigns. It must finance trips between Washington and the home State, and the entertainment of home State visitors to the Capitol. It is amazing how so many people who visit their Congressmen in Washington seem to assume that he has an unlimited expense account for lunches. The Congressman is usually quite hospitable, as home folks have the votes, but it becomes a constant financial problem, too. Thus, it is obvious that $13,000 a year is inadequate.

The answer to all these inadequacies lies in Senate bill 1663, which provides for salary raises as follows:

Supreme Court Justices: Chief, from $25,500 to $40,000; Associates, from $25,000 to $35,000.

Circuit judges, from $17,500 to $27,500.

District judges, from $15,000 to $25,000.

Members of Congress, from $15,000 to $25,000.

District attorneys: To a range of not less than $12,000 or more than $20,000, to be fixed within that range by the Attorney General.

It is certainly beside the point to say that there are always plenty of people willing to serve at present salaries.

The point is that the Government needs good men and adequate salaries are necessary to get and hold them. Ability is needed in responsible posts and ability must be remunerated or it will stay in the private fields.

It is difficult, despite the logic in the proposal for higher salaries, for Congress to pass such a bill. The reason it is difficult is that some Member of Congress, who is usually well enough fixed financially and independently, who wants to make a political pitch to the home folks argues that he is for economy and that goes for congressional salaries including his own.

It is for that reason that the great majority of men in Congress are men who have attained either wealth or financial stability before they run for Congress. Only a few young men study political science and take the legislative end for their career. We would be better off if more men were in Congress because they chose political science and the art of representation as a career. Yet that is impossible if the pay is not high enough.

The net cost of the increase of such recommendations, for Congress and Federal judges, would be $5,878,000 a year. That is peanuts. More exactly, it is less than one one-hundredth of 1 percent of the proposed annual budget.

The Senate proposal would improve the standard of our republican form of government. Congress should pass it.

Otherwise, what with the higher cost of living and high campaign expenses, Congress will become a haven only for the independently wealthy who can afford to run for and remain in Congress without salary. That would mean a concentrated narrow viewpoint on economics that would soon be reflected in legislation.

[From Rept. No. 49, 84th Cong., 1st sess., House of Representatives]

The following table sets forth a comparison between the amounts recommended by the Commission and those provided for in the bill H. R. 3828:

	Commission's recommendation	Provisions of H. R. 3828
Chief Justice of the United States	$40,000	$35,500
Associate Justice of the Supreme Court of the United States	39,500	35,000
Vice President of the United States	40,000	35,000
Speaker of the House of Representatives	40,000	35,000
Members of Congress	27,500	22,500
Judges of the U. S. Court of Appeals	30,500	25,000
Judges of the U. S. Court of Claims	30,500	25,000
Judges of the Tax Court of the United States	27,500	22,500
Judges of the Court of Military Appeals	30,500	25,000
Judges of the U. S. Court of Customs and Patent Appeals	30,500	25,000
Judges of the U. S. Customs Court	27,500	22,500
Judges of the United States district courts (including the United States district courts for the districts of Hawaii and Puerto Rico, the district court for the Territory of Alaska, and the district court of the Virgin Islands)	27,500	22,500
Chief Justice of the United States	$25,500	$35,500
Associate Justices of the Supreme Court	25,000	35,000
Judges of the United States courts of appeals	17,500	25,000
Judges of the United States Court of Claims	17,500	25,000
Judges of the United States Court of Customs and Patent Appeals	17,500	25,000
Judges of the Court of Military Appeals	17,500	25,000
Judges of the United States district courts	15,000	22,500
Chief Judge of the United States District Court for the District of Columbia	15,500	23,000
Judges of the United States Customs Court	15,000	22,500
Judges of the district courts of the Virgin Islands, Alaska, and the Cana. Zone	15,000	22,500
Judges of the Tax Court of the United States	15,000	22,500

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALTER] has expired.

Mr. REED of Illinois. Mr. Chairman, I yield 10 minutes to the gentleman from North Dakota [Mr. BURDICK].

Mr. BURDICK. Mr. Chairman, I hope that I will conduct my argument on this bill in such a way that I do not have to reflect upon anybody who is opposed to me. I do not have to say that those who are opposed to my views are timid souls; that they are cynics and demagogs. If 16 years of service in this House has demonstrated that I am a timid soul, I do not know where they got that information. Many a time for 16 years I have been the only vote opposed to my own party. I have supported the President of the United States when he was a Democrat, and I support the President of the United States when he is a Republican, if I think he is right. So that if I come to be a timid soul I would like to have the gentleman from New York come out to the Badlands and see what timidity is.

A demagog? I do not have to demagog. I do not spend any money in campaigns. The last time I received for campaign purposes exactly no dollars. I spent in campaign expenses exactly no dollars. If I had to demagog, I would like to have the gentleman from New York [Mr. CELLER] define what a demagog is. The only ones that ever approached it in my estimation came from the great State of New York.

You have heard some great men speak on this subject—men whom I admire. Probably I admire the gentleman from Texas [Mr. DIES] more than anybody else in this House because he has ability and he has courage. The gentleman from Illinois [Mr. REED] and the gentleman from Pennsylvania [Mr. WALTER] I admire, but I was disappointed in our chairman of the Committee on the Judiciary when he called me a timid creature.

Now you are not fooling me any, and I am not trying to fool you. This bill is going to be passed. I was not opposed to an increase in the salary for judges, but you lined this up so that if I was in favor of an increase in the salary of judges I would have to say I was in favor of an increase in the salary for Congressmen. It is not divided. So if I take one I must swallow the other. And you expect me to stand up here and say that

an increase in congressional salaries is not necessary. That is not my position at all. If there are young men in this House who have families and maintain 2 homes, a reasonable increase in salary is necessary. Once in a while newspapermen say that "Of course Burdick is rich. Oil. Uranium. One of the big cattle barons of the West." Well, up to this very minute I have not received pay for a single quart of oil. I have not received a dime for uranium. I do not know whether we have it or not. The scientists say it is there, but I have been walking over it for 20 years and did not know it. "Cattle baron." "I have no dependents." I venture this prediction, that out of my salary I help more dependents than the average man in this Congress, and I am glad to do it. About all that we who oppose this bill can do—I don't suppose there are very many; at least if there are they are like the gentleman from New York said, they are timid. They have not spoken to me about it. About the only thing we can do is to cut down the amount. I want you to be thoroughly honest about it, however. I would like to see you come out in the open and give me a chance to vote "No" and give you a chance to vote "Yes." Don't slide in behind the curtain and say, "It wasn't me. It was the other fellow." You say we are getting $12,500 a year. Why do you not tell the truth about it? I have often said in lawsuits, when a defendant wanted me to defend him, "For God's sake, boy, tell me the truth, because if there is any lying going on in this case I want to do it myself."

The fact is that we are getting $15,000. Let us put that down. Period. That is what we are getting. My proposition is, if you increase that $5,000, you increase it enough to take care of these young men who have all of these dependents so that they can provide two homes. I wonder if we will have enough to stand up here for a rollcall vote. I hope so. If I were of your opinion, I would not be afraid to vote. The fact is I am not afraid of anything in this House.

One Congressman said he lost $400 a month every month he was here. That does not surprise me any. You can lose more than that if you plan it. I tried it a couple of months, and it has taken all of my salary and the proceeds of two of the best Black Angus bulls you ever saw. But I have noticed something funny about these Congressmen who lose $400 a month. When their term has expired they come right back to lose $400 a month more. Let them proceed with it. As far as I am concerned, I am not going to lose as much as I have the last 2 months.

Everyone around Washington is for it. The President is for it. I ought to support the President, but when he asks for too much I am against him. The Speaker is for it. He is a man I admire, one of the greatest men I have met in Washington. Everybody else seems to be for it. Labor is for it. Well, if we put it through and get $27,500 or $25,000 or $22,500, and the question of the pay for the rest of the country comes up and we vote that down, what position are you and I going to be in when we say "No." Will the sky be the limit? Now, just because we can do it, is that controlling?

Some of you Members here—I see Mr. LANE in a front row seat—remember when Chief Justice Hughes stood on this platform at the 150th anniversary of the birth of this Nation and made a remarkable statement. He said:

> It is a good thing for the Supreme Court of the United States to know the extent of its power, but it is a far greater thing for the Supreme Court to know its limitations.

We have the power to do it; there is no other group of workers in the United States that has the power to raise their salaries. When we have that power, should we not exercise it with justice and with fairness?

How then can you face anybody and say you voted for a 70 percent raise? I do not know what kind of people you have in your districts, but I know that in North Dakota they would feel that a 70-percent raise was just a little bit large when compared with the raises they have been receiving: They have lost on their cattle, their wheat, and everything else. I am inclined to think if I met a blind man in Williston who is getting $40 a month and he asked: "What are you getting?" and I said, "$25,000 a year," I am afraid he would say: "What did you do for us?" "Well, we have not done anything yet but we are going to."

I would not be fair if I said that you are getting too much, because when your last salary was raised the earning power of the dollar was 77 cents, but today it is only 51 cents. So today on the salary we are receiving in comparison with what the situation was when we had the other raise we are not receiving $7,650. If I wanted to be intellectually dishonest I would not say that, but that is the true situation. This devaluation of the dollar, however, applies to everybody in the country as well as to Congressmen.

Those old people who were getting $40 a month when the dollar was worth 77 cents are getting $29.92 now.

It seems to me that before any group of people you cannot justify a 70 percent raise.

You say you are going to get better men if you raise the salary. I do not want to condemn any of you for being against me, but if you agree to that doctrine and vote for more, you agree that you should not be here, because we are not the best. Is not that logical? Are you going to get better men? Why, the best men in the United States never saw this Congress, and they never will, because you cannot get many good men to run. That is the reason I am here. They do not want their names and the names of their ancestors dragged through the political mud until they believe what is said about them. They do not run for office.

You notice that the one who has been here a long time remains a long time longer, because when the opposition has used up all the adjectives they can drag out against them they give up and he is elected and reelected under this slogan: "Well, hell's fire, we can't do anything about it, so let him go."

I want you to remember this thing: That some newspapers played up this idea that I am well-to-do. The only thing I need to say to you is that the people of Williston know that is untrue, and when the people of my home county know it the rest can howl.

I propose to offer an amendment if no one else does. Where in the bill it says "$22,500" I am going to offer just a mild, fair amendment to reduce that figure to $17,500. That will give you $20,000 a year. Remember now, I want to bring this hidden $2,500 up so the people can see where it is.

I am going to offer another amendment, if no one else does, to strike out the clause that makes this retroactive. If you are going to have it retroactive, I am in favor of putting it back to 1934 when I came here. I think that is the greatest piece of injustice that has been done.

Finally, I am just going to pleasantly and politely ask you for a record vote and I think you will all comply, because you have experienced now how fair I have been in this argument. Just give us a record vote.

I have enjoyed being with you while I have been here and I hope that relationship continues. Just remember that this is the only body that can raise the salaries of its own Members. If you are going to do that, do it under the precepts of Chief Justice Hughes when he said: "Understand our limitations."

If you do that and give us a record vote, then the rest of the story I can read in the CONGRESSIONAL RECORD.

I hope you will all be back here in the 85th Congress.

Mr. CELLER. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. HERLONG].

Mr. HERLONG. Mr. Chairman, I realize I am in a pretty difficult position following the gentleman who has just preceded me. There is no humor in what I have to say. I just want to talk a little cold turkey. I think we should face up to this issue squarely.

It is probably an unfortunate thing that an increase in salaries for judges and Members of Congress are tied together in the same bill. I know there are Members of Congress who would favor an increase in the judges' salaries but who will not vote for this bill simply because an increase in their own salary is contained in it. In my opinion, it is highly important that the salaries of our Federal judges be raised. I know able and qualified judges who have had to leave the bench and return to private practice because they just could not make ends meet. We must have the best possible legal talent on our benches and with the present high cost of living we simply cannot continue to get them or even keep those we have unless we are willing to pay them.

Mr. Chairman, as far as the pay raise for Members of Congress is concerned, I want to make it perfectly clear at the outset that what happens to this bill today is not vital to me personally. I happen to have some outside income, the earnings of which in no way interfere with my services as a Member of Congress. However, there are many Members of Congress whose only income is

the salary they receive here and they are vitally concerned. Many of them are not even going to be able to vote for this bill today, and I say "not going to be able to vote for it" advisedly. I have no quarrel with them. They know their own districts and they have their own local problems. Counted in this group, however, are some of the ablest and most valuable Members of Congress. Whether they vote for this bill or not I know they are "hurting" financially. Many of them are just hanging on by the skin of their teeth. This Congress cannot afford to lose their services.

Not only does the inadequate pay of Congressmen affect sitting Members but it discourages otherwise highly qualified persons from even seeking the office. I know of instances where districts have been created and extremely well qualified people have been importuned to make the race for Congress. Some of them have asked me whether a Congressman could live on his salary in Washington, and I had to tell him that he could not if he had a family.

To a degree, certainly membership in the Congress is a labor of love. I do not know any Member who expects to get rich out of his salary here in Washington, but he does want to break even. Some Members can break even. A person with no family can probably make out all right. There are a number of Members of Congress, valuable Members of Congress who are in this category, but I certainly would not want to make it an unwritten requirement that all Members of Congress be without families. Neither should membership in the Congress be an exclusive club, membership in which is open only to those who are independently wealthy or who have outside incomes. This is a representative body and should truly be representative of all the people of the United States. It should be a fair cross section of our population. It should contain men and women who know from actual experience the problems of every segment of our population. This can be achieved only by paying the Member enough money to meet the extraordinarily high living expenses of a Member of Congress. I like being a Member of Congress; I like my job, and I expect to continue to seek it, regardless of what happens to this bill. But, there are other Members here who like their jobs just as much as I do, and they are doing splendid jobs of representing their people at this time, but they are not going to be able to continue if we do not do something so that they can make both ends meet.

So, in the interest of good government, Mr. Chairman, I ask you to vote for this bill.

Mr. REED of Illinois. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. McVEY].

Mr. McVEY. Mr. Chairman, the subject of congressional salaries has been before Members of this body for some time—at least in an informal manner. There are few who do not believe that some increase is highly deserved, if not essential to their continuance in the House of Representatives. Disagreements usually center around the amount of such an increase that should be granted. The present bill would raise salaries to $22,500 per annum, with an expense allowance of $2,500, making a total of $25,000.

Informal conversations lead me to believe that many Members feel this figure is too high. They are somewhat afraid of reverberations back home. The reason is given, also, that as long as the budget is unbalanced, increases of salaries of Members of Congress are not in order. The first reason given is understandable, but the second one seems to be somewhat shallow.

Let us look at the budget for a moment. It has been unbalanced most of the time by many billions. The total amount of the unbalance is more than $275 billions. The deficit in many cases is caused by our extensive giveaway program. Such items as $700 million to Tito's government; $700 million to Indochina; $88 million to Sweden; $2 million to Switzerland; $713 million to countries of Central and South Americas; and gifts to countries whose budgetary situation is better than our own. Much of our deficit in the budget is due to the money we have given to countries which have not stood by our side in the case of war, and not to congressional salaries.

It is estimated that the increase in expenditures which would be caused by the passage of this bill amounts to $3.2 million. How are we going to balance the budget by saving $3.2 million if we are going to continue to give away such lavish sums to various parts of the world? If we are going to balance the budget we must attack the main arteries of expense and only in that way will the budget be balanced.

Now I am not in favor of the amount of increase proposed in this bill. The jump is too big. There is an attempt to make up all at once for neglect in years gone by. I do believe, however, that some increase is amply justified. I believe this Congress should at least pay salaries comparable with those received by school superintendents in medium-sized cities. In 1939, when the dollar was worth 100 cents, I received $10,000 as superintendent of schools. With the value of the dollar cut approximately in half, the amount of pay received then is equivalent to $20,000 today. If we are going to keep pace with the salaries of school superintendents, and that is not unreasonable to expect, the salaries of Representatives in Congress should be $20,000. Of course, the added expenses of keeping up a home in two places, running for office every 2 years, traveling expenses back and forth, donations to various churches, clubs, and philanthropic organizations of all kinds, constitute another drain that perhaps should be taken care of in some way. A basic salary of $20,000, however, appears to be in reason and one which we can in all conscience support.

Mr. CELLER. Mr. Chairman, I yield 10 minutes to the gentleman from North Carolina [Mr. JONES].

Mr. JONES of North Carolina. Mr. Chairman, we are today considering a bill which if enacted into law will have a far greater effect upon this country than the amount of money involved would indicate. In H. R. 3823 it is proposed that the salaries of many Federal officials be not only brought up to par with the increase in the cost of living, but that they go far beyond. Passage of this bill will be some indication to the country that the Congress has removed all restraint and is now proceeding to open the floodgates. It will signal the beginning of another round of price, wage and salary increases which will again set in motion the inflationary forces which have temporarily subsided. It will be even more difficult for the Congress to say no to the many demands for funds. The hope of a balanced budget will be dashed to pieces against the force thus set in motion.

I feel confident that the American people desire their public officials be paid a fair and decent salary, but they do not care to set up a special or favored group. Representative government is founded upon the principles that public office is a public trust. To render service to one's country should be the primary motive of all public servants. Should that motive become personal financial gain, our system of government cannot long endure. To us as lawmakers and public servants is given an unusual power—the power of setting our own salary. Few Americans enjoy the privilege of setting their own pay. To exercise such a trust requires in all good conscience the use of great caution and restraint. An abuse of that trust can do irreparable injury to representative government. In the long run it matters little what it might do to our individual political careers but the damage to our system of government could be everlasting.

Mr. Chairman, I am constrained to believe that a majority of the American people will agree that the members of the legislative and judicial branches of our Government are entitled to some increase in compensation. There has been no change in congressional and judicial salaries since 1946, but the cost of living during that time has increased substantially. However, in all good conscience, I do not believe we are entitled to the increases called for in the bill under consideration. I do not believe you can justify these increases for the members of the legislative or the judicial branch of our Government.

Let us examine the bill in detail to see just what it does. It is proposed that the salary of the Chief Justice of the Supreme Court be increased from $25,500 per year to $35,500 per year, and that Associate Justices be increased from $25,000 to $35,000 per year. This is a $10,000-per-year increase. I realize that these are responsible positions and that the men who exercise this trust should be properly paid, but I submit that a $10,000 increase on top of a $25,000 salary, together with all the other benefits available to them, is entirely out of line. A Justice of the Supreme Court is appointed for life. Under the Constitution, his salary cannot be lowered during the tenure of his office. So when these salaries are increased as proposed in this bill, this Congress will be powerless to decrease those salaries during the tenure of office of the present members of that body. This would be true not-

withstanding the financial condition of our country. Upon reaching retirement age, a Justice draws full pay for the rest of his life. Upon his death his widow draws $5,000 per year for the rest of her life from the taxpayers of this country. The Justice and his widow pay nothing into this retirement system. Estimate, if you please, just how much money a private citizen would have to earn and invest in order to pay such annuities to himself and his widow. It would be a huge sum of money, and yet all of this and more is provided for these Justices without cost to them and in addition to the salary.

Other Federal judges are the beneficiaries of a retirement system of full pay without cost to them. The same constitutional provision applies to all Federal judges relative to the prohibition against diminishing their salaries during the tenure of their office. So that when the Congress enacts this bill the salary so set cannot be diminished during the tenure of office of the present members of the Federal judiciary. Notwithstanding all of these benefits, it is now proposed to raise these salaries by from $7,500 to $10,000 per year. I readily agree that our Federal judges are entitled to increased compensation, but I do not believe we can justify such an increase.

The bill also proposes to raise the salaries of district attorneys, assistant district attorneys, and several other officials in the Justice Department. These increases, as in the other instance, are entirely out of line and should be reduced.

Mr. Chairman, the bill has another purpose—that is, to increase the salary of the Senators, Representatives in the Congress, Delegates from the Territories, and the Resident Commissioner from Puerto Rico. The increase provided for in this bill for the Members of Congress amounts to $10,000 per year. As in the case of the judges, I am firmly and sincerely convinced that such an increase cannot be justified, and that it would be a serious mistake for the Congress to pass such a measure. This is particularly true when we find that the national average annual salary is far below the amount of the increase called for in this bill. The budget is unbalanced and the public debt threatens to reach an all-time high. It behooves us as representatives of the people to ponder all of these things well before enacting the measure under consideration.

Mr. Chairman, as a member of the Committee on the Judiciary which considered this bill, I offered several amendments to reduce the proposed increases. At the proper time today, I perhaps will offer amendments reducing these proposed figures. Some of my amendments will leave the salaries higher than I think they should be but, in light of my experience in the committee, it seems to be the only way these figures can be reduced any amount.

Mr. Chairman, again let me say that I firmly and sincerely believe public office to be a public trust. I shall make no effort to judge the manner in which others perform that trust, but my conscience compels me to vote against this measure.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. YOUNGER].

Mr. YOUNGER. Mr. Chairman, I regret that I cannot support this salary bill, because I know from personal experience a reasonable increase is needed. What I honestly believe to be reasonable is a maximum increase of $5,000.

In the polls of the House taken last year, I stated I would vote for a top salary and expense allowance of $20,000. That was my appraisal of the need then, and I have not changed my mind this year.

To me, we as Congressmen are in a unique position in that we are the only Federal body which must appraise its own worth as a group and fix its own salary. For this reason, we must lean over backward to be fair and conscientious in this appraisal of our own contribution to the Government as a whole.

We must set an example of economy if we are to encourage economy elsewhere in the Government. I thought last year we made Herculean strides toward a balanced budget; but from what I have seen so far this session, Congress is leading the way toward extravagance in the matter of our own salary and expenses which should be separated as well as housekeeping expenses, in the passage of this bill, and we are setting an example which will return to haunt us in the consideration of every appropriation bill.

For years the salaries of board and commission members have been tied to congressional salaries. I somewhat doubt if any of those voting for this bill are ready to vote the same increase in the salaries of these board and commission members. I for one am not prepared to do so, but would be willing to vote for an increase to $20,000 for these same individuals.

I am sure no one on this floor decided to run for Congress because of the salary, nor do I think the salary increase here proposed would encourage or deter anyone from running in the future.

To be representative, this body should contain a cross section of our population, as I believe it does and always has. Changing the salary in the past has not affected this representation, nor will it in the years to come.

I see no objection to the judicial salaries, and only regret that they are not contained in a separate bill.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may require to the gentleman from California [Mr. JOHNSON].

Mr. JOHNSON of California. Mr. Chairman, I intend to vote for the bill before us. Congress is placed in an odd situation, it being the only vehicle that can provide an increase in the pay of its Members. I would have preferred to have had the bill written so that our salaries would be increased to commence with the opening of the next Congress.

This viewpoint would comply with the provisions of the California law which provides that the pay of an elected official may not be increased for the term for which he was elected.

However, after carefully considering the matter, I think the bill is justified and that the pay suggested by the Judiciary Committee, which wrote the bill, is reasonable, considering the responsibilities of Congressmen. The Members of Congress now have tremendous responsibilities. In the uncertain world in which we live our decisions as to legislation must be seriously pondered and our vote must be objective and strictly in accord with what we think will be for the best public interest.

In my book the statesmanlike Congressman is one who loves the public service and is not primarily concerned with the salary which he receives. If we make the salaries too high we will encourage politicians of the cheap type whose primary interest will be the amount of money the job pays.

I think I may say that to me personally it is immaterial whether the pay is raised or not. My wife and I have lived comfortably on the salary I now receive. This pay is adequate for the standard of living which we think proper for us. Our children are grown and we no longer have the expense of taking care of their needs and providing for their education.

In the present Congress there are a great many young Members. Most of them that I know have small children. For them the present salary is too low. They have the responsibility of caring for their children and of giving them a proper education. The timetable of Congress does not dovetail with the school timetable. Some of these couples use the Washington schools exclusively to educate their children. Some keep their children in school at their home for part of the year and then bring them to Washington to enter school here for the winter and spring terms. Obviously this is a very unsatisfactory arrangement. Also, it separates the family for part of the year, as the Congressman must go home to his district when Congress is not in session. Being in Congress has gone from a part-time job to a full-time job as in most county constituencies the people expect the Congressman or someone representing him to be in the district when Congress is not in session.

We must not forget that inflation has cheapened the dollar. When I arrived in the House of Representatives in 1944 the salary was $10,000 per annum. Those dollars bought a lot more than the dollars of today. I have had my life-insurance policies analyzed to determine how much the dollar has shrunk in purchasing power by the inflation following the war, in comparison with the purchasing power of the dollars invested in my life-insurance policies in the 1920's, 1930's, and the early 1940's. It has lost about half of its buying power, I was informed by a study made by the Congressional Library to whom I presented the facts.

So while we get many more dollars, we do not get near the purchasing power that the dollars did before inflation. We all realize now, after experience with inflation, that it is not how many dollars one has but how much they will purchase that really counts.

For these and other reasons that I could enumerate I believe that this bill is fair and just and should be passed.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may desire to the gentleman from Kansas [Mr. HOPE].

Mr. HOPE. Mr. Chairman, I shall vote against the bill (H. R. 3828) to increase the salaries of Members of Congress and those in the judiciary branch of the Government. I regret that these two subjects are combined in one bill as I think congressional salaries and judicial salaries should be considered separately.

I agree that congressional salaries are too low. They have not kept up with increases in the cost of living nor with the increased work and responsibilities which go with the position of a Member of Congress in these days. Many students of government as well as many authorities in the field of business, labor, and agriculture have advised Congress that it should increase the salaries of its Members. Perhaps a reasonable increase should be made at the proper time.

I do not believe that this is the proper time. The Federal Government is today spending more than it is taking in; that has been true most of the time during the past 20 years. Our national debt is still increasing and as long as this situation prevails we can make no substantial reduction in our heavy burden of taxes. Nor can we overlook the disturbed world situation; even if it gets no worse it will require large and possibly increased expenditures in the field of national defense for many years to come.

There is another factor which I hesitate to mention and yet I think it must be considered. That is if Congress votes to increase the salaries of its Members by 60 percent as proposed in this bill it puts every Member and especially those who vote for the increase in a more difficult position when it comes to voting on the many demands which are constantly being made for additional Government expenditures. We know that if only a small part of these demands are met it will further unbalance the budget and contribute to inflation.

These times of cold war constitute a trying period, a trying period which may continue for many years to come. As long as it does continue the American people are going to have to steel themselves to make more sacrifices, financial and otherwise. They have a right to look to Congress for leadership in this matter. How effective will our leadership be if we vote to increase our own salaries by 60 percent at a time when our national debt is growing larger.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may require to the gentleman from Utah [Mr. DAWSON].

Mr. DAWSON of Utah. Mr. Chairman, at the outset, I want it understood that I share the feeling that is universal among hard-working people. Like everyone else, taxpayer, Congressman, and judge, I feel I am worth more than I am getting. But the question is, have we earned it?

I say no, Mr. Chairman. I will not vote for a salary increase for myself and my colleagues in this House until the budget is balanced and a further tax reduction has been granted.

There has been a lot of testimony taken about the difficulty of obtaining competent men to serve in our Federal district courts and in Congress at the present rate of compensation. As a Member of Congress I resent this implication. I do not consider myself incompetent and I have found that there is no shortage of competent men in Utah who would be willing to take my place here in Congress if I decided not to run for reelection in 1956.

Let us look at the record in the pay matter.

When I testified in opposition to this increase before the Commission on Judicial and Congressional Salaries last session, I suggested to the Commission that it examine the salaries paid our State officials. I had expected their fact-finding crew to list the salaries paid governors of the 48 States as well as that paid members of State courts of general jurisdiction. Unfortunately, they only examined and listed the latter.

These salaries, however, are significant and should be considered in the light of this legislation which would increase the pay of Federal district judges by $10,000 as it was reported from committee.

How does the present Federal district judge's $15,000 salary, with retirement at full pay at the age of 70, compare with salaries paid equivalent or superior court officials in the 48 States? Well, gentlemen, it compares very favorably.

As a matter of fact, the 2 Federal district judges in Utah are—at the present $15,000 salary—the highest paid public officials in the State. And there is no dearth of applicants for the job when 1 becomes vacant.

Compare this salary with that paid our five State supreme court justices in Utah. They earn $9,000 per year and have to run for office—on a nonpartisan ballot to be sure—every 10 years. Yet this $9,000 has attracted outstanding public servants to our highest judicial body in Utah.

Lest you think Utah is unique in its judicial pay scale, let us look at the record.

At the present $15,000 salary, Federal district judges are being paid as much or more than the members of the supreme courts of 33 of the 48 States. And who is there here who believes that a Federal district judge's duties are more important than those of the members of the States' courts of last appeal?

A more valid comparison—one in which the duties are more comparable—would be to weigh the present salary being paid Federal district judges with that paid State judges having general jurisdiction. Here we find that the present $15,000 salary is greater than the salary paid State district judges in all but 5 of the 48 States. And I venture to state that the retirement provisions of State judges having general jurisdiction are nowhere comparable in liberality with those of the Federal district judges under the present pay scale.

At $25,000, Federal district judges would be paid more than the supreme court judges of any State except New York and no State judge with similar responsibilities and duties would make anywhere near that amount, except in New York where the salary for trial judges having general jurisdiction ranges from $23,000 to $28,000.

I regret that I do not have the comparable figures for State and governors, but again I venture that they are rather conservative when compared with the $25,000 salary this bill proposes.

I strongly believe that any increase in congressional or judicial salaries should be held in abeyance until more than a token tax reduction has been granted and until the budget is balanced. If this is not acceptable, the effective date of the increase should be postponed until January, 1957.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may require to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman, the bill now under consideration provides increased salaries for the Federal judiciary, Members of Congress, United States district attorneys, assistant district attorneys, committee professional staffs and clerical staffs.

In my opinion it is most unfortunate that so many differing classifications have been joined in this one bill. There may be reasons to justify some increases and there may be others that are not justified. However, under this bill as reported to the House it is necessary to vote for all whether they are all entitled or not, or vote against all even though some may be entitled to an increase. The unsatisfactory way in which this works is illustrated in my own case. I am in favor of that portion of the bill that increases the salaries of the Federal judiciary, but I am opposed to the increase of congressional salaries as provided for in the bill. Thus, to effectuate the latter I must vote against the entire bill. I regret to be placed in this position.

Now, as to my reasons for opposition to increasing the annual salary of Members to $25,000. Under present conditions it seems to me this would be unconscionable. The Federal Government is running a deficit each year. The Congress could and should have remedied this situation before this time. If this had been done, and, a balanced budget resulted, then there would have been some justification for giving consideration to increasing the salary of Members of Congress. However, until that is done Congress should not add to the deficit by voting itself a $10,000 annual increase.

The people of this Nation want further reduction in taxes. How can this be done if Congress is to add to the expenses of government? Congress should be seeking ways and means of reducing expenses instead of increasing the cost of government. Let us first balance the budget and reduce the cost of Government, then the people will gladly show their appreciation and support a reasonable increase in salary to Members of Congress to meet the increased cost of living and the decreased purchasing power of the dollar that have taken

place in the years that have intervened since the congressional salary was fixed at its present level.

While this same reasoning could apply to the judiciary, yet, we should not overlook the fact that our judges are greatly underpaid. We owe it to them to see that they are fully compensated. For a long time they have been underpaid. As a result too often we have been denied the services of men who could not assume a judicial position because of the inadequacy of the compensation. We must give salaries that will attract the highest type of character and ability to our courts of justice.

There is also another matter that should be given serious consideration before we vote ourselves a $10,000 increase, namely, what about the case of the postal workers and Government employees in general. While they have had several wage increases since an increase was given to Congress, yet, nevertheless these workers are being hard pressed to make ends meet. We have been quibbling over a 5 percent, a 7½ percent or a 10 percent increase for them and then by this bill, if adopted, vote ourselves an increase of nearly 70 percent. Where is there any justification in this? I cannot bring myself to be a party to such an unfair proposal of first taking care of ourselves and leaving the demands of deserving Government employees unanswered.

I am frank to admit that there may be instances where Members of Congress find it difficult to get along on the present salary. The necessity to maintain two homes, entertain visiting constituents, meet heavy election expenses, and, the many other demands, charitable and otherwise, made upon a Member of Congress, make it especially difficult for a young Member with a growing family to meet expenses, with little or no opportunity to save anything for the rainy day. It is strange that some in the face of all this persist in running for reelection. It would seem natural and certainly justifiable if they should turn their attention to more lucrative opportunities. Meritorious though these considerations may be yet, there is an obligation that we owe to our people that must be given first consideration.

It is for these and other reasons that I feel it is necessary for me to vote against the legislation at this time.

Mr. REED of Illinois. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. LECOMPTE].

Mr. LECOMPTE. Mr. Chairman, I have great admiration for the Members of this House. No doubt many could earn incomes far in excess of the salary of Congressmen. Some of our outstanding Members have spoken in favor of this bill, but, I find I cannot in good conscience support the measure as it comes before the House today. It seems to me we are presented with a peculiar situation. In the 16 years that I have served in the House, I do not recall a rule that is quite like the rule we are operating under at this moment. We have had gag rules, we have had open rules, and we have had partial gag rules, but here is a very peculiar rule indeed. You can change figures and you can strike out, but I see no way of adding new sections to this bill. I believe the folks in this Congress, if they would undertake to sample the opinion of the folks at home, they would find that the vast majority of the taxpayers are not in favor of an increase in salary in such proportion as this bill provides. An increase for ourselves that amounts to substantially 66 percent of the compensation we are getting at the present time and yet we have not yet gotten around to the consideration of even a very modest 5- or 10-percent increase in salaries of the thousands of folks who are employed in the post office and under the civil service generally. Mr. Chairman, this bill goes altogether too far, in my opinion, in undertaking to raise the salaries and compensation of the Members of Congress by 66 percent or thereabouts, and while I have great admiration for the members of the Committee on the Judiciary, I am inclined to agree with the gentleman from North Carolina, the committee has gone too far in raising the salaries of the members of the judiciary. I was very much surprised to find a section in this bill beginning on line 22, page 4, and continuing to and including line 9 on page 5, which represents to me a deliberate invasion by the Committee on the Judiciary of the functions and authority of other committees of the House. I would like to have someone on the Committee on the Judiciary tell me just where in the rules, the Committee on the Judiciary is authorized to handle the salaries of the committee staffs of the House of Representatives.

Mr. WALTER. I would like to call attention to the fact that the authority is in the Reorganization Act. This does not provide additional compensation but is legislative authorization and is an amendment to the Reorganization Act.

Mr. LECOMPTE. I have before me the Reorganization Act. I cannot see in it anywhere any authority for the great Committee on the Judiciary to handle the salary schedules of employees of the House. This function is vested in the Committee on House Administration.

Mr. Chairman, my opinion in connection with this bill is very much along the lines of the gentleman from North Dakota [Mr. BURDICK]. If representative government is to prevail and succeed, I think every man in this House ought to stand up and be recorded with respect to his feelings about this matter. I have heard it whispered around that we might be able to slip this bill through without any record vote. A record vote is fundamental in representative government. There should be no talk, in my opinion, of slipping this bill through without a record vote. I have the highest respect for those who are in favor of this bill. Certainly they will want a record vote on the measure. Those who have already spoken are on record. All other Members realize that a record vote is fundamental to good public policy and to the maintenance of representative government.

There are many other objections that I have to this bill. In the State of Iowa it would be unconstitutional, I am quite certain, for the Iowa Legislature to increase the salaries of the members of the General Assembly for the session in which they are serving. The increase in salary would have to take effect at the next session, after another election had been held. We ran for office last fall knowing the salary. This bill proposes a big raise and makes it retroactive to January 3, when Congress met. The voters will not like this idea.

Mr. WALTER. Mr. Chairman, will the gentleman yield?

Mr. LECOMPTE. I yield.

Mr. WALTER. I would like to reassure the gentleman with respect to a record vote. There will be a record vote.

Mr. LECOMPTE. I thank the gentleman very much.

In my opinion that is the correct procedure in a representative body; if we are going to maintain representative government in all of its finest traditions, we must have a record vote. I think it is very wrong for the Members of this House to vote themselves an increase in salary for this session of Congress when every Member knew the salary when he became a candidate last year. If a salary increase is necessary, it should by all means take effect in the next Congress, the beginning of the 85th Congress.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. CELLER. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. CHRISTOPHER].

Mr. CHRISTOPHER. Mr. Chairman, I am going to have to vote "no" on the record vote on this bill.

I have every respect for the sincerity and judgment of those who are in favor of this salary increase. I am willing to confess that I served 2 years in the 81st Congress, and if I count the expenses of my campaigns, which came out of my own pocket, I donated my time, and the job owed me $3,000 when I went home. But notwithstanding that fact, we have to look back to conditions that prevail in my district at the present time.

Maybe some of you people who come from where it has been raining in the last 3 years do not realize what has happened out along the Kansas border where I live and where Congressman CLIFFORD HOPE lives. We have farmers driving 70 and 75 miles into Kansas City to work in the defense plants there, or at Bendix, Westinghouse, or John Deere, at from $1.60 to $1.87 an hour, in order that they may make a little money off the farm to keep foreclosure from making them homeless.

We are cattle people out in my country, dairy cattle people; there are some beef cattle, but mostly dairy cattle. We have had our price supports on dairy products slashed from 90 percent of parity to 75 percent of parity, and that made the price of milch cows drop from $300 a head to whatever they would salvage at the packing house, which is about $100 apiece.

There is a small lens factory in my home town that makes eyeglass lenses. Because of the fact that they can be made in Puerto Rico, bootlegged into the

country and sold here, that little lens factory may be forced to shut down.

People are unemployed in my country. Remember, we have had 1 year of flood, 3 years of drought, and 2 years of Ezra Taft Benson in Missouri; a farm out there is a liability.

I cannot vote for this measure and go back and face my people.

We have old-age pensioners out there who are very deserving. They are being taken off the pension rolls because perhaps they have a son or a daughter or some other relative who owns a home. They say to the old-age pensioner, man or woman, "If you will move into a little log hut somewhere and live by yourself we can continue to pay you your little stipend, but if you live with any of your relatives we will assume that they are able to take care of you." When conditions are thus in my district I cannot demand a vote to raise my own salary. You must remember that the per capita income of farm people is only $914 per year, and unemployment in my district is widespread. I am going to have to vote in the negative on the rollcall.

Mr. CELLER. Mr. Chairman, I yield such time as he may desire to the gentleman from South Carolina [Mr. McMILLAN].

Mr. McMILLAN. Mr. Chairman, I am making this statement for the purpose of making my reasons for voting for the judge and congressional salary increase clear to everyone concerned.

The first reason is the fact that congressional salaries have been raised but once during the past 27 years and that was a 25 percent increase in 1946. During the past 27 years living expenses in the city of Washington according to Labor Department's figures have increased 316 percent. We have increased the salaries of Government employees on six different occasions since 1941, amounting to more than 100 percent, and have recently voted at $325 million salary increase for Army officers.

When I came to Washington as a Member of Congress, there were only approximately 20 people connected with the Government who received higher salaries than the Members of Congress. The President, Vice President, Supreme Court Judges, Cabinet Officers and 2 or 3 other officials connected with the Government were the only people receiving higher salaries than Congressmen at that time. Now I understand there are approximately 5,000 employees connected with the Government receiving higher salaries than Congressmen. I am certain that all my constituents and everyone realizes that Members of Congress are compelled to retain 2 homes and they are the only class of people, that I am aware of, connected with the Government who are required to continuously maintain two homes.

I had some cash reserve when I came to Congress; however, during my tour of duty here, I have spent that reserve and found it necessary to borrow on my insurance policies. Actual figures show that I am receiving $2,904 less in salary today than a Congressman was receiving on September 13, 1938 when I was elected to Congress.

One great expense is official trips to and from his district. Last year I made 13 official trips to my district and the Government paid only 1 trip.

I would like to insert the enclosed figures for the record which show that after income tax and other deductions have been made on the proposed $25,000 salary increase, the Members of Congress will be receiving only an approximate $3,000 increase under the bill now being considered.

	1939	Now	Proposed
(Present pay of Congressmen, $12,500 plus $2,500 expense)	$10,000	$15,000	$25,000
Federal income tax	$372	$2,394	$5,836
Net paid after income tax	$9,628	$12,706	$19,164
Cost of living index	100	0.53	0.53
Actual purchasing power of salary less tax	$9,628	$6,724	$10,157

In comparative purchasing power, Congressmen now are getting $2,904 less than in 1939. S. 462 would bring an actual take-home pay increase, in present buying power, of only $529 over 1939 or a raise of $3,433 over the present salary basis, which went into effect January 1947.

I am making this statement as I do not want to be considered a demagogue by voting against a salary increase bill and then accepting the benefits of same.

Mr. CELLER. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. HAYWORTH].

Mr. HAYWORTH. Mr. Chairman, since coming to Washington I have had a rude awakening in regard to what can happen to a Congressman's salary. With the experience of only a few weeks I can see that it might be even harder to put savings aside out of a Congressman's salary than from the salary of a college professor.

I might favor a modest increase. At the same time, I do not think I should vote myself a sizable increase within 6 weeks after taking office. In the teaching profession, where I have been all my life, we treat the question of salary with a modest hopefulness. I have never asked for a raise in pay—although I certainly do not think that is necessarily to my credit.

In this matter, therefore, I have voted against the pay raise for Members of Congress.

Mr. CELLER. Mr. Chairman, I yield such time as he may desire to the gentleman from Florida [Mr. BENNETT].

Mr. BENNETT of Florida. Mr. Chairman, I rise to speak in opposition to a pay raise for Congressmen at this time, particularly one of the size which is suggested here today. Although I think that there are many things that could be done to increase the attractiveness of the job of a Congressman, for instance reducing the cost of campaigning, I cannot feel that the present legislation is proper, particularly in view of the unbalanced Federal budget, other prior needs for Government funds, and the currently very heavy burden on the average taxpayer. For these reasons, among others, I am voting in opposition to this legislation. I wish to make it clear, however, that in so doing I am in no way challenging the good motives of those who differ with me on this matter.

Mr. CELLER. Mr. Chairman, I yield such time as he may desire to the gentleman from South Carolina [Mr. ASHMORE].

Mr. ASHMORE. Mr. Chairman, I am opposed to this bill for several reasons.

I am primarily opposed to it because the amount of the increase is exorbitant. It is completely out of line with salary increases in the business world in general. The fact that Members of Congress and Federal judges have not received an increase in salary since 1946 does not justify an annual $10,000 raise. If past Congresses have slept over their rights and failed to gradually increase compensation of Members and Federal judges, then that is water over the dam. If increases were in order at intervals during the last 8 or 10 years, as many claim, they should have been granted when due. But now it is not right for this Congress to vote an increase sufficient to satisfy both present and past needs.

I do not believe the voting public will look favorably upon such action. I realize that the special commission appointed to study the question recommended an even larger increase, but notwithstanding that, all the national polls I have seen show that the public is about 2 to 1 against this bill.

Ladies and gentlemen, do you know that this increase alone is more than the annual wage of the average voter. We should consider all angles of this case before it is too late. Let us not fool ourselves, because we are not going to fool the taxpayers. If this bill passes, several Members will be defeated in the next election on the strength of it—and probably a great many will fall by the wayside.

The public probably would accept a raise of three or four thousand dollars per year, because that would be more in keeping with the general policy of both private industry and other branches of the Government. But I am satisfied that a raise of more than three or four thousand dollars will be resented by the people back home. One Member who appeared on television a few nights ago is already receiving "bundles for the aid of underpaid Congressmen." This is sarcasm, of course, but it reflects the contempt of the people.

Furthermore, if we raise our own salary, then all the people on a salary will feel perfectly justified in demanding more money. It will open the door of inflation for more Federal spending. It will be just another step away from a balanced budget. It will make it almost impossible for Congress to say no to many unncessary and unreasonable demands for increased appropriations. It is awfully hard to refuse your friends when you have just cut yourself a large slice of pie—and at the same time, it is certainly bad manners.

I have said on numerous occasions, the only sensible and reasonable way to reduce taxes is first to reduce spending. I repeat that again, with the reminder that the average citizen wants both taxes

and the national debt reduced. Increasing our own salary 66⅔ percent will tend to enlarge these burdens, when the great need is to reduce them.

We should not only preach economy, but remember that it is far more effective if we also practice it. Briefly, Mr. Speaker, for these reasons, I feel we should kill this bill to increase the salaries of Federal judges and Members of Congress. I realize I am probably in the minority today, but nevertheless, I believe I am right.

Mr. CELLER. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut [Mr. DODD].

Mr. DODD. Mr. Chairman, I am on my feet so that there will be no doubt about my position with respect to H. R. 3828, to adjust the salaries of judges of the United States courts, United States attorneys, Members of Congress, and for other purposes.

In the little more than 2 years in which I have been privileged to represent the First Congressional District of Connecticut in this body, I have had some experience with respect to the responsibility and work involved and reasonable and just compensation for the job.

I am glad to publicly state that I will support the salary increase proposed in this bill.

As to the judges, it is absurd to ask competent, properly trained lawyers to assume the high responsibility of the Federal bench at the present salary rate.

Our judges make up the finest judicial body in the world, and this Nation, on the recommendation of every qualified investigation that has been made, should pay them a salary reasonably commensurate with the responsibility which they carry.

Membership in Congress today is, for the most of us, a full-time, all-year-around job.

For many of us, it requires that we maintain 2 homes and that is particularly true of those who live within a radius of 500 miles of Washington, D. C. In addition to the burden of maintaining two homes, practically all of the Members are required to make several trips to their districts during each session of Congress.

All of these round trips excepting one, are paid for out of our own pockets.

My own experience, which from conversation with others I understand to be common to the entire membership, is that I am called upon to make a great number of contributions to worthy causes in the district which I have the honor to represent. The demand is very heavy.

But for the purposes of this discussion, let me exclude from consideration the contributions, donations, expenses involved in maintaining two residences, and the heavy cost of frequent transportation.

If none of these factors were present, and in certain isolated instances they may not be, it is my considered judgment that the job of representing a congressional district is worth the increase recommended by the Commission on Judicial and Congressional Salaries.

Mr. Chairman, I do not state that I, as an individual, am worth this much money, but I do state that the position is worth the money.

The voters of my district will have an opportunity to decide whether I am the one who should continue to carry this responsibility and the one who should be paid the salary recommended.

Unless this salary increase is voted, sooner or later, the Congress of the United States will be made up of 1 or 2, classes of people.

You will have in the Congress only the well to do, who because of material wealth alone, can afford to serve in this capacity.

Or you will have in Congress a group of representatives not capable of earning the present $15,000 a year in any other walk of life.

Thus, it is possible that in the very near future, the Congress will be divided between the rich and the incompetent, with a sprinkling of struggling, sacrificial souls.

Mr. Chairman, I suggest that it will be a poor day for the United States when its Congress, the greatest legislative body in the world, falls to that low estate.

Men and women with families, particularly with young and growing children, will disappear from this Congress. And when this happens, we will have lost something of great value.

Because of the limitations of time I do not now try to spell out every benefit that can be brought to this House by men and women who are living day to day with the problem of raising children and of preserving family life.

Suffice it to say that these are the people who really know what is meant by the cost of living, who come to grips every day with the butcher, the baker, and the candlestick maker.

They do not need the expert advice of economic statisticians in order to understand the problems of the average citizen.

Besides, as we face from day to day in this body the problem of peace and war, I think that no man or woman is as qualified to vote on this issue as those who have children of their own who will be called upon to carry the guns or if necessary, to spill the blood.

It is unnecessary to take the time of the House to spell out the dreadful consequences which would attend this Nation if this body ever becomes a body attractive only to incompetents.

I have no fear about the willingness of the American people to pay a salary at which the average man and woman can decently and reasonably support himself as a Representative of Congress.

My only fear is that all of our people may not be fully informed as to the factual situation which makes this salary increase a necessity.

Mr. CELLER. Mr. Chairman, I have no further requests for time.

Mr. REED of Illinois. Mr. Chairman, may I ask how the time stands?

The CHAIRMAN. The gentleman from Illinois has 35 minutes remaining, the gentleman from New York, 28.

Mr. REED of Illinois. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. GWINN].

Mr. GWINN. Mr. Chairman, I did some reading last night on the subject of congressional salaries. I was surprised to learn that Members of the 1st Congress were paid $6 for each day while Congress was in session. My first thought was "Why those early Congressmen must have thought of themselves as rather cheap help to accept such a compensation." They had to pay some farmhand to take their place back home. It was a great distance to Washington and they had to maintain themselves while in Washington. Then it occurred to me that they had a different concept of what their duties were under the earlier interpretation of the Constitution. It was not that they were servants of the Government. The Government was merely an agency to defend life and property—nothing else. So they got their pay from the farm for defending their farms. I got this idea from rereading the oath that they took then—the same oath we have all taken—which says:

> I, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion, and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.

Then, in considering the value of my own services in defending the Constitution, it was obvious that I have failed. The $150,000 that I have received thus far in salary has been paid for services in a case that I have lost. I have been a witness to further and further disintegration of the constitutional limitations on Government and the incredible extension of unlimited functions and powers of Government. I have witnessed the transfer of a quarter of all our citizens' property to the Government itself. That has increased the power, tyranny, and functions of unlimited government. At the same time, it has reduced proportionately the capacity of the individual to take care of himself. If I feel that way about myself as a failure, you can imagine how I feel about the other fellow. Besides all that, since I have voted against all the groups feeding at the public trough and have received my share of the condemnation for that, how can I benefit myself by my own vote when I was so eager to deny all others?

Apart from the question of the value of the services, who is going to pay for the raises proposed? It does not seem democratic to charge the general taxpayer. We have done nothing but reduce his estate. We cannot hit the Government, because it is broke. Indeed, we cannot charge the Republic which we took the oath to defend, because everyone agrees that we are operating as a democracy, and as a democracy we are violating the Republic. Would it not be more appropriate for us to congregate in rump session on the grounds somewhere outside of the Chamber and vote a raise in salary to be paid by those who have received the benefits? Or perhaps we could operate more purely as a

democracy by letting the people themselves vote for our raises.

Perhaps I could vote for this raise if we had even made a start toward a reaffirmation of the constitutional limited functions of Government under the Republic and a repeal of the unlimited power to tax and borrow and spend and go in debt and run deficits. The House tried that, too, and failed.

The corn boys near the end of the last session in a burst of conscience said: "We have got to do something to reverse the trend—reduce taxes, and so forth." So the tallest of the corn said: "Yes; we must do something. We must find the group to be sacrificed. Which one will it be?" It never occurred to corn how appropriate it would be for corn to offer itself as the first sacrifice and deny itself the subsidies it has been receiving for 17 long years. So they picked on lowly peanuts to be thrown out and denied its subsidies. The debate went on for nearly 2 days. Corn said: "Why our country would get on just as well if we never raised any more peanuts. Why let them feed in the public trough? Peanuts are sort of indigestible anyway." Then with a fury that was wonderful to behold peanuts rose up on the floor from everywhere—Virginia, Carolina, Texas—and they said: "Why of all the pretense, the crust; of all the groups feeding in the public trough the one that ought to get on its knees and ask forgiveness is corn." They so shamed corn and frightened all the other feeders around the trough who might be affected if peanuts lost, that when the vote was taken, it was 228 to 170 that peanuts should stay in.

You know how impossible it is to kick one group at a time out of a feeding trough. They simply keep coming in some other place with more than before. That leads to confusion, contention, and is certain ultimately to lead to violence. Now on what theory are the corn Members entitled to a raise for that job? Certainly not from the taxpayers. Maybe corn is entitled to something from corn, pigs, cows, mules, and chickens. For certainly if corn is to be subsidized and communalized and owned by the Government those that feed on corn cannot remain in the free market. They must be taken in, too. So it is doubtful if corn is entitled to an increase because they lost to peanuts.

The peanut Members might be entitled to a raise at first blush but on examination we can see they did themselves no permanent good. Winning their case merely uncovered other groups—endless numbers of groups—entitled to the same treatment. For certainly if peanuts are entitled to subsidies everything growing under the sun can qualify. You must have noticed that the vegetable group at their last convention of the Farm Bureau Federation has organized to present their claims. So that those who are entitled to extra compensation for this kind of business are fully prepared to get smeared by spinach.

"Oh," but you say, "we have done many things besides subsidize foodstuffs and houses and power. We have done some good even if you call all this evil." Well, that debate can be ended by striking a balance to see whether the sum total of what is right exceeds the total of what is wrong.

During the 10 years of my service here I have found few opportunities to present the conservative point of view. It seemed such a waste of your time, that my speeches were delivered to the Appendix. Some of you have been good enough to tell me that you have read them. What has shocked me more than anything else has been our inability to see what everybody else can see, especially those witnesses abroad that we are so concerned about. After World War II was over, Goering and Ribbenthrop and others were behind bars. Henry J. Taylor, a great war correspondent, went to see them. Some of the most startling reports of their conversations appeared at that time. One of them was this quotation from Goering:

> Your America is doing many things in the economic field which we found out caused us so much trouble. You are trying to control people's wages and prices—people's work. If you do that, you must control people's lives. And no country can do that part way. I tried it and failed. Nor can any country do it all the way either. I tried that too and it failed. You are no better planners than we. I should think your economists would read what happened here.
>
> Germany has been beaten, eliminated, but it will be interesting to watch the development of the remaining great powers, the stupidities they practice within their homelands, their internal strife, and their battles of wits abroad.
>
> Will it be as it always has been that countries will not learn from the mistakes of others and will continue to make the mistakes of others all over again and again?

There is not a Member in this House who could have voted for a raise in the salary for the members of the Parliaments of Germany or Russia or Italy or England at the peak of the Socialist management of their economies. If we are doing the same thing, my fellow Members, and they all say that we are, then, why should we pretend any further that we are serving the Republic and are entitled for good performance to a raise in our compensation? It has not been shown. Our hesitation, our timidity in this business, now and in the last session, must be explained by the fact that we know in our hearts that we are doing those very things that Goering calls so tragically to our attention.

Mr. Chairman, I should like to be the first to vote for an increase in compensation the moment we take the first steps to reverse, honestly and permanently, the trend toward unlimited government and reaffirm the constitutional limitations on the functions of government.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may require to the gentleman from Nebraska [Mr. WEAVER].

Mr. WEAVER. Mr. Chairman, I am opposed to this bill.

I feel that there is no justification whatsoever for an increase in basic salary for Members of Congress or members of the judiciary at this time. I further feel that an increase such as is recommended is out of perspective, unreasonable, and unfair to the American taxpayer.

Our objective should be a balanced budget, and this is an example of some of the fat that can be eliminated.

We must rebuild our financial reserves and develop a strong economic America.

There may, however, be some justification for additional mileage expense to and from the District on urgent matters, but, for the most part, Congressmen should be on the job here during the session.

I do not intend to betray the trust placed in me by my constituents by supporting unrealistic measures to increase the cost of government when our objectives should be to economize.

I can find no basis to support H. R. 3828 as it has been reported from the House Judiciary Committee, and I intend to vote against it.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may require to the gentleman from Nebraska [Mr. CHASE].

Mr. CHASE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CHASE. Mr. Chairman, as I announced several weeks ago, I shall not vote for an increase in the salaries of the Members of Congress or Federal judges.

In seeking election to Congress I vigorously stressed the crying need of the American taxpayer for relief in his tax burden.

Reducing nonessential spending is the most effective way to reduce our taxes. Necessary spending is a must, but unnecessary spending should not be indulged in these critical times.

I knew what my salary would be when I applied to the voters for the job of Congressman. In a sense, I represented to them that I would be glad to work for the prevailing salary. In view of my public utterances on the all-important task of reducing the cost of government in all items, large and small, I feel that I am personally pledged to oppose a salary increase. Should I vote for an increase in my own salary, my many protests against the continually mounting cost of government would seem hypocritical.

The present salary of Congressmen, which far exceeds the salaries of many other Government employees who have dedicated their lives to Government service—some of which salaries are inadequate and should be increased—is sufficient to meet the needs of a Congressman who limits himself and family to a fair and reasonable standard of living.

As to judicial salaries, I regard the present scale as sufficient. The average Federal judge has attained such age that, considering his present family responsibilities and assurance of life tenure, he is quite fairly compensated as far as salary is concerned. If the volume of Federal judicial work has been so unduly increased as to result in crowded dockets, and so forth, raising the salaries of the judges will not relieve

the situation. More judges should be appointed. A judge can properly dispose of only a limited amount of judicial business in a given period. Increasing the salary will not increase the output of the judge.

And I cannot agree that we should increase judicial salaries in order to attract into the judicial ranks lawyers who, in private life, have the highest earning capacities. From my observation over the years, some of our outstanding jurists were drawn from private law practices which were not outstandingly lucrative. The financial standing or moneymaking ability of a lawyer, in my opinion, has slight relationship to his qualifications as a jurist.

Mr. REED of Illinois. Mr. Chairman, I yield such time as he may require to the gentleman from Indiana [Mr. BEAMER].

Mr. BEAMER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BEAMER. Mr. Chairman, during the 83d Congress, I made the statement on the floor of the House that I felt we should balance the budget and reduce taxes before considering salary increases for Members.

The 83d Congress made the greatest tax cut in history and it was a tax cut that was equally beneficial to all groups. However, the budget was not balanced and there seems to be no chance to balance it this year. It is true that my vote and the votes of many Members would have reduced expenditures, balanced the budget and even would have reduced the public debt. We were in the minority but I shall join these same colleagues again in an attempt to work for economy and efficiency in the Federal Government.

When this result has been accomplished, I then feel that we shall have earned the increased salary that has been proposed in House Resolution 3828. After all, we were elected to represent the people of our districts and to think first of them.

It is true that the present salary is inadequate especially for those who have no other business or source of income. At the same time, I feel that all of the Members of the Congress have devoted themselves to their work from the viewpoint of service. That is the way I sincerely feel about it. After all, if we stop this deficit spending and secure greater economy and efficiency in Government, then the dollars that we are paid will have more value. Thus, it would be possible to help ourselves and all of the people in our respective districts, instead of adding to the inflationary process by greater spending and the resultant increased deficits.

Mr. REED of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut [Mr. SADLAK].

Mr. SADLAK. Mr. Chairman, as the Representative at Large from the State of Connecticut, having the largest constituency on this side of the aisle, I am very much in agreement with the remarks made during the debate on the rule by the gentleman from Texas [Mr. DIES], who represents the largest constituency on the other side of the aisle.

I rose primarily, Mr. Chairman, to make this observation, although I am unqualified for this bill; and it is this. The one Member from my hometown of Rockville, Conn., who had previously served in this Chamber 50 years ago, Mr. E. Stevens Henry, I noted in my local hometown paper 2 weeks ago, was one of those Members of the House of Representatives who did not collect any of his salary until the 2-year term to which he had been elected had been served.

Mr. Chairman, I find as the other Member of Congress from my hometown that I cannot cope in my expense budget with my distinguished and eminent predecessor, Mr. E. Stevens Henry, who was a man of great wealth. He represented the First Connecticut District at that time, and I now represent the State at large.

If this bill as it emanated from the Committee on Rules had provided opportunity to reimburse Members of Congress for the trips they would make to their districts for official business, then I would propose that each Member be reimbursed for the trip made each weekend to his district, provided he or she signed a voucher that such trip to the district for official purposes had been made. The total salary could then be accordingly decreased.

There I find myself having the greatest difficulty, inasmuch as I return to my district every Saturday and hold office hours and meet with my constituents. I have never said "No" to an invitation to a meeting where my constituents desired to tell me of their problems.

Mr. Chairman, I am in complete accord with this bill and shall vote for it.

The CHAIRMAN. Under the rule, under which the bill is being considered, no amendments will be in order to the bill except proposals to strike any of its provisions or to increase or decrease the amounts authorized therein.

The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That (a) section 5 of title 28, United States Code, relating to the Chief Justice of the United States and to the Associate Justices of the Supreme Court of the United States, is amended by striking out "$25,500" and substituting therefor "$35,500", and by striking out "$25,000" and substituting therefor "$35,000."

(b) Section 44 (d) of title 28, United States Code, relating to circuit judges, is amended by striking out "$17,500" and substituting therefor "$25,000."

(c) Section 135 of title 28, United States Code, relating to district judges, is amended by striking out "$15,000" and substituting therefor "$22,500", and by striking out "$15,500" and substituting therefor "$23,000."

(d) Section 173 of title 28, United States Code, relating to judges of the Court of Claims, is amended by striking out "$17,500" and substituting therefor "$25,000."

(e) Section 213 of title 28, United States Code, relating to judges of the Court of Customs and Patent Appeals, is amended by striking out "$17,500" and substituting "$25,000."

(f) Section 252 of title 28, United States Code, relating to judges of the Customs Court, is amended by striking out "$15,000" and substituting therefor "$22,500."

(g) The first paragraph of section 4 of the act approved June 6, 1900 (31 Stat. 322; 48 U. S. C., sec. 101), as amended, relating to the District Court for the District of Alaska, is amended by striking out "$15,000" and substituting therefor "$22,500."

(h) Section 3 of the act approved May 24, 1940 (54 Stat. 220), as amended, relating to the judge of the District Court of the Virgin Islands, is amended by striking out "$15,000" and substituting therefor "$22,500."

(i) Section 7443 (c) of the Internal Revenue Code of 1954, relating to judges of the Tax Court of the United States, is amended to read as follows:

"(c) Salary: Each judge shall receive salary at the rate of $22,500 per annum to be paid in monthly installments."

(j) Article 67 of the Uniform Code of Military Justice, relating to judges of the Court of Military Appeals, is amended by striking out "$17,500" and substituting therefor "$25,000."

Mr. JONES of North Carolina. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of North Carolina: On page 1, line 7, strike out "$35,500" and insert in lieu thereof "$30,500", and in line 8, strike out "$35,000" and insert in lieu thereof "$30,000."

Mr. JONES of North Carolina. Mr. Chairman, this is a very simple amendment. What it does is to reduce the figure carried in the bill for the Chief Justice of the United States Supreme Court from the figure of $35,500 down to the figure of $30,500 and to reduce the figure carried in the bill for Associate Justices of the Supreme Court from $35,000 down to the figure of $30,000.

Mr. Chairman, this reduces the amount carried in the bill by $5,000 per year, but it is a $5,000 per year increase for the members of the Supreme Court. I submit that is all that can be justified, and I urge the adoption of the amendment.

Mr. CELLER. Mr. Chairman, I rise briefly to recite in opposition to the amendment that the Lord Chancellor of England receives the equivalent of $40,000 a year, and the chief justice of the Court of Appeals of the State of New York receives $35,000 plus $3,000 expenses. Certainly, we would not want to treat the judges of our highest court in a way indicated by this amendment in comparison to what the English do and in comparison to what the State of New York does.

The dignity and importance of our highest court demands greater respect than is indicated by the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. JONES].

The question was taken; and on a division (demanded by Mr. JONES of North Carolina) there were—ayes 27, noes 161.

So the amendment was rejected.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I take this time to read a telegram dated today which I received from our former President, Harry S. Truman. It is as follows:

Hon. JOHN McCORMACK,
House of Representatives,
Washington, D. C.:

I have been asked for my opinion on the report of the Commission on Judicial and Congressional Salaries. I am heartily in

favor of the salary raises. Senators, Congressmen, and judges have always been underpaid. The people are perfectly willing that these important servants of theirs should have adequate compensation. I hope you will push the bill through to a successful conclusion.

HARRY S. TRUMAN.

Mr. JONES of North Carolina. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of North Carolina: Page 2, line 2, strike out "$25,000" and insert in lieu thereof "$22,500."

Mr. JONES of North Carolina. Mr. Chairman, this reduces the figure calling for an increase for circuit judges, from $25,000 to $22,500, or a reduction of $2,500, leaving a $5,000 increase for these gentlemen.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. JONES].

The amendment was rejected.

Mr. JONES of North Carolina. Mr. Chairman, I offer a further amendment to section 1.

The Clerk read as follows:

Amendment offered by Mr. JONES of North Carolina: On page 2, line 5, strike out "$22,500" and insert in lieu thereof "$20,000"; and in line 6, strike out "$23,000" and insert in lieu thereof "$20,500."

Mr. JONES of North Carolina. Mr. Chairman, this amendment reduces the amount carried in this bill for the Federal district judges by $2,500, leaving those judges with a $5,000 per year increase in salary.

Mr. Chairman, I have amendments here to reduce the figures carried in this bill for all the other judges. These reductions would be the same as contained in this amendment. In view of the sentiment of the House, I would be wasting my time to offer them.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. JONES].

The amendment was rejected.

The Clerk read as follows:

SEC. 2. (a) Section 508 of title 28, United States Code, is amended to read as follows:

"§ 508. Salaries.

"The Attorney General shall fix the annual salaries of United States attorneys, assistant United States attorneys, and attorneys appointed under section 503 of this title within the following limitations:

"United States attorneys—not less than $12,000 or more than $20,000; and

"Assistant United States attorneys and attorneys appointed under section 503 of this title—not less than $6,000 or more than $15,000."

(b) The salaries of United States attorneys and assistant United States attorneys for the districts of Alaska, Canal Zone, and the Virgin Islands are subject to the provisions of section 508 of title 28, United States Code.

Mr. LONG. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Louisiana is recognized.

Mr. LONG. Mr. Chairman, I did not intend to say anything about this bill. This is the old familiar tune they are singing around here today.

In my younger days I had a good job in a sawmill. I was earning the handsome salary of $1.25 a day. One evening the employees decided to have a meeting to see if we could persuade the boss to give us a small raise of 25 cents a day, which would make us receive $1.50 for an 11-hour day. We almost had to swap our beds for a lantern to get to and from the sawmill. In the fall of the year we went to work before daylight and we came home after dark. After some argument pro and con, one of our number got up and said, "You fellows are fixing to kill the goose that lays the golden egg. We are getting too much already and should have a reduction. A dollar a day is all the money that any man here is worth."

My opinion is that a lot of Members who have spoken here today who feel that we are not entitled to a salary raise—my advice to these Members would be, "Go back home and help elect a better man to Congress to take your place; one that will be worth the money."

As for me, I came here to do a good job and I am putting in all my time in an effort to give my district the kind of representation that I believe they are entitled to. My telephone is open 24 hours a day. I invite my constituents to call on me. If I had flood or drought in my district, they would need me much more than they do now. I think this argument that somebody has had a misfortune in some parts of our country and that for that reason he ought not to ask for a salary raise, is out of line. Wait until the farmers make a good crop in the West is what the argument boils down to. I think that argument is out of line. They need a good man to represent them here if they have a distressed condition in the district more than they would during good times.

We are working hard to help our constituents get relief during floods and drought; we are working to get money to build new schools; many good things that go to your district and mine for the interest of all of our people is because they have a good Congressman here looking after their affairs.

I would like to ask all those who are going to vote against this salary raise because they do not think they are worth it to just give me the increase in their salary which this bill grants. I could use some of it handsomely.

This bill will pass and I want to make an observation. How many of these Members who talk against this pay raise will refuse to take the money when the time comes. There is not in my humble opinion a single, solitary one. Most of them are talking to hear themselves talk. They know that a majority of the people in the Congress need this salary raise and I am not talking for myself alone. I know them. I am looking at many young men right here in the Congress. Some of the best men in this Congress can hardly stay here because they do not receive enough salary.

We heard the argument here a while ago that because George Washington or somebody else served for $6 a day we ought to. There is no sense in that kind of argument. This is not the 18th century. We have the richest country in all the world. We are here making laws to protect the oil industry and all the other large industries of our great country. We are taking care of their business and, my friends, the governmental affairs is their business. And I say, Mr. Chairman, that they ought to be willing to pay for it, and furthermore they are willing.

Do you know what it would cost the people of my district to keep me here at $25,000 a year? It would cost 1½ cent per capita. I ask any man in my district if that is not little enough to pay for your Congressman's services. Figure that out. It is a pittance compared to the service rendered. It is ridiculous for us to come here today and argue against a small salary raise for Congress and our judges. Yet if you should stop the giveaway program, or foreign aid, for 8 hours it will pay the entire raise for our Congressmen for a full term and have money left.

The majority of the Members here today who are talking against this bill are just timid and are afraid to tell the truth. They want this raise as much as you or I and they are going to take it when the time comes. I wonder how many votes we would find against this measure if those Members who voted against it would receive no increase. Let us be honest with ourselves. This is the only place that the Congressman can receive a salary raise. The Constitution puts it squarely up to us to raise our own salaries when the time comes that it is necessary. Let us not quibble further about this matter. Let us have the temerity to speak out the things that we know are right and do the right thing, vote this salary increase.

The Clerk read as follows:

SEC. 3. (a) The compensation of the Deputy Attorney General shall be at the rate of $21,000 per annum.

(b) The compensation of the Solicitor General shall be at the rate of $20,500 per annum.

(c) The compensation of each Assistant Attorney General, other than the Administrative Assistant Attorney General, shall be at the rate of $20,000 per annum.

SEC. 4. (a) The matter preceding the semicolon in section 601 (a) of the Legislative Reorganization Act of 1946, as amended, is amended to read as follows.

"(a) The compensation of Senators, Representatives in Congress, Delegates from the Territories, and the Resident Commissioner from Puerto Rico is $22,500 per annum each; and the compensation of the Speaker of the House of Representatives shall be at the rate of $35,000 per annum."

(b) Section 104 of title 3 of the United States Code (relating to the compensation of the Vice President) is amended by striking out "$30,000" and substituting therefor "$35,000."

(c) Subsection (e) of section 202 of the Legislative Reorganization Act of 1946, as amended (2 U. S. C., sec. 72a), is amended to read as follows:

"(e) The professional staff members of the standing committees shall receive annual compensation, to be fixed by the chairman, ranging from $5,000 to $10,000, and the clerical staff shall receive annual compensation ranging from $2,000 to $10,000."

(d) Subsection (b) of section 2 of the act of October 24, 1951 (5 U. S. C., sec. 932b), is amended by striking out "$11,646 per annum" and inserting in lieu thereof "the maximum scheduled rate of the highest grade established by the Classification Act of 1949, as amended,".

Mr. BURDICK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURDICK: On page 4, line 15, strike out "$22,500" and insert "$17,500."

The CHAIRMAN. The gentleman from North Dakota is recognized for 5 minutes.

Mr. BURDICK. Mr. Chairman, I do not want 5 minutes.

The effect of this amendment is that the $17,500 and the $2,500 expense allowance will make $20,000 salary for Congressmen. I do not care to argue the matter; I am just submitting it because I think it is the right thing to do.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. BURDICK].

The question was taken; and on a division (demanded by Mr. MURRAY of Tennessee) there were—ayes 63, noes 176.

So the amendment was rejected.

Mr. BURLESON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: On page 4, line 22, strike out line 22 through line 25; and on page 5, line 1, strike out line 1 through line 9.

Mr. BURLESON. Mr. Chairman, this amendment takes out the personnel included in subsection (c) of section 4 which serve the various committees of the House of Representatives.

I call your attention to the Reorganization Act, Public Law 601, 79th Congress, in which the Committee on House Administration is charged with the responsibility and has the jurisdiction for the employment of persons by the House, including the clerks for Members and committees, reporters of debates, and so forth.

This is not a matter of claiming jurisdiction for the Committee on House Administration, but, rather, it is a matter of orderly procedure, which I do not think we will have as provided in this bill. I am aware, of course, that there are a number of chairmen of committees of this House who have requested that they be permitted to raise the ceiling of pay for professional staff members of their committees. If you will give the Committee on House Administration the opportunity, I can assure you that we expect to review the entire salary structure of this House in the very near future. We shall do it just as soon as we have the opportunity. We have had it in mind and we have already discussed it in the committee. A subcommittee will be appointed to review the entire structure, including employees from the bottom to the top. It may be possible that the ceiling will be raised. Under present limitations, clerks who receive the basic top salary of $8,000 per annum receive a gross of $11,646. Under this arrangement, it would raise their salaries to $14,800. When the Congress approves a reclassification of Federal employees, which it is scheduled to do, salaries of these employees in the professional category will increase still more under the automatic provisions. We cannot know at this time how much that will be.

I take no pleasure in offering this amendment, and it should not be construed that I would oppose the raise in some instances of professional people working for committees. I understand that this is not an automatic raise. But there are some 65 to 75 people now employed by committees who are receiving the top salary. It is assumed they will be raised if the ceiling now in effect is increased to $10,000.

It is entirely possible, I repeat, that they should be raised, that the ceiling should be increased, but I do not think this is the way to do it; and, I repeat further, if you will give the Committee on House Administration the opportunity, we will try to work these things out and endeavor to adjust salaries, whether they are for janitorial people or whatever they may be, up to the top professional people. We will do our best to correct some of the inequities which I am sure do exist.

Mr. DONDERO. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Michigan.

Mr. DONDERO. The reason I asked the gentleman to yield, I have practically the identical amendment on the Clerk's desk. I do not think that the section as it refers to the professional staff members of standing committees has any place in this bill, and I agree with the gentleman that it should not be in the bill, but should be left to the Committee on House Administration to work out.

Mr. BURLESON. I thank the gentleman.

Mr. LECOMPTE. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Iowa.

Mr. LECOMPTE. Is it not a fact that if we leave this provision in the bill, we will be in the position of raising salaries piecemeal without an overall survey of the situation at all?

Mr. BURLESON. That is true. Furthermore, it widens the gap between these top professional committee employees and the top administrative employees, whom I think have just as great responsibility. Further, by a blanket arrangement of this kind the elected officials of the House are not considered. The appointed officers are not receiving any consideration. Where do they stand, they must wonder?

Mr. MURRAY of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Tennessee.

Mr. MURRAY of Tennessee. As the chairman of your Committee on Post Office and Civil Service, I wish to concur wholeheartedly in the timely observation of the gentleman from Texas. This provision has absolutely no place in this bill and should be taken out.

Mr. BURLESON. I thank the gentleman very much.

Now, Mr. Chairman, let me again make it clear that the Committee on House Administration will, as early as possible, give its careful consideration to all these matters. An overall survey will be made and the results and recommendations presented to you.

Mr. Chairman, I must also express myself on the pending bill. For reasons which are not expected to influence anyone except myself, I am unable to support this measure on final vote. Be that as it may, I hope you will support this amendment, because I feel it will be a serious mistake to include this provision should the bill be passed.

Mr. WALTER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I dislike to disagree with my distinguished friend, the chairman of the Committee on House Administration, but he is in error when he states that the committee of which he is chairman has jurisdiction over the committee personnel. Section 202 (a) of the Legislative Reorganization Act—and, after all, what we are discussing now is an amendment to the Legislative Reorganization Act—provides that each standing committee of the Senate and the House of Representatives—other than the Committee on Appropriations—is authorized to appoint by a majority vote of the committee not more than four professional staff members in addition to the clerical staffs on a permanent basis without regard to political affiliations and so on.

Now, this amendment applies to those committee staff members who are appointed under section 202 (a) as I just read it and to nobody else. The Committee on House Administration has no concern whatsoever with those people on each committee staff, except those serving on their own committee, of course. This legislation is the appropriate place and the only place for dealing with their salaries unless we were to consider another amendment to the Legislative Reorganization Act. But, as I said, we are amending the Legislative Reorganization Act when we raise our own salaries. One of the reasons, the principal reason, if you please, why this provision was included in my bill was because of the representations made by the chairman of the Committee on Ways and Means, the Committee on Armed Services, and so on. Most of the chairmen of the standing committees of this House recognize the fact that it is unfair to keep committee staff salaries at the present level. Some of the professional staff members have been employed for a long time without any possibility of a raise, and certainly those people are entitled to consideration. This is the only way we can deal with this problem, and I trust that you will reject the amendment. The letters we received read as follows:

COMMITTEE ON WAYS AND MEANS,
HOUSE OF REPRESENTATIVES,
Washington, D. C., February 3, 1955.

Hon. EMANUEL CELLER,
Chairman, Committee on the Judiciary, House of Representatives.

DEAR MR. CHAIRMAN: It is my understanding that a subcommittee of the Committee on the Judiciary has been considering a bill which, among other purposes, makes possible an upward adjustment of the salaries of congressional employees, and that this legislation will be considered in the near future by your full committee.

The salary limitations now imposed with respect to our top committee employees is

seriously out of line with similar limitations applicable with respect to career civil-service personnel. I believe that this discrimination against our own congressional employees should be eliminated. The problem of obtaining and retaining highly trained and technically qualified personnel to staff our committees is an ever-growing one.

I note that the increase in the maximum limitation on staff salaries is not mandatory but is discretionary in nature. Under this circumstance, I believe that we should have no hesitation in adopting the proposal as it will permit committee chairmen to reward long service or exceptional merit, or both, as they deem best in the interest of their own committees.

As a past chairman of the Committee on Ways and Means and as present ranking minority member of that committee, I earnestly hope that your committee will give this proposal its favorable consideration.

Sincerely yours,

DANIEL A. REED,
Member of Congress.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON BANKING AND CURRENCY,
Washington, February 7, 1955.

Hon. EMANUEL CELLER,
Chairman, Committee on the Judiciary,
House of Representatives,
Washington, D. C.

DEAR MR. CHAIRMAN: I am writing this letter to urge your committee to retain, in the bill relating to the salaries of Members of Congress and the Judiciary, the provision reported by your subcommittee providing for an increase in the maximum base which can be paid to members of committee staffs.

It is my understanding that the increase in the maximum base of committee staff personnel is being recommended to bring the pay scale into line with that of civil service employees of the executive department as was the case at the time of the enactment of the Legislative Reorganization Act. In the intervening 9 year period the salary range of executive department personnel has increased, and the subcommittee recommendation would authorize on a permissive and even selective basis conforming increases for committee staff personnel.

As a result of my long experience on the Banking and Currency Committee I recognize the necessity for skilled technical committee personnel, and likewise I recognize the value to the committee of retaining a competent experienced staff. In my opinion the recommendation of your subcommittee bringing the permissive range of committee staff compensation in line with that of the executive departments will aid materially in these respects, and I therefore urge its favorable consideration by your committee.

Sincerely,

BRENT SPENCE,
Chairman.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., February 3, 1955.

Hon. EMANUEL CELLER,
Chairman, Committee on the Judiciary,
House of Representatives,
Washington, D. C.

MY DEAR COLLEAGUE: It is my understanding that your subcommittee, which has had under study a bill to increase the salaries for Members of the House and of the judiciary, has decided to include in the bill which they plan to report to your full committee a provision which would raise the maximum base which can be paid to members of committee staffs.

I am advised that this increase is being recommended so as to make the maximum gross which can be paid to members of committee staffs conform to the maximum which can now be paid to civil-service employees in the executive departments. I understand that when the present maximum base of $8,000 was established, it did conform to the maximum which was being paid by the executive departments, and that the increase in base which may be recommended will merely restore the relationship as it existed when the $8,000 base was established. I am also advised that this provision does not provide an automatic increase in the maximum pay which can be given to committee staffs, but merely raises the ceiling so that the individual committees can, if they so desire, on a selective basis, recommend an increase for any members of their staffs that they may feel are deserving of an increase.

In my opinion, this increase in the ceiling is very desirable. I know from my long experience on our committee that we have often lost experienced and talented staff members to the executive departments of the Government, private industry, and private practice, because we were unable to pay them a salary which they deserved and which they could command and did receive in other places. I believe that it is highly important that the committee staffs of the various committees be staffed by persons who are experienced and who have proved their ability.

I urge favorable consideration of legislation which will increase the maximum ceiling for committee staff personnel so as to bring it in line with the maximum permissible ceiling which can be paid by the executive departments.

With my kindest personal regards, I am

Very cordially yours,

JERE COOPER.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ARMED SERVICES,
Washington, D. C., February 5, 1955.

Hon. EMANUEL CELLER,
Chairman, Judiciary Committee,
House of Representatives,
Washington, D. C.

DEAR MR. CHAIRMAN: I want to commend and endorse the action of your subcommittee which has been considering H. R. 5, including the amendments to section 4 thereto, which relate to the pay status of committee employees and the latitude of respective committee chairmen in establishing their salaries.

If my memory is correct, it was originally intended that committee employees would have a pay status comparable to those who are governed by the provisions of the Classified Pay Act of 1948, but the inadequacy of congressional salaries interposed a practical bar to the attainment of that objective. The enactment of H. R. 3828, with the amendments to section 4 thereto, would remove that bar and I, therefore, feel that it is not only proper but just that we place our own committee employees, at the discretion of the respective committee chairmen, in a position of equality with their contemporaries who are governed by the Classified Pay Act.

There can be no doubt that this is the proper time to accomplish this action of equality of treatment. I commend your committee for its initiative in taking this action and want you to know that you may rely upon my unqualified support in this regard.

With kindest regards, I am

Sincerely yours,

CARL VINSON,
Chairman.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., February 3, 1955.

Hon. EMANUEL CELLER,
Chairman, Committee on the Judiciary,
House of Representatives,
Washington, D. C.

MY DEAR COLLEAGUE: It is my understanding that your subcommittee, which has had under study a bill to increase the salaries for Members of the House and of the judiciary, has decided to include in the bill which they plan to report to your full committee a provision which would raise the maximum base which can be paid to members of committee staffs.

I am advised that this increase is being recommended so as to make the maximum gross which can be paid to members of committee staffs conform to the maximum which can now be paid to Civil Service employees in the executive departments. I understand that when the present maximum base of $8,000 was established, it did conform to the maximum which was being paid by the executive departments, and that the increase in base which may be recommended will merely restore the relationship as it existed when the $8,000 base was established. I am also advised that this provision does not provide an automatic increase in the maximum pay which can be given to committee staffs, but merely raises the ceiling so that the individual committees can if they so desire, on a selective basis, recommend an increase for any members of their staffs that they may feel are deserving of an increase.

In my opinion, this increase in the ceiling is very desirable. I know from my long experience on our committee that we have often lost experienced and talented staff members to the executive departments of the Government, private industry, and private practice, because we were unable to pay them a salary which they deserved and which they could command and did receive in other places. I believe that it is highly important that the committee staffs of the various committees be staffed by persons who are experienced and who have proved their ability.

I urge favorable consideration of legislation which will increase the maximum ceiling for committee staff personnel so as to bring it in line with the maximum permissible ceiling which can be paid by the executive departments.

With kind personal regards, I am

Sincerely,

HERMAN P. EBERHARTER.

Mr. MURRAY of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Tennessee.

Mr. MURRAY of Tennessee. The gentleman stated that this section only applied to four professional members.

Mr. WALTER. That is right.

Mr. MURRAY of Tennessee. Does it not also apply to the entire clerical staffs of these committees?

Mr. WALTER. It does in the chairman's discretion only.

Mr. MURRAY of Tennessee. The bill provides that professional staff members of the standing committees shall receive annual compensation to be fixed by the chairman ranging from $5,000 to $10,000 and the clerical staff shall receive annual compensation ranging from $2,000 to $10,000, and a $10,000 top for the clerical staff would be $14,800.

Mr. WALTER. It could be $14,800, but I would like to call attention to this fact, that the salary ceiling now, the $11,646 as a maximum, was not fixed by the Committee on House Administration. That salary was fixed under another act entirely.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from New York.

Mr. CELLER. Is it not true that these salary increases are not mandatory;

this paragraph only creates a ceiling, and it is up to the chairman to fix the salary between the minimum and the maximum?

Mr. WALTER. That is right, of course.

Mr. CELLER. Which may not mean a penny increase.

Mr. WALTER. That is right.

Mr. CELLER. If the gentleman will yield further, is it not true also that in addition to the committees that the gentleman has mentioned, the Committee on Banking and Currency asked for this change, the Committee on Ways and Means, the Committee on Armed Services, and many other committees?

Mr. WALTER. That is correct.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from New York.

Mr. KEATING. Is it not also a fact that this change will bring the staff members of the committees of this body in line with those of the other body?

Mr. WALTER. Yes, it will do that; and in addition to that, it will bring their salaries in line with people performing comparable services in the executive branch of the Government.

Mr. KEATING. Mr. Chairman, if the gentleman will yield for a further observation, it seems to me that while the gentleman and I are in some difference about some phases of this bill, this amendment should be defeated and the provision referred to should stay in the bill because we all know that there are very able staff members on a number of our committees who are deserving of the top as fixed in this provision.

Mr. WALTER. Of course.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALTER] has expired.

(By unanimous consent (at the request of Mr. BURLESON), the time of the gentleman from Pennsylvania [Mr. WALTER] was extended for 2 minutes.)

Mr. BURLESON. Mr. Chairman, will the gentleman yield to me?

Mr. WALTER. I yield.

Mr. BURLESON. I should like to make it clear that I make no claim, of course, that the Committee on House Administration has jurisdiction of the appointment of the personnel of the committees. We do, however, have some responsibility for the payment of the cost of the personnel. But be that as it may, the arrangement here is all the more ill since it does not include administrative personnel; since it does not include the elective officers of the House of Representatives; since it does not include a great many other personnel whose salaries are all out of kilter.

Mr. WALTER. I should like to call the attention of the gentleman to the fact that their salaries come under different legislation. If their salaries are to be considered, it certainly seems to me that the gentleman's committee might well bring in an amendment to the proper legislation and have it considered in a proper manner.

Mr. BURLESON. Mr. Chairman, if the gentleman will yield further, the gentleman does not contend that the committee does not have the authority to set these salaries. Certainly the chairmen of committees have the responsibility of selecting their personnel and along with their committees set their salaries.

Mr. WALTER. I think the gentleman again is mistaken. The chairman of a committee does not have authority to select the personnel. The committee elects the personnel and the chairman fixes their compensation within the limits of the law.

Mr. BURLESON. Approved by the Committee on House Administration, I might add.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BURLESON].

The question was taken; and the Chairman being in doubt, the Committee divided and there were—ayes 126, noes 123.

Mr. WALTER. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. WALTER and Mr. BURLESON.

The Committee again divided; and the tellers reported that there were—ayes 139, noes 146.

So the amendment was rejected.

Mr. JONES of Missouri. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of Missouri: On page 5, lines 2, 3, and 4, strike out the last 2 words on line 2 and all of lines 3 and 4 and substitute a period for the second comma in line 2.

Mr. JONES of Missouri. Mr. Chairman, you approved the wording in the bill when you had to decide on whether you wanted to strike out the professional staff members from this compensation. I think probably the gentleman from Pennsylvania was correct in his first statement about the professional staff. However, I think most of us realize it is not practical to include the clerical staff of the committees in with this. I think if you do that you are not only discriminating against the other employees of the House, but you are settting a salary range here that is not practical at all. I think the House would do well to eliminate the clerical staff and let the Committee on House Administration handle that when we are considering the other salary scales.

Mr. Chairman, I hope this amendment will be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. JONES].

The question was taken; and on a division (demanded by Mr. JONES of Missouri) there were—ayes 77, noes 117.

So the amendment was rejected.

The Clerk read as follows:

SEC. 5. (a) The provisions of sections 1, 2, and 3 shall take effect on the 1st day of January 1955.

(b) The provisions of section 4 shall take effect as of the commencement of the 84th Congress.

Mr. POFF. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. POFF: On page 5, line 13, strike out "84th" and insert in lieu thereof "85th."

Mr. CELLER. Mr. Chairman, a point of order. Under the rule, House Resolution 141, the amendment offered by the gentleman from Virginia, is not germane, and therefore not in order.

The CHAIRMAN (Mr. SMITH of Virginia). As stated by the Chair before the reading of the bill, under the rule by which the bill is being considered, no amendments are in order except those raising or lowering the amount, or striking out some portion of the bill.

Therefore, such amendment changing the effective date of the bill would not be in order, and the Chair sustains the point of order.

Mr. POFF. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, had the amendment which I offered to defer the congressional salary increase until January 1957 been held in order and had it been passed by the House, I would still have voted against the bill. It has been said that two classes of people in the Congress are opposed to the measure: First, those who are so rich that they do not need their congressional salaries; and, second, those who could not earn as much as their congressional salaries in an outside job. It happens that I do not fall into either of those classes. Before I came to Congress, having practiced law for only 5 years, I was earning more than I earn today. I am not a rich man. I will venture the prediction that there is no more impecunious Member of Congress than the one who is now addressing you. Be that as it may, the fact remains that I am without any outside income, having practiced practically no law since I came to this body; and for that reason I am not opposed to the bill because I am a rich man or because I am a poor man; I am opposed to the bill in principle, and I invite the proponents of the bill to do me and the other opponents of the measure the credit of not impugning our motives, purposes, and good faith. My budget certainly is not in balance, but it is at least in far better shape than Uncle Sam's budget; and as long as I hold an elective office and serve here I do not intend to vote to add more black ink to my budget at the expense of more red ink for Uncle Sam's budget. I intend to keep inviolate the contract that I made with my people on November 2, 1954, to serve them for 2 years at a stipulated salary.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. POFF. I yield.

Mr. DIES. I know the gentleman is perfectly sincere, because he has made the observation that after 5 years of practice he was able to make more money than a Member of Congress. Is that not convincing argument and proof we ought to raise the congressional salary?

Mr. POFF. I may say to the gentleman from Texas that would be true if the only thing which actuated those of us who seek membership in the House were the dollar remuneration.

Mr. LONG. Mr. Chairman, will the gentleman yield?

Mr. POFF. I decline to yield further, Mr. Chairman.

It is regrettable to me as a new and perhaps overly idealistic Member of this

body that certain Members of the House for whom I have the highest respect have chosen to use some rather reckless language in characterizing those of us who have opposed the measure. They, the proponents, have called us the opponents, demagogs, and political cowards. If I am a political coward in opposing this bill I submit that I am going to find myself in some pretty good company, not within the ranks of those who oppose the measure but within the ranks of those who will refuse to support an effort to obtain a record vote.

Mr. Chairman, I yield back the balance of my time.

Mr. BURDICK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURDICK: Page 5, strike out section 5 and insert a new section 5 to read as follows:

"SEC. 5. This act shall take effect on January 1, 1957."

Mr. CELLER. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. CELLER. Mr. Chairman, I make the point of order that under the terms of House Resolution 141, this amendment is out of order.

The CHAIRMAN. The Chair will state that this amendment falls within the same class as the one previously ruled on with respect to this section.

The Chair sustains the point of order.

Mr. BURDICK. Mr. Chairman, I move to strike out the last word, and I am not going to take any 5 minutes, but my friend the gentleman from Virginia thought it was pretty tough to be called a coward. I was sitting here when I was called a coward by the gentleman from Louisiana. You know I made a very careful observation of the gentleman when he made that statement: He smiled when he said it.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Chairman, much has been said, is being said today, as a matter of fact, on this matter of pay raises. In this House, of course, we are acting on the House bill dealing with the question. I have these words to say because I am glad to see that the House bill, unlike the bill on this issue recently reported by the committee handling said bill in the other body, includes in the provisions for pay raises the vital and essential and overworked United States attorneys and assistant United States attorneys. If and when the bill before us passes this House in the vote to be taken in the next few minutes, then it will go to the other body for action. I hope and trust that the leadership will take pains to see that it is the House bill that is acted on in the other body instead of their own bill which excludes the United States district attorneys and their assistants. I understand that in the other body these officials were left out on the argument that they should be included in a later bill dealing with such and similar officials in the administrative and executive arms of the Government or in a general pay-raise bill for Federal employees. I have heard some timid souls even argue that no action should be taken on the bill now being considered until the Congress first acts on the general-pay-raise bill. That is specious reasoning—either the people, of all categories, in this bill merit the pay raise or they do not and we should vote on that issue head on with no hidden meaning or subterfuge course of action worthy of this House.

If and when this bill passes the other body as well as this House, I now sound this admonition to the House managers on this bill who will be named by you, Mr. Chairman, on the part of the House, to sit with the managers of this bill on the part of the Senate at the conference on the bill—that our managers stand firm and not yield to the Senate version insofar as the United States district attorneys and their assistants and the Department of Justice officials also named in this bill are concerned—and I urge in advance that this House stand by its action at that time, the same action, I trust, it will affirmatively take today. I would not like the House, or the Congress, for that matter, in order to get through a pay raise for its membership, deal out the public servants I have mentioned.

I take for granted there is no intelligent debate against the pay raise for the Federal judges as herein provided—I cannot imagine any proper question with reference to the judges' salary increase; and frankly anyone against this item, to put it bluntly, just do not know what they are talking about; and not if they wish to keep the best possible number of our best judges on the bench—and if we wish to obtain other judges of proper ability and stature—and retain their services.

With reference to the United States district attorneys and the assistants, I take the position that the same unquestioned arguments offered in behalf of the judges can very well be presented, and I do now present them, in behalf of the United States district attorneys and the assistants. By all means we must keep in mind that, today, by administrative action, the United States district attorneys and assistant district attorneys are not permitted to engage in the private practice of law—this will lose to the Nation the highly desirable services of many, many highly desirable lawyers for these key positions in the Department of Justice operations.

I have in mind, as a classic example of having our best lawyers serve us, the United States attorney for the middle district of Pennsylvania. I am sure there are a legion of like cases but I know about the middle district of Pennsylvania because I live there. Here is this renowned and distinguished trial lawyer and most active practitioner, giving the best of his unusual talents in the law to this Government as United States attorney. As a brother lawyer, though from a different county bar association, I state as my personal judgment that Mr. Levy is worth many times double the pay he receives. I know of no one in the district who could do this important job better and few could do it as well—and let me say here that in Pennsylvania we yield to none in the high quality of our lawyers, in all fields. I am not here to shower bouquets on Mr. Levy, politically we are on opposite sides of the aisle, but following the message of a TV program on the subject of law enforcement, all I want you to hear, Mr. Chairman, are the facts.

Why under the sun a lawyer with the lucrative practice enjoyed by Attorney Levy would or could give that up for the comparative pittance he gets as United States Attorney, only he can answer. I know he has a high reputation for public service—I know nothing of his financial status other than his salary—and I do not think that should be our yardstick in considering this bill.

Mr. Chairman, I feel so keenly on this subject that I would like to speak at length but I realize that under the 5 minute rule on amendments, that is not possible. But I offer as exhibit A this case of Mr. Levy to show that the pay raise provision in this bill for the United States attorneys and the assistant United States attorneys and the Department of Justice officials named are integral parts of this bill, belong in this bill, and shall stand or fall with this bill.

Mr. VORYS. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. VORYS. Mr. Chairman, I would like to vote for an increase in judges' salaries. I think congressional salaries should be increased. But I think this bill provides too much too soon for Congressmen. I protested when Congress rushed through an increase in the President's salary before inauguration day in 1949 so that it would apply to the new presidential term beginning on January 20. Amendments to postpone this congressional increase are held out of order. I voted for the Burdick amendment to reduce the increase for Congress to $5,000, but this was defeated. All kinds of salary increases for various groups of Federal employees are before us for action at this session.

I think we should delay action on our own salaries until we have passed on these bills. I fear that by acting first on congressional salaries we will start a parade of salary increases. Many of those increases may be justified. We make it hard for ourselves to consider such increases impartially when we take care of ourselves first.

I am therefore voting to recommit this bill; and if this fails, I shall vote against it.

Mr. ELLIOTT. Mr. Chairman, the question before the House is not what a Member might earn were he employed in business or in the active pursuit of his profession.

Members of Congress are engaged in performing the very highest type of pub-

lic service. A large part of the reward is in the knowledge of a job well and conscientiously done.

To me it is very distasteful to even try to measure service here in terms of money. I sincerely wish it were possible for me to serve without any pay whatsoever.

These are some of the thoughts I have as I cast my vote against the pay-raise measure.

Mr. DORN of South Carolina. Mr. Chairman, I am going to vote against this bill calling for an increase in the salary of Representatives and Senators. I sincerely believe that it is wrong for us to pass such a bill affecting the present term of office, particularly making such salary increase retroactive. I believe this to be unwise as a matter of principle. I am against this salary increase at this time because of the inflation which is running rampant in America today.

I think we could give ourselves an increase in salary and the American people an increase in wages simply by making the American dollar more valuable. I predict that if this bill passes there will be a clamor for increased salaries in all departments of the Federal Government. If passed, this will mean higher rent, higher food bills and then we will be right back where we started. The worst kind of depression is a depression of inflation. We can help guard against this kind of depression right now by defeating this bill, balancing our Federal budget and cutting out excessive foreign aid.

I believe this House today should put first things first. Let us balance our Federal budget and stop this inflation of our currency. I have heard a lot of argument here today about how much we are worth. Mr. Chairman, I submit that we should put more emphasis on the honor and privilege of serving this Nation. We should put less emphasis on monetary and materialistic reward. Frankly, I did not offer for Congress for the salary involved. I hoped that I could be of service to this country at a time of great national and international crisis. My chief concern today, Mr. Chairman, is not how much money that I draw every month but my mind is constantly on the grave problems confronting the United States and the world. This proposal is simply too much at the wrong time.

Mr. OLIVER P. BOLTON. Mr. Chairman, I will not be present on the floor of the House today during this debate because of my incarceration in the hospital. Nevertheless, because I feel so strongly on this subject, I do want my thoughts included in the RECORD of the debate. It will be impossible for me to vote on the various amendments which are made on the floor, but I know that when the bill comes to a vote the basic question will be whether or not Congress and judicial salaries shall be increased, for if this bill is defeated, the question will die for at least another session of Congress.

I must say at the outset that I hope that an amendment will be offered and adopted which will make this pay raise not applicable to the present Members of Congress, but rather to become applicable to the Members who will be elected to the 85th Congress and those who follow.

I will grant there is much logic in the position that if the Members of the next Congress are worth an increase, so are we. Nevertheless, it goes against my grain to some extent to vote an increase in my own salary when I went before the people of my district willing to take office, if elected, at the present salary rate.

Nonetheless, Mr. Chairman, even though this provision may remain in the bill and the raise become effective immediately, I have requested my whip pair me, if possible, in favor of this legislation for several reasons.

It has been my privilege to be closely associated throughout my adult life with Members of Congress. I knew before I was privileged to join this body of the sacrifice required. I do not feel that to all the other sacrifices and pressures which the job entails should be added an impossible financial burden.

Certainly the people of my district and of my State do not want independent means to be a prerequisite of service in the Congress. Regardless of race, creed, color, or station in life, the only criterion of service here should be ability. Members of Congress should not be forced to rely on outside sources of income, whatever they may be, to make ends meet.

I know $15,000 a year sounds like a tremendous amount of money and yet, I wonder how many of our constituents realize that our trips home to report to them come out of our salary; that the cost of living here in Washington is higher than in almost any other area of the country; that there are a myriad of little expenses that build up to a large tab which we must pay, and above all that we must not only move our families back and forth but also maintain two homes at the same time, one here and one back home.

Unless this legislation is passed, I sincerely believe that in all too few years we may well see the time when the Members of this body are either bachelors, men or women of independent wealth, or men or women who are forced to obtain additional income from some other source.

The job of a Congressman today is far different than it was 20 years ago. No longer is it a part-time avocation. Rather it is a full-time, complete year-around job for most of us. If we are to continue in the years ahead to attract men of ability from all walks of life in all types of background and experience, it is imperative that we pay a salary which will permit each Member to give service to his district and to do his job as well as that of a man with independent means.

Mr. SCHWENGEL. Mr. Chairman, since I was not privileged to be on the floor of the House during the debate on the bill to adjust the salaries of Congressmen, I avail myself of your leave to extend my remarks in the RECORD in favor of the $10,000 increase.

Much has been written and said in these times about the advisability of Congressmen increasing their own salaries. It is unfortunate that we must be faced with the decision to enact legislation which on the surface seems to benefit only this body of legislators. Since it is our decision, I feel that we should face it as we do all other issues before us and judge it on the basis of the greatest good for the greatest number.

This precept has long been the foundation of our democracy. I am certain that it applies here as it does in other issues. Adequate pay for Congressmen is as much a part of good government as any of the other tenets to which we hold. It is a sound business principle, and the progress of this Nation is marked with the application of these principles.

Do my constituents benefit because I receive more money? Is the principle of the greatest good for the greatest number being served because I have a few more dollars added to my monthly paycheck? I am sure that it does.

True, I knew what the salary was when I ran for the office. I accepted that salary when I accepted the mandate of the people to serve them in the office. My will to serve is not affected by the amount of money I receive. It would not be less if the salary were less. I have an obligation to the people of my district, just as does every Representative here, and we put service above all else.

Why, then, do I favor an increase in congressional salaries in order to perpetuate the greatest good for the greatest number? Because all of us believe in being fair. The American people are noted for their fairminded approach to problems that confront them. Our reputation for fairmindness stands out in the day-to-day activity of the family of nations.

The people of my district are fairminded Americans, too. They want their Congressman to receive adequate pay for what he does. It is part of their pride as Americans that in this country a man is worthy of his hire. They know that they will get better men as Congressmen. They know that they will be better served and that, in the long run, their country will be better served. When their lawmakers are paid on a basis commensurate with what their contemporaries receive in business and industry, the entire business of Government is on sound footing. The people of America know this and they will support that which is fair and just. For these reasons, my vote is in favor of the $10,000 increase in congressional salaries.

Mr. GWINN. Mr. Chairman, this debate regarding pay raises for ourselves gives me an opportunity to say something that I could not say at any other time.

During the past few days, as I thought about this raise, I was able to build up a good case for it. But our constituents are not aware of all the things we do. The folks back home just do not know how tough the modern legislator's job is. Of course, they know about our campaigns and all the work and sacrifice that entails. They know too of all the

letterwriting, speechmaking, handshaking, and backslapping a Congressman must engage in. Some of them realize, I am sure, that banquets, cocktail parties, political dinners, and the like can become an awful bore. However, the folks that send us here figure that is all part of the job, and if we are not satisfied with the pay we can stay home the next time and let the other fellow come and take our place.

But as I say, there are a whole lot of things we legislators do that the home folks never hear about. For instance, how could they ever know how many hours we discuss, debate, and labor over just how much money we will give each year to the folks in Tennessee so that they can get electric power at half price? Or what do our constituents know about the time and effort we devote arriving at wonderfuly complex formulas which spell out for us what price we can guarantee to the corn and wheat farmer for their produce? The public is not conscious of the great amount of testimony we must hear or the literature we must read before we can determine what wages an employer must pay his employees. Unless they sat in the galleries each day, the home folks cannot begin to realize how difficult it is to provide homes for the folks in the city, electricity for those in the country, and social security for everybody.

And then there are taxes. The folks that elect us always complain about the taxes. But all they have to do is to pay them. We must figure out whether taking nine-tenths of a man's income or over three-fourths of his estate leaves him too much money.

Another thing the folks at home do not know much about is the added duties we have taken on in the last few years. We not only provide money for dams in Tennessee but also in France; we authorize school construction in California and Ethiopia; we appropriate money for our own Army and one in West Germany; we build airfields in Texas and in French Morocco; we pay our own salaries and those of the United Nations. In short, we Congressmen legislate not only for ourselves but for all of Adam's children.

When you stop to think about it, Congress is in much the same position as a father. He arranges for his children's shelter, food, electricity, education, and the other necessities of life. But they never comprehend how much he is doing for them and they always demand more. One of his toughest jobs is to see that all get their share, for if any are not included in the distribution of his bounty, he is not a good father.

And as I have pointed out the family of Congress has grown awful big and the job of taking care of them all is tremendous.

One difficulty is,whom are we going to soak to provide the money for this raise? It doesn't seem democratic to charge the general taxpayer since at least one quarter of his estate has already been conveyed to the Federal Government. We can't hit the Government because it is heavily in debt and broke. I don't see how we can assess the folks at the subsidy trough because how could we decide who to pick on? Perhaps the thing to do is to ask all the foreign folks whom we have helped when they were in need, to return the favor by digging into their pockets now to help us out. They are our constituents too and it is to their own interest that the legislators of the world's greatest democracy are sufficiently paid for their labors and good works.

Some Congressmen have qualms about this raise. There might be some people in the Nation who would look at it as an attempt by Congress to elbow its way into the public trough to get its share. But on reflection, their earlier fears are unfounded because the people for whom Congress provides food, shelter, power, education, loans, gifts, pensions, and so forth, make up the majority of the voters in the country. In case any one is not sure about that I refer him to the January 25, 1955, issue of Look magazine where it is shown that 76,276,110 people receive $60,688,037,000 annually from the Government. Now, these people are not going to begrudge Congressmen a few thousand dollars more a year. In fact, they will be glad for Congressmen to get theirs as long as they get theirs. Besides our checks will not be noticed in the 300 billion that are written annually by the Government and rushed out at the rate of 400 a minute.

Therefore, Mr. Chairman, on the showing made above that all the folks the Congress supports are getting theirs, how can there be objection to Congress getting theirs?

The CHAIRMAN. Under the rule the Committee rises.

Accordingly the Committee rose, and the Speaker having resumed the chair, Mr. SMITH of Virginia, the Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes, pursuant to House Resolution 141, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. KEATING. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. KEATING. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. KEATING moves to recommit the bill, H. R. 3828, to the Committee on the Judiciary.

The SPEAKER. The question is on the motion to recommit.

Mr. WALTER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. BURDICK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 283, nays 118, not voting 33, as follows:

George	Meader	
Gross	Morrison	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Dempsey for, with Mr. Hoeven against.
Mr. Wolcott for, with Mr. Gross against.
Mr. Kean for, with Mr. George against.
Mr. Jackson for, with Mr. Judd against.
Mr. Mailliard for, with Mr. Siler against.

Until further notice:

Mr. Hays of Arkansas with Mr. Horan.
Mr. Spence with Mr. McGregor.
Mr. Cannon with Mr. Schwengel.
Mr. Bass of Tennessee with Mr. Oliver P. Bolton.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND REMARKS

Mr. CELLER. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

REPORT FROM COMMITTEE ON ARMED SERVICES

Mr. VINSON. Mr. Speaker, I present a privileged report from the Committee on Armed Services on H. Res. 136, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

House Resolution 136

Resolved, That the Secretary of Defense be, and he is hereby, requested to furnish the House of Representatives the answers to the following questions:

1. (a) Approximately how many military installations employing five or more individuals who receive compensation or maintenance from Federal funds are now maintained by the Department of Defense outside the continental limits of the United States of America?

(b) (1) Approximately how many individuals are employed in such installations and (2) at approximately what cost?

2. (a) Approximately how many individuals eligible to be assigned to combat service and who are compensated from Federal funds are in the service outside of the continental limits of the United States of America?

(b) Approximately how many individuals eligible to be assigned to combat service and who are compensated from Federal funds are in the service within the continental limits of the United States of America?

3. What is the approximate cost of the civilian employees who are supporting those named under section 2 (a) and (b)?

4. What is the approximate (a) volume in long tons and (b) value in dollars of the supplies, both military and nonmilitary, needed per year to maintain those named in section 1 (a) and (b) and in section 2 (a) and (b)?

REQUESTING THE SECRETARY OF DEFENSE TO FURNISH THE HOUSE OF REPRESENTATIVES CERTAIN INFORMATION AS TO THE EXTENT AND COST OF MILITARY INSTALLATIONS

Mr. VINSON, from the Committee on Armed Services, submitted the following adverse report:

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE,
Washington, D. C., February 11, 1955.

Hon. CARL VINSON,
Chairman, Committee on Armed Services, House of Representatives.

Dear Mr. CHAIRMAN: This is in response to your request dated February 8, 1955, concerning House Resolution 136, a privileged resolution introduced February 7, 1955.

The resolution proposes that the Secretary of Defense be requested to furnish to the House of Representatives answers to a number of questions concerning operations of the Department of Defense. The answers submited herewith bear the same numbers as the questions presented in H. Res. 136.

1. (a) Approximately 950 military installations.

1. (b) (1) Approximately 167,000 civilian employees outside the United States, plus approximately 218,000 civilians who are employees of foreign governments engaged under contracts with the United States. The 218,000 does not include 124,000 Germans paid from Deutschemarks.

1. (b) (2) Approximately $601,699,000 per annum.

2. (a) Approximately 1,370,000 military personnel. This figure excludes female military personnel.

2. (b) Approximately 1,602,000 military personnel. This figure excludes trainees with less than 4 months' service, seriously hospitalized personnel, female military personnel, and conscientious objectors.

3. Approximately $4,530,276,000 per annum. This figure excludes costs for an average of approximately 25,000 employees of the Corps of Engineers and excludes costs in relation to the 124,000 Germans referred to in 1 (b) (1) above who are paid from Deutschemarks.

4. (a) Approximately 4,100,000 long tons.

4. (b) Approximately $3,300,000,000.

Sincerely yours,

RICHARD A. BUDDEKE,
Director, Legislative Programs.

Mr. VINSON (interrupting the reading of the resolution). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with as the distinguished gentleman from Michigan [Mr. HOFFMAN] has no objection to its being printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. VINSON. Mr. Speaker, since the information requested has been furnished, I move to lay the resolution on the table.

The SPEAKER. The question is on the motion.

The motion was agreed to; and a motion to reconsider was laid on the table.

RENEGOTIATION OF GOVERNMENT CONTRACTS

Mr. CARRIGG. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CARRIGG. Mr. Speaker, a short time ago I realized that, presumably through inadvertence or purposeful act, the President had omitted in his annual message, any reference to the retroactive extension of the Renegotiation Act of 1951 which by its terms expired on December 31, 1954. In view of the general tenor of the President's message which was to oppose any tax reductions and indirectly, not to permit the cessation of revenues to flow to the Government at this time, I prefer to attribute his omission to inadvertence.

A few remarks on the nature of renegotiation might be apropos; how and why it was conceived, how it functions—herein I am constrained to simplify and summarize as time would not permit a detailed and thorough dissertation—what it has accomplished heretofore and the reasons why it is just as important today and in the immediate future as it was in the past.

Renegotiation as prescribed in the Renegotiation Act and implementing regulations is simply a retroactive review of Government contracts to prevent the realization of excessive profits by business and to provide for the recapture of such profits as may be determined to be excessive, using recognized economic and business formulae as translated and interpreted by sound business judgment. This is calculated to remove profiteering from war, defense, or national emergency and scotch the imputation or practice of cancerous fraud by a few businessmen on the United States taxpayer, or John Q. Citizen.

How does renegotiation operate? Defense contractors are required to file an annual report with the Renegotiation Board listing all of their renegotiable business and resulting profits. If the

annual renegotiable business exceeds a certain amount—currently the figure is $500,000—the contractor is then subject to renegotiation. The profits of contractors with defense business over the statutory limit are reviewed, and if excessive profits are found, the Board seeks to recapture them—either by getting the contractor to voluntarily agree to refund, or by issuing an order.

In simple words, renegotiation means that our Government rightfully takes a look at the business of its suppliers to ascertain whether they are realizing more than a reasonable profit from the misery of war or national emergency. To illustrate simply, if contractor A agrees to manufacture 10,000 units of his product at $100 per unit or a total price of $1 million and this is a product which is used for defense and not specifically exempt; at the end of the year the Government reviews these sales, related costs and profits in the light of his efficiency, reasonableness of costs, pricing, risk, and so forth. The renegotiation may determine that his profit of 25 percent or $250,000 in the light of all factors and sound business judgment is excessive. In effect, the Government will say to Contractor A, we are going to rewrite the price—retroactively—in your contract to $90 per unit or $900,000 and we find that $100,000 of your profits are excessive and must be returned to the Government. The contractor who has been given every opportunity to present his views and arguments before this will then either voluntarily agree to refund the determined amount or be subject to an appropriate order being issued against him. This may be over-simplification but time does not permit further elaboration.

Now, gentlemen, why renegotiation? The history of our country and deep understanding of human nature will furnish the answer. The temptation to excess in profiteering at times using fraudulent and even criminal means to achieve it resulting in scandal at times of war or emergency when the lives of our citizens and our sacred democratic institutions are in jeopardy, is well known and fully attested to in the annals of history.

The propensity for honest human error in such times of war or emergency is tremendously increased. In such times haste and immediate results are the main objectives. These are certainly not concomitants of accurate pricing and prudent use of the tax dollar. Error and the unscrupulous opportunism of a few Macchiavelian businessmen can conspire to produce an unnecessary and unjustifiable cost in meeting with the requirements of defense, emergency or war.

It is true that renegotiation was born and thrived in the environs of world war III, the Korean affair. But who among us has the capacity and intensity for wishful desire to say that we are living in an era of peace or one which even distantly resembles it? We live in a world of cold war whose heat from time to time achieved the intensity of incandescent heat. Witness in this condition the burning national and international issue of this very day and this very hour. Does anyone seriously believe that the frigidity of the cold war will ever cease or perhaps provide any solace or comfort beyond that which Arctic living would afford. Without the proper clothing of defense cold war can ultimately achieve what a hot war will, except perhaps that it be more insidious and agonizing.

What I am trying to say, gentleman, is that the reasons for previous renegotiation laws exist today. And in my humble opinion Formosa merely heightens the situation which I cannot see abating in the foreseeable future—certainly not in 1955 anno domini.

It is for this reason, Mr. Speaker, and colleagues, that I introduced H. R. 2004 to extend renegotiation retroactively from January 1, 1955 through December 31, 1955.

I introduced the extension bill after I learned, to my astonishment that the Renegotiation Act has lapsed, with the result that the Renegotiation Board can do nothing about profits under defense contracts that accrue after the beginning of this year. Certainly if renegotiation was needed during the calendar year 1954, it is at least equally needed for 1955.

Our appropriations are going down, but we appear to be forgetting the extent to which money appropriated in years past is now being spent. As an example, I have figures showing that on July 1, 1954, the staggering sum of $55 billion remained available to the Department of Defense for expenditure out of prior year's appropriations. In addition, the Atomic Energy Commission and numerous other United States agencies whose contracts have been subject to renegotiation likewise have additional unexpended billions.

Why stop renegotiation now? Certainly the emergency is not over, as witness the Formosa situation.

Renegotiation is the most effective method by which we can protect our huge defense expenditures, and prevent profiteering. To drop it now will, in my opinion, cost the United States Government more than $200 million during the calendar year 1955. Can we afford to lose such a vast sum?

By reviewing on a fiscal year basis the profits of defense contracts in the past several years, the Renegotiation Board has recaptured excessive profits in the amount of $232,005,643, a figure that may double by the time the Renegotiation Board completes renegotiation proceedings in cases through 1954.

In conducting the renegotiation proceedings, the Renegotiation Board does so on a confidential basis; it does not make public results in individual cases. As a consequence, the Board's activities gets little publicity, with the result that the public is not too well acquainted with either the renegotiation process, nor the reasons for it. The fact that the Government may recapture several million dollars from a defense contractor, as it is doing in so many cases, is extremely important because it eliminates profiteering. Fortunately, as a result of renegotiation, profiteering on defense contracts is virtually nonexistent. By permitting the Renegotiation Act to lapse, are we not letting our guard down?

Perhaps you would be interested in the reasons for renegotiation in the first place, and also an explanation of how renegotiation operates.

As to the reasons for renegotiation, I would like to quote from an official report made after World War II by the War Contracts Adjustment Board, commenting on the use of renegotiation during that war.

The Board, in its report to the President, emphasized that the $11 billion recovered through renegotiation was not the major benefit derived from renegotiation.

In a very real sense—

The report stated—

The refunds shown represent only a by-product of the renegotiation process. The major product was price reduction. Many voluntary refunds of so-called excessive profits were made by contractors prior to the institution of renegotiation proceedings. These occurred outside the renegotiation process, without formal determinations, and so did not constitute refunds of excessive profits in the strict sense.

Such voluntary refunds were sometimes treated as retroactive price reductions on existing contracts. At times they are not so designated, some contractors being reluctant to identify them as specific price reductions which might afterwards become a depressant factor in the postwar pricing.

The savings which resulted from reduced prices on reorders, continuing contracts, and successive contracts are not even approximately measurable. Some price reductions were effected independently by procurement personnel, others by cooperative efforts, and others by specific repricing agreements accomplished in the renegotiation contract. In all these circumstances the imminence of renegotiation improved the atmosphere in which price reductions could be mutually agreed upon. Contractors, apprehensive of public opinion, had no zeal to accumulate excessive profits which would soon be given back in to formal renegotiation proceedings.

Previous renegotiation acts, and the Renegotiation Act of 1951, clearly provides for favorable recognition to contractors who price reasonably and foster the traditions of business risk. This is a statutory incentive designed not only to reduce prices but to induce the lowering of costs.

The Board told the President that it was not the purpose of renegotiation to produce revenue for the Treasury. They said the renegotiation laws "operate primarily to forestall the realization of unreasonable profits rather than to recapture such profits after they have been realized."

The Renegotiation Act of 1951 follows along the same lines of the previous renegotiation acts. One of the principal differences today is that renegotiation proceedings are now conducted by an independent civilian board, reporting direct to the President. Previously the same agencies which let the contracts renegotiated the contractors.

It is a tribute to the Renegotiation Board that in renegotiation proceedings under the 1951 act only a small percentage of orders have been issued. Refunds are being obtained through voluntary agreements. This means that the Board is doing a highly competent review job, and is not experiencing difficulty in getting contractors to agree to refunds.

Certainly if the Board was acting unreasonably, if the Board was allowing fair and reasonable profits, contractors would be protesting. Less than 5 percent of renegotiation cases result in Board orders, and of this number less than 10 of the contractors have appealed to the Tax Court.

How much does renegotiation cost? So far, through December 31, 1954, the Board has spent $14,851,643—it has recovered 16 times that amount, and the money continues to come in.

The records of the Renegotiation Board for the years 1951–55 indicate that some $275 billion will come under review. This work will take some time to perform and complete.

Keeping in mind that it took time to set the renegotiation machinery into operation; that constantly changing personnel at top levels, budgetary restrictions, and other administrative factors, as well as the fact that case involving no renegotiation because of being below statutory minimum, exemption, nonexcessive profits are normally disposed of first, the recovery of excessive profits amounting to about $232 million as of December 31, 1954, may well represent a very small portion of the recoveries, reasonably expectable in the future, and the bigger and more complex cases are resolved. This must be judged in the light of the further fact that the cost of recovering these profits has been only $14,851,268 as of December 31, 1954.

The foregoing are perhaps not the biggest benefits to accrue to the Government and the taxpayer. The indirect increments which come about from the mere existence of renegotiation and its effect on the pricing policies of would be Government supplies is incalculable and invaluable. Who can say whether contractor A sold his item at $10 less because he realized that otherwise his excessive profits would be subject to recapture? Who can say how many contractors voluntarily reduced their prices as they progressed in the performance of their Government contracts. These amounts do not show up in any figures. Surely, the yardstick or big-stick theory of renegotiation has logically and defensibly caused the savings of countless millions of dollars. Without renegotiation there would be no incentive for such action nor a deterrent to excessive profits.

Again, I say we cannot revert to the times, conditions, and rationalizations which predated the preparation for World War II. Much as we would like to curl up in the comfort and solace of peace, we must face it—we do not have it now, and whether we have it in the future is highly problematical. If there was ever a reason in the public interest and in the interest of national defense for renegotiation—and I believe there was—it exists today, with equal or even more compelling force.

Even though the Renegotiation Act has lapsed, the Renegotiation Board still has power to clean up old cases. As an example, the Board has not yet acted on any cases involving contracts in effect during calendar year 1954. But the Board can do nothing about profits under defense contracts that accrue after the beginning of this year.

It does not make sense to fail to coordinate the impact of renegotiation with the time of maximum actual expenditure, merely because the paper figures set down in new appropriation bills show a slight falling off.

From the standpoint of private industry, the lapse, if not corrected, will mean that it can no longer assure Congress and the world that defense contractors are not profiteering from the national emergency. Nor can Congress, from now on, rest easy, knowing that it has dropped its guard in protecting the Government's money, thus possibly opening the way for profiteering.

Furthermore, the lapse of renegotiation will mean the automatic reinstatement of the profit limitations of the old Vinson-Trannel Act. These, built around fixed percentages, are not an effective way of controlling excessive profits, but have a nuisance impact far exceeding that of renegotiation, and, moreover, tend to discourage efficiency and economy.

In summary, gentlemen, H. R. 2004 is deserving of your immediate attention and expeditious enactment because:

First. It assures the elimination of excessive profits and unjustifiable profiteering at the taxpayers' expense.

Second. The millions of defense dollars it has saved during World War II and Korea far exceed the reportable figures.

Third. The conditions of world unrest and emergency of which its need is predicated exist today.

Fourth. It is an effective antidote to fraud and scandal which often follow in the wake of hysteria and haste which are the unwanted products of the troubled world in which we live.

I hope that the House Ways and Means Committee will call on members of the Renegotiation Board in a hearing, and have them outline—without revealing names—the number of renegotiation cases in which they found inordinate profits, or what would be profiteering if renegotiation was not involved. I would like them to tell about such cases and also give the committee some estimate of what the future holds with renegotiation out of the way.

Gentlemen, I therefore respectfully seek your endorsement and wholehearted cooperation to enact H. R. 2004 into law.

LITHUANIAN INDEPENDENCE DAY

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the people of Lawrence, Mass., are proud of the fact that one of their fellow citizens has been chosen to give the invocation at today's session of the House of Representatives.

February 16 is notable because it is the 37th anniversary of Lithuania's Independence Day.

Lawrence is one of the most cosmopolitan of American cities, embracing people from almost every land, who came here seeking opportunity and freedom. We are proving how people of diverse cultures can work together, sharing in the contributions made by each to the life of our community, and united by the common denominator of the dignity of man.

When the people of Ireland were struggling to be free, and the people of Israel were winning through to self-government, they were helped by the sympathetic understanding and financial contributions of Lawrencians who were not of Irish or Jewish origin.

Because, in the best American tradition, our people believe in freedom for all.

True to that faith, we are now concerned for the future of those nations that have been enslaved by Communist imperialism.

On this 37th anniversary of Lithuanian independence, we declare our unyielding opposition to the conquest of that Baltic State by Red Russia. We publicly affirm our moral support of Lithuania's cause, and our promise to work unremittingly for the liberation of Lithuania.

By one of those happy circumstances where the right man is chosen for the right occasion, the Very Reverend Monsignor Francis M. Juras, pastor of St. Francis' Church in Lawrence, has been given the high honor to deliver the invocation as the United States House of Representative recognizes Lithuanian Independence Day.

Monsignor Juras is one of the outstanding clergymen of our city, whose sincerity, and dedication to duty, have earned him the blessings of the Catholic Church, and the affection in which he is held by neighbors of all creeds.

His larger parish is the world, and particularly those human beings in it whose spiritual life is being persecuted by atheistic communism.

Monsignor Juras knows how the people of his motherland are suffering.

He knows that good men and free men must stand together, no matter what country they live in or what religion they profess, in order to overcome the cruelty, the cunning, and the contempt for God and man, that is the real and dangerous evil of communism.

In listening to Monsignor Juras' invocation today we become aware that faith in what is right, is the inspiration that we need to give us the strength and the courage that will inevitably erase communism as the last and final obstacle in the way of peace for every man.

HOME LOANS TO VETERANS OF WORLD WAR I

Mr. CURTIS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CURTIS of Massachusetts. Mr. Speaker, I am today filing a bill to extend to veterans of World War I the

same provisions as to home loans now available to veterans of World War II.

The home-loan provisions have proved to be a most valuable and successful project for veterans of World War II. This measure has created homeowners who are the backbone of American democracy. It has created healthy business activity in the construction of homes. The record of payments on their loans by these veterans has been so good that the program has been of little cost to the Government.

Many veterans of World War I are now reaching the retirement age and desire to change their living arrangements and secure new homes. The great advantage to them of this bill would be that it enables them to purchase a home without the amount of down payment required under ordinary circumstances. This benefit may well be just enough to make the difference between a new home or no new home.

Various officers of the Boston Real Estate Board, who recently visited Washington, expressed enthusiastic support. Veterans organizations have gone on record in favor of it. Although the home-loan privileges expire on July 25, 1957, if not extended, this legislation is still timely.

Many veterans of World War I feel that they were somewhat less fortunate in regard to veterans benefits than their sons and others who took part in World War II. Here is a benefit that can properly be extended to them and which will be appreciated.

I sincerely hope that other Members will feel inclined to lend this legislation their active support.

INDUSTRIAL TRADES UNION OPPOSES H. R. 1

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. FOGARTY. Mr. Speaker, under leave to extend my remarks I am including an advertisement sponsored by the Industrial Trades Union of Woonsocket, R. I., and carried in the Woonsocket Call of February 11, 1955.

This advertisement is an excellent presentation of the serious effect the passage of H. R. 1 would have on our textile industry. It points up the fact that the American workman cannot hope to compete with the unfair competition of imports produced in low-wage and substandard working-condition countries without some form of protection. Such protection is not to be found in H. R. 1.

I urge all of my colleagues to read this message. I further urge that they give it deep and serious consideration before recording their votes on the bill which will be before the House this week.

WHAT'S AHEAD FOR WOONSOCKET TEXTILE WORKERS?

President Emil Rieve, of the CIO Textile Workers Union, has announced that his organization will seek no wage increases this year because of continuing depression in the textile industry.

The Rieve statement, made in advance of collective bargaining, has caused some speculation in this area as to the probable attitude of the ITU.

We don't believe in crossing a bridge until we come to it. ITU policy will be determined in due time by the ITU membership, and executed at the collective-bargaining table.

No one can doubt Mr. Rieve's claim of continuing depression in textiles. On the other hand, we cannot be sure now what conditions will prevail 2 months hence.

The ITU has no crystal ball for the anticipation of future events. We shall deal with conditions and events as they occur. Sufficient unto the day is the evil thereof.

We agree with Mr. Rieve that textile workers need and deserve more money. That is putting it mildly. There have been no pay hikes in recent years, only pay cuts. Only worker productivity has gone up.

Contracts in April are important. However, we are more concerned right now at what is happening in Congress. There is a danger that the textile depression may be enacted into law and made permanent.

A hint of things to come was contained in an Associated Press dispatch from Washington, dated February 4. It was a story buried in some papers and ignored by others.

"NEW TEXTILE MILL

"WASHINGTON, February 4.—Representative DORN, Democrat, of South Carolina, said today a southern textile-mill owner has built a plant in India to compete with Japanese textiles in United States markets.

"DORN said the millowner, whom he did not identify, will bring goods from India—where labor is paid 9 cents an hour—for distribution from a plant in this country, now closed.

"Textile labor in South Carolina, DORN said, is paid $1.29 cents an hour, and Japanese labor about 11 cents.

"DORN's remarks were to the House Ways and Means Committee, which is considering extension of the Reciprocal Trade Act."

What is the significance of this news item? We are wondering if it indicates a new, ugly, global pattern for the textile industry. We quote now from the ITU brief, entered at Washington last December:

"If continuing tariff concessions are granted cutrate competitors in Japan, or anywhere else, what's to prevent the bulk of American-invested capital from moving abroad for the specific purpose of flooding American markets with the produce of human slavery?"

The poignant words of Omar Khayyam come to mind:

"The moving finger writes:
And having writ, moves on;
Nor all your piety nor wit shall lure it back
to cancel half a line;
Nor all your tears wash out a word of it."

The moving finger of a new global slave trade seems about to begin writing. Unless it is stayed by Congress, American textile workers may soon find themselves back in the jungle of 25 years ago.

There is no point in trying to kid ourselves or anyone else about future prospects. They are grim. The administration has the votes to legislate American textiles to the brink of bankruptcy.

If this happens, American textile workers will be pressured to take larger and more frequent cuts in pay. They will be expected to keep domestic mills competitive with foreign subsidiaries paying at little as 9 cents an hour.

We are very frankly concerned at the prospect of seeing our workers made pawns in an international rat race to aggravate human suffering and exploitation around the world.

For several years now, organized labor in textiles has fought to hold the line on good wages and decent working conditions in this country. How can we combat cutthroat competition outside the country?

Each new contract season has found American textile workers increasingly on the defensive. The situation has gone from bad to worse. Instead of holding the line, we may very soon be holding the bag.

The continuing depression in textiles during an era of rising wages and unprecedented national prosperity is senseless. Our people are becoming fed up with paying prosperity prices on a depression income.

The acceptance of maximum workloads, the foregoing of earned benefits, and the taking of pay cuts has not improved the competitive position of our mills. How could it, under the circumstances?

The protective tariff on competitive textile imports is already woefully inadequate. If it is reduced further, how many union contracts in textiles will be worth the paper they are written on?

We are not unmindful that April and contract time are just around the corner. We do not minimize its importance. Right now, we are concerned with a more immediate matter.

A sharp legislative knife seems about to be drawn across the throat of the domestic textile manufacturing industry for the profit and edification of political adventurers in global slavery.

If American markets are further flooded with low-wage textiles, there will be less local business. If there is less business, there will be fewer jobs. If there are fewer jobs, where will that leave you?

Incidentally, friend, have you written to your Congressman recently? Why not do so today? The job you save may be your own.

THE EXECUTIVE BOARD, INDUSTRIAL TRADES UNION.

THE CORE OF THE BERN INCIDENT—RUMANIAN PATRIOTS VERSUS THE COMMUNIST CONSPIRATORS

Mr. FEIGHAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FEIGHAN. Mr. Speaker, yesterday a small group of Rumanian patriots took possession of the Communist occupied Rumanian Legation in Bern, Switzerland. According to accounts in the press, they took this action as a means of forcing the Rumanian puppets who now control the Communist police state in Rumania to release a number of patriots now languishing in prison in Rumania. They have stated to the Swiss police that they intend to keep possession of the Legation until their wishes are met and that other Rumanian patriots in the free world are prepared to take similar action with respect to Rumanian Legations in other countries. The Swiss police, up to the present, have refrained from using force in removing them from the Legation and have stated that the only sensible way to handle the matter is to talk it over with the Rumanian patriots. I, too, believe this makes sense, particularly since the patriots have made it clear they will keep possession of the Legation at all cost until their demand for the release of

their fellow patriots imprisoned in Rumania are met.

This incident raises a number of questions of interest to the American people. There are, of course, the legal considerations from the point of view of international law. These are being examined by the proper Swiss authorities. There are then the practical questions such as—should free men allow themselves to be used against the patriots of any nation when they are engaged in a fight against their Communist oppressors. It also raises the question whether the Communist conspiracy which holds a total disdain for the laws of civilization, should be granted the benefits of those laws, or be allowed to use those laws to maintain their illegal occupation of Rumanian territory.

It has long been maintained as a basic part of diplomacy that embassies and legations enjoy sovereign rights precisely the same as the nation they represent. The grounds and buildings of embassies and legations have been regarded as territorial islands of the respective nations. This fact raises the fundamental question as to whether the Communists who had occupied the Rumanian Legation in Bern until they were driven out yesterday were legally residing on that territory. It also raises the question as to whether the patriots have more legal right to possession of the Legation than the Russian stooges they drove off the grounds yesterday.

From the legal point of view, it is necessary to establish whether the Communists who now occupy Rumania, do so legally. This is at the core of the many questions raised by the Bern incident. Accordingly, I would urge all the Members of the House and all interested Americans to read a Special Report, No. 11 of the Select House Committee on Communist Aggression, which is titled "Communist Takeover and Occupation of Rumania." This short report which is less than 30 printed pages, tells the story of the Rumanian people and their struggles against Russian communism as well as telling the conspiratorial and criminal methods used by the Communists to seize and maintain control over the affairs of the Rumanian nation. To understand the rights as well as the motives of the Rumanian patriots who have made their stand in Bern, Switzerland, this report is a must.

SPECIAL ORDERS GRANTED

Mr. MOLLOHAN asked and was given permission to address the House today for 15 minutes, following any special orders heretofore entered.

Mr. HOLIFIELD asked and was given permission to address the House today for 10 minutes, following any special orders heretofore entered.

ELECTION TO STANDING COMMITTEE OF THE HOUSE

Mr. MARTIN of Massachusetts. Mr. Speaker, I offer a privileged resolution (H. Res. 143) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That the following are elected members of the Committee on Public Works: Mr. BUSH, of Pennsylvania; Mr. NICHOLSON, of Massachusetts.

The SPEAKER. The question is on the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

LITHUANIAN INDEPENDENCE DAY

Mr. BYRNE of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BYRNE of Pennsylvania. Mr. Speaker, today, February 16, is the 37th anniversary of Lithuanian independence and I would like to say a few words in commemoration of this event.

The history of Lithuania goes back to 1009 when this small state was composed of approximately 12 independent principalities. In the 13th century it was united into a kingdom. However, from that time until 1918, Lithuanian independence was continually threatened and many times nonexistent. Yet, in the midst of many adversities, this small, brave country maintained its dignity and character.

Even after proclaiming its independence in 1918, Lithuania did not know peace. Before it was officially established as a state, it was invaded by the Bolshevik Army. The Lithuanian National Army, hastily called together, repelled its attackers successfully, and in 1920 the sovereignty and independence of Lithuania was officially recognized by the Soviet Union.

From that time until 1939, Lithuania prospered, socially, economically and politically. Then, in 1939, with the beginning of German aggression, this country again faced threats to its security. In 1940 the Lithuanian Government was dissolved and the Soviet Union quietly and bloodlessly entered into control of the country. Until this day the Lithuanian people are prisoners of the totalitarian, godless hordes from the East.

We cannot but decry the base, inhuman treatment to which the freedom-loving peoples of Lithuania have been subjected. The claims of the U. S. S. R. that the Baltic States of Lithuania, Estonia and Latvia should be recognized as an integral part of the Soviet Union are but a mockery. The United States has not and will not give credence to these false claims. We will stand by our State Department's declaration of November, 1953, reasserting our recognition of the last independent government of each of these Baltic states.

I feel sure that the sufferings and indignities of the Lithuanian people have not been in vain. I am proud to join with the 1 million Lithuanian-Americans in saluting their brothers behind the Iron Curtain. May they keep the lamp of freedom burning in their hearts. May they preserve their faith in righteousness. May we all soon see the day when evil is overcome by good.

ARITHMETIC OF THE DOLLAR GAP

Mr. BURNSIDE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BURNSIDE. Mr. Speaker, under leave to extend my remarks in the RECORD, I should like to speak on the arithmetic of the dollar gap.

After 20 years of the reciprocal trade agreements, United States tariffs are now at their lowest point in 100 years and among the lowest in the world. Advocates of further reductions, rest their case in part on the theory that, even at present rates, other countries are still not able to buy the goods and services they need from this country in order to prosper.

This deficit is supposed to be visible in the so-called dollar gap—that is, the difference between United States exports—said to represent what other nations require from us—and United States imports—what they ship to us in return. A high point in this gap, it is claimed, was reached in 1953, when exports reached a grand total of $15.6 billion, compared to imports of $10.8 billion, leaving an alleged gap of nearly $5 billion.

This is nonsense. Competent analysts long ago pointed out that the bulk of this alleged gap consists of defense supplies. For example, of the $15.6 billion exports in 1953, some $3 billion is officially listed as special category items, the details and destination of which are concealed for security reasons. Such shipments have little if anything to do with the normal economic needs of any country. They represent simply this country's contribution to the common defense pool of the democratic nations.

What proportion of the balance is related to this $3 billion of secret exports is not easy to ascertain. It must be substantial. A Senate subcommittee which studied the problem for weeks last spring concluded that, in 1953, after deducting such items, the real trade gap—that is, the excess of ordinary commercial exports over ordinary commercial imports—amounted to no more than half a billion dollars.

But the truly deceitful aspect of this theory lies in the fact that, in addition to ignoring defense supplies, it completely—and conveniently—neglects to mention other ways people in foreign countries obtain dollars. The shipment of physical goods to the United States tells only part of the story. In addition, foreigners realize dollars—by the billion—out of the truly enormous expenditures by American tourists and businessmen traveling abroad, out of our soldiers stationed overseas, out of charges for transportation, and other services, out of special grants and loans, and out of income remitted on investments they have been canny enough to make in the United States.

There is, of course, a corresponding flow of dollars back to the United States on account of similar expenditures by foreigners in this country and, to the extent other countries permit it to escape, the yield on investments made by Americans abroad. But the difference in these accounts is so abundantly in favor of foreigners that it more than offsets any imbalance in the simple export-import figures.

Two recent reports demonstrate this fact beyond any reasonable dispute.

First, on January 18, 1955, the balance of payments group of the National Foreign Trade Council, Inc., filed its estimates of payment transactions between the United States and the rest of the world during 1955. These figures reveal that, from all sources, an amount of $19.9 billion is expected to become available to foreigners during the year—$10.7 billion as the proceeds of imports, $2.8 billion from American expenditures abroad on transportation, travel, and miscellaneous services, $2.7 billion from United States military expenditures abroad, $1.5 billion from unilateral transfers representing chiefly private remittances and governmental economic aid, $500 million from income payments on investments held by foreigners in United States enterprises, $1.2 billion as the net realized from United States private capital investments abroad and $500 million in Government loans and short-term assets.

Against this availability of $19.9 billion the group expects foreigners to use only $18.8 billion during the year—$13.4 billion for merchandise exports, which seems to be a high figure; $2.9 billion on travel in this country, transportation, and miscellaneous services; and $2.1 billion to pay income on United States investments abroad.

In other words, the groups says:

> Foreign countries will close out the current year with a further improvement of $1.1 billion in their gold and dollar reserves.

The balance of payments group of the National Foreign Trade Council, Inc., describes itself as "composed of American exporters, importers, and investors, and representatives of banks and transportation companies." Heretofore the Foreign Trade Council, Inc., has been counted as a staunch advocate of lower tariffs.

Second, in the New York Times for Sunday, January 2, Michael Hoffman reports from Geneva that studies by the secretariat of GATT—the General Agreement on Tariffs and Trade—are upsetting all prior assumptions about the so-called dollar gap.

He says:

> The irresistible urge of foreign capital to employ itself in the United States emerges as the chief cause of whatever dollar shortage [may exist] * * *.
>
> This conclusion—

The report goes on to say—and it must be quoted in full to realize its impact—

> This conclusion has been reached after an extensive new look at the pattern of payments between the United States and the rest of the world in four periods: 1926–30 (boom), 1931–37 (depression), 1946–49 (postwar), and 1950–53 (postdevaluation of many currencies in relation to the dollar).
>
> In all except the period 1931–37, the United States had a substantial surplus on current account, excluding unilateral transfers such as Marshall aid. In 1931–37 the total of world trade was drastically curtailed by depression and the United States surplus dropped to practically nothing.
>
> But in the periods during which there was a surplus on account of trade, tourism, and other items, net private capital exports from Canada and the United States or Government-aid expenditures supplied all or more than the dollars necessary for the rest of the world to balance its dollar accounts.
>
> Were these factors alone considered, no dollar shortage would have arisen.
>
> It is generally known that in the period 1931–37 there was a tremendous flight of European capital to the United States. The GATT economists find strong evidence that the disturbing influence of such movements extends over the whole period and is a dominant factor in the periodic difficulties other countries have in procuring enough dollars.
>
> DATA ARE DYNAMITE
>
> The policy implications of these new studies, some of which are based on new data, are substantial and highly controversial. Indeed, they contain so much dynamite that it is highly unlikely the study will ever be published as an official paper.
>
> The studies emphasize, for one thing, that the very countries that assert the duty of the United States to help them with capital investments have been pouring hundreds of millions of dollars a year of their own investment funds into the politically secure United States capital market.
>
> The studies also throw considerable doubt on the thesis that lowering the American tariff is essential to the establishment of better balance in world trade. Larger American imports would, of course, make more dollars available to the world for whatever purpose the world wanted to use them.
>
> But if capital movements into the United States rather than the trade in balance are the chief cause of so-called dollar shortages, they could easily be made out as the villain responsible for the economic disorder by those interested in maintaining or increasing barriers to competitive imports.

Whatever justification the dollar-gap theory may have had in the past, it is now an exploded myth.

By subtracting defense supplies, which have no place in any discussion of normal trade, the so-called dollar gap evaporates from $4 billion or $5 billion to $1 billion or less.

By taking into account other factors, like transportation and tourism, it not only disappears: it suddenly turns into a net increase of $1.1 billion in gold and dollar reserves held by other countries.

And, according to the Hoffman report, not only do foreigners have enough gold and dollars to buy whatever they truly need from this country—except defense supplies for which the American taxpayer pays—they also have, and have had all along, enough surplus to send money here for investment in important volume.

It is not intended here to deny that specific other countries have encountered severe difficulties in meeting dollar payments since the end of World War II. But the root cause for these difficulties lies in economic forces almost entirely unrelated to United States tariffs.

Great Britain, for example, has concentrated the bulk of her exports within the sterling area, where British products are protected from outside competition. Having little or nothing left to send to the United States in exchange for imports liberally ordered from this country, Britain inevitably fell behind in her dollar payments.

In 1952, however, following the collapse of the Korean boom, some of the countries in the sterling area were compelled to impose restrictions on even British products. Great Britain quickly shifted direction and, despite United States tariffs, was able to ship an offsetting volume of goods to the dollar area. Her dollar deficit disappeared almost over night.

Qualified observers believe that the dollar-gap fiction and the campaign for lower tariffs are doing real harm.

More than a year ago Bernard Baruch said the agitation about United States tariffs was serving only as an excuse to other countries "for blaming their troubles on the United States and, by feeling sorry for themselves, to overlook what they ought to be doing on their own."

In his column for January 13, 1955, Walter Lippmann said:

> I wonder whether this—
>
> The campaign for lower tariffs—
>
> puts the real problem in its proper focus. Perhaps we can reach a clearer definition of that problem by saying that the main trouble today is not the level of the tariff rates. In the United States they are by and large not exorbitantly high any longer.
>
> The real problem is economic warfare. All the governments have armed themselves with legal powers which they use to interfere with the international markets for goods. They use them offensively and they use them defensively to cut down, to cut off, to divert, to penalize, to subsidize buying and selling so that the pattern of transaction is different from what it would be under the free operation of supply and demand. * * *
>
> The characteristic of these weapons of economic warfare is that they are not fixed rules and laws of trade but are operated by administrative decisions made, often under political pressure, by bureaucracies. * * *
>
> * * * The essential condition of economic peace is that trade among friendly nations should not be subject to the arbitrary acts of administrative and political officials, that trade should be subject to laws enacted deliberately and openly and after debate and not changeable except by equally careful deliberation.

Samuel Lubell, who has successfully predicted the course of American policy and politics in previous works, has written a new book called The Revolution in World Trade. In this book, to be published February 23, he points out that—

> At the root of the dollar mystery lies the curious optical illusion that Europe's trouble has been the fault of her customers.

Mr. Lubell goes on to say:

> Yet—at least through all the years in which a sellers' market prevailed. Europe's trouble could not have been a lack of markets. What really limited Europe's ability to pay for American goods was that she did not produce more and how her exports were spread around different parts of the world.
>
> As Europe's productivity did increase, and her domestic inflation was brought under control and her exports were redirected, her dollar deficit did shrink steadily until it (has now) disappeared. * * *
>
> Whatever is done or not done about United States tariffs will not affect Europe's crucial need to improve her competitive earning power. * * * The adjustments to improve Western Europe's competitive efficiency must be made by the Western Euro-

peans themselves. * * * Since none of these is easy, it is not surprising that so many Europeans should fasten tenaciously upon the alibi that rich Uncle Sam is to blame for what they lack. But there is no reason why we should feed these anti-American resentments by encouraging the belief that American tariff policy is to blame for things it cannot possibly correct.

SPECIAL ORDERS GRANTED

Mr. PHILBIN asked and was given permission to address the House for 45 minutes today, following the special orders heretofore entered.

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 10 minutes today, following the special order granted to Mr. PHILBIN.

LITHUANIAN INDEPENDENCE

Mr. FULTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FULTON. Mr. Speaker, we people who are interested in the liberation of our friends and relatives in Lithuania and the countries of Eastern Europe again note with pride Lithuania's 37th anniversary of independence, February 16, 1955.

This is in evidence of our continued concern and our remembrance of these fine friends who have been cut off by an iron curtain and held down by the iron hand of dictatorship. We celebrate this occasion on this day this year with renewed hope and certain of the fact that the citizens of Lithuania and the Eastern European countries will again be free and independent and peaceful nations dedicated to friendly progress and cooperation with the citizens of the free world.

Mrs. FRANCES P. BOLTON. Mr. Speaker, wishing to associate myself with the remarks of the many Members of this House who are celebrating the 37th anniversary of Lithuanian independence, I ask unanimous consent to insert a letter which I have written to my very fine constituents of Lithuanian descent.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

(The letter referred to follows:)

FEBRUARY 7, 1955.

Mr. JONAS F. DAUGELA,
President of American Lithuanian Council in Cleveland,
Cleveland, Ohio.

MY DEAR MR. DAUGELA: I deeply regret that I cannot join in the solemn observance of the 37th anniversary of Lithuania's independence. But I sincerely hope you will convey to my many friends in the American Lithuanian Council in Cleveland the depth of my feeling on this occasion.

After more than a century of domination by Russia, the Lithuanian people—who trace their heritage back seven centuries—declared their independence at Vilnius on February 16, 1918. For 22 years the Republic of Lithuania took its rightful place in the family of free nations and made marked contributions to the culture of Europe. But in 1940 the infamous Hitler-Stalin pact forced Lithuania back into chains.

For the past 15 years, the Communists have murdered, tortured, and deported the freedom-loving people of Lithuania, but still they have not been able to snuff out the fires of freedom that burn deep within their hearts. The Russians know that, because while they permit foreign travelers into many Iron Curtain countries, they have not dared to allow a non-Communist westerner into the Baltic States for many years.

Meetings such as yours, held by the million loyal Americans of Lithuanian descent, keep those fires burning. You may be certain that word of these observances get back to the Lithuanian people and assure them that some day in the future a free Lithuania will hold public celebrations of its independence day.

Sincerely yours,

FRANCES P. BOLTON.

MEET MR. REPUBLICAN: JOE MARTIN

Mr. MINSHALL. Mr. Speaker, I ask unanimous consent to adrress the House for 1 minute and include an article from the Cleveland Plain Dealer.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. MINSHALL. Mr. Speaker, last Sunday there apeared in the Cleveland Plain Dealer an article written by the distinguished Washington corespondent, Walker S. Buel, entitled "Meet Mr. Republican: JOE MARTIN." It is an article calling attention to the many great achievements of the gentleman from Massachusetts. It is an excellent article.

Mr. Speaker, we are in the midst of a period when we celebrate the birthdays of many great Americans. Last Saturday we celebrated the birthday of Abraham Lincoln. Next Tuesday we will observe the birthday of George Washington. Mention of many other notable birthdays has been made on this floor.

But there is one notable birthday that will not be mentioned this month or even next month. This birthday has seldom been alluded to on the floor because it falls on November 3—a time when the House is usually adjourned.

This birthday of a truly great American belongs to our beloved minority leader, who in more favorable times is our Speaker, the Honorable JOSEPH W. MARTIN, JR.

It seems only fitting to me that when we are paying tribute to revered statesmen on the aninversaries of their births, we should include our praises to the gentleman from Massachusetts, even though it is not his birthday.

Thus, Mr. Speaker, I say thank you to the gentleman from Massachusetts and pay tribute to his steadfastness, his strength of purpose, and his courage. I salute "Mr. Republican."

MEET MR. REPUBLICAN: JOE MARTIN

(By Walker S. Buel)

WASHINGTON, February 12.—That title of "Mr. Republican" borne by the late Senator Robert A. Taft has been awarded, in at least one public instance, to Representative JOSEPH W. MARTIN, of Massachusetts, GOP floor leader of the House, where he has been either Speaker or minority leader since 1939.

He was so introduced last Sunday afternoon on a Washington CBS TV panel show, Face the Nation, by its moderator, Ted Koop. Koop explains that when he and his coworkers were arranging the program the week before, it struck them that MARTIN'S impressive record and his 30 years in Congress made him almost the "legal" heir to the title, and so that was the way Koop addressed him.

GOT START IN 1912

The Martin record is notable. He is 70, and has been in public life since 1912, when he entered the Massachusetts Legislature, serving first in the house and then in the senate. He was elected to Congress in 1924 and has been there ever since. He is publisher of the North Attleboro Evening Chronicle and a weekly newspaper, the Franklin (Mass.) Sentinel.

He was elected chairman of the national Republican congressional campaign committee in 1937, succeeding the late Chester C. Bolton, of Cleveland, and for 2 years was chairman of the Republican National Committee. He was permanent chairman of the last four Republican National Conventions, a record exceeding that of the late Senator Henry Cabot Lodge, who served in that capacity three times.

He was born November 3, 1884, in North Attleboro, where his father was a blacksmith. The father died in 1934, but the Congressman's mother, 93, lives with him in a home only a few blocks from where he was born—the family never moved "uptown." The Martins had slender means in Joe's boyhood and he began work as a newsboy at the age of 5 or 6. Later he worked in jewelry shops and as night telephone operator in the North Attleboro exchange. He was educated in the public schools.

He declined a college scholarship to go to work as a reporter on North Attleboro newspapers at $10 a week. He has never gone into debt, and still has his first savings account opened in 1902. After 5 years' newspaper work he saved $1,000 and persuaded local citizens to join him in purchasing the Chronicle. He became the youngest publisher of a daily newspaper in the United States at 24. His newspaper enterprises are managed by a brother and a nephew. Oldest in a family of 8, he sent 2 younger brothers through Dartmouth College.

ALWAYS ACCESSIBLE

JOE MARTIN is a medium-sized, compact man with a strong but pleasant face and brow always overhung by one lock of dark hair. His talk is straightforward. He gives direct answers to questions. He is always accessible at the Capitol, even when Speaker. He has no regular recreation, except walking for exercise. His favorite sport is baseball. He was a sandlot player when a boy, and afterward a semipro.

He is one of the most modest of men. He has not yet had his portrait painted to hang in the Speaker's lobby of the Capitol, although the 80th Congress appropriated the money for it. However, a group of his friends in the Capitol Hill Club, where Republican Congressmen gather, finally persuaded him, after years of effort, to let them have a portrait for the club, and it has been done. Plans are under way for a great unveiling ceremony.

NEVER TEMPTED TO MARRY

One of the most popular men in Washington, Representative MARTIN is a bachelor. Asked on television how he has managed all these years not to marry, he replied: "It's because I haven't had any great temptation."

Next week he expects to be a stage-door Johnny, undoubtedly for the first time in his life. Ever since her girlhood Tallulah Bankhead has loved JOE MARTIN, who for long years was a colleague and friend of her adored father, the late Speaker William B. Bankhead.

When arrangements were made for the great Tallu to come to Washington with her play, Dear Charles, opening at the National here Monday night, she wrote the Representative that he must be in the front row on the

first night. Joe replied that because of too much work he could not be there opening night, but would attend in midweek, and after the show would go backstage to her dressing room, when they could have a long visit.

Politically, MARTIN belongs to the conservative Republican school—he probably would be rated by many as more conservative than the late Senator Taft, so that wing of the party need not wince if the appellation of "Mr. Republican" sticks. However, he believes the renomination of President Eisenhower and his reelection in 1956 are inevitable.

Typically, Representative MARTIN is making Lincoln Day speeches this year in Florida and Texas—in the hope of enabling the GOP to get more Republican Congressmen in that traditionally Democratic territory. Each of those States broke the tradition by electing one Republican last fall.

Mr. MINSHALL. Mr. Speaker, I also ask unanimous consent that any other Member who desires to extend his remarks in the RECORD on the same subject may be permitted to do so.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. WEAVER. Mr. Speaker, with a deep feeling of pride, I am happy to join with my distinguished colleagues in extending congratulations to the gentleman from Massachusetts.

His simple and earthy qualities have earned for him an enviable standing in the minds and hearts of all Americans.

I admire his genuineness, sincerity, forthrightness, and warmth.

These attributes of character have brought him the affection and respect of all who know him.

Mr. CHASE. Mr. Speaker, the fine tributes paid to my esteemed colleague, the Honorable JOSEPH W. MARTIN, whenever and wherever heard by me—and I hear many, and in many places—are always sweet music to my ears. And I know that I express the sentiment of my good friends of Nebraska who over the years have attentively and admiringly watched the career of this great American in his untiring and unselfish service to our country. And surely the sovereign State of Massachusetts should be proud to have given to our Nation such a son. May he have many more birthdays for his friends to honor.

Mr. THOMSON of Wyoming. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

Mr. THOMSON of Wyoming. Mr. Speaker, the Honorable JOE MARTIN, our beloved minority leader, has made several, but altogether too infrequent, trips to Wyoming during the entire period that I have been active in politics, and even before. We in Wyoming think a great deal of the gentleman from Massachusetts. We consider him one of the outstanding Americans of our times.

It has been brought to our attention that the gentleman from Massachusett's birthday falls on November 3, when the House is usually not in session.

We from Wyoming would like to join in recognition of this outstanding American citizen at this time when the observance of birthday anniversaries of other great Americans is included in the order of business of the House.

Mr. Speaker, we recognize in this American the strength of character, and the devotion to duty and principles which makes us proud to be Americans. It is my pleasure to join in this tribute to the gentleman from Massachusetts, often referred to as "Mr. Republican."

EXCISE TAX ON CERTAIN TELEVISION SETS

Mr. IKARD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. IKARD. Mr. Speaker, I have just introduced a bill designed to assist in remedying a very serious national problem. This bill if passed would remove the excise tax from television receiving sets capable of receiving all of the ultra-high frequency band. The American people have a vital interest in nationwide, competitive television services. According to the best available testimony of experts—both from the Government and those representing private industry—the only way these two objectives of nationwide TV facilities and competitive TV programing can be realized is to utilize both the very high frequency portion of the communications spectrum for channels 2 through 13 and the ultra high frequency portion of the communications spectrum for channels 14 through 83.

To the layman this sounds like a relatively simple problem. Actually it is a very complicated one, and unfortunately there is no cure-all solution in sight at the present time. Virtually all have agreed on one point of procedure relating to relief for the general public, and for the telecasters who are pioneering the use of ultra high frequency television. That solution is to remove the burden of excise tax on sets which can receive all the UHF band.

The historical development of this problem is related to the uncertainties and unknown factors usually associated with all industries growing out of rapidly evolving scientific discoveries. When the UHF band was first set aside for experimental use, certain ideas were held about its engineering characteristics which have proven to be somewhat at variance with actual experience. Not only that, but when the Federal Communications Commission first licensed UHF television stations, the American public had already purchased over 17 million television sets which were engineered so as to receive only the VHF television signals, and UHF programing could not be obtained without an additional investment by the user to place a UHF tuner in the existing television set. There are now more than 30 million receivers in the hands of the public, of which 80 percent are unable to receive anything but VHF signals.

Again, all the experts seem to agree that as the relative imbalance of VHF and UHF television sets in the hands of the public is corrected, the major problem relating to nationwide competitive television programing will have been solved. The ultimate desirable situation would be to have all television sets equipped with both VHF and UHF tuning devices so that programing could be received equally well from both types of transmitters. Program diversity would be enhanced and the resulting competition would work to the advantage of the people.

This bill will assist in removing the disadvantageous position in which a prospective buyer finds himself when he is confronted with the choice of buying a VHF-only television set at one price and a set capable of receiving all of the television channels both VHF and UHF at a higher price. It is to our national interest to make the choice for the all-channel tuning sets more attractive to the buyer. The passage of this bill will obviously provide an additional incentive to manufacturers of television sets to produce more UHF receivers.

This bill will also offer concrete evidence to the many television operators who are struggling along with loss UHF television stations, that their plight is recognized by the representatives of the people, and that the inequity of their opportunity to have their programs viewed and heard by a prospective audience along with the signals of VHF stations is being adjusted more favorably. I am informed that of the 318 UHF construction permits granted by the Federal Communications Commission, some 118 UHF operators have found it necessary to turn in their permits for construction with substantial financial losses. This is a convincing index of the real seriousness of this problem.

SEATTLE-HAWAII AIRLINE RUN

Mr. REUSS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. REUSS. Mr. Speaker, you will recall the observations made in this House on Monday, February 7, in connection with the President's order of February 1. That order reversed a unanimous decision of the Civil Aeronautics Board granting Northwest Airlines the certificate on the Seattle-Hawaii run, and instead cut Northwest Airlines out and attempted to give the route to Pan American World Airways. Protests from every State from Wisconsin to the Pacific poured into the White House against the President's unexplained action. Then, on Monday night, February 7, the President issued another order saying he was reversing his February 1 reversal. This was accompanied by White House statements that new information had come to the President. The new order indicated that both Northwest and Pan American would be given 3-year temporary certificates on the Seattle-Hawaii run.

At the President's press conference on Wednesday, February 8, the President was asked about this reversal of his reversal. His answer was:

It is very simple in this case. There was information came to my attention that convinced me I had made an error. And so I tried to correct it. The actual facts were these:

I am directed by the Congress to cut down subsidies in this air business, which means that when you have unprofitable competition on lines, you had better look at it very, very closely, because this occasions a greater deficit.

I am also directed to preserve competition and, in accordance with the American system, preserve competition so far as this can be done, but always with this other conflicting consideration of cutting down the subsidies.

In this case, it looked like we should get rid of one line on the Hawaiian run and get the line that was—had the most of the traffic and in which it had the smallest subsidy last year on that line, or at least as far as figures showed, that was the one I was going to go with. And I made that decision.

Now, what happened then was the Chairman of the Board came over to see me and pointed out that all of their calculations showed that within 2 years they believed that the entire subsidy would be eliminated from the Pacific runs.

He showed, therefore, that, even if you did have to have a new subsidy, since now you have your computations for subsidies made on the operations of the full line, that here we had a case where we could well afford to go ahead with the competitive system for a while and still believe that we would come out of the subsidy area.

So I said, in that case we will renew this for a short period, which I did for 3 years.

We have all been waiting with great interest for the publication of the original CAB decision, in order that we may know just what it was that the President was reversing by his order of February 1. Today that decision has been finally released. It makes interesting reading.

Had the President read the CAB's decision dated November 26, 1954, he would have seen it clearly set forth that—

In connection with the choice of Northwest as the carrier to operate the Pacific Northwest-Hawaii route, one further matter should be mentioned. At the close of the argument before the Board Northwest expressed its willingness to operate the route at a compensatory mail rate without subsidy. * * * We accept the carrier's statement of its willingness to operate the route without subsidy as one made in good faith and as such we believe that in the future in establishing mail rates for the route we will be justified in reaching our decision in the light of the carrier's offer. (Decision, pp. 15–16.)

Even without this offer by Northwest to operate the route without subsidy, the Board indicated that there were other good and sufficient reasons to award the route to Northwest—decision, page 15. Both the record and the decision are barren of any suggestion that Pan American was willing to operate the route without subsidy. The taxpayers last year paid $27,291,503 in subsidies to Pan American.

Yet, despite all this, the President on February 1 reversed the CAB, threw out Northwest, and put in Pan American. Now, what was the new information which caused the President on February 8 to reverse his reversal of February 1? Our only clue to this is in the CAB's press release of today, in which it is set forth that—

Acting Chairman Chan Gurney declared that in the course of conversations with President Eisenhower regarding the final decision in the West Coast-Hawaii case, he had provided the President with the following statement:

"Mail rates for both Pan American and Northwest over the entire Pacific operations of the carriers, and separate figures as to the Seattle-Honolulu operations can only be determined by calculating the subsidy support per revenue plane mile. These figures, however, being system figures, are not truly representative of the local operations between Seattle and Honolulu. In theory, both carriers should approximate the same cost levels over a period of time.

"The subsidy support provided for the entire Pacific operations of the 2 carriers during the 12 months ending September 30, 1954, was as follows:

"Pan American	$6,740,000
Northwest	3,656,000

"The subsidy support per revenue plane mile equalled:

	Cents
"Pan American	49.28
Northwest	62.48

"The subsidy separation report for November 1954 forecasts that Pan American may be off subsidy entirely in fiscal 1956, due to the military mail movement in the Pacific, and that Northwest would require only $1,483,000 in subsidy support. However, the most recent estimates as to the division of mail between the carriers in the Pacific and the volume which will be tendered to them indicates that, on the basis of existing mail rates, both carriers may be subsidy free in fiscal 1956. It should be stressed, however, that the military mail situation is not entirely clear and that the volume of mail, its distribution between carriers, and the rate which the Board ultimately establishes for its transportation, may directly affect this calculation."

Let us examine this new information. We will find that part of it is not new, and part of it is not information. The part that is not new has to do with Northwest's prospective lack of subsidy. As the CAB's decision of November 26, 1954, clearly points out, Northwest was ready to go to it unsubsidized, not in 2 years, not in 1 year, but right now. The part that is not information is the suggestion that, according to the most recent estimates, both carriers may be subsidy free in fiscal 1956. There is not a word in the record or decision to indicate that Pan American will be in this happy state of affairs by 1956. We are not enlightened as to who made these most recent estimates and on what he based them. What is the point of an elaborate hearing before the CAB, lasting many months, and with the exhaustively analyzed testimony of experts spread upon the record, if it is to be swept aside by some casual conversation about most recent estimates?

Putting Pan American into the Seattle-Hawaii run is not going to help competition, because Pan American already has a permanent route into Hawaii from California. It is not going to save taxpayers' dollars. Under the CAB's November 26 decision, Northwest would have made the run without a penny of subsidy. As a result of the President's order of February 7, Pan American will continue to be subsidized for the run, and so will Northwest, since Northwest's no-sudsidy offer was conditioned on being the sole line certificated for the route. According to the new information, these subsidies may end in 2 years' time. As far as the taxpayers are concerned, 2 years' unnecessary subsidy is 2 years too much.

But, waste aside, the whole case is a shocking illustration of how not to administer civil aeronautics. If you will look at the history of the case, you cannot escape the conclusion that somebody has been trying to pull the wool over the President's eyes. Despite the order of February 7 reversing the reversal of February 1, the CAB's original decision of November 26, 1954, as now revealed, is a sound, dollar-saving, antimonopoly, and unanimous decision. If the President will read it, I am sure that he will wish to order a reversal of his reversal of his reversal.

A PARTIAL STATEMENT OF OUR OVERSEAS ARMED SERVICES COMMITMENTS

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, on February 7, last, House Resolution 136 was introduced by me. That resolution asked for certain information, and a reply came to the House through the Armed Services Committee earlier today.

The questions asked and the answers are as follows:

Question:

1. (a) Approximately how many military installations employing five or more individuals who receive compensation or maintenance from Federal funds are now maintained by the Department of Defense outside the continental limits of the United States of America?

Answer:

1. (a) Approximately 950 military installations.

Question:

(b) (1) Approximately how many individuals are employed in such installations and (2) at approximately what cost?

Answer:

1. (b) (1) Approximately 167,000 civilian employees outside the United States, plus approximately 218,000 civilians who are employees of foreign governments engaged under contracts with the United States. The 218,000 does not include 124,000 Germans paid from deutschemarks.

1. (b) (2) Approximately $601,699,000 per annum.

Question:

2. (a) Approximately how many individuals eligible to be assigned to combat service and who are compensated from Federal funds are in the service outside of the continental limits of the United States of America?

Answer:

(a) Approximately 1,370,000 military personnel. This figure excludes female military personnel.

Question:

(b) Approximately how many individuals eligible to be assigned to combat service and who are compensated from Federal funds are in the service within the continental limits of the United States of America?

Answer:

2. (b) Approximately 1,602,000 military personnel. This figure excludes trainees with less than 4 months service, seriously hospitalized personnel, female military personnel, and conscientious objectors.

Question:

3. What is the approximate cost of the civilian employees who are supporting those named under section 2 (a) and (b)?

Answer:

3. Approximately $4,530,276,000 per annum. This figure excludes cost for an average of approximately 25,000 employees of the Corps of Engineers and excludes costs in relation to the 124,000 Germans referred to in 1 (b) (1) above who are paid from deutschemarks.

Question:

4. What is the approximate (a) volume in long tons and (b) value in dollars of the supplies, both military and nonmilitary, needed per year to maintain those named in section 1 (a) and (b) and in section 2 (a) and (b)?

Answer:

4. (a) Approximately 4,100,000 long tons.
4. (b) Approximately $3,300,000,000.

The information just given should aid in voting on appropriations and in determining foreign policy.

LITHUANIAN INDEPENDENCE

The SPEAKER. Under the previous order of the House, the gentleman from Indiana [Mr. MADDEN] is recognized for 60 minutes.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include a resolution from the American Lithuanian Council, Lake and La Porte Counties, Ind.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. MADDEN. Mr. Speaker, 37 years ago today, Lithuania made known to the world that it was an independent nation, exercising the right of self-government and self-determination. This declaration of Lithuanian independence was one of the great milestones in the history of a liberty-loving people whose struggle for self-government continued over centuries. From the 16th century on, Lithuania was almost in a constant battle against aggressive neighbors, but never gave up hope to preserve the Lithuanian tradition for freedom. During 120 years of Russian domination, no less than five distinct major revolts took place in Lithuania. Back in the early 1800's, Czar Nicholas the First invoked a sweeping policy to Russify Lithuania. Repressive measures were taken against all forms of Lithuanian culture, literature, language, schools, religion, and governmental offices. In 1863 and 1864, another revolt took place which failed after a struggle of 18 months. Another revolution in 1905 brought fresh hopes for independence, but failed. During World War I, the German armies overran the country and remained there until the end of the war. During this time, uprising, negotiations, and minor rebellions did not cease.

On February 16, 1918, the Lithuanian National Council unanimously adopted a declaration calling for the reestablishment of an independent Lithuania on a democratic basis, with Vilna as the capital and the severance of all political ties which linked it with other nations. This declaration became Lithuania's proclamation of independence.

After the evacuation of Lithuania by Germany in November and December, 1918, Russian troops arrived at the border of Lithuania and again made an effort to subjugate the nation. The last battle with the Red army was fought late in 1919 which culminated in a peace treaty signed July 12, 1920.

On September 22, 1921, Lithuania was admitted to the League of Nations, thus Lithuania became a full member of the international powers. The permanent constitution was adopted August 1, 1922. It was an instrument which followed the blueprint of western democracy. The state of Lithuania was an independent democratic republic; the people were accorded the constitutional rights of freedom of speech and assembly; the constitution guaranteed freedom of religion; the independent Lithuanian Government instituted land reform; industrial production proceeded to ascend; neglected railroads were rebuilt and transportation improvement was inaugurated throughout the land; social legislation and education were expanded and it did not take long before the new independent democracy was functioning with the precision of nations much older. The Lithuanian people proved, during the period of time from their declaration of independence up until the Hitler-Stalin menace devastated Europe, that its people could give the world a practical example of true democracy in action. During the period from 1920 to 1939, the Lithuanian Government entered into peace treaties, nonaggression pacts and mutual assistance agreements with the Soviet Union. By reason of typical and well-known Communist duplicity and treachery, every one of these agreements was discarded and nullified by Russia when they saw the opportunity was ripe to enslave the Lithuanian people.

I will not take up the time in these remarks to repeat on the floor of this House, the treachery, mass murders, prison incarcerations, and tortures that the Soviets inflicted upon the brave and liberty loving people of Lithuania. This history is vividly set out in the summary and final report of the Committee on Communist Aggression filed December 31, 1954, only a month and a half ago. Every Member of Congress should read that report and learn from former leaders of Lithuania and other witnesses who were victims of Soviet treachery what Communist tyranny can inflict on innocent human beings. This report also reveals facts containing similar inhuman aggression upon other captive nations now under the Kremlin iron heel. The basic findings, conclusions and recommendations set out on pages 3 to 9 of that report will startle millions of people throughout the free world when they learn of the true facts concerning the Communist conspiracy. Lithuania, along with other captive countries and all free nations must keep up the fight against Communist aggression and expansion and the day will eventually come when freedom will be restored to Lithuania and other captive nations.

Mr. Speaker, I wish to include with my remarks a resolution which was adopted last Sunday, February 13, 1955, by the American Lithuanian Council of Lake and La Porte Counties at a banquet held at St. Casimir's Parish Hall, Gary, Ind.:

AMERICAN LITHUANIAN COUNCIL,
LAKE AND LA PORTE COUNTIES, IND.,
February 13, 1955.

Hon. RAY J. MADDEN,
Member, House of Representatives,
First District of Indiana,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN MADDEN: On February 13, 1955, citizens of Lithuanian descent residing in the Calumet region of Indiana met at the St. Casimir Parish Hall, 1390 West 15th Avenue, Gary, Ind., to observe the 37th anniversary of the declaration of independence by the people of Lithuania.

The following is a resolution which was unanimously adopted at this gathering:

"Whereas Lithuania was a self-ruled country for several hundred years before Russia's first occupation in 1795; and

"Whereas Russia enslaved Lithuania for 123 years; and

"Whereas the yearning for self-rule and freedom existed throughout these years, and on February 16, 1918, severed its ties with Russia by announcing its independence; and

"Whereas Soviet Russia renounced for all time its rights to the territory of Lithuania, and recognized Lithuania as a sovereign and independent state; and

"Whereas the United States of America and other nations recognized and continue to recognize Lithuania's rightful independence and sovereignty; and

"Whereas the free and independent Republic of Lithuania made remarkable progress in every phase of its life, and was acknowledged as one of the most cultured, progressive, and industrious countries of the past World War I period; and

"Whereas Lithuania's independence was suspended and achievements destroyed when it was occupied by Russia for the second time in 1940, and followed by the Nazi's occupation of Lithuania from 1941 to 1944, when the Soviets reoccupied the country and continue to occupy and rule it by force to this day; and, therefore

"*Resolved,* That we, Americans of Lithuanian descent and ancestry shall continue to support the efforts of Lithuanian people to regain freedom and reestablish an independent Lithuanian Republic;

"*Resolved,* That we appeal to the Government of the United States to denounce openly the Soviet policy of destruction of native population, and take effective steps to make Russia respect the principles of the Declaration of Human Rights; be it further

"*Resolved,* That we urge the Government to use its power and influence to help Lithuania and other Baltic States regain their freedom and sovereign rights in accordance with the principles of the Atlantic Charter and the charter of the United Nation, and not to make any peace settlement with Soviet Russia until this has been achieved; and be it finally

"*Resolved*, That this resolution be forwarded to the President of the United States, and copies thereof to the Secretary of State, the Senators and Representatives of the State of Indiana, and the press."

LITHUANIAN INDEPENDENCE DAY COMMITTEE,
JOSEPH PETRITIS, *Chairman*.
JUNE EVANSECK, *Cochairman*.
GARY, IND., *February 13, 1955*.

American Lithuanian Council, Lake and La Porte Counties, Ind.: Albert G. Vinick, president, East Chicago; Antionette Nenios, vice president, Gary; Rev. Dr. Peter Celesius, secretary, East Chicago; John Skierys, treasurer, Gary; board of directors, Msgr. Casimir Bickauskas, East Chicago; Rev. I. C. Vichuras, Gary; Mary Micksis, Michigan City; Joseph K. Matuck, East Chicago; John Ambrose, Gary; Ted Mason, Indiana Harbor; Frank Groach, Michigan City.

Mr. PRICE. Mr. Speaker, for many years I have been closely acquainted with a great number of residents of my home community of East St. Louis, Ill., who are of Lithuanian extraction. No group has contributed more to the civic life of the community. They reflect the firm foundation in loyalty to their country and morality in everyday life which they inherited from their parents who came from their native Lithuania. Many of these parents still carry on and those who have passed on have left a new generation of fine American citizens.

We know how dearly these people love America. It is easy to understand this loyalty, because no people have fought more valiantly for so long to establish the independence of their homeland and to bring to it freedom and liberty, than have the Lithuanians.

Today we celebrate the 37th anniversary of Lithuanian independence. It is not a joyful celebration because it is observed in the knowledge that Lithuania is now enslaved behind the Iron Curtain—enslaved by Russian communism.

Today the Communist tyrants oppress a great Lithuanian people by deporting them under the guise of volunteers for work elsewhere, compelling collectivization of her prosperous agriculture, and by systematically attempting to sovietize every segment of Lithuanian life.

Russian treachery delivered control of Lithuania to the Reds, and by the typical Communist method of terror 3 million Lithuanians are held slaves behind the Iron Curtain.

We pay deserved tribute today to these Lithuanians, whose perseverance and continued resistance to communism and the Russian tyrant will one day restore their homeland to the status of a free and independent nation.

Mr. BENTLEY. Mr. Speaker, will the gentleman from Indiana yield?

Mr. MADDEN. I yield to the gentleman from Michigan.

Mr. BENTLEY. Mr. Speaker, it is my pleasure to call the attention of the House today to the 37th anniversary of independence of the Baltic Republic of Lithuania.

During my work on the Congressional Committee to Investigate Communist Aggression in the last Congress, I had occasion to acquire a great deal of information concerning the fate of Lithuania and her sister republics of Estonia and Latvia. Although these three small countries have today been incorporated into the Soviet union as so-called Soviet Socialist Republics, they have not been forgotten by this Government in view of the fact that diplomatic recognition is still extended to their representatives here in the United States. This is clear proof of the fact that this Government has not and, I am sure, will never acquiesce in the enslavement of these peoples by the Soviet communists any more than it has acquiesced in the enslavement of hundreds of millions of other captive peoples behind the Iron Curtain.

It should be brought to the attention of the House, the people of this country and all freedom-loving peoples throughout the world that a keynote of the foreign policy of the Eisenhower administration is the peaceful liberation of the captive peoples everywhere. This administration has committed itself to make no deal or arrangement with the Soviet Union which would tend to confirm or acknoweldge the present unhappy status of the captive peoples.

In paying tribute to the free government and the people of Lithuania on this day, therefore, I wish to reassert my own hope and belief that they will again one day enjoy freedom and the right to self-determination in a government and institution of their own choice. As long as we continue to call attention to these facts and to remind the people of Lithuania that they are not and never will be forgotten by the Government and the people of the United States, we can confidently hope that the day of freedom will again come for them in the not too far distant future.

Mr. MURRAY of Illinois. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Illinois.

Mr. MURRAY of Illinois. Mr. Speaker, today, the 16th of February 1955, Americans of Lithuanian extraction throughout our country are celebrating the 37th anniversary of Lithuania's independence. I think that I can speak with some authority upon the independence of Lithuanian descent.

Firstly, because the historicity of the country of their origin is like that of the country of my ancestors—a struggle for independence and liberty against obstacles that at times seems to be insurmountable.

Secondly, many of my closest personal friends and neighbors are Americans of Lithuanian extraction.

And, finally, a large number of my constituents are Americans of Lithuanian extraction.

I have found in my friendship and contact that Lithuanians are a devout people with an intense love of God and liberty. Americans of Lithuanian extraction, with their faith in Almighty God and their great love for America, carry in their hearts and with their prayers seek for the day of liberation of the country of their origin from the hands of a godless oppressor.

On this day of the 37th observance of the independence of the Republic of Lithuania, I would like to lend my prayer to the Almighty and my hope that the day draws near when Lithuanians everywhere can see their desire and prayers fulfilled with the deliverance of the people of their homeland from slavery and the return of their country to a free nation dedicated to liberty under God.

When that day arrives, as it will, and captive nations the world over are free from the yoke of their oppressors, I feel that the world will be at the dawn of an era of peace, prosperity, and the pursuit of happiness.

I would like permission to insert in the RECORD a resolution which has been adopted at the observance of Independence Day for Lithuania by the Lithuanian Council of Chicago. A very close personal friend of mine, Judge Alphonse F. Wells, is president of the Lithuanian Council of Chicago, and he kindly forwarded this resolution to me prior to its adoption. It states:

RESOLUTION UNANIMOUSLY ADOPTED, AFTER DUE DELIBERATION, BY AMERICAN CITIZENS OF LITHUANIAN DESCENT OF THE CITY OF CHICAGO, AT THE COMMEMORATION OF THE 37TH ANNIVERSARY OF LITHUANIA'S INDEPENDENCE, HELD UNDER THE AUSPICES OF THE LITHUANIAN COUNCIL OF CHICAGO, AT THE ASHLAND AUDITORIUM, ON THE 13TH DAY OF FEBRUARY, 1955

Whereas the Soviet Union, spurred by its vicious ambition to conquer the world, has embarked upon practices of propaganda, fraud, subversion, and aggression in international relations to an extent unheard heretofore;

Whereas the Communist conspiracy which, in the course of 37 years, has succeeded in enslaving over 800 million people on almost one-third of the surface of our globe is now feverishly advancing its ultimate end by deep infiltrations into the still free countries, using any deceit or stratagem to further its ideological, psychological, and subversive attack upon the free world society;

Whereas the continued enslavement of the captive nations by Soviet power is the basic cause of the growing menace of war and stands as a threat to the security of the United States;

Whereas this threat is increased in direct proportion to the time and opportunity given the Communists to consolidate their conquests and to prepare for the final showdown with the still free nations; it can be diminished only if the Communist hold on the captive peoples is weakened by the positive policy that promotes the forces of national independence in the countries now enslaved: Therefore, be it

Resolved, That the patriotic Lithuanian Americans of Chicago, Ill., reaffirming their adherence to the moral and political principles enunciated in the American Declaration of Independence and pledging their loyalty to the Federal Government, call upon the President, Secretary of State, and Congress of the United States to inaugurate an aggressive, vigorous, and positive program of foreign policy to thwart the global and totalistic Communist conspiracy; be it further

Resolved, That it is the consensus of the Lithuanian Americans, gathered here today, that the following steps should be undertaken as a part of such a program:

1. That the Government of the United States formulate and submit to the United Nations Organization a resolution, based upon the findings of the recent investigation by the Select Committee on Communist Aggression of the Communist takeover of Lithuania and other formerly free countries, with the purpose of accusing the Soviet Union as an aggressor against all these nations;

2. That the said investigation of Communist aggression be continued during the

present Congress in order to complete the picture of all phases and methods of Communist aggression in areas not yet covered by the committee of the 83d Congress;

3. That the psychological warfare against the international communism be intensified by expanding the present media of transmitting the truth behind the Iron Curtain and by enlightening the American people and the people of the whole world as to the true nature of communism and its techniques;

4. That the Genocide Convention designed to curb annihilation of the Soviet-enslaved people be immediately ratified by the Senate of the United States and this ratification implemented by decisive efforts by the United States Government in the United Nations to make the Soviet Union criminally responsible for all the atrocities committed in Lithuania and other subjugated countries;

5. That the existing liberation movements of the enslaved nations and the private organizations or groups that have natural bond with the enslaved people be given encouragement, maximum opportunity, and support through use of funds already authorized by Congress for such purposes; be it finally

Resolved, That this meeting voice its heartfelt appreciation and gratitude to the administration and Congress of the United States for many past considerations in and sympathy with the cause of Lithuania's fight for her independence.

LITHUANIAN COUNCIL OF CHICAGO,
ALFONSE F. WELLS, *President*.
Mr. J. LINKUVIENE, *Secretary*.
CHICAGO, ILL., *February 13, 1955*.

Mr. MADDEN. I wish to thank the gentleman from Illinois.

Mr. MURRAY of Illinois. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. KLUCZYNSKI], may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. KLUCZYNSKI. Mr. Speaker, a few days ago, as in past years, I received a warm letter from the Lithuanian Information Center, reminding me of the 37th anniversary of Lithuania's Independence. Among other things the letter says:

> The occasion will be observed solemnly by Americans as you are aware that it will pass unnoticed in the homeland.

Speaking for myself and for all those whose ancestors have come from countries presently occupied by the Soviets, this date, February 16, cannot pass unnoticed. As a matter of fact it was marked months ago on my calendar in order that I might devote some time today to this small and gallant nation, which throughout its history fought off foreign aggression, only to be conquered once again. This time it was the most brutal conquest the world has known. First there were the masses of little people sent by the thousands to slave labor camps in Russia, and when Hitler's Army came to Lithuania, thousands of others were shipped off to German concentration camps. The Soviet liberation of the Baltic States was marked by the most bloody path in the history of mankind. Up until last year some several hundred thousand men and women were deported and moved deep into the Soviet Union. It is their sweat and blood which counts on the fraudulent Soviet statistics, hailing Russian production in the industrial and agricultural fields.

How many Lithuanians, Poles, Czechs, Rumanians, and Hungarians have contributed to the growth of power of the Soviet industrial output, only God knows, because so far as the leaders of the Kremlin are concerned, this figure is their top secret and it is for this reason that they have hidden themselves behind the Iron Curtain. We may well estimate that slave labor has reached well over 15 million men and women. They are people who have been degraded into the most wretched human beings, who live like animals, receiving for their 14 hours' work a watery bowl of soup and 300 grams of bread. They are people who have been torn away from their families, separated from their loved ones, and have lost contact with their husbands, mothers, and fathers, not to mention their children who have been taken away from them and indoctrinated to believe what the Kremlin wishes them to believe.

I do not doubt for 1 second that there is any person in this country, who on a day like this, will not stop to think how happy he is, living in a democracy which has been founded on righteousness and the good will of the community. For us Americans, it is inconceivable to imagine that there are places in the world where peace-loving men and God-fearing people have to suffer so much as those under the Soviet orbit.

Symbolic as it is, February 16, being celebrated by all free Lithuanians, is a paradoxical situation. On the one hand we hail a day, perhaps the greatest in the history of Lithuania when independence was returned to their wonderful nation, and on the other hand we celebrate the day which at this moment is only part of a glorious history.

I must admit that when I stopped to think what to say today to all my Lithuanian friends, I realized it was somewhat of a problem, solely because of the knowledge and realization that encouragement alone would not be sufficient and that there must be a concrete plan to achieve the desired goal and that is the liberation of all those oppressed.

A great deal has been said about coexistence with one another in order to avoid a military showdown. But, will mere coexistence save the rest of those behind the Iron Curtain who have somehow managed to stay alive and away from slave labor? With the rate and speed of deportations and the misery which deprives nations of its most vital materials necessary for survival, under the best of circumstances, coexistence is no remedy and it is this remedy which we just have to find in order to help the millions in the Soviet orbit to survive, to see them through these darkest years of their entire history. A remedy must be found to help these unfortunate people to throw off the chains of slavery. It is our moral duty to see to it that the job will be done as soon as possible so that countries like Lithuania, as well as others, can freely celebrate a day like this in their own country, with their own Government, freely elected by the people.

On the other hand, the experience of Lithuania should be a lesson to us here, whose situation, as long as we shall stand idle, will become more and more endangered. That is why today we should pause for a moment and think and bow our heads to this brave and glorious Lithuanian nation which on its own soil is unable to commemorate its own anniversary of independence.

Mr. KEATING. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from New York.

Mr. KEATING. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. MARTIN] may extend his remarks at the conclusion of the remarks of the gentleman from Indiana, and that following that I may extend my remarks on this same subject.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Illinois.

Mr. PRICE. Mr. Speaker, I have listened with interest to the remarks of the gentleman from Indiana and also to the remarks of my colleague, the gentleman from Illinois [Mr. MURRAY]. The gentleman from Indiana has long taken an active lead in the efforts of our Congress to explore the reasons and the story behind the oppression of the people of Lithuania by the Russian Communists. He has contributed a great deal by his work, and he took the lead in the investigation of the Katyn massacre. I want to pay tribute to him personally, and I want to join with him and my other colleagues of the House in paying tribute to the heroism of the people of Lithuania.

Mr. MADDEN. I thank the gentleman from Illinois.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Mr. Speaker, there are countless millions of persons whose only misfortune was that they were born in one of the countries behind the so-called Iron Curtain, who hate the oppressor, who have an intense love for freedom under God and under the law; who at one time or another enjoyed their independence and, as in the case of Lithuania, enjoyed their independence in recent years after World War I.

We know of the results that have followed when the Communist hordes took over any territory or any people; slavery—compelled outwardly to obey as a result of the use of force.

Behind the so-called Iron Curtain is a great strength that those of us who believe in liberty and freedom possess. Not only in the so-called satellite countries but in the Soviet Union itself there are tens of millions of persons who want to be free men and free women, who want to enjoy the inherent right

of freedom, who want to enjoy those God-given rights which all of mankind have through God's natural law, who want a little sanctity in their home life, who want some of the fruits of their efforts. Those are God-given rights that man may suppress but can never destroy. That is a spiritual force. It is a force which exists there and which is a powerful reservoir for us to capitalize on at the proper time if the circumstances should occur when the influences of the natural law upon men and women in those suppressed countries may come into operation again.

The brave people of Lithuania are simply a symbol of the brave people of other countries. We honor Lithuania on this occasion, but in honoring Lithuania and its brave and liberty and religious-loving people, we also honor the people of other lands whose independence has been temporarily destroyed and whose liberties have been temporarily denied.

They are looking to America, the leader in the world of today of a future decent world, the leader among the free countries of the world of today, to achieve their hopes and aspirations. America cannot fail them, because we have a rendezvous with destiny. Whether we like it or not, we have that rendezvous. On one side of the troubled world of today is the United States; on the other side is the Soviet Union. Our country is the leader of the forces of decency and progress and the Soviet Union is the leader of the forces of evil and destruction.

So it is well that the House pause today to refresh its memory, and to pay tribute to the brave people of those countries—in this case Lithuania—and by our remarks carry to those brave people over there the hope that in the near future their liberty and their independence will be regained.

We need military strength. We need to be militarily powerful. But we need also to be spiritually powerful. To be militarily powerful alone, while that is necessary, is not enough. Fortunately, we in this country have that great reservoir of spiritual strength in the minds and hearts of our people. And fortunately in Lithuania and in other oppressed countries there are countless millions of people who are possessed of the same spiritual strength.

I want to congratulate my friend the gentleman from Indiana [Mr. MADDEN], and also the gentleman from Illinois [Mr. MURRAY], for having had this hour allocated to them by unanimous consent of the House, because it shows the feeling of all of the Members of the House respecting this occasion, so that we could pay tribute to the brave people of Lithuania and by our voice carry to those in that country today a feeling of confidence and of hope.

Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may be permitted to extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DINGELL. Mr. Speaker, on this 37th anniversary of the independence of the brave and progressive people of Lithuania may I say that I am as certain as there is a sun in the heavens that God the Father of us all, will one day, and soon, reward the patience and fortitude of the good Lithuanian people by restoring their freedom and independence with an assured blessing and perpetuity which only He can give.

As for America, we have never for one moment forgotten, and we shall ever remember, the struggle and suffering of Lithuania. We shall never recognize the bestial attack of Communist Russia upon a helpless little nation which is bound in chains and shackles as a consequence of the German-Nazi conspiracy and blood bath. The world of today suffers in abysmal travail because of the arch conspiracy of the two criminal fiends run riot among free and liberty loving people.

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Speaker, I too join my colleagues who have addressed the House on the subject of Lithuania's independence. I too am delighted to see my colleagues from Indiana reserving this time to conduct these ceremonies.

I am pleased as well that today the invocation was said by the Very Reverend Monsignor F. M. Juras, who is present with us on the floor at this moment, and who served his calling in a parish in my district.

I am especially interested to add my contribution to these words regarding the history of this interesting ancient people and their struggle for liberty.

I am concerned for the point I make today with the insistence by both Imperial Russia and now Soviet Russia that Lithuania be to all intents and purposes annexed to Imperial Russia and now Soviet Russia.

Mr. Speaker, you and the Members of this House know that as a matter of fact and as a matter of law that is not the case. I am proud as an American to say and as a citizen of the United States to know that my country has never recognized any such annexation and has consistently refused to recognize any such annexation. I am satisfied, regardless of what administration may be in power in this country and regardless of who may be the Secretary of State, that the United States of America will never, under any circumstances, recognize the annexation by any foreign power of the Republic of Lithuania.

It has often been said by the Communists or their fellow travelers that the Soviet Union had an historic right to force Lithuania to join the U. S. S. R. because Lithuania had once been a part of the Russian empire. Thus, they have argued, the legacy of the Czars has justly been passed on to the Soviets.

No statement advanced in an attempt to justify the destruction of Lithuania's independence could be farther from the truth. It is so, primarily because it displays a fundamental lack of knowledge of Lithuanian history. Lithuania had been part of the Russian Empire—that lamentable fact no one will deny. But this period of forced adherence was for only 123 years. Prior to subjugation by Russia, Lithuania had a glorious history of national independence, reaching far back into the distant past.

In the 13th century King Mindaugas, one of Lithuania's great kings, succeeded in defeating the Knights of the Sword, the Ruthenian princes, and the invading hordes of Tatars. A baptized Christian, Mindaugas was crowned King of united Lithuania. In the 14th century Lithuania, under the kingship of Gediminas, consolidated the Lithuanian state, succeeded in maintaining an effective defense against the predatory Teutonic Order, and expanded eastward into the Slavic lands conquered earlier by the Tatars. The successors of King Gediminas, the brothers Algirdas and Kestutis, ruled for a period of 32 years from 1345 to 1377. They expanded further the Lithuanian domain until it extended throughout nearly the entire area of the Dnieper and Dniester, stretching from the Baltic to the Black Sea. And then, under the rule of Vytautas the Great, the Lithuanian Empire, which comprised a geographic area equivalent to the combined area of modern France and Germany, reached the height of its glory. Christianization and westernization were advanced with remarkable success, and thus Lithuania became an integral part of the Western European cultural-religious community.

Prof. Clarence Manning, of Columbia University, has made this observation of Lithuania in the Middle Ages:

> The Lithuanians had established a power- and independent state in Europe during the Middle Ages. They were able to check the German drive to the east for centuries. They protected Europe against the Mongols and the Tatars. They furnished a power and a government behind which the Eastern Slavs could live in peace and safety with a freedom that was unknown in Muscovite Russia. They blessed their subjects with more human freedoms than in the neighboring countries. They encouraged education and toleration, and they played their part in the general development of European civilization.

After the close of World War I, Lithuania again declared her independence and established a republic. Throughout the entire interwar period the Lithuanian nation prospered; and Lithuania took her place in the family of nations as a free and independent state. Having established diplomatic relations with the leading powers of the world, Lithuania played an active role in international relations. As a member of the League of Nations she joined with other nations in furthering world peace. Among her Baltic neighbors, Latvia and Estonia, Lithuania had the most cordial relations, which culminated eventually in the conclusion of the Baltic Entente.

Politically, the Lithuanian people proved their ability to govern themselves and to determine their own destiny. Economically, the Lithuanians prospered, expanding efficiently their economy to suit the needs of the nation. Nor were the Lithuanians wanting in social progress, for the Lithuanians were aware of the need for maintaining a strong social structure if freedom from want was to be achieved. In every respect, therefore, the Lithuanian people

marched far along the path of establishing a vigorous and prosperous state.

There are no grounds, therefore, for the argument advanced by Moscow's propagandists justifying incorporation of Lithuania into the Soviet Union on the ground that Lithuania was formerly Russian property, and that the Soviets had a right to claim their lost heritage.

Lithuanians have had a glorious history of national independence; and while today we behold this unfortunate people bound in the chains of Soviet serfdom, we raise our voices in the hope that one day their nation will enjoy the freedom they once knew. In this people there is an inestimable quality of greatness—history has proven that. Let them, therefore, not be denied the destiny which they deserve.

Mr. MADDEN. I thank the gentleman from Pennsylvania [Mr. FLOOD], and also commend him for the outstanding work he did as a member of the special congressional committee which in the 82d Congress investigated the Katyn massacre.

Mr. FLOOD. I appreciate the remarks of the gentleman from Indiana, and wish to observe that the chairman of that very fine committee investigating the Katyn massacre was my colleague the gentleman from Indiana [Mr. MADDEN].

Mr. MADDEN. May I state further that the gentleman from Michigan [Mr. BENTLEY], who just addressed the House, was a member of the special committee in the last Congress investigating the Communist aggression, and he contributed a wonderful service in the work of that committee.

Mr. FEIGHAN. I wish to congratulate the distinguished gentleman from Indiana on his untiring and effective work in exposing the menace—the inhumanities of the international Russian Communist conspiracy. The gentleman from Indiana is one of the strongest voices advocating a positive political offensive based on moral and political principles, which, I am convinced, is the only way that we can avoid an all-out world war III. We must pursue a true, forceful policy of liberation of the nations enslaved by Russian communism, if we are to achieve the goal of peace and freedom.

Mr. MADDEN. I wish to thank the gentleman from Ohio. I might state that the gentleman from Ohio [Mr. FEIGHAN] was a member of the special committee investigating Communist aggression in the 83d Congress and contributed magnificent service on that committee.

Mr. FEIGHAN. I thank the gentleman.

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. LANE].

Mr. LANE. Mr. Speaker, all of us, of course, owe a debt of gratitude to the gentleman from Indiana for making the proper arrangements today and affording us an opportunity to speak this afternoon on this anniversary of the independence of Lithuania.

Mr. MADDEN. If the gentleman will yield, I do not want to take all the credit for reserving this time because the gentleman from Illinois [Mr. MURRAY] also had time reserved to pay tribute to Lithuania.

Mr. LANE. Yes, and I too, want to give him deserved credit which is due to him and to you also for your thoughtfulness in arranging this program here this afternoon so that we might have this opportunity afforded to us to say something in behalf of Lithuania.

Also, Mr. Speaker, we are indebted to you and to the majority leader of the House today for having as Chaplain for today's session a Lithuanian-American, Very Rev. Msgr. Francis M. Juras, of Lawrence, Mass., who has served his flock for many, many years and who is familiar with the history of Lithuania and the struggles of the Lithuanian people. We are pleased that today when we are having this hour of tribute to Lithuania that the Chaplain who offered the prayer at the opening of today's session should be of Lithuanian extraction.

Like the early Christians who were true to their faith in spite of all the persecutions of the Roman Emperors, the people of Lithuania are loyal to their religion, their national independence, in spite of the Red terror.

Like imperial Rome, imperial communism wields temporary power, but it lacks the eternal spirit, which is bound to prevail.

The 37th anniversary of Lithuanian independence is celebrated in the catacombs of the human heart in every Lithanian who is living under the Communist occupation.

One million Americans of Lithuanian descent, and millions of others in the free nations of this earth, honor this anniversary in public affirming the right of Lithuania to be sovereign and self-governing.

This Baltic country is small in size, but large in character.

From its great and glorious past it draws strength to endure the trials of the present, and confident to prepare for the day of its inevitable liberation.

To the gallant people of Lithuania we send this message:

"You have legions of friends in the free world who have not forgotten, who will never lose sight of your just claims which are interwoven with our own goal of independence for all men.

"The overlords of the Kremlin do not trust each other. They are fearful of their own people, as well as the people of other nations that they hold in temporary captivity. The day of retribution will certainly come when their instruments of material power will be turned against them.

"People of Lithuania, be brave, be patient.

"Each day that passes brings your country closer to inevitable independence."

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Speaker, I am happy to have this opportunity of joining with the distinguished gentleman from Indiana [Mr. MADDEN] in giving expression to my affection for the noble people of Lithuania. As chairman of the special congressional committee investigating the Katyn Forest massacre, the gentleman from Indiana performed one of the most prodigious and far-reaching missions in the history of the Congress of the United States. More than any one man in our times was he responsible for bringing into the daylight, where all the world could see, the dastardly deeds of savage tyranny. Today the name of Madden is a household word mentioned in affection and in reverence wherever, both in our own country and in foreign lands, men and women and children of the blood of Lithuania, Poland, and the other enslaved nations now reside. The great service that the statesman from Indiana has rendered in this field is shared by all in Congress since it was by the unanimous vote of this body that the special committee headed by Mr. MADDEN was created. I want to take this occasion to say publicly that which is in all our minds, the gentleman from Indiana by the masterful and courageous manner in which he performed his mission as chairman of the Katyn Committee has brought honor upon all of us who go to make up the membership of the Congress of the United States.

I am glad, too, that joining with the gentleman from Indiana in these observances of today is the gentleman from Illinois [Mr. MURRAY] who represents the district in the city of Chicago in which reside more persons of Lithuanian blood and descent than in any other district in the great metropolis of Chicago. Congressman MURRAY's devotion to the cause of a free Lithuania is so well known among the Lithuanian-American population of Chicago that on Sunday last he was summoned back to his district to be the featured speaker at a monster mass meeting celebrating the Lithuanian Independence Day.

Mr. Speaker, it is good not only for the cause of a free Lithuania, for the cause of a free Poland, for the sacred cause of bringing freedom to all the lands now enslaved, but it also is good and heartening to all those in these United States regardless of the countries from which our forebearers came that we have in the Congress of the United States such men as the gentleman from Indiana [Mr. MADDEN], and the gentleman from Illinois [Mr. MURRAY].

This is the 37th anniversary of the independence of Lithuania. What did the Lithuanians accomplish during the brief period in which they were their own masters and the government of Lithuania was of, for, and by the people of Lithuania? Let me give you a few figures: In two decades when Lithuania was free the number of primary schools was increased from 677 to 2696. There were constructed over 100 secondary schools, including 2 years of college; and 4,000 advanced students were enrolled at the great university at Kaunas. Every city in Lithuania of more than 5,000 population supported opera seasons with the world's great operas, many of them translated into Lithuanian, given under conditions making it possible for all who so desired to attend. Everywhere there were special schools for music, art, and ballet. Industry and commerce reached peaks never before attained in a country of a population of not many more than 3 million. Practically everyone owned

his own home or his own farm. This is the record made in 22 years when the people of Lithuania were free and the government of Lithuania was of, for, and by the people of Lithuania. No people in all the history of the world ever made a record surpassing that of the people of Lithuania when Lithuania was free.

There is something in the Lithuanian blood that will not tolerate injustice and that can withstand the most savage inroads of tyranny. The source of the spirit of freedom that is in the Lithuanian people goes back many, many years. It was 1,500 years before the birth of Christ that the Lithuanians came to settle themselves in Europe. It is said that the origin of the Lithuanian race is lost in the mists of time. Probably it came from the Himalayan Mountains of north India, one of the tribes belonging to the Aryan group of thousands of years ago. The settlement of Lithuanians in Europe was on the rolling plains along the shores of the Baltic Sea, a land of rich and fertile earth, heavily forested, and with wide rivers and many lakes. In modern times, it is described as a heart-shaped land of 33,000 square miles, lying between Russia and Germany, like a walnut in the jaws of a nutcracker.

From 1500 B. C. to this year of A. D. 1955 the Lithuanians have been a vital force for freedom in Europe and their descendents now numbering over a million who came to the United States of America have in this land of ours been a vital force for freedom.

When Tatar hordes swept out of the East, their objective being the overwhelming of Europe, the Lithuanians rallied to beat back the invaders. When to the west the Huns and other Germanic tribes came with fresh threats, again the Lithuanian people rallied and beat back the invading hordes.

In the first centuries after the birth of Christ, the worship of the Lithuanians was that of a pagan mythology. Perkunas was the god of thunder and lightning, Zemininkas the god of earth, and Vieshpats the god of life. Then came Christianity. One of the first of a long line of powerful Lithuanian leaders was King Mindaugas, who succeeded in gathering the other Lithuanian dukes under his banner and who 700 years ago was crowned King of Lithuania. For three centuries the unconquerable legions of Lithuania held the balance of power in eastern Europe. The word of the Lithuanian was law through much of what is now Poland and Germany and beyond Moscow in Russia.

In 1572, the Polish throne was given up and in 1795 the country was overwhelmed by the legions of Russia. There followed the tide of diplomatic intrigue, the Napoleonic wars and the oppression of the czars. Always did the Lithuanians refuse to accept their conquerors. Three times in the 19th century they rose and revolted against overwhelming odds. Again at the dawning of the 20th century they revolted, their spirit still beyond the power of tyranny to crush. Loyal freedom-loving Lithuanians were torn from their homes and thrown in the hell-holes of Siberia, but no power, no torture could quench their spirit.

Then in 1918 freedom came again to Lithuania. Again she was free to form her own government and take her place in the family of nations. In the 22 years of Lithuanian independence a record was written in successful self-government of which any people could be proud.

Today again Lithuania is in the enslavement of a brutal tyrant but the spirit of freedom, which centuries of oppression has never succeeded in crushing, lives on among the people of Lithuania.

On this anniversary day I join with my colleagues in the House of Representatives of the Congress of the United States in sending across the seas to the enslaved people of Lithuania this message:

Be not discouraged, be not down-hearted. The night may be long and dark but the sun of the morning is soon to break upon you, your homes, and your land. We shall not fail you.

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. DONOHUE].

Mr. DONOHUE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DONOHUE. Mr. Speaker, I am very glad to join with my fellow Representatives here today in paying tribute to the great people of Lithuania and our own Lithuanian-Americans who are celebrating the 37th anniversary of Lithuania's independence.

Thirty-seven years ago, Lithuania stood forth as an independent, democratic republic with a happy, prosperous people who faced the future with confidence in their destiny.

In this year of 1955, our observance here is, unfortunately, shaded with sorrow. The bright star of Lithuania's freedom has been clouded over by the violent storms of tyranny. We gaze with sadness upon the advancing tragedy of sacrifice to ruthless imperialism that has enveloped Lithuania; she has ceased to be an independent nation.

Hundreds of thousands of good Lithuanians have been torn from their families and their homes for service as slaves in Siberia. It is slave labor that the Kremlin is using to equip Russia for further expansion, for further despotism, for further persecution, and, perhaps, even for war, and a substantial part of the slave force has been kidnaped from Lithuania.

The case of Lithuania, and the other small nations, is a challenge to the moral conscience of this Nation and the United Nations to establish the great, basic principles of freedom and liberty for all peoples.

In simple justice, our Government must insist that the Lithuanian people be permitted their inalienable right to govern their internal existence as they themselves see fit.

We must dedicate ourselves today to the continuing revelation and presentation—to the world—of the facts and truth about Lithuania, so that the United Nations shall accept the full moral and humanitarian responsibility of restoring the independence of Lithuania. May God grant that this will be accomplished within the year.

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from Michigan [Mr. RABAUT].

Mr. RABAUT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. RABAUT. Mr. Speaker, today Americans of Lithuanian descent or origin, and Lithuanians all over the world, celebrate the anniversary of Lithuania's independence, which was proclaimed 37 years ago. But there is no celebration in the homeland, except perhaps clandestinely, for Lithuania has fallen a victim to the expansive thrust of Soviet Russian imperialism. This ancient and proud land, once a powerful kingdom, and between the 2 world wars a self-supporting, progressive, and enlightened republic, was occupied and betrayed by the Russian dictatorship during the period of Nazi-Soviet collaboration. There followed 3 years of harsh German occupation, and then the Soviet yoke, under which Lithuania still languishes, was again imposed.

But Lithuanians have never ceased resisting their Russian oppressors, and the United States has never recognized this cynical Russian absorption of a friendly smaller nation. Today the Russians have established a military zone for 50 kilometers inland from the coast of Lithuania, in an effort to terrorize the people into compliance, and to seal off the escape of Lithuanians who will not live under dictatorship. They have deported thousands, and they have liquidated thousands. They have despoiled property owners, they have persecuted religious believers, and they have subjected the Lithuanian people to incessant propaganda and political oppression.

But terror and brainwashing have thus far failed. The Lithuanian people are no more ready today to accept Russian tyranny than they ever were. Their example can serve as an inspiration to those other unwilling peoples who groan under Soviet servitude, and an object lesson in fortitude and courage to those of us fortunate enough to be free.

Mr. MADDEN. Mr. Speaker, I yield to the gentleman from New Jersey [Mr. RODINO].

THE BASIC PRINCIPLES OF THE LITHUANIAN DECLARATION OF INDEPENDENCE

Mr. RODINO. Mr. Speaker, in the Lithuanian declaration of independence of February 16, 1918, three important principles are clearly established. In the first place, the declaration called for "the reestablishment of an independent Lithuanian state." Secondly, the declaration made it clear that this new state was to be founded on a democratic base. And, finally, the declaration proclaimed "the abolition of all political ties which have existed with other peoples."

In 1918 Lithuania reclaimed for herself the status of a nation-state as a right

based not only upon the democratic principle of self-determination of peoples but also upon historical fact. Centuries before the period of Russian domination Lithuania was an independent state and at one time had an empire stretching from the Baltic to the Black Sea. Thus, when Lithuania declared her independence in 1918, she could point to a glorious historical past as substantial evidence of her right to national independence.

Moreover, the new Lithuanian state was to be founded on a democratic base. During the period of independence the Lithuanian people, despite some internal difficulties, maintained a high regard for not only the forms but also the ideals of democracy and endeavored to put into practice these forms and ideals.

Finally, by their declaration of independence the Lithuanians cut all the ties that bound them to the Russian Empire. Significant is the fact that the Soviet Russian Government recognized the independent status of Lithuania in the treaty of peace July 12, 1920, and, moreover, pledged its word in this treaty and in subsequent engagements to respect the territorial integrity and national independence of Lithuania.

The pledged word of Soviet Russia, the Lithuanian people found, could not be relied upon. For in June 1940 the Soviets broke every treaty engagement they concluded with Lithuania with utter disregard for international law. As a consequence, Lithuania lost her cherished independence; the democratic base of the Lithuanian state was replaced by Soviet totalitarianism; and finally, the ties that Lithuania had cut loose and denounced in February 1918 reenveloped her, reducing the Lithuanian people to the most abject servitude.

On this 37th anniversary of Lithuanian independence the free world takes notice of the gravity of Soviet aggression and Soviet oppression in Lithuania. In the case of Lithuania the free world sees Soviet imperialism in its most outrageous form. Today the Lithuanian people are held in the grip of the greatest tyranny of modern times. For these courageous, but unfortunate people, all the free world raises its voice in a common plaint of righteous indignation. It is problematical what the future has in store for Lithuania; but of one thing the Lithuanian people can be sure: They have the sympathy and good will of all the free world.

Mr. MARTIN. Mr. Speaker, I arise to salute the spirit of courage and hope exemplified by the people of Lithuania, who have vowed that some day they will be free again. Today marks the 37th anniversary of Lithuanian independence. It is appropriate that we should take occasion on this anniversary to observe that, while the people of Lithuania may be enslaved physically by the Communists, the Soviets have never succeeded in imprisoning their souls. They have never succeeded in destroying their determination to regain their freedom.

It has been well said that the Russians are in possession of satellite governments, but they are not in possession of satellite peoples. Therein lies the fatal chink in the Communist armor. As long as the fires of freedom burn in human hearts, as long as the passion for escape from the Soviet yoke lives in the souls of the oppressed, Communist dictatorship is in peril.

No European people better demonstrate the determination to be rid of Communist oppression than the Lithuanians. These people want their freedom. They are entitled to it. The annexation of Lithuania by Soviet Russia should not be recognized by the free world.

Soviet attempts to beat the Lithuanian spirit into line have been miserable failures. They have failed in spite of continuing deportations under the guise of volunteering for labor elsewhere; collectivization and slave labor camps. Not even wholesale murder of resistant groups has beaten Lithuania into spiritual submission. Nor will it do so, because these are people who treasure freedom more than life itself.

As one who assisted materially in the passage of the Baltic resolution through the House 2 years ago, I express my appreciation of the fine work it accomplished. It exposed for all to see the oppressive spirit that the Soviets displayed to the Baltic States.

The people in Lithuania, suffering under the heel of Communist oppression, are unable to fittingly observe this anniversary of Lithuanian independence.

They must know in their hearts, however, that the more than 1 million Americans of Lithuanian descent in this free land are observing what their forebears are denied under the ruthless Soviet dictatorship.

And as they express renewed determination and hope that the land of their fathers shall eventually be free again, they must be comforted by the knowledge that their aspirations are shared by the great masses of the people of America, and, indeed, by freedom-loving souls everywhere in the world.

Mr. KEATING. Mr. Speaker, 37 years ago, on February 16, 1918, the people of Lithuania joined to establish an independent republic for themselves. Today that republic lives only in the hearts of those who have survived the crushing oppressions of enslavement by the Communists, and in the firm resolve of the sons of Lithuania, and her many friends, in other parts of the world. But it is a living thing nonetheless, and on this anniversary it is fitting for us once again to assure the Russian conqueror that the cruel distortions he has wrought upon the face of Europe will not be forever tolerated by the community of free men.

The history of these small and peaceable nations that were launched so confidently in the aftermath of World War I is fraught with great tragedy. They were innocent victims, caught from the very outset in the middle between wicked forces which they could not hope to withstand. They have been the victims of every tyranny that has emerged around them.

Mr. Speaker, we are the great Nation which has never gobbled up a small neighbor or ally. We have stood resolutely for the principal of self-determination for all peoples, for the proposition that all men are created equal. It is important that we keep affirming this principle, and that we miss no chance to demonstrate that we have not forgotten our friends who are enslaved by the Communist monster at this moment. We shall never forget them. And we shall never waver from the high purposes and the great resolves which have made the United States of America a symbol of light and hope and liberty throughout the modern world.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their own remarks in the RECORD at this point regarding Lithuanian independence.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. HESELTON. Mr. Speaker, 37 years ago today the valiant peoples of Lithuania proclaimed their independence.

Within that period of time, they have twice been under the domination of ruthless invaders and even now they are struggling to throw off the cloak of tyranny imposed by the Soviets.

The indomitable spirit of this freedom-loving country will continue to survive, and I am confident Lithuania, together with the many other countries behind the Iron Curtain, will one day again live and work under her flag of freedom.

Mr. HOLTZMAN. Mr. Speaker, today marks the 37th anniversary of the establishment of Lithuania's freedom.

While it is not possible for the people of Lithuania to celebrate this occasion openly, many Lithuanians throughout the free world, and Americans of Lithuanian descent will observe the anniversary of that independence day. In publicly honoring this anniversary we give renewed hope and determination to those now enslaved and deprived of their fundamental rights and liberties.

Human dignity can be suppressed for so long, but the spirit of freedom still burns behind the Iron Curtain, and the quiet force of resistance is at work awaiting the day when Communist domination can be swept from the face of the earth.

Lithuania's history indicates that she has endured aggression and domination before, and has survived her conquerors. Soviet tyranny cannot outlive the desire of the Lithuanians to be free, and the day is not far distant when the cause of justice will triumph over the forces of oppression and terror, and Lithuania will be numbered once more among the family of free nations.

We in the United States treasure our independence and recall the bitter obstacles which had to be overcome before we could establish ourselves as a free Nation.

We feel that Lithuania is entitled to self-determination and with continued fortitude and patience will reestablish herself as the free and independent Republic of Lithuania.

Mr. KLEIN. Mr. Speaker, under leave to extend my remarks, I include herewith a message sent to the Lithuanian Ameri-

can Information Center upon the occasion of the 37th anniversary of Lithuanian independence:

I am glad to join with my colleagues in Congress to send greetings to you on the anniversary of Lithuanian independence.

Freedom is indivisible. No man can be truly free unless his fellowmen are equally so. Out of this awareness we Americans who, by the grace of God enjoy the benefits of freedom, must express our warmest sympathy for those deprived of that blessing and extend our hope that this deprivation will not, with God's help, long endure.

Mr. DODD. Mr. Speaker, I wish to commend the gentleman from Indiana [Mr. MADDEN] for having reserved this time today to mark the 37th anniversary of Lithuanian Independence Day.

I also congratulate the gentleman from Indiana for the splendid statement which he has made.

Last Sunday it was my high privilege to address the Lithuanian-American Council of Greater New York and I ask that my remarks on that occasion be included at this point in the RECORD.

I should also like to have included in the RECORD at this point, a splendid address delivered by the Honorable Jonas Budrys, the Consul General of Lithuania, who also spoke in New York last Sunday before the Lithuanian-American Council of Greater New York:

We are meeting this Sunday to celebrate the 37th anniversary of Lithuania's independence day—which actually occurs this coming Wednesday, on February 16.

It is one of the saddest commentaries of our time that this anniversary of the establishment of the Lithuanian Republic is being celebrated only in the free world, outside of Lithuania. Inside the stricken land to which our thoughts are turned this week, independence day can be celebrated only secretly, and only in the hearts of the brave people who still continue to endure the black night of slavery which has befallen all who exist behind the Iron Curtain.

So, this is not a day for celebrating; this is a day for remembering.

It is now 15 years that the survivors of the Lithuanian people have endured the Soviet aggression that robbed them of their freedom. It moves me to wonder how many of them today—after a decade and a half—are remembering with us that this is an anniversary of independence day, that this was the day for which the Lithuanian people had yearned and dreamed and fought for 120 years under Czarist Russian oppression. Or, do they only remember it today as a lost and beautiful dream of long ago?

Where are the Lithuanian people behind the Iron Curtain today? A few months ago, those of us who were in Europe with the House Committee on Communist Aggression heard the answer from a lady who escaped to freedom just 12 months ago.

From the cities and large towns of Lithuania, she told us, Lithuanian names and Lithuanian faces have largely disappeared. In the farming areas, Lithuanian faces are still a majority, but a dwindling one as the deportations continue. It almost can be said that Lithuania is no longer Lithuanian.

If you would find the Lithuanian people today you would have to seek all over the vastnesses of Siberia and central Asia to which those who lived have been deported.

Why this genocide of the Lithuanian nation? Why this inhuman deed against humanity? Compare the map of 1940 with the map of 1950, and in the changes you will see how close the Soviet Union already is to its goal of turning the Baltic Sea into a Soviet lake.

This was a dream the Czars of Russia also had—to turn the Baltic into a domestic lake. This lay behind the Russian invasion and conquest of Lithuania 155 years ago.

But as long as the Lithuanian people remained on Lithuanian soil, the dream of the Russian Czars was frustrated. They could not Russify the Lithuanian people, and so the Russian Czars could never feel secure in their toehold on the Baltic Sea.

But the Soviet Communists knew a brutal answer to the stubborn love of the Lithuanian people for their soil, their nation, their language, and their culture.

That brutal answer was made 15 years ago by NKVD Gen. Ivan Serov, who issued the infamous Serov order which deported hundreds of thousands of Lithuanians from their homes and native soil and dispersed them all over the wastes of Siberia.

A few days ago the name of Serov was heard again as another struggle for power convulsed the snake pit in the Kremlin. The same Serov, having succeeded the late and unlamented Beria as head of the Soviet secret police system, has now emerged as the close henchman of Khrushchev, the new Communist tyrant, and today Serov stands as one of the top less than half a dozen masters over the hundreds of millions who live today under the Communist yoke.

Fifteen years ago the world was too preoccupied with other troubles to take note of the words of an obscure Soviet emissary to occupied Lithuania—a certain Professor Kirsanov who told Lithuania's intellectuals to give up their resistance and submit to the Soviet Union.

Professor Kirsanov's words, which live today in the evidence gathered by our recent Congressional Committee on Communist Aggression, should have been heard and heeded by the whole world. For this is what he said:

"Peter the Great was the first monarch who understood the interests of Russia: to occupy the Baltic countries and to come nearer to the Atlantic Ocean. Some people may call the Soviet Union an imperialist country. Yes, we are the vanguard of the proletariat and in this sense imperialists. But destiny or by its spirit the peoples of the Soviet Union are marching by way of revolution and communism in order to save the world. The Baltic countries were occupied by force because they were not ripe for bolshevism, but we Bolsheviks, we shall not consider and we do not consider what means are to be used until every foot of land and every person is under the shadow of the red flag. The early and at the same time honorable incorporation of the Baltic peoples into the Soviet Union is not an accidental event but a logical consequence of the Communist-Bolshevik policy and its liberation of peoples. Drop your dream of liberation. The Soviet Union will march through the world even through ruins and fire."

Fifteen years ago this ominous cloud, the world thought, hovered only over the Baltic States. Today, the world knows that same ominous shadow hovers over the whole earth.

During the past week this ominous shadow, it seems to me, has grown more portentous. During the past week Malenkov, who succeeded Stalin, was stripped of his power and was succeeded in the real seat of power by Khrushchev, the first secretary of the Soviet Communist Party—the position, it should be remembered, from which Stalin also rose to the pinnacle of power.

The heresy which apparently tripped Malenkov was the policy he advocated of building up the consumer goods industries of the Soviet Union so as to enable him to give more material satisfactions to the people behind the Iron Curtain.

To those of us who had heard witnesses by the hundreds testify before our congressional Committee on Communist Aggression last year and who, thereby, had learned of the widespread spirit of disaffection that exists everywhere behind the Iron Curtain, Malenkov's policy of bringing more material satisfactions to the people was most meaningful.

It meant, obviously, an effort to woo and win the subject peoples under the Communist heel. This might have promised an amelioration of the suffering for the people who today must live under that Communist heel. And it even might have meant a long period of peace in the world.

But this policy has now been rejected. The demotion of Malenkov and the elevation of Khrushchev means that the soulless fanaticism of the Communist Party has emerged triumphant again.

For the people behind the Iron Curtain it means that they must go hungry, ill shod and ill housed again while the heavy industry that produces the weapons of war is given priority. And for the people of the free world it means they must continue to live under the Damoclean sword of Communist aggression. It means that the echo of the words of Professor Kirsanov, as he spoke them 15 years ago in the Lithuanian capital city of Kaunas, rings louder even than the day he spoke them.

We must remember his words in this sentence: "Some people may call the Soviet Union an imperialist country. Yes, we are the vanguard of the proletariat and in this sense imperialists."

And we must remember his words in still another sentence: "The Soviet Union will march through the world even through ruins and fire."

In these words reigns incarnate the real spirit of Communist fanaticism, from which has germinated as one of the flowers of evil Soviet imperialism and Communist aggression.

Had the world taken deeper heed of the experience of Lithuania 15 years ago, had the world listened and understood the words I have just quoted to you, think how much better off the free world might have been today. And there is still much the world can learn from the tragic experience of Lithuania.

As I said before, this anniversary of Lithuanian Independence Day is not so much a time for celebration as it is a time for remembering.

Let us remember these facts; that:

Lithuania was occupied by the Soviet Army upon the expiration of a 9-hour ultimatum on June 15, 1940.

Faced with an alternative of either opposing the unprovoked Russian aggression or of salvaging the vestiges of independence by accepting the ultimatum, the Lithuanian Government elected to attempt a full-scale collaboration with Russia, still being hopeful that the Kremlin would respect at least some of its solemnly pronounced international obligations.

In taking this line of action, the Lithuanian Government was fully aware that any armed resistance against the overwhelmingly stronger Red army would only lead, sooner or later, to an internment of the Lithuanian army in East Prussia and its surrender into protective custody of Nazi Germany—a perspective which Lithuania regarded with even greater dread.

In scarcely more than a month, Moscow once more turned Lithuania into a Russian province.

And the United States, first among the free nations of the earth, uttered the words of which every American can be proud today. The statement was made by Acting Secretary of State Sumner Welles, and he said:

"During these past few days the devious processes whereunder the political independence and territorial integrity of the three small republics—Lithuania, Latvia, and Estonia—were to be deliberately annihilated by one of their more powerful neighbors,

have been rapidly drawing to their conclusion.

"From the day when the peoples of these republics first gained their independent and democratic form of government, the people of the United States have watched their admirable progress in self-government with deep and sympathetic interest.

"The policy of this Government is universally known.

"The people of the United States are opposed to predatory activities, no matter whether they are carried on by the use of force or by the threat of force.

"They are likewise opposed to any form of intervention on the part of one state, however powerful, in the domestic concerns of any other sovereign state, however weak.

"These principles constitute the very foundations upon which the existing relationship between the 21 sovereign republics of the New World rests.

"The United States will continue to stand by these principles, because of the conviction of the American people that unless the doctrine in which these principles are inherent once again governs the relationship between nations, the rule of reason, of justice and of law—in other words, the basis of modern civilization itself—cannot be preserved."

And I say to you that we cannot do better than to repeat these solemn and ringing words of Sumner Welles today as expressing the unchanging and unshakeable position of the American people.

ADDRESS BY JONAS BUDRYS, CONSUL GENERAL OF LITHUANIA, AT A GATHERING COMMEMORATING THE 37TH ANNIVERSARY OF THE PROCLAMATION OF LITHUANIAN INDEPENDENCE, WEBSTER HALL, NEW YORK., SUNDAY, FEBRUARY 13, 1955

Once again, we have come to our most important and meaningful national day, and we commemorate it solemnly. For 22 years, this was a carefree holiday, the day of your deepest joy.

Our happiness was justified; each year, our Lithuania had grown more beautiful, more endowed in all the attributes that make a nation rich. Our future course always seemed easier, and the pace of progress to be accelerating. Easier because, each year, we gained several tens of thousands of new workers, idealistic and patriotic, deeply devoted to their country and determined to apply their newly acquired education and all their skills in her cause. These workers were not simple drudges; through their awareness of their goal, their creative energy, the faces of our cities and villages transformed themselves with astonishing rapidity, and our nation began to flourish.

Now it has been almost 15 years since our Lithuania was enslaved, but the Lituanian world has not stopped commemorating the 16th day of February. In Lithuania, in the mines and on the taigas of Siberia, Lithuanians mark it in their hearts. The free world, and we, the Free Lithuanians, are their hope and aspiration.

Lithuania is an old nation; possessed of a great past—a cultured nation, with a free history of over 700 years, entitled to Europe's credit for her defense against the Tatars; a nation which has demonstrated her quality of mind in sheltering within herself the refugees from neighboring oppression, in having provided haven for persecuted Jews from Europe's farthest reaches, and in having given these people not only homes but land and occupations.

When Lithuania once again returned to the fellowship of free nations, she warmly cooperated with other nations, fulfilled her duties, honored her treaties, and met her obligations.

Can such a nation, such a people, in this age, be permitted by the free world to disappear—to be cruelly exterminated?

The free world is ruled by justice. Does not the simple security of the free world demand the liberation and return to Western Europe, where they belong, of all the independent nations possessed of western culture and civilization? Nations which, from the Baltic to the Adriatic, have fallen into the captivity of the twentieth century Khans?

What of the hopes that suffering Lithuania places in us, Lithuanians, who are free? Do we not have debts, obligations, and duties toward our brothers and sisters? Our duty is not only to boast of and hearten ourselves with our great past, but to demonstrate, with our works and our lives, that that past is still, today, a fit measure of our nation's worth. Scattered through all the continents, it is the duty of Lithuanians to speak to the world of suffering Lithuanians.

The majority of those of us who are refugees from oppressed Lithuania have graduated from or availed themselves of the education provided by Lithuania's schools. Free Lithuania encouraged education, gave it to all who sought it, and even provided for finished educations abroad. He to whom much has been given has also incurred an obligation, and it is good to see that our people understand this, and follow the course of their duties.

This is why, even now, the 16th of February retains its meaning, and its commemoration continues to hold a grave purpose. Through today's observance, we express our solidarity with oppressed Lithuania, we strengthen our will and her will to be faithful to the ideals of the 16th of February, we swear to keep vigil over and fight for our homeland's liberation, and we hold the sacred hope that Lithuania shall be free.

On this occasion, the Minister of Lithuania to the United States, Povilas Zadeikis, conveys his sincere greetings to all of you assembled here.

Mr. LESINSKI. Mr. Speaker, this is the 37th anniversary of Lithuanian independence. As an American of Polish descent, I know something of the history of the Lithuanian people, since it ties in so closely with the history of its neighbor, Poland. This is particularly true about the time the Jagiello dynasty started in Poland.

The people of both of these great nations are well known for their love of freedom. As days go by, we read in the papers of a flier escaping from Poland, families leaving Lithuania in small boats to cross the treacherous seas, to get away from Communist oppression.

Time and again the people of Lithuania, as those of Poland, have had to face and resist invaders from other countries. Their homes have been destroyed, their families separated, churches desecrated, farms devastated by barbaric hordes. Today is no exception. Today Lithuania suffers under the heel of Soviet tyranny. Lithuania has become a vast concentration camp for its liberty-loving but helpless inhabitants. Thousands of its people have been deported to distant areas of the Soviet Union. All means are being used to destroy the will and love of freedom of the Lithuanian people. I know these people, however. They will not let this happen, for they love their liberty above all other values.

We who are familiar with the plight of the people behind the Iron Curtain should do all we can to bring their plight before the other peoples of the world. There are many who do not want to believe possible all that is going on behind the Iron Curtain. To show these people just what is occurring, the Kersten committee should be revived. This committee should investigate the Communist occupation of all nations in Europe. This is one way in which we can fight the Soviet Union and expose the methods of genocide that they are practicing in the occupied countries. What the modern day needs is to be shocked into the realization that the tactics of Attilla the Hun have become the common order of the day in the story of these nations.

In celebrating the 37th anniversary of Lithuanian independence, we are showing those people that we aim to keep alive their hopes for freedom. We know that they will continue to resist in every practicable way at their disposal and with courage and fortitude the ones who would enslave them. I know they will, and can, survive, and their will to be free will, in the end, overcome the guns and tanks of the oppressors.

I can assure you that all of us who are aware of what these great people are suffering are thinking of them, and our prayers are going out to them.

Mrs. BUCHANAN. Mr. Speaker, I am very happy and proud to join my colleagues today in this commemoration of the 37th anniversary of the independence of Lithuania.

With their country still writhing under the heel of the oppressor, the people of Lithuania commemorate today with all the fortitude and hope of that ancient land the 37th anniversary of their declaration of independence.

On February 16, 1918, the Lithuanian National Council—Taryba—in consultation with American Lithuanians, proclaimed their country to be free and independent.

It has been said that down through the centuries the Russians have been to other countries of Eastern Europe something like a locust plague that would always return from time to time. In 1940 the locusts returned to the fair land of Lithuania but with a far greater capacity and skill in oppression. Through the use of the purge and mass deportations the Russian commissars have done their best to accomplish their mission from the Kremlin. But they have failed to conquer the spirit of freedom that has been nurtured for centuries by the Lithuanian people. The sad years of Communist domination have confirmed what the world has long known about the indomitable spirit and faith of this ancient people.

Russian occupied and oppressed Lithuania has given America more than a million sons and daughters of the best stock of her nation. I have seen how they have helped to build America's industrial might in the great arsenal of democracy in the Pittsburgh area. They have made important contributions to the cultural, civic and professional life of the community.

Let us look forward to the day when Lithuania will once again be free and we will celebrate as well as commemorate the anniversaries of her independence.

Mr. ADDONIZIO. Mr. Speaker, on this 37th anniversary of Lithuanian independence our hearts go out to the persecuted Lithuanian people. On this oc-

casion I would like to focus attention upon one phase of the persecution which they have endured since the forced annexation of their country by the Soviet Union during the war—and that is the persecution of religion. Since the Red army occupied Lithuania in a ruthless and calculating manner the Soviet authorities have persistently carried on a campaign to destroy religion, to wipe out every manifestation of it, and to transplant in its stead the atheistic, materialistic philosophy of communism.

Lithuania, a nation rich in religious traditions, prior to the Soviet annexation was largely Roman Catholic with over 80 percent of the population of nearly 3 million adhering to that faith. The remainder was comprised of Lithuanians professing the Lutheran, Jewish, and Greek Orthodox religions. Mindful of the need for a strong religious foundation to insure the moral and ethical vitality of the nation, the Lithuanian people had the wisdom to establish constitutional conditions conducive to the growth of a vigorous religious outlook. In independent Lithuania freedom of religion was guaranteed by the constitution. Religious groups were free to propagate their faith, conduct religious services, maintain places of public worship, and administer educational institutions. In 1927 a Concordat was concluded with the Vatican in which Lithuania established diplomatic relations with the Holy See.

Such was the wholesome religious atmosphere in Lithuania in the period following her declaration of independence. Such was the religious character of the Lithuanian nation. By constitutional guaranty, freedom of religion prevailed. In every way the practice of religion and its development within the nation were encouraged. Thus, the Lithuanian people were grounded in a strong and virile religious and moral ethic.

The Soviet conquests of Lithuania in 1940 and again in 1944 have threatened the heart and core of Lithuanian religious life. As a consequence of the corroding processes of Sovietization the soul of the Lithuanian nation has been exposed to the gravest peril.

Bishop Vincentas Brizgys, the former Roman Catholic Bishop of Kaunas and presently a resident of Chicago, has given a vivid account of the extent to which religion is persecuted within so-called Soviet Lithuania. On June 25, 1940, 10 days after the first Soviet occupation of Lithuania, Moscow abrogated the Concordat with Rome, and the Papal Nuncio was ordered to leave the country by August 25. Thus the Lithuanian link with the Vatican was broken and the Catholic Church was isolated. Shortly thereafter, Bishop Brizgys stated, all private hospitals, schools, kindergartens, charitable institutions, orphanages, and the like were seized and the personnel arrested by Soviet authorities. Furthermore, the religious press was suppressed within the first week of the occupation; and religious books and other printed matter were banned or destroyed. All seminaries were seized, and monasteries taken over. All bishops and chancery staffs were expelled from their residences. A drive commenced on the observance of religious feast days. And then on April 25, 1941, the teaching of religion was absolutely forbidden throughout the entire nation.

Probably the most ruthless measure taken by the Soviet authorities in their anti-religious drive was the attempt to liquidate the clergy. According to Bishop Brizgys, 150 Roman Catholic priests were arrested in Lithuania during the first Soviet occupation. Within 1 year 16 were killed and 6 have since been missing without a trace of their whereabouts. The remainder were liberated by the Lithuanian partisans when the Russo-German war began in June 1941.

When in 1944 Lithuania was again forceably brought into the Soviet Union, the Soviet military authorities displayed some toleration of religion while the war continued. After the war, however, anti-religious measures were again imposed with the same thoroughness and brutality as they were during the first occupation. Bishop Brizgys declared that during the first 2 years after the war 4 Lithuanian Catholic bishops and 89 Lithuanian priests were arrested, and subsequently many additional priests were arrested.

With unrelenting determination the Soviets have continued and even accelerated the process of Sovietization in Lithuania. Nor has the Communist attack been solely centered upon the largest religious group, the Roman Catholics. Communism is uniformly hostile in theory and practice to all religions. Only for tactical reasons does it sometimes differentiate between Protestants, Catholics, Jews, or members of the Orthodox church. In Lithuania all religious groups have felt the heavy hand of the Soviet oppressor.

On this 37th anniversary of the declaration of Lithuanian independence we of the free world ought to reflect for a moment upon this time of troubles which has come upon the Lithuanian people. The Lithuanians are a people in jeopardy; they are a people fighting for their identity as a nation; they are a people struggling to keep alive even a spark of their religious spirit.

To this great people, let us, therefore, extend our hand in a symbolic gesture of everlasting friendship; let us raise our voices with those who like ourselves seek justice for the oppressed; and let us join with all the free peoples of the world in prayerful supplication that the soul of Lithuania shall always remain unconquered by its ruthless oppressors.

Mr. GORDON. Mr. Speaker, not very long ago there flourished in the Baltic countries a modern democracy, Lithuania. It was a prosperous and vigorous industrial and agricultural country. Lithuania today does not enjoy that freedom.

This year, on February 16, will be the 37th anniversary of her independence, and nearly 1 million Americans of Lithuanian descent will hold commemorative services of the tragic plight. Today the enslaved people of this nation are pleading to the free world for the restoration of their freedom and the removal of the shackles of the communistic rulers.

At Vilna on February 16, 1918, after over a century of domination by the Russian czars, the independent Republic of Lithuania took its rightful place in the family of free nations, a place it enjoyed for 22 years until, with the advent of World War II, Lithuania was overrun by, in turn, Russian and Nazi aggressors. And in 1940 the Soviet Union began the systematic program, which we have come to recognize all too well—planned starvation, collectivization, and physical enslavement, which program continues to the present day.

The tightly guarded borders permit no chance of escape, or bring to the free world what deplorable conditions those gallant people must bear. Word has come from returning German war prisoners that annihilation of Lithuania is still going on, also the many deportations which began in 1941. The Communists have invented youth volunteer battalions to dispose of unwanted people and many are shipped to deep Siberia.

The so-called Communist land reform, the kolkhozes—theoretically peasant-owned farm operatives—now have been changed into Government-operated farms, or sovkhozes, consisting of from 2,500 to 12,000 acres each. The land is now 100-percent collectivized.

There are many more women than men employed in agriculture. For instance, on 1 kolkhoz consisting of 10,000 acres, there are about 500 women and about 200 men, most of them old. All the young men are recruited into the army, and after their service never seem to return to the kolkhozes.

Through social and material oppression, the peasant class has become the lowest in the country. They are hungry. All they produce they must give to the Government. Their own pay keeps them on the brink of starvation. All the farm produce goes to Russia, primarily to the Leningrad region, and the one-time very high production of farming in Lithuania has dropped more than 50 percent. Collectivization of the land, lack of interest, and deportations are the main reasons for agricultural disaster.

As the time passes, the Russian language becomes practically the official language of Lithuania. The youth is pressed to join the Communist youth and pioneer organizations, and there is intensive indoctrination of the youth through the schools. There are many special ideological schools for selected students; for instance, in 1 region with a peasant population of about 30,000, the Communists this autumn opened 9 political schools with 500 pupils.

The commissars and other high officials for almost every institution in Lithuania come from Russia.

The history of this brave and gallant little nation is written in the blood of its valiant patriots whose only desire was for freedom and independence and never reaching out to grab or annex neighboring territories. Today the same spirit of sacrifice is a dominant characteristic of the Lithuanian people.

It is a proud privilege that I can freely stand before you in this House of Representatives and join with you in saluting the Lithuanian people on their national independence day, and I pray that

it will not be too long before peace and freedom will be restored to Lithuania and the countries behind the Iron Curtain.

Mr. SADLAK. Mr. Speaker, it is a year since last we met in this Chamber to commemorate an anniversary of Lithuanian independence. For all of us the year has passed altogether too rapidly—vanished into history. But for the men and women and children of Lithuania, it was a lifetime, an eternity of continued oppression under the heels of Communist invaders and rulers. There has been the watchful waiting for a break, as we Americans term developments along life's path as also in games and in politics. But the break has not appeared. If anything, the newest changes in the Kremlin will increase their anxiety and more hopefully will this God-fearing nation look to us for succor. I join with my colleagues today that a break, a changed attitude of promised independence and freedom, may somewhere be found and the Lithuanian people and their neighbors, the Poles, Estonians, and Latvians, may observe the next anniversary under better circumstances, under lessened hardships and encouraged hope that freedom and independence can again be realized.

Mr. GARMATZ. Mr. Speaker, as it has done each year in the past, the Council of Lithuanian Societies of Baltimore again celebrated the anniversary of Lithuanian independence. This year, the 37th anniversary, was celebrated several days early—February 12—at Lithuanian Hall in Baltimore, and it was my privilege to be present at the observance.

With their fellow citizens throughout the country, Baltimoreans of Lithuanian descent mourn the continued enslavement of the Lithuanian nation and yearn and pray for its early liberation from the yoke of its Communist oppressors.

The history of Lithuania is one of constant struggle for freedom against invading forces, in many of which they successfully defeated their enemies. Their history again proves that no nation can take its liberty and freedom for granted, but can maintain them only by constant vigilance and strong national defenses against enemies from within and without. During its periods of enslavement, the flame of freedom was never extinguished, but continued to burn brightly until the nation was again free and independent.

During the periods of liberty and freedom, the nation made great strides in its economic, educational and cultural growth, and we, in Baltimore, are grateful for the many civic and cultural contributions which its peoples have made to our city. This observance gives us an opportunity to pause and reflect on the suffering of the enslaved Lithuanians and to consider what we, with other free nations, can do to encourage them during this time of oppression, and to bring about their eventual liberation. It also gives us the opportunity to study ways and means of helping them by liberalizing our immigration laws, arranging to accept displaced persons, and investigating further the seizure of the Baltic States by the Soviet Government and the crimes committed against them by that Government.

Mr. Speaker, I will extend my remarks in the RECORD and include the speech made at the anniversary banquet in Baltimore by the Honorable J. Kajeckas, counselor of the Lithuanian Legation, a resolution adopted on that occasion, and a brief outline of Lithuanian history.

Mr. ZABLOCKI. Mr. Speaker, February 16 marks the 37th anniversary of the Lithuanian declaration of independence. This memorable anniversary has been observed year in and year out by the Lithuanian people, and by all Americans of Lithuanian descent. In this manner, they have kept a spark of hope burning in their hearts—the hope that the day will soon come when an independent Republic of Lithuania will once again assume its rightful place in the family of free nations.

It is only fitting that we, the Congress of the United States pause for a moment in our deliberations and express our admiration for the staunch faith and undaunted courage of the Lithuanian people who have been suffering so greatly under the ruthless Soviet occupation, but who, in spite of this totalitarian oppression, have maintained their spirit and their devotion to the principles of freedom and democracy.

Let us, on this occasion, bolster their hopes in the eventual realization of their aspiration to resume their existence as an independent republic. The conscience of the free world will not be at rest until liberty and justice shall reign over the lands which are today enveloped by the dark clouds of Communist totalitarianism. To this end, we shall continue to devote our efforts.

Mr. MACHROWICZ. Mr. Speaker, I wish to join with my colleagues to pay tribute to the gallant Lithuanian nation on the occasion of the 37th anniversary of the independence of that country. My experience on the special Katyn Massacre Committee, and subsequently on the Kersten Committee on Communist Aggression, has given me access to facts which give astounding testimony to the great love for liberty and freedom of the Lithuanian people, and of their brave resistance to Communist aggression.

Those who still believe in the possibility of peaceful coexistence with brutal Communist tyranny, and with a regime which has no respect for solemn agreements, should read carefully the testimony and evidence submitted to the congressional Committee on Communist Aggression. They will learn that the occupation of Lithuania by the Communists began with a peaceful coexistence which soon was replaced by armed occupation, murders, and mass deportations.

On this 37th anniversary of the independence of Lithuania let us look realistically upon the situation as it exists in the world today. Appeasement and acts of weakness on our part can only bring closer to our doors the menace of Communist occupation as it is known today in Lithuania. I join with my colleagues in paying tribute to the gallant Lithuanian nation and pray that we may have the wisdom and courage to face the future with faith and confidence in our ideals and in our way of life.

Mr. FRIEDEL. Mr. Speaker, several million Lithuanians—some in their homeland, others scattered throughout the world—are commemorating the anniversary of their national independence today, February 16. Many of them, because their government was seized in 1940 and because they are now in the tight grasp of the Soviet dictatorship, can celebrate it only quietly in their hearts. Others, although they can celebrate it freely, do so only with sadness, because they are exiles from their native country and, as such, are cruelly cut off from family and friends in their homeland.

Lithuania is so completely shut off from the free world by the Iron Curtain that it is difficult to obtain information about conditions there in recent years. It is known, however, that the Soviet system of collectivization and communization continues and that there has been deportation of large numbers of Lithuanians to remote parts of the Soviet Union.

Meanwhile, in our own country, there are many Americans of Lithuanian descent and friends of Lithuania who work constantly to let the captive peoples know that they are not forgotten and that we in America are not reconciled to their fate. Our own President and our own Congress have decried, in ringing words, the heavy despotism of the Soviet rule and have brought a renewal of hope to the Lithuanian captive people and their families and friends abroad. The 83d Congress created what was called the House Baltic Committee, which studied the origin, development, and seizure of the Baltic States. This committee heard numerous witnesses and discovered new evidence of the ruthlessness of the Red regime in Lithuania. In this and other ways the Congress is exposing the harshness of Red rule and is vigorously stimulating men of good will to oppose the Communist tyranny.

The universal hope of all Lithuanians, in which we in America join, is that their small country will again be free and will again be able to pursue with renewed vigor and determination its democratic way of life. We congratulate loyal Lithuanians, in whatever part of the world they may be, on the steadfast spirit which has held them, month after month, and year after year, to the vision of a free homeland.

Mr. FALLON. Mr. Speaker, as we pay tribute to the Lithuanian people today I wish to include a message which I sent to Mary M. Kizis, director, Lithuanian American Information Center, 233 Broadway, New York 7, N. Y. The message follows:

Throughout the United States today, Americans of Lithuanian descent are celebrating the 37th anniversary of Lithuania's independence. On this occasion, I wish to extend warmest greetings and my very best wishes to the Lithuanians everywhere in their continued fight for freedom. Because of our common devotion to freedom and national independence, we in America feel a close tie with the people of Lithuania and are deeply sympathetic with them in their present distress. In the past I am grateful to have had the opportunity to express by

direct action by unwavering support of their cause and you and the members of your organization can depend upon my continued vigorous efforts and support of that legislation which will bring about liberalization of the Baltic Republics. I favor, and pledge my active assistance, in the setting up of a committee on Communist aggression when this matter comes before the House to investigate.

Mr. FEIGHAN. Mr. Speaker, today as we commemorate Lithuanian Independence Day, I think it is appropriate for us to make a short review of some of the findings of the Select House Committee To Investigate Communist Aggression of which I had the honor of being a member. For example in the third interim report of the committee which deals exclusively with the plight of the Baltic States, and which, therefore, has special application to Lithuania, the following two conclusions are reached:

First. The evidence is overwhelming and conclusive that Estonia, Latvia, and Lithuania were forcibly occupied and illegally annexed by the U. S. S. R. Any claims by the U. S. S. R. that the elections conducted by them in July 1940 were free and voluntary or that the resolutions adopted by the resulting parliaments petitioning for recognition as a Soviet Republic were legal are false and without foundation in fact.

Second. That the continued military and political occupation of Lithuania, Latvia, and Estonia by the U. S. S. R. is a major cause of the dangerous world tensions which now beset mankind and therefore constitutes a serious threat to the peace.

I should like to emphasize that the reason for the world tensions today and the increasing threat of war rests squarely with the continued occupation of the Baltic States by the Russians. These tensions will undoubtedly continue to increase until the Russians get out of the Baltic States and all the other nations which they now enslave.

I am more convinced today than ever before that Lithuania shall regain its national independence and that that happy day is not far distant. I say this because the fate of Lithuanian independence is irrevocably tied to the fundamentals of the crisis which now faces civilization. That crisis is best described as the conflict between the forces of freedom and the forces of human slavery, the outcome of which will determine whether the world itself shall be all free or all slave. It is not possible for any period of time for the world to survive as half free and half slave. One or other of the forces now engaged in conflict must win.

The cause of Lithuania is tied to the cause of all the other non-Russian nations enslaved by the Russian Communists. I speak not only of Estonia and Latvia, but I mean Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, Byelorussia, Ukraine, Georgia, Armenia, Azerbaijan, Turkestan, and all the other non-Russian nations now within the tyrannical grip of the Russian autocrats. It is inconceivable to me that we, the people of the free world, can turn our backs on the terrible inhumanities that are now taking place within the modern-day empire of the Russian Communists. If we do make the terrible error of deserting these people to a fate which is worse than death itself, we shall surely be punished and would eventually have to face up to the strong possibility that we, as a Nation, ourselves would be very shortly in the chains of Moscow. I am sure that we, as practical-minded Americans, as well as being a free people, motivated by the highest moral and political principles, will never be contented until all the nations enslaved by communism regain their national independence and their complete sovereignty.

The events which have happened in the Kremlin during the past few days clearly show the tremendous unrest within the empire of communism occasioned by the resistance of the enslaved people. It has been said that the master criminals of the Kremlin are sitting on a powder keg. I believe this is an understatement of the facts. In my opinion these tyrants are sitting on an explosive force many times more powerful than the hydrogen bomb. I speak of the tremendous spiritual force that is pent up in the enslaved millions; I speak of the tremendous political force which is represented by the healthy nationalism which these millions of enslaved people represent. I speak of the explosive human force which is represented by the enslaved non-Russian nations and their people. This is the real powder keg within the empire of the Russian Communists. The masters of the Kremlin cannot get themselves off this powder keg and it is only a matter of time until it explodes in all its fury in the cause of human freedom.

I believe the time was never more opportune nor the situation more demanding for an all-out political offensive against the conspiracy of communism by the people of the free world. Such a political offensive, in my considered judgment, is the only course of action which gives reasonable hope of avoiding world war III. All of us seek the common goal of peace and freedom and we must, therefore, do everything in our power to prevent all-out war while at the same time maintaining and strengthening the forces of freedom.

I join in the hope that we, as a nation, may soon launch a real crusade for freedom in the form of a positive political offensive against the Kremlin as the only way to bring about the liberation of all the non-Russian nations and to avoid world war III.

Mr. KELLEY of Pennsylvania. Mr. Speaker, I am sure that all the freedom-loving people of this world rejoice and weep over the plight of the Lithuanians—rejoice for their independence day and weep for their plight at this time.

It is one of the tragedies of modern time that Lithuania, among her sister countries, finds herself under the ruthless heel of one of the fiercest aggressors ever to curse the earth.

I am also sure that the American people feel as I.

Our only hope is that someday in the near future, by the intervention of divine providence, Lithuanians may enjoy again that freedom which is so close to their hearts.

Mr. VANIK. Mr. Speaker, I want to concur in the fine remarks of the gentleman from Indiana [Mr. MADDEN], the gentleman from Illinois [Mr. MURRAY], and the gentleman from Massachusetts [Mr. MCCORMACK].

The 3 million Lithuanians, the millions of Poles, Czechs, Slovaks, and Hungarians and others behind the Iron Curtain must draw some hope and confidence from what this Congress is saying and doing today.

I hope that our very serious problems in the Pacific do not distract and deter us in our effort to in a more substantial way help these entrapped peoples of Europe. Our most important product is our spirit of democracy. For it we must develop a stronger world market. The most effective market is among those peoples of the world who have sampled and loved its advantages and social benefits. Let us try in this Congress to do something more positive, something more concrete to restore democracy where it so fruitfully thrived.

Mr. FINO. Mr. Speaker, this is the 37th year since the people of Lithuania declared their independence of Russia. Unhappily, once again they are in the grip of the savage Russian bear. But his grip is not mortal. Throughout her history Lithuania has known foreign tyranny, and she has survived. The tenacity of her people, their devotion to their culture and way of life, has been truly remarkable.

In 1919, by their own efforts, the Lithuanians drove Russian invaders from their soil. The Soviet Government then recognized Lithuanian sovereignty and independence, and renounced all rights there. But in a pattern that was to become all too familiar they unscrupulously broke their word, invaded the country, and incorporated it into the Soviet Union as the 14th Soviet Republic. A short period of German rule then ensued, and then the Russians returned in 1944. Since that time the Soviets have confiscated private property, they have persecuted religion, they have deported thousands of Lithuanians to Siberia, and killed thousands more. But they have not broken the spirit of the Lithuanian people, nor their desire for freedom and independence. The people of Lithuania look with hope, and we join them in that hope, that the day will come when Lithuania will once again be free, and resume her rightful place among the nations of the world.

Mr. FORD. Mr. Speaker, today while Americans of Lithuanian origin are enjoying the pleasures and rights of a free society, their relatives and friends still living in the nation of their native rootage suffer under the leash of tyrannical communism. Approximately 5,000 miles, or 10 hours by modern jet time, separate those who exist in the little Baltic nation from those with similar national backgrounds living in the climate of free America.

Yet this separation of so few hours as judged by modern speeds is minute compared to the wide crevasse in their freedom and rights to live as men should. These people bearing the same nationality backgrounds, the same pride, ambitions and abilities which enable one to carve out the best life for himself and

those close to him are yet so far distant in opportunity and human liberty.

I think Lithuania, so small geographically yet so big in spiritual determination, symbolizes the struggle against oppressive bullies. This isn't the first time or the first nation so tenaciously picked on by one so drunk with power and ambitious with designs as Communist Russia. I hope and pray it will be the last.

Only the people of Lithuania know the burdens, the heartbreak and suffering which have been endured since Soviet Russia lowered the yoke of oppression on their shoulders. Their story is too long to forget and too solemn to lack inspiration. Let us hope that soon the great Lithuanian nation can again be restored to their rightful heritage of liberty and independence which was theirs 37 years ago.

I am happy to join those who today are sending their warmest regards and sincerest sympathy to those persons who through no fault of their own are not able to enjoy the fruits of individualism and independence.

Mr. PATTERSON. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following letter from Arvydas Kudirka, president, Waterbury chapter, of the Lithuanian Student Association:

LITHUANIAN STUDENT ASSOCIATION,
Waterbury, Conn., February 13, 1955.

Hon. JAMES T. PATTERSON,
Washington, D. C.

DEAR SIR: As you may know February 16, 1955, is the 37th anniversary of the Declaration of Independence of Lithuania.

The people of Lithuania have been fighting communism since 1917, when they had to defeat its new forces to establish a free country.

Again this fight in blood against communism was renewed when Russia occupied Lithuania in 1940. For 15 years now Lithuanians have been fighting the Red demon with blood and word and will continue to do so until the Red aggressor is destroyed. We all know that Communist goals are to destroy the free world and establish despotism throughout it.

We, therefore, join forces with the free world so that together we can defeat the evils of communism and again restore peace and freedom of our native country, Lithuania, and the world.

The Lithuanian students of Waterbury, Conn., would like to take this opportunity to thank you for all your past considerations you have given us and our native country Lithuania.

We would be very grateful if you would continue to remember us and our cause in the future.

Respectfully yours,

ARVYDAS KUDIRKA.

Mr. Speaker, I wish to take this occasion to say that any nation that has withstood for more than a century and a quarter continued foreign domination and oppression from a ruthless and tyrannical neighbor and still survive, certainly deserves the praise of mankind. Such praise Lithuania deserves; for in spite of the fact that Lithuania has been occupied and ruthlessly dominated by Imperial Russia and Soviet Russia for periods totaling over 125 years this nation still lives.

In many respects the Lithuanian people today are ruled by a far more ruthless master than in the days prior to the foundation of the Lithuanian nationality when it was relegated to an inferior status in the days of czarist Russia; but the suppression exercised by the czar might well be termed moderate when compared to the suppression imposed by the Soviets.

In this 20th century our language has taken on a new word "genocide," which means the willful destruction of a nation and people. Genocide is the long-range objective of the Soviet rulers; it is to destroy the Lithuanian nation. Deportations of thousands of Lithuanian people and the resettlement of Russians and other Soviet peoples in Lithuania have thus far done much to change the ethnic character not only of that country but also of the other Baltic States, Latvia and Estonia. As part of its scheme of communization Soviet Russia had laid down a plan calculated to eradicate the Lithuanian national consciousness. Along with their plan to destroy the idea of Lithuanian nationality, the Communists are seeking to remold this once free and happy country in the image of the Soviet State.

That Lithuania is going through an epoch of great trial goes without saying. But the Lithuanian nation is a virile nation. It is a nation with a glorious historical past and a sense of national destiny for the future. It is a nation which has survived other oppressions and shall survive this one.

On this occasion commemorating the 37th anniversary of Lithuanian independence the message of America is a message of hope that one day the Lithuanian people shall fulfill their national destiny and that they shall again enjoy the natural right of every nation to be free, as they once were, so that they can once more resume their tasks of development and progress, and pursue the happiness they once enjoyed as a free and independent people.

When I contemplate the friends I have of Lithuanian origin and their loyalty to the causes of freedom and justice in the United States, I know that by personal example they keep burning the flame of freedom in their native land.

Mr. VAN ZANDT. Mr. Speaker, February 16, 1955, marks the 37th anniversary of the national independence of Lithuania, and I join with 1 million Americans of Lithuanian descent in saluting and encouraging the 3 million Lithuanians in that distressed country as they suffer under the iron heel of their Russian masters.

Lithuanians down through the centuries have dearly loved liberty and freedom, but it has been their unhappy lot to be deprived of such God-given rights under the mailed fist of one conqueror after the other as they were ruthlessly subjected to partition, devourment, and bitter persecution during the centuries of the existence of their beloved Lithuania.

History is replete with bloodcurdling accounts of the cruel persecution of the Lithuanian people who through their long and admirable history as industrious and peace-loving people have exhibited at all times a burning desire to live their lives in liberty and freedom.

In the great State of Pennsylvania, we have thousands of Americans of Lithuanian descent. Many of them, especially in my congressional district, have parents living here who have become naturalized citizens and with their American-born offspring constitute a virile and vibrant segment of the America we all love. Therefore, it is only natural that all Americans sympathize with the plight of the Lithuanian people in the homeland because our hearts are attuned to the spirit of liberty and independence purchased for us by the blood of our forefathers.

Mindful of the turbulent conditions of world affairs we join our prayers with those of the patient, brave, and persevering Lithuanian people in commemorating the 37th anniversary of their independence—an independence that was short-lived and wrested from them by cruel tyrants.

We realize that the future of all liberty-loving nations is threatened by the ruthless forces of world communism. Nevertheless, we know that all of us must cling firmly to our unshakable belief in almighty God and His mercy, confident that He will not desert us but will grant our supplications that the scourge of communism be erased from the earth so that human dignity among men and nations may be restored and that all God's children may live in the peace and harmony embodied in His teachings and reflected in His daily salutations while He dwelt on this earth—"Peace be to you."

Mr. KEARNEY. Mr. Speaker, on this day, February 16, 1955, which is the 37th anniversary of the Independence of the Republic of Lithuania, it is fitting that we pause to pay tribute to the freedom-loving spirit which has always motivated that small nation, and give voice to our belief that such a spirit has not and will never be crushed by foreign tyranny.

Lithuania's independence came as a blessing for its people won after centuries of subjugation under a staggering succession of alien despotisms. For 22 years thereafter, the people of Lithuania knew the, to us, commonplace pleasures of self-government and experienced the pride which citizens of a state entitled to an honored place among other free nations may justly feel.

In 1940, however, as a result of a secret conspiracy with Nazi Germany, and taking advantage of the collapse of political and military order in Europe, the government of the U. S. S. R. forcibly invaded the Republic of Lithuania. Following the Soviet imperialistic plan, the legal government was supplanted by Communist-controlled puppets, and in due course Lithuania was incorporated into the Soviet Union. Thereby began a new and more infamous era of foreign tyranny and oppression for this heroic people.

The Government of the United States has steadfastly refused to recognize the cowardly usurpation of the sovereignty of Lithuania by the Soviet Union, and in so doing we continue to reaffirm our belief that the many years of struggling and suffering which the people of Lithuania have endured without abandoning their hope for the eventual restoration

of their nation's independence have not been in vain.

Mr. CRETELLA. Mr. Speaker, it is a privilege for me to extend my greetings in honor of the 37th anniversary of the independence of Lithuania this February 16.

The plight, the privation, and the hardships endured by those nations swallowed up in the shadows of the Iron Curtain remind all of us in the free world that we must continue to recognize the Soviet plague for the cruel design it cuts in the face of humanity and decency. No one knows better of these tyrannies than those enslaved in such countries as Lithuania.

The reports we receive from these countries tell us of forced labor, murdering of anti-Soviet resistant forces, the collectivization of prosperous farmland, and in short, man's inhumanity to man. Truth again becomes stranger than fiction in this tragic russification of the brave once free Republic of Lithuania.

As a Member of this great Congress, I join with others paying tribute to the cause of freedom and independence and in the prayer that Lithuania, through the continued spirit of her citizenry and the unwavering voice of America and the free world, will once more cast off the shackles of this bondage.

Mr. ANFUSO. Mr. Speaker, the 37th anniversary of Lithuanian independence is being observed on February 16. The little Baltic state was established as an independent nation in 1918, only to have its freedom and existence snuffed out in 1940 by the Soviet Union which has since enslaved its people and destroyed every vestige of their independence.

In the years since 1940, the people of Lithuania have paid a tremendous toll in human suffering and destruction at the hands of a ruthless oppressor. The culture of this little Baltic country is gradually being wiped out, its churches destroyed, and its people are subject to mass purges and deportations. Yet, despite all this suffering and subjugation, the spiritual and moral resources of the Lithuanian people have not been exterminated, nor has its indomitable desire for national freedom been extinguished.

The fake annexation of Lithuania and the other Baltic states has never been recognized by the United States. The American people have followed with great sympathy the plight which has befallen the Lithuanian people and we have on numerous occasions raised our voice in their behalf.

On this occasion, the 37th anniversary of their independence, we extend our greetings and encouragement for their righteous cause. The American people hope and pray for their early liberation from Communist tyranny. We renew our solidarity with this heroic people in their struggle against the forces of evil.

Mr. OSTERTAG. Mr. Speaker, under leave to extend my remarks, I wish to call attention of the House to the fact that today is the 37th anniversary of Lithuania's independence.

The small but fiercely proud Baltic country won her independence after World War I, to the plaudits of the whole world. For 22 years her people enjoyed the fruits of freedom, and under freedom Lithuania became an outstanding member of the family of free nations. A successful land reform program, coupled with the intelligence and industry of her farmers, converted the country from a merely self-sustaining nation to an exporting nation; universal education swiftly reduced illiteracy from 64 percent to 15 percent, as the number of children in grammar schools rose from 45,000 to 300,000. Her state opera, the theater, and the ballet added cultural luster to her economic and commercial development.

In 1940, the Soviet Government drew the Iron Curtain down on Lithuania, thinking to snuff out the people's will to freedom.

It has not succeeded. The Lithuanians, like their Baltic neighbors, the Latvians and Estonians, have never ceased to resist subjugation. It was a proud day for our own country when we determined not to recognize the conquest of these three republics by the voracious Soviet bear, but to sustain the spirit of freedom within them by continuing recognition of the republics. All of us share with them the hope that the spirit of freedom will not die, and that the day of liberation is not too far distant.

Mrs. ROGERS of Massachusetts. Mr. Speaker, today, February 16, 1955, marks the 37th anniversary of the independence of Lithuania. Although the freedom that once belonged to Lithuania has been taken from her by Soviet Russia, the Lithuanian people are united in their determination to again establish their complete independence.

There are 3 million Lithuanians living in their rugged and admirable homeland. Here in America we have over 1 million Lithuanian citizens who have greatly proved their quality, their fineness, and their strength as citizens of our American Republic. All Lithuanians are united today, including those in the homeland and those here in America, in the celebration of this 37th anniversary of their independence.

During her independence, 1918 to 1940, Lithuania was an exemplary nation and an honored member of the family of free nations, honorably fulfilling all her obligations. Her land reform act of 1922, the first in all Europe, was one of the most important events in her history as 73 percent of her population was engaged in agricultural pursuits. This land reform act lessened greatly the influence of Communist propaganda. Universal compulsory education—1930—reduced the illiteracy from 64 to 15 percent. From 1919 to 1939 the number of pupils in grammar schools alone rose from some 45,000 to nearly 300,000. Economically, her great progress in dairying and hog production transformed Lithuania from a self-subsisting nation to a commercial type one. Her rapidly developing cooperatives raised the standards of commerce, agriculture, and industry. Lithuania's state opera, the theater, and ballet attracted internationally famous conductors and artists and added luster to the culture of this ancient nation.

Then came the Soviets on their drive to world domination. Today a rigid censorship conceals from the world the continuing deportations under the guise of volunteer work elsewhere, collectivization, the slave labor camps, the russification and colonization by Russian elements, the systematic efforts of the Soviet occupational regime to merge Lithuania organically into the Soviet system, the extermination of the hostile native anti-Soviet element by killings of the resistant groups.

In this great struggle for independence, Lithuania has not given up. She still fights on. Little does Communist Russia realize the strength of heart and determination of the spirit of the Lithuanian people. These stalwart people know they have a friend in America. They know the Government and the people of the United States are with them all the way. Never has the Government of the United States recognized the annexation of Lithuania by Communist Russia, just as the United States Government has never recognized the annexation of Latvia or Estonia under their rule and domination. It is my view that the United States Government will stand firm in this position, and that the people of Lithuania and her Baltic neighbors may rest assured the United States will never recognize the incorporation of these wonderfully fine small Baltic countries into the Soviet Communist Union.

On this anniversary day I extend my congratulations to the people of Lithuania. In doing this I say to them, "Hold fast to your faith, and hold fast to your hope and courage, for with these necessary qualities I am positive the sun will again shine on an independent Lithuania and a happy nation of Lithuanian people living in freedom."

Mr. McVEY. Mr. Speaker, today, February 16, marks the 37th anniversary of Lithuania's independence, and I am happy to have the opportunity of paying tribute to the people of that gallant little nation. During her brief period of independence, from 1918 until 1940, she made great progress in economics and education, and outstanding achievements in commerce, agriculture and industry. It was with a deep sense of satisfaction that we watched this young republican government honorably fulfill her obligations as a member of the family of free nations.

Unfortunately, this period of freedom came to an abrupt end when, on June 15, 1940, the Soviet Army marched in and took over. Since that day, her people have endured untold hardships at the hands of the aggressor. The American people have never recognized the incorporation of the free Republic of Lithuania into the Soviet Union. We have the highest respect for this noble people who are deprived of so many freedoms as a country behind the Iron Curtain and a genuine interest in her welfare. Her spirit has not been crushed, and her present bondage will be an inspiration for future generations to carry on with that indomitable spirit that has brought her through so many trying situations in the past. It is the hope of all of us that one day soon Lithuania will again throw off the yoke of the oppressor and take her rightful place among the freedom-loving peoples of the world.

Mr. FORAND. Mr. Speaker, today is a memorable day for all people of Lithuanian descent. It is Lithuanian Independence Day.

It is a day of mixed emotions for these gallant and freedom-loving people.

They are happy at the thought that on February 16, 1918, after 123 years under Russian rule, the people of Lithuania cast off the Russian yoke and proclaimed Lithuania an independent kingdom, and proceeded to organize their own government.

Nine months later, in November 1918, Lithuania became an independent republic and continued to enjoy happiness and freedom for more than a decade.

All this was accomplished as the result of a great nationalist political and cultural revival which took place in spite of all Russian efforts to obliterate Lithuanian national sentiment.

The people of Lithuanian descent are sad today because Lithuania's hard-won freedom was again taken from her in 1940 when Soviet troops marched in and, again by force, placed Lithuania under the Russian yoke and have held her people in practical slavery ever since.

We in America, and I am sure all other freedom-loving people, have not forgotten the unfortunate plight of the Lithuanian people.

We want them to know that we support them in their fight for freedom. We are not unmindful of the fact that under present circumstances they can do little for themselves; that the present government of their country is not one of the will of the people but rather one that has been imposed upon them by force.

We have not forgotten their valiant fights of the past against tyranny and dictatorship and we entertain a fervent hope that the day will soon come, as it did in 1918, when the great people of Lithuania will rise in their wrath and again break the Soviet yoke that has been placed around their necks.

It is up to us, who enjoy freedom and liberty, to do all we can to help Lithuania regain her independence; to ratify the Genocide Convention without further delay; to help her displaced people find asylum in the United States and other free countries; to bring them hope through the Voice of America and other available means; and to continue investigation by congressional committees of Soviet seizure of Baltic States and Soviet crimes against the Baltic peoples.

This we should do as all of these means lead ultimately to the restoration of Lithuanian independence.

Mrs. KELLY of New York. Mr. Speaker, I am happy to have this privilege to pay tribute to the Lithuanians on the 37th anniversary of their Independence Day.

There are certain things we value so highly that we carefully preserve them from the erosion and forgetfulness of time. There are certain events which we consider of such great significance that we take care always to preserve their memory. Time and time again we advert to these events for inspiration. Time and again we find ourselves drawn to them with a solemn sense of awe and reverence, because we realize that they are milestones of vital significance in man's struggle toward a higher and better life.

Such an event is the proclamation of Lithuanian independence. And such are our feelings when we celebrate Lithuanian Independence Day, the national holiday of all Lithuanians.

After February 16 of 1918, the day on which Lithuania was proclaimed an independent republic, the history of that land was first a happy one, but then, when the Nazis and Soviet Communists decided to destroy its freedom it entered into a time of serious troubles. Thus, since the proclamation of independence in 1918 Lithuania has experienced both happiness and misery, prosperity and poverty, progressive democracy and totalitarian dictatorship.

The first two decades of Lithuania's independence were a blessing to its peace-loving, hard-working, and patriotic inhabitants. In the course of that short time, from 1919 to 1939, the country was definitely on the road to prosperity and progress, and the people were happy in rebuilding the economic and political life of their reconstituted country. They were not only learning the hard but useful lessons of democracy, but they were also practicing it in their daily communal and national life.

In those relatively calm days when the cold war was unheard of and World War II was not even thought of, Lithuania seemed to be safe and secure. However, as it turned out, the Lithuanians were not masters of their country's fate, nor could they assure its peaceful destiny. There came a turn of international events that has proved disastrous and quite tragic to Lithuania since 1939.

Lithuania's independence was one of the first casualties of World War II, and now, for almost 16 years, the unfortunate Lithuanians have been suffering under the worst of tyrannies. In 1940 their country was annexed to the Soviet Union; in 1941 it was overrun by Nazi forces; in 1944 the Nazis were evicted by the Red army, which came and took over Lithuania in the name of the Soviet Union.

Since those dark days Moscow's agents have turned the country into a prison. Just what the exact situation is in Lithuania we in the West have no way of knowing in detail, because for more than a decade the country has been sealed off from the West. We often get reports or rumors to the effect that there is considerable underground resistance to the Communist regime. Unfortunately, however, a totalitarian dictatorship, once imposed, is difficult to dislodge.

We who understand the plight of the Lithuanians and sympathize with them think of that historic day when they proclaimed their independence and ardently hope that soon they will be able to celebrate in freedom this national holiday in their homeland.

Mr. MORANO. Mr. Speaker, on February 16, Lithuanians throughout the world observed the 37th anniversary of their homeland's independence.

Though burdened with grief over the oppression which has overtaken their country, Lithuanian people nevertheless demonstrate each year their undying will to be free.

It is such sustained spirit which 1 day will result in freedom for all peoples whose hearts cry for liberty.

The Lithuanian spirit may well be the beacon light to rally all of the temporarily oppressed, to lead the broken peoples on waves of hope to the self-government they so dearly cherish.

It is a courageous thing they do—celebrating an independence which exists only in their minds and hearts. But it is only by such zealous devotion to freedom that independence is achieved.

In this quest the Lithuanian people have our wholehearted support and admiration.

Mr. McDONOUGH. Mr. Speaker, on February 16, 1955, Lithuanians in all parts of the world observed the 37th anniversary of Lithuania's independence.

For Lithuania independence was short-lived. Lithuania gained freedom in 1918, and as a nation great strides were made to advance the standards of commerce, agriculture, and industry, and to improve the economic status and the physical welfare of Lithuanian citizens. As an honored member of the family of free nations, Lithuania fulfilled all of her obligations.

In 1940 tragedy struck the young nation, and the Red tide of communism swept across Lithuania wiping out the freedom and liberty so dear to the hearts of Lithuanians at home and abroad.

The people of Lithuania have not despaired, but look hopefully to the West trusting that the miracle of liberation will once more bring independence to their land.

All the people of the United States who cherish individual freedom and national liberty as their most priceless possession join with Lithuanian-Americans and Lithuanians in the homeland on the 37th anniversary of Lithuanian independence in the prayer that liberation may not be far off.

The Lithuanians have displayed courage and fortitude in their valiant and ceaseless fight against the enslavement of communism, and they have earned the admiration of the free world which joins them in the struggle to defeat the Communist aggressor everywhere.

REPORT FROM THE COMMITTEE ON AGRICULTURE

Mr. GATHINGS. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight tonight to file a report on the bill H. R. 3952.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

WORLD-TRADE TRENDS IN OIL

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Oklahoma [Mr. JARMAN] is recognized for 60 minutes.

Mr. JARMAN. Mr. Speaker, on May 25, 1954, I addressed the House at length on the subject of world trade trends in oil. I then expressed the opinion that excessive imports of oil, by the

United States, were dangerous to the Nation's security.

Regrettably, nothing has happened since that time to change my opinion. If anything, the events of the past year have only served to make this danger even more apparent. Oil imports have continued to take an increasing share of the Nation's market for oil.

In the summary of my earlier address on this subject to the House, I concluded as follows:

One thing is certain. The domestic oil-producing industry cannot continue to maintain a large excessive capacity to produce, while foreign oil enters the country without the need for a similar responsibility. It cannot conserve, while foreign oil plays wastrel. It cannot exist while foreign oil acts in the role of court favorite. Something must give, and unless the Congress acts, it will be the domestic oil-producing industry.

The Congress has not acted, and the domestic oil market has been doing the giving.

It is because of these facts that I have asked for time here today, to discuss the continued threat to the Nation's security and economy which is presented by excessive oil imports, and to suggest to my colleagues that something can and must be done soon about this problem. It is a problem which, if left unsolved, contains the implications of disaster.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. JARMAN. I yield to the gentleman from West Virginia.

Mr. BAILEY. I am sure the Members present on the floor would appreciate it if the gentleman would tell us something about what these oil imports are doing to the economy of the gentleman's State of Oklahoma. What is it doing to your State's revenues? And how are you carrying out your ordinary State services?

Mr. JARMAN. I will be happy to develop that.

Mr. Speaker, this is no academic problem as far as my own State is concerned. Oil is Oklahoma's lifeblood. According to the Daily Oklahoman of February 6, 1955, the State produced its seven billionth barrel of oil during the month of December. Only Texas and California have produced more oil. Oklahoma grew up with oil. Its first production came just 2 years after the run of '89, which opened Oklahoma to general settlement. Of the State's 77 counties, 62 produce oil. Petroleum accounts for 90 percent of the value of the Sooner State's mineral production. More than 43,000 people are employed there in the production of oil alone, not to mention the many more who are indirectly employed as a result of oil production. Every county in my own district is an oil producing county. Anything affecting oil production is of real concern to the people in my district.

I cite these figures only to illustrate that Oklahoma's economy is greatly benefited by oil production. A substantial reduction in that production causes Oklahoma direct injury. Excessive oil imports have sharply restricted Oklahoma production. In 1954, the State produced about 16 million barrels less oil than in 1953, despite increased production capacity. Future increases in the importation of oil may cause even further injury.

Mr. BAILEY. Mr. Speaker, will the gentleman yield further?

Mr. JARMAN. I yield.

Mr. BAILEY. It is a fact that a certain percentage of tax going into the treasury of the State of Oklahoma is for the support of schools. What is the effect of this necessary reserve you are forced to hold back because of the imports of foreign oil? Has it impaired your State treasury funds so that you may not be able to carry out your school program?

Mr. JARMAN. I would say to the gentleman that it has had a decided effect economically upon the school and highway programs and on the general finance structure of Oklahoma; and if I may, in just a moment, I will give specific figures to back that up.

Inasmuch as Oklahoma possesses more than 6 percent of the Nation's proved oil reserves, I hope that adequate market outlets will exist to assure the production of this oil for the use of people all over the Nation. The high rate of oil imports gives little cause for optimism.

Mr. Roy G. Woods, president of the Oklahoma Independent Petroleum Association, described the impact of oil imports on Oklahoma in graphic terms recently before the House Ways and Means Committee. Mr. Wood's testimony of January 28, 1955, included the following comment under the heading, "Effects of Present Policy of Imports on Oklahoma's Economy":

(a) Reduced unallocated oil allowables from 75 barrels to 15 barrels in a year, with a comparable cut in take-home pay per barrel to the operator.

(b) State average of unemployment of oilfield workers has increased 156.25 percent in 1954 over 1953, while in some counties there was as much as a 400 percent increase in unemployment. (Oklahoma Employment Security Commission, December 31, 1954.)

(c) Gross production taxes on crude oil during fiscal year 1954 in Oklahoma were $26,900,000; during the first 6 months of the fiscal year, 1954 gross production taxes were $13,794,368, during the last 6 months of the year 1954 gross production taxes declined to $11,399,950—a decrease of $2,395,368, which, if continued (and it's getting worse) will show a decrease in gross production taxes of approximately $5 million per year in Oklahoma. This will seriously curtail the vital functions of Oklahoma government, and this does not count the drop in income and other tax sources, such as the sales tax, all of which depend on the oil economy of the State.

(d) Supply houses, services companies, independent producers, drilling contractors, and countless other small enterprises that serve the oil industry are dying on the vine.

Mr. Woods has, in my opinion, ably listed some of the very specific and injurious effects of oil imports on the Oklahoma economy.

It is the consensus of those most concerned with Oklahoma's welfare that excessive oil imports should be curbed. The Oklahoma State Legislature, by joint action of both of its branches, has passed a resolution which urges that oil imports be restrained. I would like, at this point, to insert, into the RECORD, this resolution, which stands as a recent and unanimous action of the Oklahoma State Legislature:

Whereas Oklahoma for many years has been a leader in the production of oil and gas and an advocate of the conservation of oil and gas; and

Whereas the economy of the citizens of the State of Oklahoma is closely allied and dependent upon the production of oil and gas in this State; and

Whereas by reason of continued high imports of oil and its derivatives into this country from foreign markets, Oklahoma has been forced to reduce its current production much lower than its ability to produce oil within the standards of proper conservation of oil and gas, resulting in great losses in taxes which are used for the benefit of the schools, highways, and general revenues to the State of Oklahoma, and resulting in great losses to the economy of the State of Oklahoma and its citizens; and

Whereas by reason thereof the incentive to discover new reserves in the State of Oklahoma has been destroyed, which reserves are vital to the defense of this country: Now, therefore, be it

Resolved by the Senate and the House of Representatives of the 25th Legislature of the State of Oklahoma:

That, the continued import of foreign oil and its derivatives into the United States is detrimental to the citizens of the United States; and

That, if the importation of foreign oil and its derivatives is continued, it is the opinion of the Senate and of the House of Representatives of the 25th Legislature of the State of Oklahoma that adequate domestic petroleum reserves, which are vital to the defense of this country, will not be discovered and will not be available for use in this country in a time of emergency; and be it further

Resolved, That, in addition thereto great and serious losses are resulting to the economy of the citizens of the State of Oklahoma by reason of foreign oil and its derivatives supplanting the traditional market of oil and gas that can be produced in the State of Oklahoma under sound conservation practices.

It is obvious from this material that those who best know Oklahoma have no doubt as to the effect of excessive foreign oil on the State's economy. Excessive oil imports are now impairing the ability of the oil producing industry in Oklahoma. They should be curbed before they cause greater harm.

Mr. VURSELL. Mr. Speaker, will the gentleman yield?

Mr. JARMAN. I yield to the gentleman from Illinois.

Mr. VURSELL. I want to congratulate the gentleman from Oklahoma who has been active for many months as I well know in raising an alarm in reference to excessive imports of oil. He has done a splendid job in the past and he is making a fine contribution in the figures he gives us this afternoon in his very able address.

Coming from Illinois, I want to associate myself with this crusade, with this effort or whatever you want to call it, to try to bring about a limitation of excessive imports that is doing such great harm to the entire economy of our country. In my judgment, these imports may have reached the point now where they are threatening the defense of our country. I am hopeful that through the efforts of the gentleman from Oklahoma and others from the Southwest and other areas of Illinois, who know the

importance of the oil economy to our Nation and to our national defense, that combined, our efforts in cooperating with one another may hurry an urgent solution to this problem.

I am hopeful that something may be done in this session of the Congress that will limit these imports to about 10 percent of our total consumption rather than to allow them to continue to permit these big companies in our own country to import this oil, and that those imports will be cut down to something like 800,000 barrels a day. It is a matter that I think the Congress and the parties interested otherwise in Government must come to grips with and help us find a solution, because it is doing great harm to the far-flung independents in the oil exploration and development of our country. I congratulate the gentleman.

Mr. JARMAN. I thank the gentleman for his contribution, and I am in thorough agreement with him as to the seriousness of the situation. I am in hopes that the matter can be further emphasized in the discussion tomorrow and the next day on the Reciprocal Trade Agreements Act.

Mr. WICKERSHAM. Mr. Speaker, will the gentleman yield?

Mr. JARMAN. I yield to the gentleman from Oklahoma.

Mr. WICKERSHAM. The gentleman from Oklahoma is making a good statement. He is well acquainted, as well as the rest of us from the Oklahoma delegation, with Mr. Russell B. Brown, general counsel of the Independent Petroleum Association of America. The other day Mr. Brown made a statement before the Committee on Ways and Means in which he said this:

> The essentiality of oil and the dangers of becoming dependent upon uncertain foreign sources have been recognized by our national leaders, both civilian and military.

He pointed out statements by other gentlemen, including President Eisenhower, who said this:

> The Russians produced last year something less, probably, than half a billion barrels of oil. We produced two and a quarter by ourselves. We produced something over twice as much steel as they produced. Now these are strong elements in our economy, when you are going to use so much of your production to wage a war, particularly a war of exhaustion.
>
> Now all of these things are deterrents upon the men in the Kremlin. They are factors that make war, let us say, less likely.

It is clear that the President believes accessible oil is not only vital to defense, but more important, is also vital to the maintenance of peace.

Then Adm. Chester W. Nimitz, former Chief of Naval Operations, was quoted in the December 6, 1954, issue of Newsweek as follows:

> Oil is the lifeblood of our Navy, Air Force, and mechanized Army. Without it we are sitting ducks for aggression. The year 1942 was a critical one for the Allies primarily because of German submarine sinkings of our oil tankers. America's oil industry, however, can take great credit for meeting Allied needs despite these losses.

Then we have the statement of Mr. J. P. Coleman, president of the National Stripper Well Association. He resides in Wichita Falls, Tex., just below the district served by the gentleman from Oklahoma now speaking and myself, and he said this:

> For several years, the domestic oil producers of the United States have watched with growing alarm the steady increase in foreign imports of petroleum and its products. Since the end of World War II, we have seen imports of petroleum increase from about 300,000 barrels per day to 1 million barrels daily in 1954.

Then one final statement by Mr. W. M. Vaughey, president, Independent Petroleum Association of America, in which he said:

> Since 1948 excessive imports of crude petroleum and refined products have constituted an increasingly serious problem, which was only temporarily relieved by the needs of the Korean war in 1950 and the shortage of oil in foreign markets resulting from the Iranian dispute in 1951. Otherwise, there has been a growing surplus of foreign oil, particularly from the Middle East. This has not only pushed American oil out of the world market but has resulted in foreign oil taking an increasing share of the market in this country, with corresponding restrictions on domestic production. With total imports exceeding 1 million barrels daily in 1953 and 1954 and with more and more domestic capacity "shut-in" for lack of market, it became increasingly clear that imports had gone beyond proper levels, and were violating all rules of equity.

I would like to ask the gentleman from Oklahoma if he agrees with these statements by gentlemen who are well versed in the oil situation?

Mr. JARMAN. I thank my colleague, and I am in complete agreement with what he has quoted.

Mr. WICKERSHAM. I should also like to ask if it is not true that anything affecting the oil industry in any location in Oklahoma affects us throughout the whole State. We have 62 out of 77 counties in Oklahoma producing oil; is that not true?

Mr. JARMAN. Certainly. The entire State is affected by any segment of the industry that is hurt.

Mr. WICKERSHAM. I should like to say, too, that it was a privilege for me and the gentleman who is speaking [Mr. JARMAN] to appear before the Rules Committee with our chairman, Mr. TOM STEED, with Mr. CARL ALBERT, the secretary of the Oklahoma delegation, with Mr. EDMONDSON and Mr. BELCHER, yesterday to urge an open rule on H. R. 1 so the House could consider an amendment limiting the importation of foreign oils to not more than 10 percent of our domestic needs.

Mr. JARMAN. I thank the gentleman.

Mr. Speaker, we dealt in some degree here today with the problem as it affects Oklahoma. It also affects our Nation.

While I am concerned with the injury that oil imports are causing my State, I am even more vitally disturbed at their implications to the national security and welfare. This is a matter of real concern to every American.

Foreign oil has little to offer in the way of security. By contrast, oil produced in Oklahoma and the other producing States is virtually immune to enemy sabotage and attack. It can be moved safely through underground pipelines. It is not subject to attack by submarine.

Increasing amounts of the oil imported into this country come from the Near East. This oil would be a primary Russian target in any emergency, and its availability to this Nation at such a time is extremely doubtful. On February 8, the Washington Evening Star carried an Associated Press article out of Moscow which quoted the Soviet Foreign Minister, Mr. V. M. Molotov. Mr. Molotov dropped a thinly veiled hint as to Russia's aims in the Near East. A part of Mr. Molotov's quoted comments are as follows:

> In the Near East we can say that the Arab countries have not progressed as much in development as the countries of the Far East. But it is obvious that soon it will be impossible to strangle the national liberation movement in the Near East as freely as they [the Western Powers] are doing it now with the peoples of Africa.

It seems to me that Mr. Molotov is here boldly threatening what he terms the "liberation" of the Arab countries of the Near East. Since he speaks favorably of the situation in the Far East, the implication seems to me to be strong that Russia is now looking with hungry eyes at the Near East, and would like to force this area into the same sort of so-called liberation that has shackled China. The fact that one of these oil-rich countries, Iran, actually adjoins Russia lends credence to such a possibility. Whether Russia actually does have such intentions remains to be seen. Whether she is capable of carrying out her aims is also debatable. Whether she can win over such countries as Iran, which was only a short time ago controlled by the Communist-dominated Tudeh Party, is open to question.

One thing is certain, however. Near Eastern oil offers very little in the way of reliability, as compared with domestic oil. One military expert recently commented that our chances of defending Middle Eastern oil are about like Russia's chances of defending Mexican oil. This may be a tragically accurate comparison.

Even more unfortunate, if we become dependent on foreign oil, we hurt our own traditional national independence as to oil. Unless a market outlet exists for domestic oil, the wells cannot be drilled; the reserves cannot be found and the needed supply of domestic oil will not be available for use in an emergency. A strong domestic oil industry is vital to the Nation's defense. Excessive oil imports can chain that strength and independence as to oil. They must be prevented from doing so.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. JARMAN. I am happy to yield to my colleague from Oklahoma.

Mr. EDMONDSON. I should like to join in the commendations of Members of the House who represent States with oil production, of the gentleman from Oklahoma [Mr. JARMAN] for his very fine presentation of this problem. It is a problem of vital concern to all of us who live in and represent States where oil is a principal source of income to our people.

I might add that the problem is by no means confined to oil. In the Second District of Oklahoma, which I have the privilege to represent, we are today seeing disastrous effects of excessive imports on our lead and zinc industry, on our glass industry, and on our coal-mining industry, as well as in the petroleum industry. I think the time is certainly here for facing up to this problem. Like the gentleman from Oklahoma, who represents the Fifth District, I, too, am in favor of the principle of reciprocal trade, but I agree with him that the time has come to place safeguards in that law to see that the escape clause is no longer a blind alley, and to see that American industry receives the recognition and the protection to which it is entitled in the administration of the Reciprocal Trade Act.

Mr. JARMAN. I thank the gentleman for his able presentation, and I appreciate his additional reference to the lead and zinc, glass, and coal-mining segments of our economy.

Mr. Speaker, domestic oil offers the real security. It was here in adequate supply yesterday. It is here today. And, if markets are assured for its development today, it will be here, in plentitude, tomorrow.

I am at a loss to understand the failure to adopt a national policy which would prevent us from becoming even more reliant on foreign oil. In view of Mr. Molotov's aggressive statements, and in view of the obvious tension which now prevails all over the world, I am fearful that we are in great need of a national policy as to oil, and other strategic defense materials, which would assure that excessive imports would not impair domestic production of strategic materials. A policy is needed which would give emphasis to the discovery and production of accessible supplies of strategic materials, so that we are assured of adequate supplies of such materials in any emergency. Priorities as to such sources should be established and they should be established with the greatest possible speed. As a nation, we should take an analytical look at the political reliability of some of the countries upon which we have become increasingly dependent for our oil supplies. It seems apparent to me, for example, that we can ill afford to look to countries in the Middle East for our supply of oil. Countries in the Western Hemisphere, may be relatively dependable. This is personal speculation, however. I don't know the real facts. It seems that no one knows the true facts, and it is apparent that no formal study has been made to ascertain all of these facts.

Therefore, as a member of the House Foreign Affairs Committee, I intend to suggest the creation of a special subcommittee of that committee with the responsibility of investigating these matters, ascertaining the facts and reporting its findings back to that body. It seems to me that such a study would provide an invaluable key to the formulation of a national policy regarding world trade in strategic materials.

If world trade affects defense, and it does, I believe that our trade policy should include defense considerations. As the trade agreements program now stands, this is its most serious omission. This omission should be corrected at the first possible opportunity.

Oil is by no means the only commodity affected, although it is certainly one of the most important. Domestic producers of chemicals, electrical equipment, lead, zinc, and many other commodities can be seriously damaged by excessive imports of strategic materials.

Senator STUART SYMINGTON, of Missouri, introduced an amendment to the 1954 Trade Agreements Act which established the legislative principle that essential domestic industries should not be injured by excessive importation of strategic materials. This amendment was a wise addition to the act and the philosophy of the Symington amendment should be extended. I believe that the implementation of the Symington amendment would be consistent with the Trade Agreements Act and with reciprocal trade. I feel strongly that some safeguards must be provided in our trade program to assure adequate domestic production of defense materials.

Because of Oklahoma's position as a leading oil-producing State, I am more familiar with the impact of excessive oil imports on domestic productiotn than I am with the effect of imports of other commodities. I know that oil imports have increased in the postwar period from about 377,000 barrels daily to their present level of more than 1,200,000 barrels per day. An increase of this volume could not have failed to be injurious to the domestic oil industry. It has resulted already in a restriction of the industry's potentialities and it will cause even further harm unless something is done.

Congress can do something about oil imports. It must do something if the domestic oil industry is to maintain the strength which is necessary to the Nation's defense.

The House of Representatives is now considering H. R. 1, a bill to extend the Trade Agreements Act for three additional years. This bill, as it now stands, contains none of the safeguards which I have mentioned above as essential to protection of the national defense. I have introduced a bill, H. R. 4005, which I feel will provide the necessary safeguards as to oil. I believe, too, that such safeguards are necessary as to other commodities and I feel that a study of this whole matter will reveal specific information necessary to provision of such safeguards.

I intend to vote for the extension of H. R. 1. I am for reciprocal trade. However, I also feel that it is consistent with reciprocal trade to provide for the national defense. Where the two are in important conflict, I believe the Nation's defense to be paramount.

The Congress will soon be faced with a decision on this vital problem. I hope and believe that it will resolve the issue in such a manner as to solidify both our trade program and the national defense.

Such a solution may be ultimately essential to national survival.

Mr. STEED. Mr. Speaker, will the gentleman yield?

Mr. JARMAN. I yield to my colleague from Oklahoma.

Mr. STEED. Mr. Speaker, perhaps the strangest thing in every consideration given to the problem of reciprocal trade is the brazen assumption that those who would curb or curtail imports into the United States are motivated by greedy, selfish, and shortsighted self-interest, while those who espouse freer trade have only a grand and altruistic cause to serve.

Nothing can be farther from the truth. Sooner or later, it must become apparent to everyone, it seems to me, that these great clashes of interest that confront us every time Congress takes up the matter of extension of the Trade Agreements Act are motivated almost entirely by selfish interest on the part of all, not just the so-called high tariff bloc.

The issue comes to the House in its usual gagged and bound form this year, and the propaganda for this flagrant giveaway of American self-interest has proved itself again most effective. More than ever before, those who fight to retain some protection for American domestic industries are branded as the crass self-servers, while those who espouse this even greater surrender of trade power march under a halo of altruism.

The truth is that all around us are undeniable signs of growing danger and distress to American industry which, if the trends continue, may well become deadly to the American economy. Another truth is that any final decision on the matter of world trade now before us that is not fair, is no solution at all but an undeserved victory for one self-interest group over another.

Six years ago these same signs were all about us. The outbreak of fighting in Korea temporarily set aside the dangers. We are just now again approaching the situation that had developed alarmingly after the end of World War II. There is no better example of this recurrence of trade danger than in the oil industry.

The accelerated importation of oil has caused all oil-State Congressmen to become acutely aware of trends in world oil trade. More foreign oil has meant less oil produced in Oklahoma. More foreign oil must inevitably weaken our Nation's security as to oil.

My district, which probably contains more independent, domestic oil producers than any other in this country, has directly felt the impact of increased oil importation. The economy in my area is closely related to the welfare of the oil-producing industry there, and is very much affected when that industry is hurt.

In 1954, my State and my district felt the heavy impact of foreign oil. While imports rose to an all-time high, and while the Nation's consumption of oil continued to rise, Oklahoma's oil production was down by an estimated 18 million barrels. In my district, drilling rigs were stacked and oil workers were idle in 1954, because Oklahoma's oil allowables were cut back to make room for foreign oil. This decreased activity has a direct effect on the general business volume. Now I am quite aware of the need for international good will and

of our compelling need for national progress in that field, but I am also, concerned with the impact of oil imports on the Nation's defense and on the many towns in my district that are greatly helped by oil production in their vicinities.

I believe that the oil produced in my district has proved its value to the Nation's defense, but I am not quite so sure about the security value of some of the imported oil that is now displacing this Oklahoma oil. I am disturbed by the threat of economic injury which would occur if my State were to suffer a simultaneous injury to both its oil and agricultural production. We are told that Oklahoma may possibly be faced with the return of the days of the drought and the dust storm. At the same time, we see oil imports continue to cause a decline in the State's oil production. The combination of these events could be catastrophic. It is not a pleasant thought, but it is a thought that leads me to commend caution to my colleagues, insofar as a trade policy for oil is concerned. I do not believe it is the intended goal of national trade policy to weaken the production of a product which is vital to the health of my State. I do not believe that a national trade program should promote national insecurity as to oil and other strategic materials. It is the effect that counts, however, and not the intent.

The potential effects of excessive oil imports are, to say the least, alarming.

Much has been said of the value of reciprocal trade to other nations. It is very doubtful whether world trade in oil bears out this theory. It is clear, however, that certain large companies are being greatly benefited by increased imports of oil.

Take the Creole Petroleum Corp., for example. On February 10 this Venezuelan production subsidiary of the Standard Oil Co. of New Jersey proposed a 3-for-1 split of capital stock, with the par value of the stock to remain at $5 per share. The directors then declared a dividend of $1.95 per share. It does not take a financial analyst to tell you Creole is doing quite well, even after you deduct her costs for propaganda and lobbying during the last session of Congress.

Some idea of these costs may be gained from the fact that one of Creole's registered representatives here in Washington, Steven Fitzgerald & Co., listed expenditures of more than $73,591, in the first three quarters of 1954. At the same time, local chambers of commerce all over the country were being besieged with propaganda. Full-page ads were placed in large metropolitan and business newspapers, proclaiming the wonders of Venezuelan oil. Speeches were made and pamphlets were written along similar lines. All the stops were out in this expensive and extensive campaign.

No mention was made of what this oil was costing this Nation in terms of future United States oil production capability. No mention was made of the impact of excessive oil imports on oil-producing areas.

It has been costly, this propaganda barrage. Despite this, however, the firm was able to split its stock, 3 for 1, and pay a large dividend.

I hope I will not be regarded as cynical when I look askance at some comments, within the past month, of Creole's president. In an appearance on January 20, before the House Ways and Means Committee, Mr. Harold W. Haight, commented, in part, as follows:

> The continued success and growth of my company depend upon the continuation and expansion of international trade. Therefore, I am happy to appear before this committee to support H. R. 1, in particular, and, in general, the reciprocal trade program recommended by President Eisenhower, which I believe will mean more prosperity and greater security for the people of the United States.

I think Creole's stock split makes it evident that Creole's own prosperity is also, somewhat involved in this question of world oil trade. Very much involved, I would say. I am not so sure, however, that what is good for Creole is good for Oklahoma.

Mr. Haight also, refers to the President's position on reciprocal trade. As far as oil imports and their impact on the domestic oil industry are concerned, it has been exceedingly difficult to ascertain President Eisenhower's position as to the problem. Many months ago, he appointed a special Cabinet Committee on Energy Supplies and Resources Policy. This Committee's study is supposed to have embraced the oil imports problem, but apparently, it has been unable to agree. At any rate, although the subjects involved in its investigation were of vital importance, the Committee has delayed its report for months. The President, in a recent press conference, was quoted as saying that the Committee's report was not ready, but was not being held up. While the President did, in answer to questions, make some general remarks as to oil import restrictions, these probably should not be regarded as significant, in view of the fact that the Committee which was officially delegated the responsibility to carefully study the problem has still not made its report. I am sure this Committee will ultimately make its report and I hope that it will become a valuable addition to the Government's archives even if not received in time to help in the actual formulation of policy.

It is to be regretted that the Cabinet Committee's report is not ready. One would almost think it was being deliberately delayed by this Administration so as to avoid facing up to some very live and difficult issues. Such so-called studies have occurred with disturbing regularity in the past 3 years, and they seem often only to constitute the preface to further indecision. Sooner or later, some issues must be met. There are times when it is extremely unwise to get there latest with the leastest. This is such a case. A report was needed from the Cabinet Committee, not an epitaph.

We shall have to make out without it, I suppose. The problem of oil imports, after all, is one that requires a decision now, and cannot be deferred until further studies are made.

Oil imports are at an all-time high, averaging more than 1,200,000 barrels each day. This compares with an average of less than 400,000 barrels daily at the end of World War II. The rapidity of increase in foreign oil use has come at a time when our domestic production capacities were far more than adequate. Today, we are capable of producing more than 1,750,000 barrels per day of United States oil which is being left dormant. Yet, we are using record amounts of foreign oil.

We are sometimes urged to save our own oil and use foreign oil. This is foolish. The more oil we have used in this country, the more we have found, with the result that the Nation's oil reservoir has grown steadily over the years.

Nor can you conserve know-how. This was stated in entertaining terms recently, by Mr. Roy G. Woods, president, Oklahoma Independent Petroleum Association, in an appearance before the House Ways and Means Committee on January 28. Said Mr. Woods:

> This idea of saving our domestic crew is as fallacious in its reasoning as another situation which I have in mind. In Oklahoma we have a great football team which has on its schedule in September of 1956, the University of Notre Dame, which, as you gentlemen all know, is also, a great team. What man among you gentlemen present here today would advise our great coach, Bud Wilkinson, not to schedule any scrimmage, not to have any tackling or blocking practice, not to play any more football games, but to keep the Big Red under wraps and save them for the game with Notre Dame in 1956. Come 1956, the Big Red would not be ready. This is an illustration of a typical situation. Do the same thing to the domestic oil team, and then an emergency arises, the oil team would not be ready.

Sooner or later, unless oil imports are restrained, the United States market outlet for oil will be restrained to the point that drilling will be sharply reduced, and the discovery of new sources of oil will decline. The seeds for future dependency on foreign oil are now being sown by the increased importation of foreign oil. Our lack of a policy restraining oil imports will some day bear us bitter fruit unless we do something to change it.

Much is said about the benefits derived from world trade. As concerns oil, a large part of those benefits stay with the importing oil companies. I have cited the case of Creole.

The Middle East offers some even more dramatic examples. There the oil reserves are fabulous. There, under the desert palms, lie huge deposits of oil that can be cheaply produced, without responsibility to American jurisdiction, but with ever-growing access to American markets. There a few importing companies are waxing fat and happy.

Russell B. Brown, general counsel for the Independent Petroleum Association of America, told the House Ways and Means Committee on January 28, that, and I quote:

> 1. About 82 percent of the free world's oil reserves, outside the United States, are in the Middle East, within a few miles of Russia.
>
> 2. About 70 percent of total imports into the United States are brought in by 5 large

international American oil companies, and by 1 of foreign control.

3. These six importing companies have their principal interest in Middle East oil reserves.

Then, Mr. Brown added what I feel to be a very astute comment. I quote again:

The concentration of ownership of foreign oil in the hands of a few, and its long-range effect upon the American consumer and the national security, is a factor which we believe this committee should carefully consider.

The six companies which import most of the oil into this country are: The Standard Oil Co. of New Jersey; Gulf Oil Corp.; the Texas Co.; the Standard Oil Co. of California; Socony-Vacuum Oil Co., Inc.; and the Royal Dutch Shell group.

These 6 companies import about 70 percent of the foreign oil used in this country.

The five American firms listed have become increasingly un-American in character, as far as their oil reserves are concerned. Taken together, 89 percent of their total proved reserves are located outside the borders of this country. About 64 percent of their oil production is outside this country. These companies are global in nature and global in perspective. I believe that, should these global activities be surveyed in the light of this Nation's interests, the two will not always be found to coincide. The national interest must, of course, take precedence, however painful this may be to the importing oil companies.

Excessive oil imports present a real defense problem. At the same time we become more dependent on more distant sources of oil, we injure our own capability to produce oil. This is a policy of folly, or rather, it is no policy at all.

My views on this problem are well known. I have spoken many times about the need for legislative restraints on oil imports. That need has increased over the years. The problem is fast approaching a point of crisis. The importing oil companies have, in the last year, shown a complete lack of concern for the domestic oil industry. They have increased their volume of oil imports again and again, not only halting the domestic oil industry's traditional growth, but actually causing the domestic industry to reduce its production. In some areas, the problem has become acute. Unless something is done, we may someday be a "have-not" nation as to oil. It will be a matter of choice, not necessity. Not every nation has the chance to decide whether it should be self-sufficient as to oil. I believe that the Congress is wise enough to take the steps that will insure national oil self-sufficiency. The opportunity to do so now knocks at our door.

H. R. 1, the bill to extend the Trade Agreements Act, as recommended by the House Ways and Means Committee, should be amended to safeguard essential domestic industries, including oil, against injury from excessive imports.

Regardless of what happens to H. R. 1, as it moves through the legislative channels, I urge that it be so amended. I am a long-time supporter of reciprocal trade, where that trade is really reciprocal. Let me say here and now, however, that reciprocal trade is no sacred cow, as far as I am concerned. It is not the only concern of Government. Some of the proponents of free trade approach the subject wearing blinders, as if they felt that deviation, however wise, would be fatal to the trade program. These blinders have obscured their vision to the point where they are unable to see the threat that some imports present to certain domestic industries producing strategic materials. Nor are they seemingly aware of the fact that imports can injure other domestic industries. They just do not seem to want to think about it.

The Congress cannot escape this responsibility, however. Its duty is clear. Where trade policy impinges on other policy considerations, the Congress must resolve the conflict.

I urge that the Congress provide, by law, those restraints that are essential to the protection of essential domestic industries. Unless it does so, the Trade Act will be extended for 3 more years and vital and essential industries may be fatally exposed. And eventually, though the coming of such disaster, the justified interest in reciprocal trade may be destroyed. Today's victory well may be tomorrow's defeat. Free traders might well ponder this omen.

Mr. JARMAN. I thank the gentleman for his contribution.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. JARMAN. I yield.

Mr. BAILEY. Does not the gentleman think that the best procedure to face the situation which will develop tomorrow in the consideration of the bill, H. R. 1, would be to have a serious attempt made to defeat the ordering of the previous question in order that we can have an open rule under which amendments can be offered by various segments of industry that are being injured.

Mr. JARMAN. I agree thoroughly with the gentleman. I hope that we can defeat the rule and, if we are unsuccessful in defeating the rule, that we can recommit H. R. 1 to the Ways and Means Committee with instructions to protect those segments of our economy which so badly need protection.

Mr. BAILEY. I thank the gentleman.

Mr. JARMAN. I thank the gentleman for his contribution and, Mr. Speaker, I yield back the balance of my time.

RECIPROCAL TRADE AGREEMENTS ACT

The SPEAKER pro tempore. Under previous order of the House, the gentleman from South Carolina [Mr. ASHMORE] is recognized for 30 minutes.

Mr. ASHMORE. Mr. Speaker, a matter of utmost importance to the American economy, the American people and all of us here will shortly come before this House for decision. I refer to H. R. 1, aimed at reduction of existing tariffs and extension of the Reciprocal Trade Agreements Act.

As a representative of the great textile State of South Carolina, I view with particular apprehension the inherent threats toward textile manufacturing and cotton agriculture contained in this bill. I know many of my colleagues feel similar alarm over what could happen to the textile industrial system of the United States if this bill were to be enacted in its present form.

I wonder if all my distinguished colleagues fully realize the exact nature of the textile industry—made up primarily of many small businesses—how it operates, what factors are involved in its pursuit of business and what we of the Congress must face in order to preserve it.

The American cotton goods industry, from the grower to the customer, is based primarily on future operations in sales, mill production schedules and in buying of raw materials. Cotton is purchased in the futures exchanges months in advance of its use. Mills must figure the demand for goods sometimes as much as a year ahead. Yes, the entire system is based on futures; and we, Mr. Speaker, hold its future in our hands.

A tiny drop of uncertainty in such a sensitive system might very well have the effect, in time, of a rushing torrent. Those who do not understand fully the practices of the cotton business cannot envision what damage the doubling or tripling of foreign imports might cause, even though the inflow remained less than exports.

Proponents of this bill are wont to say that if imports in the past have not been very sizeable, why should the industry fear some moderate reduction in tariffs? Or they argue that if American exports continue to exceed foreign imports, so that there is a substantial net for American mills in the export-import ratio, what adverse effect could increased imports have?

Mr. Speaker, I have made inquiry into such questions and believe the answers are important to our understanding of the textile problem. In regard to exports there are 1 or 2 very significant points. First, large as it may seem to some people—500 million yards or thereabouts—the volume of United States textile exports has declined alarmingly. Only a few years ago it was 3 times as much, 1½ billion yards. Thanks to trade concessions and tariff cuts under so-called reciprocal trade, the American textile industry has lost two-thirds of its export business. That meant the loss of at least 10,000 American jobs, reckoned conservatively—a sizeable sacrifice to the free-trade idea, as great a sacrifice as any major industry has made.

What export business remains is carried on, for the most part, with a few countries with which the United States enjoys trade on a preferential status or under special circumstances such as fast train deliveries to Canada, America's biggest foreign market.

Now as to the import side of the picture. While it is true that imports have never reached the rate of exports, it is my firm belief that under conditions which I shall outline they could expand very sharply in volume, and that by enacting H. R. 1 we would be adding to the temptation of other countries to increase that volume.

It seems to me that proponents of this measure are apt to be misled by what has happened in the past. They should look toward the future rather than the past.

I fear, Mr. Speaker, that many do not realize how rapidly the textile industries of foreign countries like Japan are advancing, in technology, in worker skills, in all-round efficiency. No longer can we use the past as a yardstick for measuring probabilities of business and production volume. We face a rehabilitated world wide textile industry which in some cases—again, such as Japan—not only equals the capabilities of the United States industry on the average but in instances of individual mill comparisons actually exceeds ours.

In recent months qualified experts who have visited Japan have described that nation's brand new mills and machinery, the heavy assignment of machines per employee, and the long work week in Japan's mills. Looking to the future instead of the past, we must understand that the efficiency of which America's industry is so proud can no longer serve as a potent weapon in competitive world trade. Nor does the United States industry enjoy any advantage in raw material, because cotton can be obtained and is obtained by Japan's mills at the same prices American mills pay, owing to the low cost of ocean transport.

And what of the largest item of cost in making textiles, the wage factor? Here, as well we know, the foreign countries have a huge advantage because the average wages paid in Japan and India are only one-tenth and one-twelfth, respectively, of the prevailing American hourly rate. Thinking of the future, how long can a textile company or any other type of small business hope to work against 10 to 1 or 12 to 1 odds, unless it has some kind of safeguards to maintain its home markets?

Mr. Speaker, I am sincerely dedicated to the principle of true reciprocity in trade. I hold no brief for protecting those manufacturers who are monopolistic in tendency, or who hold special patents or have highly specialized machinery of their own. But when the people of my State and the entire textile industry are asked to compete in the American home markets against goods that can enter this country for one reason only—that reason being because they were made under conditions of cheap and unfair wages—I think my people have every right to be given reasonable tariff protection.

Even under the present tariff structure, Mr. Speaker, that protection is small and no real deterrent to a sudden inflow of foreign goods. Only in recent months it has been proved that Japanese-made goods can easily enter the United States market and sell competitively here, despite the tariff and the currently low level of American prices.

For the great bulk of textile products, the American cotton goods market is an open market; and it is almost as sensitive to price influences as the raw cotton market. Price changes on any given day permeate the entire cotton textile system. Sales representing only a small fraction of current supply or production determine the values for the whole. On several occasions, a mere flurry of Japanese cloth sales in the central market at prices below the American market level served to paralyze general sales activity for weeks.

This disturbance happens because the inflow of competitive imports is an attack from the dark. No one can tell at the moment how large and swift the current may become, how long it will last, or whether it will in time engulf the market. That is the danger, the uncertainty and doubt which would result if our gates to foreign imports were opened wider. Just now, when the textile industry seems to be beginning to pull out of a serious depression, any such action on our part would certainly prolong the industry's difficulties.

We are dealing here with one of this country's basic industrial enterprises. Measure it in any way, its employment of hundreds of thousands of men and women, the million and more people who work in allied industries such as knit goods, hosiery and apparel manufacture, its huge capital investment, its essential products of cloth and clothing, its critical role in clothing our military forces—by any standards, this is far too important an industry to be handed over to the domination of foreign countries.

What are we trying to do in this country today—put the foreigners first and let our own people and their industries take the hindmost? Sometimes I fear that we are going overboard to help questionable friends thousands of miles from America at the expense of our own people. I know that those who favor H. R. 1 do not desire or expect such results. But I am firmly convinced that if we continue to follow the theory and philosophy of those who sponsor this bill we shall reap calamity. And after our small industries are bankrupt and their laborers unemployed, it will then be too late to change our foreign-trade policy.

And let us make no mistake about it, Mr. Speaker. The sole purpose and result of tariff reduction is the surrender—in part, or all—of American production and American jobs to foreign countries. There is no avoiding the conclusion that for some reason, the textile industry of the United States seems to be earmarked for that kind of surrender. This very month a new round of trade bargaining gets underway in Geneva. The textile industry heads the list of the so-called expendable industries, because fully 90 percent of its entire range of products has been put out on the bargaining table by our State Department. This, mind you, is being done under existing authority. And in addition, H. R. 1 as now presented would remove a great deal more of the American textile industry's protection. Yes, again I say, where are we heading to?

The consequences would be calamitous, to put it mildly, in my State where 1 out of every 2 industrial employees are textile people; where the mills besides producing a major portion of industrial payrolls and tax revenues, are the providers of schools, hospitals, churches, recreation centers, and in many other ways sustain the very economic and social life of hundreds of communities.

We know from bitter experience, recalling the era of the 1930's when Japan staged a large-scale invasion of the American textile market, what lowered tariffs will do to employment, industrial stability, and the economic health of the South. We know very well, also, that if mills were to shut down, thousands of people in addition to the mill employees would be bound to suffer. We know the process of readjustment would be long, costly and indeed impossible. Mr. Speaker, the South has no relish for another period of reconstruction.

Before I close, I urge my distinguished colleagues to consider with utmost care this entire problem of foreign textile competition, and the need for keeping the mills of America operating as prosperously as possible. Keep in mind that a thriving textile industry is a multimillion dollar a year customer of America's transportation system, chemical industry, financial institutions, textile machinery industry, fuel and power industry and many others—not the least of which is our great cotton agricultural industry. Two out of every three bales of cotton grown in the United States are bought by America's mills. In a year's time the textile industry pays out $2 billion for the home-grown cotton it consumes. The mill industry not only represents the biggest customer of the American farmer, but his best customer—his most secure and reliable market.

These are a few of the reasons, Mr. Speaker, why I feel these questions of tariff, foreign economic policy and agricultural policy cannot be divorced. It is why I join with so many of my friends in urging the greatest caution possible in our consideration of measures such as H. R. 1, and why I especially oppose further textile tariff reductions at this time.

In my opinion the American textile industry has contributed its full share, and more, to the reciprocal trade effort. In my opinion this industry has sacrificed more than any other American industry of comparable size in helping Japan's mills get back on the road to recovery. In my opinion, Japan's current economic plight—centered largely around her own textile industry since that happens to be the major Japanese industrial business—cannot be disassociated from the whole world problem of declining, unbalanced textile trade.

To solve that problem, and Japan's, will require a courageous attack on the real heart of the trouble, and not an attack on any fringe issue like the tariff. As I have said, I fervently hope to see trade restored on a truly reciprocal basis. I should like to see the other nations cooperate in bringing about currency convertibility, a lessening of their many import controls, a reduction in the exorbitant and discriminatory tariffs they have imposed against one another and against the United States.

Mr. Speaker, my hope is that the Congress will develop a forward-looking trade policy in place of the warmed-over programs which for 20 years now have accomplished little else than to penalize

American industry. I urge that we work together for a policy which will lead the way toward restoration of Japan's natural markets, toward increased consumption of cotton and manufactured textiles in the destitute regions where clothing is needed, so that American mills and all the world's textile industries can look to a future of expanding trade and growing prosperity.

Mr. FLYNT. Mr. Speaker, will the gentleman yield?

Mr. ASHMORE. I yield to the gentleman from Georgia.

Mr. FLYNT. I wish to commend and congratulate my distinguished friend from South Carolina upon the presentation of his remarks on this subject, for by the very wording of his remarks he shows that he is thoroughly familiar with this subject which is of vital interest to all of us who live in a section of the country where the textile industry forms an important part of the economy.

I should like to associate myself with the remarks of the gentleman from South Carolina, and if I may, make a few observations in direct line with what the gentleman has just said.

In this connection all of us are aware that the textile industry has not yet suffered terribly damaging blows, yet, based absolutely on figures released by the Department of Commerce, the rate of increase of foreign textile imports is alarming. These increases amount sometimes to as much as 20 to 30 percent from one month to the next. How long can this rate of increase continue before the peril point is reached in the American textile industry?

I am sure, Mr. Speaker, all of us agree with the gentleman from South Carolina when he says he is for reciprocal trade. Basically, I think all of us are for it. We realize the necessity of international trade and commerce among the nations of the world, yet we must take into consideration the wage-cost factor and the differential in wages which exists in this country and in such countries, for instance, as Japan where the wage-cost factor is about only one-tenth what it is in this country and where the cost of production of textile goods is geared almost entirely to the wage-cost factor. It is necessary that the textile industry in America have some assurance in the form of an amendment to H. R. 1, or else we stand on the threshold of seeing the American textile industry and a great many other American industries sacrificed completely on the altar of so-called reciprocal trade.

This reciprocal trade idea I think is good; I think all of us agree that it is good, but it must be a two-way street. If we are going to make concessions to the other nations of the world, it is necessary that these other nations in good faith make equal concessions to the United States. Too many times in the past, Mr. Speaker, we have been confronted with artificial embargoes, with inconvertible currencies, and with protective devices like licenses and import permits which have had the effect of destroying the importation of American goods by other countries.

Mr. Speaker, I think that on tomorrow and on Friday the Members of this House should give very careful, thoughtful, and prayerful consideration before they vote into law a 3-year extension of a piece of legislation which could completely wreck not only the textile industry but also other industries which form a vital part of the American economic life.

Mr. ASHMORE. I certainly thank the gentleman from Georgia for his most timely remarks. I agree with him completely in his statement.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. ASHMORE. I yield to the gentleman from West Virginia.

Mr. BAILEY. Does the distinguished Member from South Carolina propose to tell the Members present on the floor of the injury to the textile industry and what effect that injury would have on the domestic demand for raw cotton?

Mr. ASHMORE. Yes. I have a statement in respect to that.

Mr. BAILEY. I would be interested to know because the injury to the textile industry would cut off the demand for domestic cotton and would injure the cotton industry of the South as well as the textile industry.

Mr. ASHMORE. It certainly will.

Mr. BAILEY. Mr. Speaker, will the gentleman yield again?

Mr. ASHMORE. I am very glad to yield to my friend from West Virginia.

Mr. BAILEY. The point that I raised when I asked the gentleman to yield previously was this. At present approximately one-third of the raw cotton produced in this country is exported. Approximately 90 percent of the remaining two-thirds goes into the textile industry.

Mr. ASHMORE. The American textile industry uses two-thirds of the cotton grown in the United States.

Mr. BAILEY. If the new trade agreement with Japan should result in destroying 50 percent of the textile industry of this country, it would also take away 50 percent of the demand for raw cotton and also destroy the cotton industry.

Mr. ASHMORE. There is no doubt about that. I was getting to that in just a moment.

Mr. BAILEY. I was not sure whether the gentleman had covered that point particularly, but I want the record to show that not only is the textile industry in danger, but the cotton industry is in danger because that which hurts textiles hurts the cotton industry.

Mr. ASHMORE. It most positively does. I appreciate the contribution of my friend.

Mr. BAILEY. Mr. Speaker, will the gentleman yield further?

Mr. ASHMORE. I yield.

Mr. BAILEY. I think the record should show that under our foreign-aid program the bulk of the cost of building some irrigation projects in Egypt is coming out of the pockets of the American taxpayer.

What is the prime product of Egypt when that irrigation project is completed? It is cotton, and a far better grade of cotton than we can ever hope to grow in the United States. Under this same policy of reciprocal trade, this enlarged program is all tied in to that idea of point 4 aid to foreign countries which will furnish competition to American cotton growers.

Mr. ASHMORE. The gentleman is entirely correct. They can produce as fine cotton in Egypt and Brazil and other countries as we can and at much lesser cost.

Mr. BAILEY. What is the use of spending millions of dollars to irrigate land in Egypt unless they can find a market for Egyptian cotton?

Mr. ASHMORE. If we do that, it will soon take our own American cotton market, I am afraid.

FOA PROGRAM HURTS DOMESTIC COAL INDUSTRY

The SPEAKER pro tempore. Under previous order of the House, the gentleman from West Virginia [Mr. MOLLOHAN] is recognized for 15 minutes.

Mr. MOLLOHAN. Mr. Speaker, I wish to call to the attention of the House a gross abuse of high office, a shocking breach of faith with the American people, and a cruel hoax perpetrated upon a hard-pressed, vital industry and its thousands of unemployed workers.

There is no need for me to dwell at length, here, upon either the plight of our coal industry, the effect upon our economy, or, in the event of war, the extent to which its reduced capacity would endanger our national security. These are facts with which the Members of the House are well acquainted.

But a fact that may not be so well known concerns the shameful way in which these circumstances were seized upon by the Director of the Foreign Operations Administration, Mr. Harold Stassen, for political exploitation of the most flagrant sort.

Last August 5, 1954, at a press conference held in the Executive Office Building, Washington, D. C., Mr. Stassen made the announcement that FOA would purchase 10 million tons of coal from the United States as part of its foreign-aid program for the fiscal year 1955. The date of this announcement is significant. It marks the eve of the opening of the 1954 congressional election campaigns. I ask you to bear in mind that the principal coal-mining States are—in the order of their importance—West Virginia, Pennsylvania, Kentucky, and Illinois, and that in each of these States there were close political races.

Mr. Stassen's statement, very understandably, received wide coverage by the press, especially in these coal-producing States, where great numbers of jobless coal miners began to hope that their Government was not indifferent to the plight of the unemployed.

But after this preliminary and, I have reason to believe, wholly premature announcement by the FOA Director, there followed nothing but silence. No details of when this coal-purchasing program was to begin, how it was to be handled, where this coal was to be bought, or to what countries it was to be shipped were forthcoming. And this despite the fact that anxious coal operators, equally anxious officials of the United Mine Workers, and somewhat skeptical but still hopeful Members of Congress from

the coal-bearing regions literally haunted Mr. Stassen's office.

For 6 long weeks all that happened was that the coal-export market was disrupted so that even less coal moved from United States docks. Then, on the 21st of September, when the political campaigns were in full swing, the Director of the Foreign Operations Administration issued another statement to the press. This one came from the President's summer headquarters at Lowry Air Force Base, Colo. Mr. Stassen had flown there to confer with the President, and, he announced, the President had approved his coal-purchase program to "relieve unemployment in distressed coalfields in the United States." Under the President's direction, the FOA Director said, the coal is to come from the most critical unemployment areas.

This was especially welcome news to West Virginia where, due principally to our idle coal mines, the rate of unemployment was the highest in the Nation, and had been so since the previous April. Moreover, our hopes that relief was in sight were further raised when Mr. Stassen informed us, in this same September 21 statement, that the purchase of the whole 10 million tons of coal was to be allocated: 2 million tons, each, from West Virginia, Kentucky, and Pennsylvania, 1½ million tons from Illinois and 2½ million tons to be generally distributed through other coal-producing regions.

Again, Mr. Stassen made the headlines.

And now, some 6 months later, the FOA Director and his coal program are once more in the news. But this time the words are not sweet nor are the accompanying comments laudatory.

On Monday, February 14, this past Monday, the Fairmont Times, published in my home town of Fairmont, W. Va., carried a front-page story charging that the State Department and the Foreign Operations Administration have under consideration a plan to purchase approximately a million tons of coal for the use of United States military forces in Japan and Korea from mines operated under the Chiang Kai-shek government. If consummated, this purchase, it is charged, would deprive 800 United States miners of 1 full year's work. The story is accredited to Mr. Chester Potter of the Pittsburgh Press, who originally broke it on Sunday, February 13.

The scheme, this news story states, is credited to Mr. Stassen, whose bogged-down foreign coal export program was labeled, at the time it was announced last fall, "as being a strictly political maneuver in the hope of swaying key States or districts where there was a heavy mine vote in favor of Republican candidates for the Senate and House of Representatives."

I have not checked the accuracy of the report about Mr. Stassen's latest sortie into coal. In all likelihood he would disclaim any knowledge of the plan, anyhow, and I say this as one who has experienced some of the FOA Director's expert technique in failure to know when the questions become embarrassing.

But I can attest to the accuracy of this news article when it describes the bogged-down aspects of Mr. Stassen's coal-for-foreign-export program. This program would have afforded a measure of relief from the critical unemployment from which we suffer in the First Congressional District of West Virginia. I have therefore made it my business to follow it closely and to know how it was being handled.

Seven months have now elapsed since Mr. Stassen first announced his program to help our coal industry and to relieve unemployment in the distressed coal fields of the United States. What is the status of this program today?

As of today, I am reliably informed that the total purchases by FOA in the 7½ months since this program was announced amount to 1,423,000 tons, that is at the rate of slightly less than 200,000 tons per month. And only 690,000 tons are presently authorized.

This means that in the remaining 4½ months of the fiscal year covered by the program, contracting must be done on the basis of 1,911,000 tons per month, a feat which all of us accept as obviously impossible of accomplishment. In 1948, the year in which FOA made its largest purchases of coal, the total amount bought in the entire 12-month period was 9 million tons. And conditions then were of course quite different from what they are now, when most of the coal-producing nations have largely recovered from the devastation of World War II. It is also interesting to note that up until the time of the announcement of this program, our purchases under the FOA program were being carried on at the rate of 70,600 tons per month.

Even this amount now is being considered and included as part of the much-publicized emergency program to relieve unemployment in distressed labor areas.

It would therefore seem that the ambitious announcement made by Mr. Stassen last August was made without previous planning, or even the remotest idea how the program was to be carried out. This might be due to lack of executive and administrative ability on the part of Mr. Stassen, which would be regrettable but not necessarily reprehensible.

But Mr. Stassen's failure to carry out this program is not limited to his inability to find overseas sources for the use of United States coal. He has also failed to carry out the President's directive that the coal purchased was to come from the most critical areas of unemployment.

West Virginia's unemployment rate last fall was the highest in the Nation and still continues among the highest. In coal mining alone, there has been a drop of 25.7 percent in employment in 1954 over 1953. In the First Congressional District, total unemployment in the coal industry is as high as 40 percent according to the latest figures available. But not so much as 1 pound of coal has moved from this district under Mr. Stassen's 10-million-ton coal-purchase program. For the entire State of West Virginia, we have shipped less coal under this program than we have done in previous years on an open competitive-bid basis under the regular FOA program.

Furthermore, over the past several months, it has become increasingly apparent to me that the FOA Director, having achieved whatever political benefits might have derived from his announcement of this program at the time it was made, would now like to have us forget the whole thing.

But I feel certain that this House will agree with me that it has now become incumbent on the Director to keep faith with the coal industry and its unemployed workers. To the fullest extent of his abilities and the resources of his agency he must continue to give them the token assistance which he promised with so much assurance last August. Within the coal-producing areas of the United States unemployment is almost as high now as it was during the depression of the last Republican administration. The very least the FOA Director can do is to stop playing politics in order that he may discharge his responsibilities to the American people in a manner consistent with the tradition of the high office to which he was appointed.

Mr. Speaker, I include herewith the article which appeared in the Fairmont Times on February 14, 1955:

EIGHT HUNDRED IDLE MEN SEEN IN GOP COAL PLAN—PROGRAM FOR MILITARY PURCHASE OF MILLION TONS FROM FORMOSA CALLED BLOW TO UNITED STATES MINERS

Having bogged down on a foreign coal export program which was labeled when it was announced last fall as politically-inspired, the Republican national administration now has a plan which if adopted would mean the loss of a year's work for 800 American coal miners.

Such was the disclosure made by Chester Potter, Washington correspondent of the Pittsburgh Press, in a copyrighted story appearing in the Press yesterday.

Potter said that the State Department and the Foreign Operations Administration had under consideration a plan to purchase approximately a million tons of coal for the use of United States military forces in Japan and Korea from mines in Formosa operated under the Chiang Kai-shek government.

The Press story said that "all of this coal is now being or could be purchased in the United States" and that it approximates the production of 800 miners for a year. Coal industry and union officials contend that the Formosan coal is inferior to that produced in this country's bituminous mines.

The copyrighted article asserts that miners, railroaders and others would lose by the purchase of coal in Formosa and that the United States Treasury also would be deprived of taxes resulting from the business.

The scheme is credited to Harold E. Stassen, head of the FOA, whose plans to purchase 10,000,000 tons of coal for export was announced last August.

At that time the FOA coal purchase plan was labeled as being a strictly political maneuver in the hope of swaying key States or districts where there was a heavy mine vote in favor of Republican candidates for the Senate and House of Representatives.

Among those who charged that the plan was politically-inspired were Senator Matthew M. NEELY and Congressman Robert H. MOLLOHAN, both of this city, who noted in a joint statement that the first orders for coal were being directed to States in which the Republicans felt they had a chance to influence close elections.

The Pittsburgh paper's Washington correspondent said that the FOA program

appears to have bogged down almost completely. Six months after the plan was announced, only a million and a half tons have been shipped or authorized for purchase, and it is generally believed that the extent of future orders will not exceed a million tons. That would make 2,500,000 tons actually bought, a quarter of the total the GOP high command announced with a fanfare of publicity as the 1954 election campaign was at its height.

After detailing the FOA purchases to date, the Press' copyrighted story said: "Industry and the United Mine Workers looked askance at this program when Mr. Stassen first announced it. They said they were not consulted about it at any time.

"However, they hesitated at first to openly criticize it, though the UMW felt strongly that it was an administration measure aimed at getting the votes of miners in last fall's election. The UMW felt that if it did put some miners to work, then they shouldn't criticize the program.

"Significant, perhaps, is the fact that on the record no coal has been purchased from West Virginia mines, the country's largest soft-coal producing area. Senator MATTHEW M. NEELY, a Democrat, was up for election last year but realistic minds in GOP politics felt pretty certain he couldn't be licked.

"So coal was first purchased from Kentucky, where Senator John Sherman Cooper, a Republican, was up against tough opposition—former Vice President ALBEN W. BARKLEY. The purchases of coal in Kentucky didn't save Senator Cooper from defeat."

Northern West Virginia coal producers and union members are expected to make a vigorous protest against the purchase of coal outside this country for the use of United States Armed Forces and to the economic detriment of the industry here.

Mr. MOLLOHAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include an editorial from the Fairmont Times.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

CIVIL DEFENSE

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from California [Mr. HOLIFIELD] is recognized for 10 minutes.

Mr. HOLIFIELD. Mr. Speaker, during the past 5 years I have spoken many times on the subject of civilian defense. I have again and again pointed out that we have failed to establish a realistic program for citizen survival in the atomic-hydrogen age.

My speeches have stressed two major points: one, that the people should be informed by a source no less authoritive than the President, of the terrible effects of these new weapons; two, that the Federal Government assume the national obligation of directing and financing an adequate program of civilian defense.

I am pleased to note that my repeated requests seem to be having some effect. The Atomic Energy Commission yesterday, February 15, released some very important information on the factor of radioactive fallout of past bomb explosion substances. This information is long overdue in my opinion. The people can now begin to comprehend the hazards of atomic-hydrogen war. I have often said that an informed citizenry is necessary if the democratic form of government is to survive. The citizen must know the hazards of modern life if he is to be equipped to meet those hazards, both physically and financially.

Now that some of the hazards relating to radioactive fallout of atomic-hydrogen explosions have been made known, I hope that the executive branch of our Government will proceed to the next step in their responsibility to our citizens. That step is a reevalution of our civilian defense program.

My remarks will be brief and blunt. They concern the problem of civil defense against nuclear attack.

Today, the rulers of the Soviet Union have in being a growing stockpile of both atomic and hydrogen bombs. They have in being the planes needed to deliver these bombs against our American cities. Today, not next year, but today, we must go on the assumption that the Soviet dictators have it in their power to attack every major center of population within the United States. Today, not next year, but today, the costs of such an attack would probably be reckoned, not in millions, but in tens of millions of American casualties.

I have consistently advocated the strongest possible continental defense, the most effective program attainable for detecting, intercepting, and destroying enemy bomber formations. But our existing continental defenses, according to official and publically released Air Force testimony, could not turn back more than a fraction of an attacking air fleet. Enough planes would penetrate our defenses to inflict ruinous damage upon our Nation.

Within a relatively few years, in addition, the Soviets will in all likelihood produce the intercontinental ballistic missile. Such a weapon could travel from Russian bases to the heartland of America in a matter of minutes, at speeds and altitudes making interception almost hopeless. Future planning must consider this prospect.

A realistic policy for national survival in the atomic age must assume that a large-scale enemy nuclear attack—resolutely pressed home—would reach the majority of its intended targets—either today, or in the future. We need the strongest possible continental defenses—yes. But let us realize that such defenses can do no more than blunt the edge of an enemy attack.

In the preatomic age, our national military strategy could be built around a first and second line of defense. The vast stretches of the Atlantic and Pacific stood between the cities and industries of America and the military machines of our potential enemies. If attacked, we could trade space for time. We could use our forces and munitions in being to blunt the armed spearheads of an aggressor while, protected by two oceans, the tremendous industrial capacity of America—our second line of defense—could be turned to the output of the tanks and planes and guns needed by our Armed Forces.

Not so today, however; today, our industries would be exposed to direct attack from the very outset of a conflict. In a matter of a few days, or even a few hours, our cities and factories could suffer more destruction than was inflicted on England or Germany throughout the 6 years of World War II. With our industries largely destroyed, the flow of munitions to our fighting forces would quickly become a mere trickle, and then stop completely, leaving our fighting men armed only with raw courage.

In this age of nuclear weapons and jet bombers, there can no longer be a first and second line of defense. There is only one line of defense—total defense. It is a line that involves both military and civil defense. It is a line that runs through the cities and industries of America. We are all part of this line—civilian and military, Eastern and Western Hemispheres. Wherever free men live, work, or man the domestic machinery or military outposts we are one—one in exposure to danger, one in responsibility to defend our institutions.

This is the reality confronting us today. What are we doing about it?

Our existing civil-defense program—our program for minimizing casualties following an enemy attack, and for restoring defense production as quickly as possible—is tragically inadequate. We do not have today—and there is today no prospect of us having—the bare minimum of protection our cities and industries would need to keep a nuclear Pearl Harbor from dealing us a terrible, possibly mortal, blow.

Why is this? The Congress—on both sides of the aisle—does not lack for wise and patriotic legislators, ready to adopt the programs, and vote the appropriations, needed to keep us alive and free. Yet the Congress has appropriated only token sums for civil defense. The American people have time and again demonstrated their willingness to support the policies required for national survival, no matter what the cost in dollars and sacrifice. And yet their attitude toward civil defense is one of boredom, skepticism, and indifference. Why?

Here is my own answer to this question. I am convinced that most Americans—and most of their elected officials as well—do not now begin to appreciate the appalling vulnerability of our cities and industries against atomic-hydrogen attack. They do not understand the present danger because they have not been given the facts which would enable them to understand it.

Those who do know the true nature of the Soviet air-atomic threat also know that our existing civil-defense program could not begin to cope with it. Many in the Congress, let us acknowledge it, frankly, now feel that voting appropriations for civil defense is the equivalent of throwing good money after bad.

Now the American people and their elected officials are not cowards, and they are not stupid. If you tell them that our present civil-defense effort, or anything like it, can meet the challenge of Soviet air-atomic power, do not be dismayed or surprised if they appear skeptical. Give them no facts, or sugar-coated facts, concerning the present danger, and they will reach wrong conclusions. Give them the hard facts concerning this danger, and what is required

to meet it, and they will reach wise conclusions. Come before the American people with a real—rather than a token—civil-defense program, and they will support it.

Let me be specific regarding one vital area of information now withheld from the American people. You will remember that during the hydrogen tests held last spring in our Pacific proving grounds a group of Japanese fishermen on a trawler situated far from the test island of one of the shots were exposed to radioactive fallout. The same fallout forced the evacuation of Marshall islanders and United States military personnel from atolls located more than one hundred miles from the ground zero of the test. The implications of this for civil defense should be obvious to all. If a hydrogen test held in the Pacific forced us to evacuate an area covering thousands of square miles, does it not follow that radioactive fallout from a Soviet hydrogen bomb exploded in Washington might require us to evacuate Baltimore and Philadelphia? This conclusion is based, not upon military secrets, but upon a simple exercise in geography. It is a possibility which should be apparent to any person reading the public accounts of last spring's tests.

To my way of thinking, there is nothing mysterious or complicated about the shortcomings of our present civil defense effort, and there are constructive things which can be done to remedy them. Our existing civil defense program depends primarily on local resources and volunteer workers. A realistic program, in my opinion, must depend largely on Federal resources, and a vastly increased full-time civil defense corps. It must also be based on regional planning and unified coordination with vital military functions.

When the biggest weapon in the arsenals of the world was a two-ton blockbuster, a civil-defense program run primarily by our cities made real sense. When we thought in terms of Hiroshima-type atomic weapons, it was still possible to argue that the burdens of a civil-defense program should be borne primarily by our cities and States, with the Federal Government lending minor financial assistance and simply playing the role of an overall coordinator or adviser.

But this is an age of thermonuclear weapons. If a single hydrogen weapon were dropped on New York City, all the resources of New England and the Middle Atlantic States would have to be mobilized in minimizing the effects of the attack.

We do not ask the city of New York to purchase, maintain and operate the fighter squadrons charged with defending the local New York area. Neither do we ask the citizens of my own city, Los Angeles, to purchase and operate the Nike batteries which will be used for its military defense. Instead, we recognize that the program of providing active defense for our individual cities is properly a national—Federal responsibility.

The same logic calls for making civil defense primarily a national responsibility. Local resources and volunteer workers must naturally be used wherever possible, and no sensible person could propose creating a huge Federal civil defense bureaucracy. Let us face it, however. Our cities and States—without major Federal assistance—simply cannot provide emergency housing, feeding and medical services to survivors in target areas, after an atomic-hydrogen attack. Federal coordination of civilian defense and production problems, with military functions in a given target area, is imperative. The alternative is chaos for both. The Soviet air-atomic menace is a national danger—and we must meet it on the national level.

Simple logic should carry us a step further. We do not expect part-time volunteer workers to man our interceptor aircraft, our guided missile battalions, or the antiaircraft guns which ring our critical target areas. We realize instead that these are highly skilled activities, requiring the service of full-time fully trained personnel.

An equal degree of skill would be required to minimize casualties and damage following an attack against our cities. It it is no discredit to the thousands of Americans now serving as civil-defense volunteers to say that the problem of civil defense is simply too vast, and too complex, to be dealt with by an organization based primarily on volunteer help and local funds.

The concept of Federal responsibility for civil defense embraces far-reaching programs for utilizing national resources to provide emergency shelters, vital supplies of food, water, and medicines, protection of industrial facilities, and trained manpower.

Trained manpower to cope with widespread disaster is crucial in civilian-defense programs. All Americans will be called upon to make sacrifices and to discharge their individual responsibilities in a plan for national survival. We need no less than a universal system of training for civilian defense.

Those who are unable to serve in the military forces may be called upon to serve in the Civil Defense Corps. Each year many thousands of young Americans are rejected for military services because of minor physical handicaps. But a handicap disqualifying a young man for possible frontline combat duty need not disqualify him for an extremely vital role in our civil-defense effort. I say that we should ask such men to render a special service in our civil-defense program. They should be paid, of course, for the value of services rendered. This is the obvious way to lessen present inequality of sacrifice by giving such rejected draftees an opportunity to render our Nation services of great value. Here is the obvious way to create a full-time trained civil-defense organization without ruinous expenditure. At the same time, it would provide professional guidance to our indispensable volunteer workers.

One final point. Last year, the Congress appropriated almost $50 billion for the military defenses of our Nation. It appropriated little more than $50 million for the civil defense of our Nation. If civil defense is worth anything at all, I say it is worth more than one out of every thousand dollars we spend for national security. We are not going to create an effective civil defense through the kind of appropriations which the Congress has been voting for this purpose over the past 5 years. Military defense in the atomic age cannot be bought in bargain basements. Neither can civil defense.

It is crystal-clear, however, that the Congress will not vote larger sums for civil defense unless both our legislators and their constituents understand why these expenditures are necessary. To say this is to say again that the heart problem of civil defense is a problem of education—a problem of getting the facts home to the American people, so that they will not only passively support, but actively demand, a real civil defense. Suppression of the facts regarding atomic-hydrogen weapon effects is not only an insane policy of self-deception but it is a threat to national survival.

All our history shows that the American people do not want to be spoon fed or mollycoddled by misguided, even if well-intentioned, public officials. All our history shows that our people will support adequate national security programs, and the expenditures required for them, once they understand why such programs are necessary.

Mr. Speaker, the Atomic Energy Commission's report of February 15, 1955, should be read by every American citizen. This report is judicious and restrained. It is not exaggerated. If anything, it could be termed an understatement of the known facts.

I include this document as part of my remarks:

A Report by the United States Atomic Energy Commission on the Effects of High-Yield Nuclear Explosions

1. Considerable information on the effects of the explosions of atomic weapons has been made public by the Government since the first nuclear detonations in 1945. The handbook, The Effects of Atomic Weapons, published in 1950, is being revised and brought up to date to include the effects of thermonuclear weapons, as a result of the most recent tests at the Pacific Proving Grounds. References to the effects of thermonuclear explosions have been made in several official statements, beginning with Chairman Strauss' description of the phenomenon of fallout at a White House news conference on March 31, 1954. The following statement is designed to condense and correlate information, some of which already has been made public and other portions of which have been of a classified nature until now.

2. The effects of nuclear tests are evaluated for civil defense planning as well as for military and technological purposes. So long as nuclear weapons are in possession of any unfriendly power, the Commission believes the American public will wish to be as fully informed as possible as to the nature and extent of the dangers of nuclear attack and of the protective measures that can be taken by individuals and communities to avoid or minimize those dangers if we should be attacked.

3. Test conditions, which must necessarily form the principal basis of evaluating the effects of nuclear explosions, may differ markedly from those which might be expected if nuclear weapons were used against our population in wartime. It would be difficult to predict the size or kind of bomb an enemy might use against us in event of war, the exact means of its delivery, the

height at which it would be exploded, or the number of bombs which might reach a given target. Nevertheless, the facts to follow are the fundamental ones at this time.

FOUR EFFECTS OF DETONATIONS

4. A nuclear detonation produces four major characteristics—blast, heat, immediate nuclear radiation, and residual radioactivity. Of these, the first three are essentially instantaneous, while the fourth has a more protracted effect. The phenomena of blast, heat, and nuclear radiation from the detonation of a thermonuclear bomb are of the same nature as those of earlier and smaller atomic bombs. The nature of the phenomena is, in general terms, standardized whether the bomb be a 20,000-ton (TNT equivalent) atomic weapon or a thermonuclear one of many times that power. The intensity and area of the blast, heat, and nuclear radiation increase in relation to the greater energy yield of the explosion. Information on these effects has been extensively publicized; therefore, this report deals principally with effects other than heat and blast.

5. Residual radioactivity, although in no sense exclusive to high yield thermonuclear detonations, does become a matter of major concern when a large thermonuclear device of the type used in the 1954 tests in the Pacific is exploded on or near the ground. The fallout of radioactivity from such an explosion may, under certain conditions, settle over wide areas. Therefore, the extent and severity of this radioactive fallout has been a subject of continuing study since the first full-scale thermonuclear tests at the Pacific Proving Grounds on November 1, 1952. The results of these studies and of our evaluation of data obtained from the latest tests in the Pacific in March 1954 are described in subsequent parts of this report.

6. It should be noted that if we had not conducted the full-scale thermonuclear tests mentioned above, we would have been in ignorance of the extent of the effects of radioactive fallout and, therefore, we would have been much more vulnerable to the dangers from fallout in the event an enemy should resort to radiological warfare against us.

BLAST AND HEAT EFFECTS

7. The effects of blast and heat from a nuclear explosion are relatively localized. One A-bomb of the earliest type equivalent to 20,000 tons of TNT (20 kilotons) would produce blast sufficient to destroy or damage seriously residences within a 1-mile radius. Within a radius of about a mile and a half, residences would be so damaged as to be unusable without repairs. A principal hazard to human beings would come from flying and falling debris and from fires due to such causes as broken gas and electric lines or overturned stoves. The area in which injuries to human beings would be caused by blast, therefore, would be about the same as the area of damage to structures.

8. The United States, as announced previously, has developed fission bombs many times as powerful as the first A-bombs, and hydrogen weapons in the ranges of millions of tons (megatons) of TNT equivalent. For these larger weapons, the blast effects can be calculated approximately by means of a scaling law, namely, the distance at which a given blast intensity is produced varies as the cube roots of the yields of the explosions.

9. Similarly, the heat and burn effects of nuclear explosions can be estimated from accumulated data. These effects, of course, are influenced by prevailing atmospheric conditions. The time element also is a prime factor. Very large weapons deliver heat over an appreciably greater period of time than smaller weapons. A given quantity of heat from a high-yield weapon, delivered over a longer period of time, will produce somewhat less severe burns than the same quantity of heat from a nominal detonation.

PROTECTION AGAINST BLAST AND HEAT

10. The hazard from both burn and blast effects in the outer affected areas would be reduced greatly by shelter. Clothing or almost any kind of shelter would reduce the danger of direct burns, although there might be some danger of clothing and structures becoming ignited. Shelter would materially reduce the hazard of blast injury by affording protection against flying or falling debris. The Federal Civil Defense Administration has made extensive studies of shelters and has issued plans for several simple and inexpensive types which can be utilized by householders. However, the Federal Civil Defense Administration recommends evacuation of the central areas of target zones on early warning of approaching attack.

RADIATION EFFECTS

11. The immediate nuclear radiation, i. e., the neutrons and gamma rays released instantaneously with the explosion of a large weapon on or near the ground, does not present a serious hazard beyond the area where heat and blast are of great concern.

FALLOUT RADIATION

12. However, particles with residual radioactivity produced by a detonation (as opposed to the immediate nuclear radiation) may fall out over an area much larger than that affected by blast and heat, and over a longer period of time. All nuclear detonations produce radioactive materials, but the nature and extent of the radioactive fallout depends on the conditions under which the bomb is fired. The main radioactivity of a bomb's fallout decreases very rapidly with time—for the most part, within the first hours after the detonation.

FALLOUT FROM IN-THE-AIR DETONATIONS

13. An in-the-air explosion where the fireball does not touch the earth's surface does not produce any serious radiological fallout hazard. The radioactivity produced in the bomb condenses only on solid particles from the bomb casing itself and the dust which happens to be in the air. In the absence of material drawn up from the surface, these substances will condense with the vapors from the bomb and air dust to form only the smallest particles. These minute substances may settle to the surface over a very wide area—probably spreading around the world—over a period of days, or even months. But they descend extremely slowly with the result that, by the time they have reached the earth's surface the largest part of their radioactivity has been dissipated harmlessly in the atmosphere.

FALLOUT FROM SURFACE DETONATIONS

14. If, however, the weapon is detonated on the surface or close enough so that the fireball touches the surface, then large amounts of material will be drawn up into the bomb cloud. Many of the particles thus formed are heavy enough to descend rapidly while still intensely radioactive. The result is a comparatively localized area of extreme radioactive contamination. Instead of wafting down slowly over a vast area, the larger and heavier particles fall rapidly before there has been an opportunity for them to decay harmlessly in the atmosphere and before the winds have had an opportunity to scatter them.

15. The area of hazard from radioactive fallout from a surface or near-surface explosion of a thermonuclear weapon is much larger than the area seriously affected by heat and blast. The large radioactive cloud of a thermonuclear explosion rises with great rapidity to the highest levels of the atmosphere and spreads over hundreds of square miles in the first hours. During this time the winds toss the extremely radioactive particles about and the pattern of the radioactive fallout is determined by the size of the particles and by the direction and velocities of the winds, including those up to 80,000 feet and above. The nature of the surface of the earth on which the bomb is fired also must be taken into consideration. Because of these variables, it is impossible to apply a single fallout pattern to all thermonuclear detonations, even test explosions conducted under selected conditions. However, with adequate knowledge of atmospheric conditions, including wind directions and velocities up to high levels and meteorological reports, the fallout region for any detonation usually can be predicted with considerable accuracy. In general terms, the region of severe fallout contamination from the detonation of a thermonuclear weapon fired on or near the surface can be described as an elongated, cigar-shaped area extending downwind from the point of burst.

FALLOUT PATTERN OF PACIFIC TESTS

16. The thermonuclear device fired at the Bikini Atoll on March 1, 1954, was exploded on a coral island. Coral consists of calcium carbonate, thus the detonation's radioactivity was spread by particles consisting largely of unslaked lime which, during the hours of descent, was slaked by moisture in the atmosphere. These particles ranged between one-thousandth and one-fiftieth of an inch in diameter and were, on the average, somewhat adhesive. The prevailing winds were westerly so the bomb cloud moved generally to the east and deposited the radioactive particles in varying amounts over an elliptical or cigar-shaped area. About 160 (statute) miles downwind from the point of burst the early fallout was observed in the form of fine particles which looked like snow. It began to fall about 8 hours after the detonation and continued to fall for several hours.

17. The roentgen is the commonly accepted unit of measurement of radiation dosage. A dose of about 25 roentgens of radioactivity received by a person over a brief space of time will produce temporary changes in the blood. A dose of some 100 roentgens received in a short interval may produce nausea and other symptoms of radiation sickness. About 450 roentgens delivered over a day or so might be fatal to approximately half of the persons so exposed. However, because of the body's repair processes, a total radiation dose which would be serious if incurred in a few minutes would produce much less effect if spread over a period of years. These statements may be helpful in understanding the data which follow.

18. The very large thermonuclear device exploded at ground surface during the tests in the Pacific on March 1, 1954, contaminated an elongated, cigar-shaped area extending approximately 220 statute miles down-wind and varying in width up to 40 miles. In addition, there was a contaminated area up-wind and cross-wind extending possibly 20 miles from the point of detonation. Data was collected from 25 points on 5 atolls located from 10 to 330 miles downwind (generally east) from Bikini Atoll. Due to an unexpected shift in the direction of the prevailing winds in the higher altitudes, the fallout missed the observation rafts that had been placed farther north previous to the test firing. The estimated contour of the pattern of fallout is, therefore, based only in part on data obtained from actual measurements and partly on extrapolation, i. e., calculations based on known data, including factual information obtained during previous tests of smaller devices.

19. Data from these tests permits estimates of casualties which would have been suffered within this contaminated area if it had been populated. These estimates assume: (1) that the people in the area would receive the maximum dose, (2) that they would not take shelter but would remain out of doors completely exposed, and (3)

that they would ignore even the most elementary precautions. Therefore, it will be recognized that the estimates which follow are what might be termed extreme estimates since they assume the worst possible conditions.

20. On the basis of data collected from the March 1, 1954, thermonuclear test in the Pacific, it is estimated that there was sufficient radioactivity in a downwind belt about 140 miles in length and of varying width up to 20 miles to have seriously threatened the lives of nearly all persons in the area who did not take protective measures. During the actual tests, of course, there were no people in this zone. Inside Bikini Atoll at a point 10 miles downwind from the explosion it is estimated that the radiation dosage was about 5,000 roentgens for the first 36 hour period after the fallout. The highest radiation measurement outside of Bikini Atoll indicated a dosage of 2,300 roentgens for the same period. This was in the northwestern part of the Rongelap Atoll, about 100 miles from the point of detonation. Additional measurements in Rongelap Atoll indicated dosages, for the first 36-hour period, of 2,000 roentgens at 110 miles, 1,000 roentgens at 125 miles, and, farther south, only 150 roentgens at 115 miles from Bikini.

21. Some distance farther from the point of detonation, at about 160 miles downwind and along the axis of the ellipse, the amount of radioactivity would have seriously threatened the lives of about one-half of the persons in the area who failed to take protective measures. It is estimated that the radiation dosage at that point was about 500 roentgens for the first 36-hour period.

22. Near the outer edge of the cigar-shaped area, or approximately 190 miles downwind, it is estimated that the level of radioactivity would have been sufficient to have seriously threatened the lives of 5 to 10 percent of any persons who might have remained exposed out of doors for the first 36 hours. In this area the radiation dosage is estimated at about 300 roentgens for the first 36-hour period.

23. Thus, about 7,000 square miles of territory downwind from the point of burst was so contaminated that survival might have depended upon prompt evacuation of the area or upon taking shelter and other protective measures.

24. At a point of 220 miles or more downwind, it is unlikely that any deaths would have occurred from radioactivity even if persons there had remained exposed up to 48 hours and had taken no safety measures.

25. The estimates cited above do not apply uniformly throughout the contaminated area inasmuch as the intensity of radioactivity within a region of heavy fallout will vary from point to point due to such factors as air currents, rain, snow, and other atmospheric conditions. Because of this and because most persons, if given sufficient warning, probably would evacuate the area or take shelter and other precautionary measures, the actual percentage of deaths could reasonably be presumed to be considerably smaller than these estimates.

PROTECTION AGAINST FALLOUT

26. In an area of heavy fallout the greatest radiological hazard is that of exposure to external radiation. Simple precautionary measures can greatly reduce the hazard to life. Exposure can be reduced by taking shelter and by utilizing simple decontamination measures until such times as persons could leave the area. Test data indicate that the radiation level, i. e., the rate of exposure, indoors on the first floor of an ordinary frame house in a fallout area would be about one-half the level out of doors. Even greater protection would be afforded by a brick or stone house. Taking shelter in the basement of an average residence would reduce the radiation level to about one-tenth that suffered out of doors. Shelter in an old-fashioned cyclone cellar, with a covering of earth 3 feet thick, would reduce the radiation level to about 1/5000, or down to a level completely safe, in even the most heavily contaminated area. Designs of shelters of simple yet effective construction have been prepared by the Civil Defense Administration and are available to the public.

27. Radioactive material deposited during fallout may or may not be visible but would be revealed by radiation detection instruments such as Geiger counters. Any falling dust or ash that can be seen downwind within a few hours after a nuclear explosion should be regarded as radioactive until measured by a radiation detection instrument and found to be harmless.

28. Care should be taken to avoid the use of solid foods or liquids that may contain fallout particles.

29. If fallout particles come into contact with the skin, hair, or clothing, prompt decontamination precautions such as have been prescribed by the Federal Civil Defense Administration will greatly reduce the danger. These include such simple measures as thorough bathing of exposed parts of the body and a change of clothing.

30. If persons in a heavy fallout area heeded warning or notification of an attack and evacuated the area or availed themselves of adequate protective measures, the percentage of fatalities would be greatly reduced even in the zone of heaviest fallout.

FALLOUT FROM NEVADA TESTS

31. Only relatively small nuclear test explosions are conducted at the Nevada test site, in contrast to the tests of high-yield thermonuclear devices at the Pacific proving grounds. In Nevada, as well as in the Pacific, all tests are planned for times when forecast weather conditions minimize the possibility of fallout hazard. Methods of forecasting weather patterns in these areas are improving steadily. High air bursts at the Nevada testing grounds have produced no significant fallout and heavy fallout from near-surface explosions has extended only a few miles from the point of burst. The hazard has been successfully confined to the controlled area of the test site. The highest actual dose of radiation at an off-site community has been estimated to be less than one-third of the greatest amount of radiation which atomic energy workers are permitted to receive each year under the Atomic Energy Commission's conservative safety standards.

INTERNAL RADIATION EFFECTS

32. Several basic facts should be kept in mind in evaluating the hazard from fallout radiation. First, radiation is not a new phenomenon created by the explosions of fission and thermonuclear weapons. Since the beginning of life, living things have been exposed constantly to radiation from natural sources. Cosmic rays from space constantly pass through our bodies. We are exposed to "background" radiation from radium and radon in the soil, water, and air. Our bodies have always contained naturally radioactive potassium and carbon.

33. As pointed out earlier, detonations of all atomic weapons produce radioactivity, a portion of which is carried to high altitudes and over great distances in the form of fine particles. The percentage of this radioactivity which travels beyond the relatively near area of the explosion depends largely on the conditions under which the bomb is fired, the percentage being higher for in-the-air bursts where the fireball does not touch the earth's surface. The most widespread radioactivity is produced only by the longer-lived fission products, since the radioactivity of the shorter-lived products decays and disappears before the particles come down to earth in a matter of days, weeks, months, and even years. The longer lived radioactive products may be distributed over the entire earth. However, as the particles are carried farther and farther to remote aeas, the possibility of significant amounts of fallout decreases.

RADIOSTRONTIUM FALLOUT

34. One of the most biologically important radioactive substances found in fallout is strontium-90. It has a long lifetime—nearly 30 years on the average. Radiostrontium has a chemical similarity to calcium and, therefore, when taken into the body it has a tendency to collect in the bones. Radiostrontium can enter the body in two ways—by inhaling or by swallowing. Normally, the amount inhaled would be small compared with the amount one might swallow. Fallout material deposited directly on edible parts of plants may be eaten along with the plants, but washing the plants before they are eaten would remove most of this radioactive material. However, rainfall carrying the radiostrontium down to earth may deposit it in the soil where it can be taken up, in part, by plants and incorporated into plant tissues, later to be eaten by humans or by grazing animals which, in turn, provide food for humans.

35. Since the start of nuclear tests, careful measurements have been made of the distribution of radiostrontium in the United States—in the soils, in plants and animal tissues, in rain, in the atmosphere, and in all forms in which it might be expected to occur. The results of this study are reassuring. The amount of radiostrontium now present in the soils of the United States as a result of all nuclear explosions to date would have to be increased many thousand times before any effect on humans would be noticeable.

RADIOIODINE FALLOUT

36. Among the shorter-lived fission products involved in the study of internal radiation, the most biologically important is radioiodine–131 with an average life of only 11.5 days. Even though this product may be widely spread after a nuclear explosion, the possibility of serious hazard is limited by its relatively short life. Like the nonradioactive form of the element, it concentrates in the thyroid gland and, in excessive quantity, conceivably could damage the thyroid cells.

37. Scientists of the AEC have estimated that the average exposure of people in the United States from radioiodine in the fallout from the entire series of tests in the spring of 1954 was only a few percent of the annual dose that can be received year after year and still have no noticeable effects.

38. These two isotopes—radiostrontium and radioiodine—constitute the principal internal hazards from the radioactivities produced by the detonations of atomic weapons, both fission and thermonuclear. The Atomic Energy Commission has been engaged for 3 years in a broad study of the radioactive forms of these isotopes and conducts year-round monitoring of these radioactivities in many locations. Any accumulation of these materials can be detected with great sensitivity so that ample warning of potential hazard could be given long before any actual danger occurred. The amounts of radiostrontium and radioiodine which have fallen outside the areas near the test sites as a result of all atomic tests up to now are insignificant compared to concentrations that would be considered hazardous to health.

GENETIC EFFECTS OF RADIATION

39. One other effect of radiation must be considered in evaluating the long-range possibilities of hazard from nuclear detonations. This is the possible genetic effect upon the germ cells which transmit inherited characteristics from one generation to another. At our present stage of genetic knowledge, there is a rather wide range of admissible opinion on this subject.

40. In general, the total amount of radiation received by residents of the United States from all nuclear detonations to date, including the Russian and British tests and all of our own tests in the United States and the Pacific, has been about one-tenth of one roentgen. This is only about 1/100th of the average radiation exposure inevitably received from natural causes by a person during his or her reproductive lifetime. It is about the same as the exposure received from a single chest X-ray.

41. The medical and biological advisers of the Atomic Energy Commission believe that the small amount of additional exposure of the general population of the United States from our nuclear weapons testing program will not seriously affect the genetic constitution of human beings. Nevertheless, we are continuing our thorough study of the entire question and will continue to report our findings to the American people.

SUMMARY

42. The Atomic Energy Commission hopes that the information on nuclear weapons effects contained in the foregoing report will never be reflected in human experience as the result of war. However, until the possibility of an atomic attack is eliminated by a workable international plan for general disarmament, the study and evaluation of weapons effects and civil defense protection measures must be a necessary duty of our government.

43. Inevitably, a certain element of risk is involved in the testing of nuclear weapons, just as there is some risk in manufacturing conventional explosives or in transporting inflammable substances such as oil or gasoline on our streets and highways. The degree of risk must be balanced against the great importance of the test programs to the security of the Nation and of the free world. However, the degree of hazard can be evaluated with considerable accuracy and test conditions can be controlled to hold it to a minimum. None of the extensive data collected from all tests shows that residual radioactivity is being concentrated in dangerous amounts anywhere in the world outside the testing areas.

44. It must be recognized that in the event of war involving the use of atomic weapons, the fallout from large nuclear bombs exploded on or near the ground would create areas of hazard to civilian populations far greater than heretofore experienced. However, as mentioned in the foregoing statement, there are many simple and highly effective precautionary measures which may be taken by individuals to reduce casualties to a minimum outside the immediate area of complete or near-complete destruction by blast and heat. Many of these protective measures, such as shelter and decontamination procedures, have been detailed by the Federal Civil Defense Administration.

THE RECIPROCAL TRADE AGREEMENTS PROGRAM

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Massachusetts [Mr. PHILBIN] is recognized for 45 minutes.

Mr. PHILBIN. Mr. Speaker, first I would like to congratulate the gentlemen who preceded me for the excellent discussion they gave of this very important question presented to the Congress by H. R. 1.

H. R. 1: AN ECONOMIC CONFUSION

The number of industries whose existence and prosperity are challenged and endangered by the reciprocal trade treaties is literally legion and I will not attempt here to set forth a complete enumeration. Available statistics incontrovertibly indicate that the largest unemployment and the greatest distress in the Nation occur in areas where there is greatest import competition. Textiles, critical materials and minerals, fabricated steel products, synthetic organic chemicals, plastic bases, carpet goods, electrical manufacturing, bicycles, motorcycles, wood products, and optical instruments together with many other domestic-produced commodities and products are seriously affected by foreign imports.

A vivid illustration is found in the textile industry, where textile imports have risen steadily and textile employment has declined by some 300,000 persons during the operation period of the treaties. Spokesmen for both northern and southern branches of the textile industry keenly aware of the perils of foreign imports have joined in urging adequate tariff duty. Managers and union-labor representatives have come together in efforts to forestall this ruinous competition.

Critical and strategic metals like lead, zinc, and copper are being progressively affected by foreign competition. Steady drops have occurred in employment in lumber and wood-products industries. Foreign chemical cartels are flooding American markets with competitive goods.

Scientific-instruments industries possessing vital critical skills are so sorely beset by cutthroat foreign competition that the supply of these skills so essential for defense and warfare is steadily but surely diminishing. Unless desperate efforts are taken to conserve these vital skills in American scientific-instruments industries a national emergency or war would witness shortages and deficiencies in this type of worker that might well spell disaster.

This situation was admirably and effectively outlined by a great industrial statesman from my own district, eminent businessman and economist and student of critical industrial skills, Mr. Henry Woodbridge, vice president of the American Optical Co., whose cogent remarks and timely warnings I am especially inserting in the RECORD.

Some New England textile cities have been deluged and swamped with unemployment, distress, and hardship arising in no inconsiderable measure from the impact of the trade treaties. For example, employment in the city of Lawrence, Mass., a beautiful community, so ably represented by my distinguished and amiable friend and colleague [Mr. LANE] dropped from over 20,000 in September of 1950 to 8,700 in September of 1953 and it is estimated that at present perhaps over 15,000 people in that city are out of work.

In Lowell, more than half of the area's jobless workers are displaced textile workers. About the same condition obtains in New Bedford where the textile industry has been steadily declining and unemployment is marked. Similar conditions obtain in many communities throughout the country where, despite the generally high economic and prosperity levels, there are many spots where there is extensive unemployment.

In my own district several communities are affected. Workers have been thrown out of work and established industrial concerns existing for over a hundred years have been forced to curtail their operations or go out of business. Several of these local areas have been designated as employment distress areas by the Government but as a consequence have not thereby been materially helped in securing necessary business through Government procurement, and in some instances are facing desperate conditions.

In textiles, despite the fact that raw material and labor operations have become relatively identical throughout the world, there are vast, existing wage differentials in the industry between this and other nations which completely nullify the normal competitive advantage of the high productivity and efficiency of American industry. These differentials are truly colossal. The gap between the modern American worker and his European or oriental counterpart is so astonishingly wide that it cannot be bridged alone by the superiority of our modern scientific methods and mass production efficiency.

The statistical evidence on this point is both voluminous and undeniable. It overwhelmingly demonstrates that the reciprocal trade treaties are slowly strangling many basic American industries to death. The celebrated economist of Harvard University, Professor Seymour E. Harris, rendered most significant testimony on the question before the Committee, the Tariff Commission and the Committee for Reciprocity Information. This acknowledged expert, a painstaking and able student of economic problems generally and the textile industry in particular, so far as this testimony is concerned, drew some very startling conclusions about the unfavorable prospects for the textile industry under existing Treaty laws and national economic policies.

Professor Harris cannot be regarded as a reactionary, in fact, he is widely recognized as forward-looking and progressive in his thought. Nor is he a trade isolationist or a stagnated classical economist. On the contrary, he is a man of broadest learning and viewpoint, possessed of keen awareness of national and international problems, particularly as they relate to economic factors and developments. He is a detached, impartial and disinterested witness who contributed his time and testimony without compensation as a public service. After setting forth certain basic statistics indicating trends in the textile industry, Professor Harris concluded, in effect, that if current unemployment trends continue, this great industry would be out of business in the Nation in 15 years and in New England in 8 years.

He effectually exploded the theory that under protective meaures the United States would be restricting free trade. Pointing out that the dollar is the only major world currency that is convertible and the relative absence of quotas and exchange control restrictions by this country he minimized the influence of treaty tariff policy in solving

dollar shortages and promoting free trade. The high level of economic activity in the United States, he asserted, is a factor of greater importance than tariffs in determining imports and emphasized the discriminatory aspects of the trade-treaty system excessively burdening the textile industry. Branding the liquidation of the textile industry as "cruel," he sternly opposed the view that trade-treaty tariff policies could solve dollar-shortages problems. We are much indebted to Professor Harris for his discerning and brilliant analysis.

Of course the bare statistics completely support the views and concern expressed by Professor Harris, by prominent industrial and labor leaders and others. In New England alone textile employment has fallen by 48 percent since 1951 and by 267 percent since September a year ago in cotton and rayon mills. The gravity of this situation is focused more clearly when we consider the facts that in New England 1 out of every 6 industrial jobs is in textiles. Textile workers displaced by foreign competition or other factors either remain unemployed, are forced to take lower paying jobs, or as a last resort, are compelled to seek public relief.

The evidence is to the effect that these displaced workers are not being absorbed in large numbers by other industries. The record shows that they are being displaced to a great extent because of foreign competition of workers whose wages are, at highest, about a third and, at lowest, about a 15th of what American workers receive. The wages of American workers are 210 percent of those paid in Great Britain, over 1,000 percent of those in Japan and 1400 percent of those in India.

To admit goods produced at such wage scales into this country in continuing and larger amounts will merely serve to promote a worldwide competitive struggle based on paltry wages and lowly living standards and can only damage, perhaps irreparably, the industrial structure of the United States and, in time, the free world. The American flax manufacturing industry, indeed, all soft fiber and hard fiber textile industries, are confronted under existing treaties with this threatening situation. Unless relief is soon granted, it is clear that the position of many of these industries will be entirely insupportable. They will have no recourse but to go out of business. Hundreds of thousands of loyal workers would lose their jobs.

Now I would like to discuss briefly what other countries are doing regarding the admission of American-made goods to their markets at a time when we are so generously opening up the doors to our markets to foreign-made goods under the reciprocal-trade treaties. The dictionary defines reciprocal as "done or given by each to the other—mutual—mutually interchangeable—expressive of mutual relationship or action." Legally the word "reciprocal" is similarly defined as carrying the implication of mutual and reciprocal responsibility and obligation in accordance with written instruments or protocols. The United States under the so-called reciprocal-trade treaties has implemented these laws in a manner which has been, I reiterate, extremely generous to foreign countries and as a consequence a steadily increasing flow of foreign products is reaching American shores and moving into American markets.

What are other countries doing by way of reciprocal action to implement the agreements and to carry out the spirit and letter of these laws? Many American manufacturers know why it is difficult to sell United States goods abroad. For example, in Britain import of most goods is limited by quotas, licenses are required on imports, dollars needed to buy in the United States are rationed, goods from the rest of the Empire get special, preferential, low tariffs. In West Germany a similar situation obtains. In France, a strict quota system admits only essentials, a strict import licensing system exists, tariffs have been raised and its colonies are induced to favor French goods. In Japan, a system of high tariffs, complex, tangled bureaucratic custom rules, quotas and permits, make United States goods very costly.

In a special report not long ago U. S. News & World Report editors around the globe compiled and listed the barriers generally and specifically set up abroad against American products and goods. There is scarcely a country in the world, they stated, that is not operating under systems of tariff, import and dollar controls, quotas, licenses, and other restrictions on American import.

What is worse, foreign industries financed, constructed and guided by American grants, technical advice and assistance have entered the world markets on a huge scale in competition with American goods. The trend overseas is toward eliminating all American goods except extreme essentials. The automobile industry and household-appliances industry, machine-tool industry, cotton industry, and others supporting H. R. 1 and favoring foreign imports on the theory that low tariffs and high imports here will make foreign exchange available for the purchase of their products, are living in a fool's paradise and I want to tell them right now that they are not going to live in that paradise for very long. As the special report indicated, in practice, foreign controls become protectionist. In setting quotas, foreign officials try to fill their needs from home industries and to eliminate imports by building local manufactures.

European markets for American automobiles are being drastically and steadily limited. Some of the companies have anticipated this development by locating huge factories overseas but this is not helpful, but harmful, to American labor and to the American economy. Indeed, because of blocked exchanges and other restrictions the investors in these industries, generally the only American beneficiaries of American foreign manufacture programs, in the long run are going to find it very difficult, if not impossible, to get any of their money out of these countries.

European nations are gradually tightening rules on imports of autos and parts. In time, the automobile imports overseas will be virtually barred, and the same is true of most other American products, if present trends continue.

Mexico junked a reciprocal trade agreement with the United States it is stated, in order to raise her own tariffs although she continues to benefit munificently from most of the tariff cuts we have made. Germany slapped a 12-percent duty on aluminum as soon as her own industry recovered. Australia set higher rates on canvas, internal combustion engines, and other items. New Zealand is planning to raise tariffs. The Portuguese are studying proposed tariff raises. Practically everywhere American goods are facing exclusion or greatest difficulty in being admitted to foreign markets. Throughout the world, trade barriers remain very high. Many governments find controls suitable for their radical economic planning programs. India allows cars to come in only "knocked down," but she now plans to eliminate assembly plants and eventually make all her own cars. Thus, not only American goods, but American assembly plants and manufacturing establishments are being excluded or slated for drastic regulation in many countries.

Free trade was the dream of some classical economist. But like the automatic gold standard, it has gone the way of all flesh and not only is no longer a reality in most parts of the world, but has become virtually an impossibility to achieve. Only the Pollyannas of our State Department, the do-good, bleeding heart, world-state elements that have already done so much damage to our foreign policy and our economy, some definitely left-wing propagandists, also wedded to radical theories and, unfortunately, some international bankers and industrial business tycoons who are long on ready cash but short on judgment of long time economic trends in the world, are enthusiastically pressing for this policy of lop-sided reciprocity which is, to be sure, no reciprocity at all, since this Nation is making practically all the concessions and doing all the reciprocating while many other nations are tightening their imports controls and inaugurating drastic restrictions. The reciprocal trade treaties were sponsored, implemented, and promoted by some who neither believe in our economic system or our free way of life.

You do not have to be a professional economist to know that this course is going to lead this Nation to perdition. If we keep the door open for cutthroat competition by foreign goods and products produced at a fraction of our domestic cost, it is only a question of time—and not a long time at that—before our economic system will be shattered and wrecked.

I am willing to help impoverished nations and people solve their governmental and living problems and get back on their feet economically, socially, militarily, and spiritually. I have voted for many proposals to carry out this laudable objective within reason and our capacity. But I think that it is time now to make a complete, careful reappraisal of our economic position in the world, to study existing economic trends, to analyze existing trade policies directed against our foreign and domestic mar-

kets, and to recognize the need—yes, the urgency—for keeping our own economic structure and system strong, vital, and vigorous.

Because the present administration has thrown its weight and influence behind this free-trade policy, there is little prospect for materially changing or defeating the present bill. Nevertheless, I regard this measure not only as unsound and unwise, but I warn that it contains the germs of disintegration and dissolution of our great and matchless economic system. It could well bring our great economy down to ruin.

One of the most disturbing features of this bill is the speed with which it has been catapulted through the committee and the Congress. The subject matter of this bill is of vital importance to the Nation and the economy. It presumes to deal with extremely complex economic and political questions. It is a measure, not only of great importance, but of far-reaching, deep-seated ramifications.

In my humble opinion it should have been considered over a much longer period of time. Since it is not an emergency measure, it should have been considered without the fervor, haste, and sense of urgency that characterized its legislative course.

I have concluded, as one consequence of my long experience in public life, that there is nothing in the legislative branch so calculated to produce definitely bad results, confusion, and uncertainty as legislation which is rushed through the Congress. Such legislation merely complicates our long-run task as lawmakers because subsequent sessions of Congress must invariably seek to undo what has been unwisely done in haste and under pressure.

The recent history of Congress is replete with instances of measures hastily adopted, which have had to be altered and materially changed to avoid harmful results of one kind or another. Haste makes waste, and that is just as true of legislation as it is of everything else.

I am very sorry that this measure could not have been given more extensive consideration so that a moderate approach and mature judgments might possibly be substituted for overzealousness, fervor, and preconceived theories.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. PHILBIN. I yield to the gentleman from West Virginia.

Mr. BAILEY. In connection with the point the gentleman is making of restrictions set up by foreign countries, may I remind the gentleman that of the imports coming into this country 65 percent are on the free list. So far as America is concerned that is double the amount of items on the free list of other nations that are parties to the reciprocal trade agreements program. These restrictions that they set up against our exports are completely out of line with the restrictions here in America, because only 35 percent of the foreign imports are on the duty list whereas the other 65 percent are on the free list.

Mr. PHILBIN. The gentleman has made a very cogent point.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. PHILBIN. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. The gentleman is making a very fine statement. May I ask the gentleman if he thinks the farmers realize what will happen to their markets if our mills are further closed down? There will be no market for the milk, butter, eggs, and all of the farm products that they produce. I think the farmers sometimes do not realize what closing the mills and putting all of these thousands of people out of work will do to them.

Mr. PHILBIN. The gentlewoman has as usual put her finger on a very vital point. I hope that the farmer does realize the implications of this legislation. It will result in chaos for the farmer if the textile market is closed down or retarded any further.

Mrs. ROGERS of Massachusetts. The Farm Bureau does not realize what it is going to do to them. Workers from all over the country have been getting in touch with me in protest, as well as manufacturers. The farmers do not realize what it will do to their domestic market which they are now assured of.

Mr. PHILBIN. I hope that the farmers will take a realistic position in reference to this bill and I want to thank the gentlewoman who is always so much interested in these problems, especially those affecting her own district.

THE TEXTILE INDUSTRY

The SPEAKER pro tempore. Under previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 10 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I have asked and received unanimous consent to insert in the RECORD a full-page advertisement which appeared in the Lowell Sun. I should like to quote just briefly from this advertisement:

I like living in the United States. I like living in Massachusetts. I like my home and job here in Lowell because these are matters of my own choice. But here is a point which bothers me and my wife. It's this rumbling in Washington about a new bill coming up Thursday of this week in the House of Representatives which will lower the tariff. It seems to me this is going to make a big difference in my job, my home, and my future.

If you vote to pass this bill to lower the tariff, it means that people in England who work for 45 cents per hour; also people in France who work for 43 cents per hour, Italy at 30 cents, and Japan at 14 cents, they will all be working steady but I won't.

It's just as simple as that.

I'm just one of many workers all over the country, whose homes and jobs will be affected by the passage of this bill. If you are interested in me, my family, my home, and Lowell, please do not approve this bill.

Respectfully yours,

A WORRIED WORKER.

Then it is signed by many of the biggest manufacturers of the cotton-woolen textile industry in Massachusetts.

It says:

If you work for wages, own a store, run a business, or are a housewife, you have a deep interest in affairs in Washington during the coming few days. Along about Thursday your Congressmen will be asked to vote on a bill to lower the tariff. Congressmen are sent to Washington to represent the people back home. But you've got to let them know how you feel.

Once again our jobs and homes are in danger because of the tariff. They are in danger because some people—the free traders—are trying to pass a bill in Congress to cut United States tariffs 15 percent in the next 3 years. The free traders don't worry about your job.

Tariffs actually are supposed to even up the big wage gap between your pay and that in foreign mills. Our tariffs now are too low as it is. That is why imports coming to the United States can undersell the goods we make here.

You are competing with England, where mill pay is about 45 cents an hour. You are competing with France, where it is about 43 cents; with Italy, where it is 30 cents; and with Japan, where it is only 14 cents an hour. Our low tariffs now are no bar to imported goods, yet the United States Government is willing to cut tariffs again on many kinds of textiles to aid Japan.

The people who want to cut tariffs say you can learn a new kind of work if imports kill your job. They say you can move some place else and try to find work.

Bear in mind, and tell your Congressman, that if H. R. 1 becomes a law, it means Congress once more, and to a greater degree than ever, will have given up its constitutional obligation to control our foreign trade. The State Department will continue in the saddle. If H. R. 1 passes, there is nothing your Congressman and Senators can do to help you combat imports. They might protest to the State Department, but it would be too late, because the Department again would have the power Congress surrendered.

All of the people in the city of Lowell and the surrounding towns are asked to write to their Congressmen. The gentleman from Massachusetts [Mr. PHILBIN] and I have had several letters on this subject. I am glad to have the additional letters coming in. I saw some workers today from Pennsylvania, and they made some very fine statements.

Mr. PHILBIN. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield to the gentleman from Massachusetts.

Mr. PHILBIN. I want to compliment the gentlewoman on the excellent speech she made and particularly upon those splendid, pertinent remarks she read from the paper that she is evidently going to include as part of her remarks.

Mrs. ROGERS of Masachusetts. Yes.

Mr. PHILBIN. It was stated very succinctly and vividly sets forth the true situation that is presented to the country. There is no way to meet the situation that confronts the people as the result of these tariff cuts.

Mrs. ROGERS of Massachusetts. I thank the gentleman.

And, they talk of a number of other related industries in our district and all over the country that will be affected and closed down when our textile mills close down. Many do not seem to realize what it is going to do to the farmers who will not have their local markets to sell their agricultural products, their butter, their eggs, their cheese, and other commodities. It is going to ruin a lot of those farmers. Also, there are a good many farmers who have mortgages at

the banks, and if the money is not forthcoming on the sale of their products, they will not be able to pay off their mortgages. I do not think some of the farmers realize that.

LEAVE OF ABSENCE

Mr. FRELINGHUYSEN. Mr. Speaker, I ask unanimous consent that a week's leave of absence be granted to my colleague the gentleman from Nevada, Mr. YOUNG, on account of illness, for the week ending February 19.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

By unanimous consent, leave of absence was granted to:

Mr. HOEVEN (at the request of Mr. MARTIN), on account of official business.

Mr. GEORGE (at the request of Mr. MARTIN), on account of serious illness and death in family.

Mr. PROUTY (at the request of Mr. MARTIN), for 10 days, on account of illness of his wife.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. BOGGS.

Mr. MAGNUSON.

Mr. KELLEY of Pennsylvania and to include a reply to the statement of Charles Taft before the Committee on Ways and Means and the Joint Economic Committee on the coal industry.

Mr. LANE and to include an article, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $260.

Mr. MASON on the subject of the Eisenhower school program and to include an editorial.

Mr. SCOTT and to include extraneous matter, notwithstanding that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $400.

Mr. VAN ZANDT.

Mr. THOMPSON of New Jersey and to include extraneous matter.

Mr. MACK of Illinois and to include a speech.

Mr. REED of New York.

Mr. RABAUT, in two instances.

Mr. HOFFMAN of Michigan.

Mr. HALE and include an editorial.

Mr. ALGER and include a speech delivered by the minority leader, Hon. JOSEPH W. MARTIN, Jr., in Dallas, Tex.

Mr. QUIGLEY and to include extraneous matter.

Mr. BYRD in three instances, in each to include extraneous matter.

Mr. ANFUSO (at the request of Mr. MULTER) and to include extraneous matter.

Mr. ZELENKO.

Mr. RODINO.

Mr. GWINN and to include extraneous matter.

Mr. FULTON (at the request of Mr. MCCULLOCH).

Mr. LESINSKI in two instances.

ADJOURNMENT

Mr. MURRAY of Illinois. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 54 minutes p. m.) the House adjourned until tomorrow, Thursday, February 17, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

439. A communication from the President of the United States, transmitting a proposed amendment to the budget for fiscal year 1956 involving a reduction in the amount of $3,500,000 (H. Doc. No. 91); to the Committee on Appropriations and ordered to be printed.

440. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to authorize the Secretary of Defense and the Secretaries of the Army, the Navy, and the Air Force to reproduce and to sell copies of official records of their respective departments, and for other purposes"; to the Committee on Armed Services.

441. A letter from the Archivist of the United States, transmitting a report of records proposed for disposal pursuant to the provisions of the act approved July 7, 1943 (57 Stat. 380) as amended by the act approved July 6, 1945 (59 Stat. 434); to the Committee on House Administration.

442. A letter from the Secretary of Health, Education, and Welfare, transmitting a report of all tort claims paid under section 2672 of title 28, United States Code, for the period January 1, 1954, to December 31, 1954, pursuant to section 2673 of title 28, United States Code; to the Committee on the Judiciary.

443. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation and a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (5)); to the Committee on the Judiciary.

444. A letter from the Deputy Maritime Administrator, Maritime Administration, Department of Commerce, transmitting the annual report of the Federal Maritime Board and Maritime Administration for the fiscal year 1954; to the Committee on Merchant Marine and Fisheries.

445. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to amend the Act of June 27, 1942 (ch. 453, 56 Stat. 461), as amended, to make permanent the exemptions from duty of personal and household effects, and for other purposes"; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of February 14, 1954, the following resolutions were reported on February 15, 1954:

Mr. DELANEY: Committee on Rules. House Resolution 141. Resolution for consideration of H. R. 3828, a bill to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes; without amendment (Rept. No. 51). Referred to the House Calendar.

Mr. SMITH of Virginia: Committee on Rules. House Resolution 142. Resolution for consideration of H. R. 1, a bill to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes; without amendment (Rept. No. 52). Referred to the House Calendar.

[*Submitted February 16, 1955*]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DURHAM: Committee on Armed Services. H. R. 2123. A bill to repeal Public Law 820, 80th Congress (62 Stat. 1098), entitled "An act to provide a revolving fund for the purchase of agricultural commodities and raw materials to be processed in occupied areas and sold"; without amendment (Rept. No. 53). Referred to the Committee of the Whole House on the State of the Union.

Mr. DURHAM: Committee on Armed Services. H. R. 2581. A bill to promote the national defense by authorizing the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research; with amendment (Rept. No. 54). Referred to the Committee of the Whole House on the State of the Union.

Mr. LONG: Joint Committee on the Disposition of Executive Papers. House Report No. 55. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. VELDE: Committee on Un-American Activities. Annual report of the Committee on Un-American Activities pursuant to House Resolution 5, 84th Congress (Rept. No. 57). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H. R. 3952. A bill to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; with amendment (Rept. No. 58). Referred to the Committee of the Whole House on the State of the Union.

ADVERSE REPORTS

Under clause 2 of rule XIII,

Mr. VINSON: Committee on Armed Services. House Resolution 136. Resolution requesting the Secretary of Defense to furnish the House of Representatives certain information as to extent and cost of military installation (Rept. No. 56). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. THOMPSON of Texas:

H. R. 4045. A bill to provide for settlement of claims for damages resulting from the disaster which occurred at Texas City, Tex., on April 16 and 17, 1947; to the Committee on the Judiciary.

By Mr. BARTLETT:

H. R. 4046. A bill to abolish the Old Kasaan National Monument, Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 4047. A bill relating to the establishment of public recreation facilities in Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BURLESON:

H. R. 4048. A bill to permit and assist Federal personnel, including members of the Armed Forces, and their families, to exercise their voting franchise, and for other pur-

poses; to the Committee on House Administration.

By Mr. BURNSIDE:

H. R. 4049. A bill to amend the Federal Property and Administrative Services Act of 1949 so as to improve the administration of the program for the utilization of surplus property for educational and public health purposes; to the Committee on Government Operations.

H. R. 4050. A bill to promote the further development of public library service in rural areas; to the Committee on Education and Labor.

By Mr. CELLER:

H. R. 4051. A bill to provide for the relief of certain Army and Air Force nurses, and for other purposes; to the Committee on the Judiciary.

H. R. 4052. A bill to amend the act of January 12, 1951, as amended, to continue in effect the provisions of title II of the First War Powers Act, 1941; to the Committee on the Judiciary.

By Mr. COLE:

H. R. 4053. A bill to amend the Agricultural Adjustment Act of 1938 to exempt certain wheat producers from liability under the act where all the wheat crop is fed or used for seed on the farm, and for other purposes; to the Committee on Agriculture.

By Mr. COOLEY:

H. R. 4054. A bill to encourage the improvement and development of marketing facilities for handling perishable agricultural commodities; to the Committee on Agriculture.

By Mr. CRETELLA:

H. R. 4055. A bill to appropriate $3,460,000 to carry out the authorized project for the development of New Haven Harbor, including construction of a channel in the Quinnipiac River with a turning basin at the mouth of the Mill River; to the Committee on Appropriations.

H. R. 4056. A bill to provide for the construction of certain flood-control works along the east bank of the Mill River near New Haven, Conn.; to the Committee on Public Works.

H. R. 4057. A bill to provide for a determination by the Board of Engineers for Rivers and Harbors of the advisability of modifying the existing project at New Haven Harbor, Conn., in view of changed shipping and economic conditions; to the Committee on Public Works.

By Mr. CURTIS of Massachusetts:

H. R. 4058. A bill to extend the home-loan provisions of the Servicemen's Readjustment Act of 1944 to veterans of World War I and their widows; to the Committee on Veterans' Affairs.

By Mr. DEANE:

H. R. 4059. A bill to repeal section 348 of the Agricultural Adjustment Act of 1938; to the Committee on Agriculture.

By Mr. DIGGS:

H. R. 4060. A bill to amend title 18 of the United States Code so as to allow compensation to counsel assigned by the court in criminal cases; to the Committee on the Judiciary.

By Mr. DOLLINGER:

H. R. 4061. A bill to provide for promotion by merit of employees in the postal service and to establish uniform procedures for examination and appointment of candidates for promotion to supervisory positions; to the Committee on Post Office and Civil Service.

By Mr. DOYLE:

H. R. 4062. A bill to increase the national minimum wage to $1.25 an hour; to the Committee on Education and Labor.

By Mr. FINE:

H. R. 4063. A bill granting exemption from income tax in the case of retirement annuities and pensions; to the Committee on Ways and Means.

H. R. 4064. A bill to amend the United States Housing Act of 1937 to establish a program for the housing of elderly persons of low income; to the Committee on Banking and Currency.

By Mr. FLOOD:

H. R. 4065. A bill to amend the Public Buildings Act of 1949 so as to eliminate the 1-year limitation on the period of leases of space for Federal agencies in the District of Columbia; to the Committee on Public Works.

By Mrs. HARDEN:

H. R. 4066. A bill to amend the act of August 23, 1954, relating to reimbursement to postmasters of discontinued post offices for equipment owned by the postmaster; to the Committee on Post Office and Civil Service.

H. R. 4067. A bill to provide that equipment for use in post offices shall be furnished by the Post Office Department, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. HARDY:

H. R. 4068. A bill to authorize the conveyance of certain war housing projects to the county of Norfolk, Va.; to the Committee on Banking and Currency.

By Mr. HILLINGS (by request):

H. R. 4069. A bill to extend the benefits of the pension laws to certain male nurses who served under contract with the United States between April 21, 1898, and February 2, 1901; to the Committee on Veterans' Affairs.

By Mr. IKARD:

H. R. 4070. A bill to exempt ultrahigh frequency television receiving sets from Federal excise tax; to the Committee on Ways and Means.

By Mr. JONES of Alabama:

H. R. 4071. A bill to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. KEATING:

H. R. 4072. A bill to amend title II of the Social Security Act to provide monthly insurance benefits for certain dependent parents of individuals entitled to old-age insurance benefits; to the Committee on Ways and Means.

H. R. 4073. A bill to improve the enforcement of laws pertaining to gambling by suppressing the transmission of certain gambling information; to the Committee on Interstate and Foreign Commerce.

By Mr. KEOGH:

H. R. 4074. A bill relating to the definition of the term "bond" for purposes of determining amortizable bond premium under section 171 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. LANKFORD:

H. R. 4075. A bill creating a Federal commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents and a music, fine arts, and mass communications center; to the Committee on the District of Columbia.

By Mr. LESINSKI:

H. R. 4076. A bill to increase the rates of basic salary of postmasters, officers, supervisors, and employees in the postal field service, to eliminate certain salary inequities, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 4077. A bill to amend section 12 of the Civil Service Retirement Act of May 29, 1930, as amended, so as to provide for the payment of annuities thereunder to the widowers of female employees who die in service; to the Committee on Post Office and Civil Service.

H. R. 4078. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide a uniform rate for the computation of all annuities, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 4079. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide that the surviving widows or widowers of retiring employees shall automatically be entitled to an annuity equal to 50 percent of the annuity earned by the retiring employee without requiring the retiring employees to elect to take reduced annuities; to the Committee on Post Office and Civil Service.

H. R. 4080. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide that accumulated sick leave over 90 days be credited to retirement fund; to the Committee on Post Office and Civil Service.

H. R. 4081. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide optional retirement at 60 years after 25 years of service with full annuity; to the Committee on Post Office and Civil Service.

H. R. 4082. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide equal benefits for surviving children of female employees as are provided for surviving children of male employees; to the Committee on Post Office and Civil Service.

H. R. 4083. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to eliminate reduction in annuity made for surviving spouse, if spouse does not survive; to the Committee on Post Office and Civil Service.

H. R. 4084. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, so as to provide a full annuity compensation for employees involuntarily separated after having rendered at least 25 years of service; to the Committee on Post Office and Civil Service.

H. R. 4085. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide that annuities shall be adjusted simultaneously with general adjustments in Federal employees salaries; to the Committee on Post Office and Civil Service.

H. R. 4086. A bill to extend the time within which local educational agencies may complete applications for payments under Public Law 815 in certain hardship cases; to the Committee on Education and Labor.

H. R. 4087. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

H. R. 4088. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide optional retirement at age 55 with 30 years service; to the Committee on Post Office and Civil Service.

H. R. 4089. A bill to amend section 4 (a) of the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

By Mr. McCORMACK:

H. R. 4090. A bill to amend part II of title III of the Communications Act of 1934, so as to require the installation of an automatic radio-telegraph call selector on cargo ships of the United States carrying less than two radio operators, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. McDOWELL:

H. R. 4091. A bill to amend section 812 (d) of the Internal Revenue Code of 1939 with respect to the deduction of inheritance, succession, or other death taxes imposed by law other than Federal; to the Committee on Ways and Means.

H. R. 4092. A bill to amend section 162 of the Internal Revenue Code of 1939; to the Committee on Ways and Means.

By Mr. MILLER of Maryland:

H. R. 4093. A bill to authorize the Secretary of Commerce, acting through the Coast and Geodetic Survey, to assist the States of Maryland and Delaware to reestablish their common boundary; to the Committee on the Judiciary.

H. R. 4094. A bill to provide certain decorations for outstanding and heroic conduct or

service by persons serving in the American merchant marine; to the Committee on Merchant Marine and Fisheries.

H. R. 4095. A bill to incorporate National Service Star Legion; to the Committee on the Judiciary.

By Mr. O'BRIEN of New York:

H. R. 4096. A bill to provide for the disposal of public lands within highway, telephone, and pipeline withdrawals in Alaska, subject to appropriate easements, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. O'HARA of Minnesota:

H. R. 4097. A bill to amend the Interstate Commerce Act, as amended, with respect to the issuance of certificates of public convenience and necessity, and relating to railway property; to the Commitee on Interstate and Foreign Commerce.

By Mr. PRIEST:

H. R. 4098. A bill to provide for studies of the methods of determining the amount, distribution, and effects of illness in the United States and for conducting periodic inventories of illness by the best methods developed through such studies; to the Committee on Interstate and Foreign Commerce.

H. R. 4099. A bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act to prohibit the use in food of new chemical additives which have not been adequately tested to establish their safety; to the Committee on Interstate and Foreign Commerce.

By Mr. O'HARA of Minnesota:

H. R. 4100. A bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act to prohibit the use in food of new chemical additives which have not been adequately tested to establish their safety; to the Committee on Interstate and Foreign Commerce.

By Mr. QUIGLEY:

H. R. 4101. A bill to provide that school districts which filed applications for payments under Public Law 815, 81st Congress, before November 24, 1953, shall not be penalized on account of school construction contracts made after that date; to the Committee on Education and Labor.

By Mr. REED of Illinois:

H. R. 4102. A bill to require the registration of certain persons who have knowledge of or have received instruction or assignment in the espionage, counterespionage, or sabotage service or tactics of a foreign government or foreign political party, and for other purposes; to the Committee on the Judiciary.

H. R. 4103. A bill to provide for the representation of indigent defendants in criminal cases in the district courts of the United States; to the Committee on the Judiciary.

H. R. 4104. A bill to amend title 18, United States Code, regarding published articles and broadcasts by foreign agents; to the Committee on the Judiciary.

H. R. 4105. A bill to amend sections 1, 3, and 4 of the Foreign Agents Registration Act of 1938, as amended; to the Committee on the Judiciary.

By Mr. RIVERS:

H. R 4106. A bill to authorize the crediting, for certain purposes, of prior active Federal commissioned service performed by a person appointed as a commissioned officer under section 101 or 102 of the Army-Navy Nurses Act of 1947, as amended, and for other purposes; to the Committee on Armed Services.

By Mr. SMITH of Mississippi:

H. R. 4107. A bill to amend certain provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. THOMPSON of Louisiana:

H. R. 4108. A bill to provide for minimum 1955 State rice acreage allotments; to the Committee on Agriculture.

By Mr. THOMPSON of New Jersey:

H. R. 4109. A bill to establish an advisory board to assist the Commission created by the joint resolution of December 20, 1944, in considering a site and design for a National Memorial Stadium in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. VANIK:

H. R. 4110. A bill to authorize the modification of the existing project for the Great Lakes connecting channels above Lake Erie; to the Committee on Public Works.

By Mr. VINSON:

H. R. 4111. A bill to extend the existing authority for the loan of a small aircraft carrier to the Government of France; to the Committee on Armed Services.

By Mr. WILLIS:

H. R. 4112. A bill to provide for minimum 1955 State rice acreage allotments; to the Committee on Agriculture.

By Mr. WOLVERTON:

H. R. 4113. A bill to provide that compensation of a Federal officer or employee shall be subject to State tax only in the State where he is domiciled, and for other purposes; to the Committee on Ways and Means.

H. R. 4114. A bill to provide assistance to certain non-Federal institutions for construction of facilities for research in crippling and killing diseases such as cancer, heart disease, poliomyelitis, nervous disorders, mental illness, arthritis and rheumatism, blindness, cerebral palsy, and muscular dystrophy, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. YOUNG:

H. R. 4115. A bill to define the surface rights vested in the locator of a mining claim hereafter made under the mining laws of the United States, prior to issuance of patent therefor, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BERRY:

H. R. 4116. A bill to authorize and direct the Indian Claims Commission to determine the liability for the engagement in the vicinity of Wounded Knee, S. Dak., on December 29, 1890, and make recommendations in respect thereto; to the Committee on Interior and Insular Affairs.

H. R. 4117. A bill to authorize the construction of a sewage-treatment plant to serve the St. Joseph's Indian School, Chamberlain, S. Dak.; to the Committee on Interior and Insular Affairs.

By Mr. BONNER:

H. R. 4118. A bill to amend section 606 (5) of the Merchant Marine Act, 1936, relating to the computation of the 10-year recapture period; to the Committee on Merchant Marine and Fisheries.

By Mr. BURNSIDE:

H. R. 4119. A bill relating to farm-acreage allotments for burley tobacco under the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

H. R. 4120. A bill to establish quota limitations on imports of foreign residual fuel oil; to the Committee on Ways and Means.

By Mr. FLOOD:

H. R. 4121. A bill declaring October 12 to be a legal holiday; to the Committee on the Judiciary.

By Mr. FOGARTY:

H. R. 4122. A bill to increase the national minimum wage to $1.25 an hour; to the Committee on Education and Labor.

H. R. 4123. A bill to provide for the refund of the Federal excise tax on distilled spirits lost, or damaged by the hurricanes of 1954; to the Committee on the Judiciary.

By Mr. FRAZIER:

H. R. 4124. A bill to amend the Civil Service Retirement Act of May 29, 1930, to provide annuities for widows of officers and employees separated from the service with title to deferred annuity who die before having established a valid claim for annuity; to the Committee on Post Office and Civil Service.

By Mr. LESINSKI:

H. R. 4125. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, so as to exempt from taxation annuities of retired employees; to the Committee on Post Office and Civil Service.

By Mr. MARSHALL:

H. R. 4126. A bill to encourage a stable, prosperous, and productive dairy program, and for other purposes; to the Committee on Agriculture.

By Mr. MOLLOHAN:

H. R. 4127. A bill to exempt courses leading to standard college degrees offered by nonprofiit educational institutions of higher learning from the provisions of section 227 of the Veterans' Readjustment Assistance Act of 1952 prohibiting the enrollment of eligible veterans under that act when such courses have been in operation for less than 2 years; to the Committee on Veterans' Affairs.

By Mr. UTT:

H. R. 4128. A bill to amend section 203 (j) of the Federal Property and Administrative Services Act of 1949, as amended, to permit the disposal of surplus property to State health departments and publicly owned water districts; to the Committee on Government Operations.

By Mr. BROYHILL:

H. J. Res. 215. Joint resolution proposing an amendment to the Constitution to provide that Congress shall have power to grant representation in the Congress to the people of the District of Columbia; to the Committee on the Judiciary.

H. J. Res. 216. Joint resolution proposing an amendment to the Constitution to provide that the people of the District of Columbia shall be entitled to vote in presidential elections; to the Committee on the Judiciary.

By Mr. COLE:

H. J. Res. 217. Joint resolution to authorize and request the President to require the flag to be flown at certain foreign service posts during daylight hours; to the Committee on the Judiciary.

By Mr. WILLIAMS of New Jersey:

H. J. Res. 218. Joint resolution to establish a Joint Committee on Internal Security; to the Committee on Rules.

By Mr. YATES:

H. J. Res. 219. Joint resolution authorizing the President of the United States of America to proclaim February 3 of each year as Dorchester Day for the observance and commemoration of the deaths and the heroic act of Chaplains Clark V. Poling, George L. Fox, John Patrick Washington, and Alexander D. Goode; to the Committee on the Judiciary.

By Mr. PATMAN:

H. Con. Res. 85. Concurrent resolution authorizing the printing as a House document the pamphlet, Our American Government, What Is It? How Does It Function? to the Committee on House Administration.

By Mr. BUCKLEY:

H. Res. 144. Resolution authorizing and directing the Committee on Public Works to conduct thorough studies and investigations relating to matters coming within the jurisdiction of such committee under clause 15 of rule XI of the Rules of the House of Representatives; to the Committee on Rules.

By Mr. WILLIS:

H. Res. 145. Resolution authorizing reprinting of House Document 210, 83d Congress; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. METCALF: Memorial of the Montana Legislature relating to irrigation canal seepage, mosquito control, and land development; to the Committee on Interior and Insular Affairs.

By Mr. THOMPSON of New Jersey: Joint resolution of the New Jersey Legislature memorializing the Congress of the United States to amend the Hayden-Cartwright Act of 1934 and subsequent Federal-aid highway acts to provide for the elimination of provisions which would deprive those States of Federal highway aid which are spending motor fuel and motor vehicle tax receipts for nonhighway purposes; to the Committee on Public Works.

By Mr. WICKERSHAM: Memorial memorializing the Congress that the continued excessive importation of foreign oil and its derivatives is inimical to the well-being of the United States of America and the State of Oklahoma; to the Committee on Ways and Means.

By the SPEAKER: Memorial of the Legislature of the State of New Jersey, memorializing the President and the Congress of the United States to amend the Hayden-Cartwright Act of 1934 and subsequent Federal-aid highway acts relative to the use of motor fuel and motor vehicle tax receipts for nonhighway purposes; to the Committee on Public Works.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H. R. 4129. A bill for the relief of Pearl Luba; to the Committee on the Judiciary.

By Mr. BLATNIK:

H. R. 4130. A bill for the relief of Peter Penovich; to the Committee on the Judiciary.

H. R. 4131. A bill for the relief of Joe Penovich, Lorenzo Laconi and Joseph Laconi; to the Committee on the Judiciary.

By Mr. BOLAND:

H. R. 4132. A bill for the relief of Bayazit Taygan; to the Committee on the Judiciary.

By Mr. CLARK:

H. R. 4133. A bill for the relief of Rem-Cru Titanium, Inc.; to the Committee on the Judiciary.

By Mr. DAVIDSON (by request):

H. R. 4134. A bill for the relief of Moses Aftergut; to the Committee on the Judiciary.

By Mr. DEVEREUX:

H. R. 4135. A bill for the relief of Edoardo Maria Filippo Baldassare Perrone di San Martino; to the Committee on the Judiciary.

By Mr. DOYLE:

H. R. 4136. A bill for the relief of Ada M. Funk; to the Committee on the Judiciary.

By Mr. FLOOD:

H. R. 4137. A bill for the relief of Mitsuko A. Hachita; to the Committee on the Judiciary.

By Mr. FORAND:

H. R. 4138. A bill for the relief of Harilaos G. Tsironas; to the Committee on the Judiciary.

By Mr. FRIEDEL (by request):

H. R. 4139. A bill for the relief of Evangelia Focas; to the Committee on the Judiciary.

By Mr. GRAY:

H. R. 4140. A bill for the relief of Gabriel Sho-Tse Tsiang; to the Committee on the Judiciary.

By Mrs. HARDEN:

H. R. 4141. A bill for the relief of Vivencio Fernando Raymundo; to the Committee on the Judiciary.

By Mr. HAYS of Arkansas:

H. R. 4142. A bill for the relief of Mrs. Ulysses M. Roberts; to the Committee on the Judiciary.

By Mr. HESS:

H. R. 4143. A bill for the relief of Adib Farid Tabri; to the Committee on the Judiciary.

By Mr. HUDDLESTON:

H. R. 4144. A bill for the relief of Dr. Lincoln Roy Manson-Hing; to the Committee on the Judiciary.

By Mr. HYDE:

H. R. 4145. A bill for the relief of Mrs. Isolina Alvarez Groton; to the Committee on the Judiciary.

By Mr. KELLEY of Pennsylvania:

H.R. 4146. A bill for the relief of Adelheid (Heidi) Giessner (nee Schega); to the Committee on the Judiciary.

By Mr. KILBURN:

H. R. 4147. A bill for the relief of Angelo De Vito; to the Committee on the Judiciary.

By Mr. LANE:

H. R. 4148. A bill for the relief of McFarland Cockrill, and for other purposes; to the Committee on the Judiciary.

By Mr. LIPSCOMB:

H. R. 4149. A bill for the relief of On Saik Chiang and Mrs. Nena Tabongbanua Yee Chiang; to the Committee on the Judiciary.

By Mr. NORBLAD:

H. R. 4150. A bill for the relief of Wong Ma Chee; to the Committee on the Judiciary.

By Mr. POWELL:

H. R. 4151. A bill for the relief of Pietro Pipitone; to the Committee on the Judiciary.

By Mr. RABAUT:

H. R. 4152. A bill for the relief of Maria Pintos and her daughter, Eugenia Pintos; to the Committee on the Judiciary.

H. R. 4153. A bill for the relief of Romilos Sarri; to the Committee on the Judiciary.

By Mr. REED of Illinois:

H. R. 4154. A bill for the relief of Alzbeta Katerina Szwabe; to the Committee on the Judiciary.

By Mr. RODINO:

H. R. 4155. A bill for the relief of Rosa Daschner; to the Committee on the Judiciary.

By Mr. SADLAK:

H. R. 4156. A bill for the relief of Dr. and Mrs. Henri Revilliod; to the Committee on the Judiciary.

H. R. 4157. A bill for the relief of Bronislaw (John) Waz; to the Committee on the Judiciary.

By Mr. SHEPPARD:

H. R. 4158. A bill for the relief of David Kehsin Wang; to the Committee on the Judiciary.

By Mr. SIEMINSKI:

H. R. 4159. A bill for the relief of Maria Pas Singson Garcia; to the Committee on the Judiciary.

By Mr. SIKES:

H. R. 4160. A bill for the relief of Mrs. Anna Glen Robertson; to the Committee on the Judiciary.

By Mr. SIMPSON of Pennsylvania:

H. R. 4161. A bill to authorize former Maj. John R. Brown, Jr., United States Air Force, to accept the Air Force wings and supporting documents conferred upon him by the Government of Pakistan; to the Committee on Armed Services.

By Mr. TUCK:

H. R. 4162. A bill for the relief of Kahzo L. Harris; to the Committee on the Judiciary.

By Mr. WOLCOTT:

H. R. 4163. A bill for the relief of Kocci-mides Nicolas Katsibris; to the Committee on the Judiciary.

By Mr. ZABLOCKI:

H. R. 4164. A bill for the relief of Ahmet Suat Maykut; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

93. By Mr. SMITH of Wisconsin: Resolution of the Wisconsin Cooperative Wool Growers Association meeting at Madison, Wis., urging the Department of Agriculture and the directors of the Commodity Credit Corporation to provide for assignments by wool growers of the incentive payments to banks, credit institutions, and marketing agencies, including cooperatives, who have financed wool for growers in the past; to the Committee on Agriculture.

94. By the SPEAKER: Petition of the board of supervisors, San Diego, Calif., relative to the observance of the centennials of the opening of the Pacific overland mail; to the Committee on the Judiciary.

95. Also, petition of Vachel Davis, Eldorado, Ill., requesting that the action of the Joint Committee on Post Office and Civil Service, in 1949, that gave the Postmaster General full powers to select and authorize issuance of all special commemorative postage stamps, be repealed; to the Committee on Post Office and Civil Service.

96. Also, petition of the executive director, the Cooperative League of the U. S. A., Chicago, Ill., urging the United States to continue its support of the international technical assistance program of the United Nations and its associated agencies; to the Committee on Foreign Affairs.

97. Also, petition of the secretary, National Association of State Racing Commissioners, Lexington, Ky., urging careful consideration be given the result of imposing additional taxes on parimutuel wagering; to the Committee on Ways and Means.

98. Also, petition of the grand knight, Parkway Council, No. 1433, Knights of Columbus, Brooklyn, N. Y., expressing support of the principles of the proposed Bricker amendment to our Federal Constitution; to the Committee on the Judiciary.

99. Also, petition of the Board of Supervisors, Buffalo, N. Y., requesting enactment of legislation so that all individual persons be allowed an exemption of $1,200 instead of the $600 now allowed; to the Committee on Ways and Means.

100. Also, petition of the secretary, Lithuanian Americans of the City of Syracuse, Syracuse, N. Y., voicing gratitude to the United States for its sympathy and support extended to the cause of independence of Lithuania and her neighbors, Latvia and Estonia; to the Committee on Foreign Affairs.

101. Also, petition of the president, Dallas Geological Society, Dallas, Tex., requesting the enactment of legislation providing that the Natural Gas Act does not apply to the production and gathering of natural gas, the local sale of gas by producers or gatherers, and the price received by the producer or gatherer from such sale; to the Committee on Interstate and Foreign Commerce.

102. Also, petition of the secretary, Hudspeth County Farm Bureau, Dell City, Tex., condemning the practice of using wetback labor as demanded by the United Immigration and Naturalization Service, in order to keep our organization from being blacklisted; to the Committee on the Judiciary.

103. By Mr. MILLER of New York: Resolution of the Board of Supervisors of Erie County, State of New York, memorializing the 84th Congress of the United States to enact such necessary legislation so that all individual persons be allowed an income-tax exemption of $1,200 instead of the $600 presently allowed; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

The United States Forest Service

EXTENSION OF REMARKS
OF
HON. HALE BOGGS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. BOGGS. Mr. Speaker, the American people are proudly congratulating a great conservation agency—the United States Forest Service—in celebrating, this month, its golden anniversary.

The accomplishments of this fine organization as it pioneered in improving, maintaining, and protecting our forests and streams have benefited our people from coast to coast. We are proud of this quiet, hard-working, competent group.

It is my pleasure here to throw a little light on one of the many outstanding groups in the Forest Service organization. The headquarters of the Forest Service's Southern Forest Experiment Station is located at my home, New Orleans. The southern station was established in 1921 when only a few visionary people looked upon timber as a replaceable resource. The station has been, and continues to be, a sturdy guidepost for good forestry in the loblolly- and shortleaf-pine forests of the mid-South, the hardwoods of the Arkansas and Tennessee uplands, the delta hardwoods, and the longleaf- and slash-pine lands of the lower South.

Research at the southern station has helped make possible the tremendous pine-planting program underway in the South. The contribution of the forest survey in determining the extent, volume, and condition of southern forest lands and in appraising probable future timber requirements has been of inestimable value to wood-using industries and in stabilizing communities. Research in the growth and economic possibilities of farm woodlands is showing the way toward an improved standard of living for thousands of small farm-forest landowners.

Yes; the foresters of the southern station are doing a great job—but they have an even greater job yet to do.

The census people say that as a nation we are now using more industrial wood and wood products than ever before. We sometimes forget that in addition to lumber, plywood, poles, crossties, and piling, many of our everyday commodities come from wood—paper, boxes, rayon, cellophane and plastics, to name just a few. And each year new products are added to the list. The census people further tell us there are 164 million people in the United States, and that in less than 20 years the figure will be raised to 210 million. Forty-six million more Americans will be demanding more and more wood.

Where are we to get this wood? There is no doubt about it, our forests from Oregon down to Louisiana and up to Maine must be managed at their best to meet the demand. Within our Southland, the region with one of the greatest forest potentials is the Longleaf Slash Pine Belt. This region blessed with high rainfall and long growing season lies across the lower South from east Texas and Louisiana to Georgia and Florida—50 million acres of some of the best timberland in America, but 50 million acres growing trees at less than one-fourth capacity. These capable lands are growing 20 good trees where they should be growing 100.

America can no longer afford the luxury of idle, or even half-idle, land. America needs the wood and the people of the forest commmunities need the steady jobs—steady jobs that productive forests can offer.

The lower South supports a growing population of 10 million people—people who have lived on the land in the past—people who are inseparable from the land in the future. Yet, in this era of general prosperity there are still many unstable communities in the Longleaf Slash Pine Belt—communities with submarginal incomes.

Good forestry and forest research are making great strides. Much has been accomplished, but many tough problems remain. The extensive planting of southern pines has been a real help, but the problems go much deeper. For example, we need better ways of using or removing low-quality and worthless weed trees now encumbering southern forests. Important forest management research in the longleaf-slash pine forests of Louisiana, Mississipppi, Alabama, Georgia, and Florida must be continued and strengthened to keep pace with the requirements of southern industrial development.

More and more people are becoming familiar with the many pine seedling nurseries throughout the South, with the tremendous job they are doing and have left to complete. Last year 60 million pine seedlings were grown in Louisiana alone, yet at the present rate of planting it will take more than 50 years to do the job. Research and industry together must find ways to speed the task of reforestation—perhaps by planting seeds directly on areas needing restocking instead of seedlings grown in nurseries and by finding ways of making our best trees produce more seed.

Another problem is the growth of longleaf pine—one of the finest timber trees in the world. Longleaf seedlings often grow less than a foot in height during their first 10 years. This delay costs the South colossal volumes of wood annually—wood that could provide steady jobs for the people in the forests and in the mills. If research can solve the problem, the solution will be a spectacular achievement with Southwide application.

Most of the beef cattle in the lower South graze part or all of the year on forest ranges. Although these forest ranges produce tons of grass and good grazing, meat production per animal is too low. We need more efficient ways to convert this grass to beef, and we must also learn how to profitably raise timber and cattle simultaneously.

Forestry is not the mere growing of trees. If America is to remain strong, our forests must produce high-quality materials—both timber and forage, and in large volumes, in the shortest possible time. Pulp and paper mills are playing a greater and greater part in the southern forest economy. Less than 20 years ago, only 31 paper mills were operating in the South. Today there are 67 and more are under construction. What is the impact of these mills? We must learn how to grow and how to use our forests to supply the demands of both pulp mills and sawmills.

These are just a few of the problems that we are counting on the Forest Service to help solve. Forests mean jobs and payrolls. The history of the world has shown that depleted forests and depleted nations go hand in hand. But thanks to men of vision, America's forests are a renewable resource managed for permanency. We congratulate the Forest Service at its golden anniversary—and we expect even greater accomplishments during the next 50 years.

Residual Oil Versus Coal

EXTENSION OF REMARKS
OF
HON. AUGUSTINE B. KELLEY
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. KELLEY of Pennsylvania. Mr. Speaker, when Mr. Charles P. Taft, president of the Committee for a National Trade Policy, testified before the Committee on Ways and Means and the Joint Committee on the Economic Report, he took it upon himself to act as the champion for the entire foreign trade program, and in doing so belittled the effects which the importation of oil and glass in competition with domestic industry and labor was having upon our national economy.

Mr. Taft, in his appearance before these committees as president of the Committee for a National Trade Policy, although he did not mention it, was not entirely unselfish in his presentation. Mr. Taft, if he is not now, has been in the past, registered as the agent for a foreign government representing the government of Venezuela and the Venezuelan Chamber of Commerce. Therefore, when, in Mr. Taft's statement, he devotes some very specific, pointed remarks to the efforts of the coal industry to obtain relief from the damaging imports of foreign oil which have greatly reduced coal's market on the east coast, he joins in a very well organized and highly financed campaign being conducted by

some of the richest and most powerful oil companies, to destroy vital segments of our industry.

Mr. Taft, as well as other spokesmen for the major oil companies, seven of whom control the entire world petroleum market, attempt to belittle, discredit, and destroy an industry that supplies the Nation's biggest source of energy that keeps the electric power and steel industries operating, and which is the keystone of the prosperity of the railroad, chemical, and other related industries.

The coal industry, in an appearance before the House Ways and Means Committee which is now considering a proposed extension of the Reciprocal Trade Agreements Act, testified that the coal industry must have a quota limitation on residual fuel oil imports if it is to remain competitive in the large east coast energy market. The coal industry has not asked for absolute elimination of the imports of foreign oil. The request has been modest and only asks that the House committee write into the Trade Agreements Bill, and that Congress vote it, an amendment limiting foreign oil imports, including residual oil imports, to 10 percent of the domestic demand for petroleum products in the corresponding quarter of the previous year. Such a formula would mean only that the level of imports that would be permitted would be the same as the level of imports which prevailed during the postwar period from 1946 to 1951.

I support that request as reasonable—so do a growing number of my colleagues.

The reaction of the oil industry spokesmen, including Mr. Taft, has been one of hysterical denunciation of the coal industry. In addition, the oil industry spokesmen and Mr. Taft have made statements and quoted figures, in attempts to disparage the coal industry's contention, which are deliberately misleading.

In his statement before this committee, Mr. Taft asked for all the facts, "not the selected ones which coal spokesmen and their auxiliaries bring to this committee." Then Mr. Taft cited facts of his own which add up to half-truths and untruths. Mr. Taft asks for facts. Well, let us have the facts about the amount of coal displaced by oil imports. Coal producers and coal shippers, shipping to industries and public utilities on the east coast, know the reason for the discontinuance of these shipments to their East customers. As an example, a coal producer or shipper has an order with an industry for a certain tonnage of coal. He is notified that shipments must be discontinued. He is given the reason; if not, he requests it. Now, by simple addition, the total number of tons of coal displaced, added up, totals approximately 32 million tons per year. It is just as simple as that, and it is accurate.

The coal industry does not need the juggling of figures as to railroads and natural gas and light fuels, and the tonnage lost to other industries. I do not know what "other industries" mean, nor do I know what he means by "light fuels." But the facts are as I have stated above about the loss of tonnage.

Does Mr. Taft think for one moment the amount of residual oil being shipped to the United States is not displacing coal at all? What is being done with it? What is the purpose of shipping it then?

He said that heavy residual fuel oil consumption increased by only 11 million tons coal equivalent in the United States between 1947 and 1953. Actually, the increase of foreign residual fuel oil—including that refined from foreign crudes—increased from 17 million tons coal equivalent in 1946 to 47 million tons coal equivalent in 1954, or an increase of 30 million tons.

The fact is that foreign fuel oil represents a type of competition without end or limit, with the capacity—through dump pricing and shifting the cost to other oil products—to drive coal completely off the east coast. Foreign oil has taken over approximately 50 percent of the coal competitive energy market on the east coast.

Mr. Taft said shutting out residual oil would definitely hurt American manufacturers in 30 States employing 30,000 people in manufacturing for export to Venezuela. But the damage already done to the coal industry has contributed to a decline of employment in American coal mining from 400,000 men in 1950 to 214,000 in 1954, has cost the coal miners $81 million in wages or the equivalent of 25,000 jobs for 1 year, and cost railroad labor $44 million in wages. Approximately 75,000 miners went off the payrolls in 1954 alone.

Mr. Taft said that the real employment problem in coal mining is the turn to strip mining which he said accounts for fully 25 percent of total bituminous production. Actually, strip mining production in 1953—the latest year for which statistics are available—represent only 23.1 percent of the total national production of bituminous coal. In 1947, strip-mine production represented 22.1 percent of the total national production—an increase of only 1 percent in 6 years. These facts are certainly far different from those presented by Mr. Taft in support of his misinformation that "the real employment problem in coal mining is the turn to strip mining."

The number of strip mines has declined from 1,750 in 1947 to 1,554 in 1953; production has declined from 139,395,000 tons in 1947 to 105,448,000 tons in 1953 and the number of men employed in strip mines has fallen from 43,338 in 1947 to 31,088 in 1953.

Mr. Taft says, "This is a technological change opposed as vigorously by the United Mine Workers as is the importation of residual oil, but with less publicity."

The United Mine Workers do not oppose, never have, technological changes. Their vigorous opposition of strip mining has been against the nonunion strip miners. Historically the United Mine Workers have encouraged technological improvements in coal mining. It is exemplified by the fact in the United States the average production of coal per day is 8 tons. In England and on the Continent where these changes were opposed by the union, the average is 1½ tons per man per day.

At the mine the cost is lower than it is abroad.

Mr. Taft in his statement, implied that with a bituminous coal production of 400 million tons in 1954, the addition of only 70 million tons would be ample for this country's war needs. The actual facts do not support Mr. Taft's statement. In the first year of World War II, the requirements for coal rose 130 million tons and coal supplied 82 percent of the grand total added energy needs in the first year of the war. Likewise, Mr. Taft failed to mention that in World War II the supplies of foreign oil on the east coast received by tanker, dropped 93 percent as a result of submarine sinkings.

Seemingly, Mr. Taft attempts to present himself as a technical expert in coal production when he says "existing mines by going to a full week without overtime, could add 150 to 200 million tons a year." Mr. Taft assumes that the current production capacity of the bituminous coal industry is 670 million tons annually. That figure is for 1953 and it ignores completely the current availability of manpower and the condition of the necessary machinery and equipment to produce coal. Between October 1953 and October 1954, according to the Bureau of Mines, there was a reduction of 74,000 miners. The Bureau of Mines figure of capacity is directly related to days worked and number of employees. With the indicated reduction of employees by 27 percent, the potential capacity is cut proportionately. On that basis mine capacity as of October 1954 would have been more nearly at less than 500 million tons.

As a matter of fact, as of now the anticipated coal mine production for 1955 is much less than 500 million tons—more nearly 400 million tons.

Mr. Taft makes the categorical statement "that there is no evidence that shutting out residual oil helps coal," and then he continues with a personal observation that he personally found "that the mines in southern Kentucky and Tennessee on the Southern Railroad at least, had no competition from residual oil since the last reduction in freight rates down there." These statements are wholly untrue. In the first place, foreign oil today potentially displaces 32 million tons of coal equivalent, principally in the east coast energy markets. In fact, through operation of various price understandings and market agreements within the oil cartel, bituminous coal is now virtually wiped out of the east coast energy market, and if the flood of imported oil continues, it will be wholly eliminated. The present coal displacement by foreign oil represents approximately 25 percent of the total production of coal in the principal coal mining States of West Virginia and Pennsylvania, and such a tonnage reduction sponsors a chain reaction which affects the entire coal producing areas.

Mr. Taft's statement regarding the mines in southern Kentucky and Tennessee is contradicted by the President of the Southern Appalachian Coal Operators Association, which is made up of the coal mine owners in southern Kentucky and Tennessee, who in a telegram

to the chairman of the House Ways and Means Committee, says:

Regarding Mr. Taft's testimony that coal mines Southern Appalachian area particularly those located on Southern Railway have been materially helped in competition with residual oil by reduction in freight rates. Reduced freight rates have helped a few cases in competition with natural gas but cannot find in any instance of help in competition with residual oil sufficient to regain or hold coal in these seaboard markets.

The record shows that residual fuel oil imports are being dumped primarily in one geographic area, namely the east coast, the heart of our industrial arsenal. This foreign residual oil originates in the main from Venezuela, which today is living on a level of prosperity unequalled by any section of the United States, principally because the majority of the income in Venezuela is derived from taxes amounting to 50 percent of the value of the petroleum products which it exports—90 percent to the United States.

It is time for the Congress to end the folly of destroying a major portion of our domestic industry, namely coal mining and domestic oil production, with unreasonable and excessive importations of foreign oils. Further, it is time for the oil industry spokesmen, including Mr. Taft, to temper presentations, such as that made before these committees, with some factual research and reasonableness so that the consideration of their own selfish interests might be leavened somewhat by a respect for American businessmen and workers, who today are being seriously and vitally affected economically by trade advantages granted to foreign nations.

Opposition to H. R. 1

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955

Mr. REED of New York. Mr. Speaker, under leave to extend heretofore granted, I am inserting in the RECORD the following statement in opposition to the extension of the so-called reciprocal trade agreements:

TWELVE KEY FACTS ABOUT H. R. 1

H. R. 1, introduced by Representative JERE COOPER, Democrat, Tennessee, proposes to extend the Trade Agreements Act. In the process it would grant the State Department, via the President, broad new powers for lowering United States tariffs and firmly committing the United States to GATT (the General Agreement on Tariffs and Trade).

This bill has unleashed an intense debate. For this debate to produce results in the national interest all the pertinent facts must be squarely considered. Herewith are summarized 12 facts which are compellingly pertinent.

NOTE.—The content of H. R. 1 may change or become entangled with other bills during the legislative process. The references here are current as of February 12, 1955.

I. RIGHT NOW UNITED STATES TARIFFS ARE AMONG THE LOWEST IN THE WORLD

United States tariffs, now at their lowest in history, average only 5.1 percent of the value of imports. This represents sharper reductions than have been made by most other industrial nations; a 68-percent reduction of the 1937 average.

By comparison, Switzerland's tariffs average 8.1 percent of imports, and have been reduced only 47 percent since 1937; France averages 10.6 percent, 43 percent of 1937; and Great Britain averages 25.6 percent, which is 20 percent above 1937.

Among the industrialized nations of the West only Denmark, Sweden, and Western Germany have reduced their average tariff level since 1937 by as large a percentage as the United States. However, even in 1937 the United States had a lower average than Sweden and Germany. Denmark is the only one which was lower then and remains lower now.

NOTE.—Tariff comparisons tell only half the story. Import quotas, currency restrictions, monopolies, government trading, cartels, and other devices are far tighter barriers to free trade than tariffs. Because, except with respect to quotas on agricultural products subject to price supports, the United States does not engage in these practices; it actually permits freer trade than any other industrialized country in the world.

II. THE FULL IMPACT OF THE RECENT UNITED STATES TARIFF DECLINE HAS NOT YET BEEN FELT

The first cuts, following the original Trade Agreements Act of 1934, came while the world was still struggling with the effects of a worldwide depression. Since then World War II, the fighting in Korea and Indochina, the continuing cold war and repeated injections of economic aid by the United States have distorted the historical patterns of trade. Only now are other nations approaching full production.

But even during this disturbed period United States imports reached a sustained level of nearly $11 billion—four times prewar value, twice prewar volume.

III. TARIFFS AFFECT LESS THAN ONE-THIRD OUR TOTAL IMPORTS

Foreign countries earn dollars, and the United States buys its needed imports, for the most part, without any tariff interference at all. In considering the effect of tariffs on imports it must always be remembered that tariffs affect less than a third—$3 billion out of a total imports of $10.8 billion. A pertinent section of the United States tariff policy statement by the Committee for Economic Development—November 1954—it follows:

"Only a part of our imports are subject to tariffs or other import restrictions. Of our total annual imports of approximately $10.8 billion in 1951, some $6 billion consisted of products which enter free of duty or quota restrictions. The rest—some $4.8 billion annually—were subject to tariff duty or import quotas. This $4.8 billion included some $2.5 billion of finished and semifinished manufactures, $1.8 billion of agricultural products and $500 million of metals and minerals. Of this $4.8 billion of imports, however, only about $3 billion were subject to import quotas or to tariffs sufficiently high to have an appreciable effect on the volume of import. This $3 billion consisted for the most part of agricultural products and finished manufactures."

IV. OTHER COUNTRIES HAVE NOT RECIPROCATED

Though foreign countries have made some nominal concessions American exporters still face such barriers as—

Automobiles, charged 63 percent duty in India, 30 percent to 40 percent in Japan, 15 percent to 33⅓ percent in the United Kingdom, and 15 percent to 30 percent in France.

Machinery, charged 10 percent to 25 percent duty in Britain, 6 percent to 30 percent in France, 15 percent to 30 percent in Japan, 5 percent to 40 percent in Italy.

Synthetic textiles (including rayon), charged 20 percent to 35 percent in France, 25 percent to 27 percent in Italy, 22 percent in Norway, 17 percent to 24 percent in Belgium, and 50 percent in India.

Cotton manufactures, charged 15 percent to 30 percent in the United Kingdom, 7 percent to 30 percent in Germany, 15 percent to 25 percent in Italy, 18 percent to 30 percent in Indonesia, and 15 percent to 27½ percent in Canada.

Grains, charged 15 percent to 30 percent in France, 15 percent to 20 percent in Germany, 25 percent to 30 percent in Italy, 10 percent to 15 percent in Sweden.

In addition, many countries employ side devices which effectively limit, or even ban, the import of United States goods into their markets.

These devices, perfected by the Nazi economist, Dr. Hjalmar Schacht, include: Import quotas, currency restrictions, state trading, monopolies, barter deals, and cartels. The use of such devices has increased markedly during the so-called reciprocal trade period.

There has been much talk about relaxing such restrictions but little "do."

For example, Great Britain has at last agreed to admit a few United States cars on trial—650 to be exact—but subject to duties and taxes which bring the price of an American-made Chevrolet in the British market to about $6,000.

France recently announced liberalization for certain selected items—e. g., cotton yarns (but not fabrics), threshing machines (but not tractors), and so on. But at the same moment France turned around and imposed a special import tax of 10 to 15 percent on the items thus liberalized. And even these concessions did not apply to imports from the United States, only to imports from other European countries.

NOTE.—Although Great Britain employs such devices freely, and in addition maintains tariffs at a level 20 percent above 1937, the New York Herald Tribune for January 3, 1955, quoted R. A. Butler, British Chancellor of the Exchequer, as saying:

"We expect some improvement in their (United States) trade practices before there is any question of lowering our barriers any further or indulging in any further nondiscrimination."

V. OUR FREE WORLD ALLIES DO NOT NEED LOWER UNITED STATES TARIFFS TO PROSPER

Congress was told a year ago that further cuts in United States tariffs were needed then to foster world trade and bolster the economy of our allies.

Congress refused. Instead it obtained an agreement by the State Department to make no further cuts for a year.

Here are examples of what actually happened in 1954, without the benefit of additional tariff cuts by us:

1. Italy's national income rose 4 percent, and its exports 10 percent.

2. Austria's income rose 10 percent as a result of increased trade and production.

3. The Netherlands' prosperity lured capital from all over the world; securities on the Amsterdam Exchange are now at their highest point since World War II.

4. West Germany anticipates an 8 percent rise in the gross national product in 1955, and a continuing expansion of exports. Between 1949 and 1953 exports more than quadrupled, while imports doubled; credit not tariffs has been the exporters' main problem.

5. "Britain Is Tasting New Prosperity As Exports Spurt"—headline from New York Times, January 3, 1955.

6. "Persisting Boom Is Seen by Swiss"—"Prosperity Based on Demand for Manufac-

tures, Credit and Domestic Building"—headline from New York Times, January 9, 1955.

7. "Rise in Finn's Timber, Paper Exports Helps Puncture Pessimistic Forecasts"—headline from New York Times, January 9, 1955.

8. A flourishing export trade gave Portugal an exceptionally prosperous year; as expressed in a New York Times headline—January 4, 1955,"—Nation Goes on Buying Spree."

In contrast, the United States experienced a temporary falling off in 1954.

VI. LABOR RATES IN OTHER COUNTRIES REMAIN AT ONE-THIRD TO ONE-TENTH UNITED STATES SCALE

Here are comparative average hourly earnings for industrial workers in the United States and other countries (1952–53 figures):

United States	$1.79
Switzerland	.57
United Kingdom	.47
France	.46
West Germany	.44
Italy	.35
Japan	.19

Notes.—At one time better machines and more skilled workers enabled the United States to compete with low labor costs imports. Now—largely due to United States aid and assistance programs—other industrial nations have machines as modern and efficient as any we own, and for the most part their workers are as skilled as ours. A recent study by the National Industrial Conference Board indicates that at the same time the real wage gap is spreading, not narrowing.

VII. IMPORTS FROM CHEAP LABOR AREAS DO HURT

Industries already affected include coal, textiles, footwear, glass pottery, and china, electrical equipment, lead and zinc, ship building, fishing, and dozens of others. In the textile industry alone, which has been severely affected by competition from Japan and other low wage countries, the number employed declined by 260,000 in 3 years. New England mills took the brunt of this loss; but even in the South, where the most modern mills are located, there was a loss of 40,000 jobs.

State Department negotiators not long ago cut the rate on watches. Last fall the President had to restore the old rate. Too many workers in the United States watch industry, whose precision skills are needed for defense, were losing their jobs—and skills—because of imports.

Workers in the following industries are also threatened: chemicals, radio, and electronic equipment, machine tools, synthetic fibers, plastic materials, and—looking at the list proposed for the next round of negotiations by the State Department—literally hundreds of others.

N. B.: H. R. 1, in fact, excepts nothing. It invites a reduction of from 15 to 50 percent in every single rate now in effect, no matter how often or how deeply cut in the past.

VIII. THE "PERIL POINT" AND THE "ESCAPE CLAUSE" ARE VIRTUALLY MEANINGLESS

Under the "peril point" the United States Tariff Commission is required to determine whether or not a proposed cut will injure domestic industry. But such a finding does not bind State Department negotiators. In the past the Commission's findings have been ignored in favor of a hoped for and often meaningless concession from foreign governments. H. R. 1 would make possible the continuation of this practice.

Similarly, the much talked of "escape clause" is no sure remedy for injury to American producers and workers. The Tariff Commission's recommendations of relief can be, and usually are, rejected on advice of the State Department which fears the resentment of other countries.

IX. GOVERNMENT HANDOUTS ARE NO SUBSTITUTE FOR JOBS

Some H. R. 1 supporters have introduced bills to provide Government aid, at the expense of the general taxpayer, for workers thrown out of their jobs by import competition—after the injury has been done. Even the Randall Commission, which originated the H. R. 1 plan, could not go along with this idea. It substitutes a Government dole for a man's wage, or requires workers to move from their homes to strange areas—much as is done in totalitarian countries. There is no way to estimate the cost in advance—it could and probably would run into billions.

X. H. R. 1 WOULD ESTABLISH AN ENTIRELY NEW NATIONAL POLICY ON TRADE AGREEMENTS—THE UNITED STATES MAKES CONCESSIONS BUT GETS NONE IN RETURN

Heretofore our trade agreements have required foreign countries to make concessions to us, no matter how nominal, in return for any concessions we make. H. R. 1 abandons this principle.

Right now the State Department is rushing plans for round-robin negotiations with 33 other countries beginning in Geneva next month. It has openly announced its intention to offer wholesale concessions in United States tariffs as a means of inducing these other countries to open their markets to Japan. H. R. 1 expressly permits this one-sided deal.

XI. H. R. 1 CAN INVOLVE THE UNITED STATES IN GATT (GENERAL AGREEMENT ON TARIFFS AND TRADE(WHICH SUBJECTS THE TRADE OF MEMBER NATIONS TO INTERNATIONAL CONTROL, DESPITE OPPOSITION BY CONGRESS

The General Agreement on Tariffs and Trade provides for a new international organization empowered to sponsor and police a comprehensive code of trade practices among member nations. These rules would cover the whole range of trade, including farm products and minerals as well as manufactured goods.

The Constitution assigns responsibility for the regulation of foreign commerce to Congress. By previous Trade Agreements Acts Congress has delegated a large part of this responsibility, via the President, to the State Department. It has always refused, however, to allow the State Department to redelegate such power to an international body, in which we would have only one vote.

H. R. 1, although amended by committee to appear neutral on GATT, still contains language which permits the State Department to commit the United States to GATT without congressional knowledge of that agreement's changing provisions.

XII. UNITED STATES TARIFFS DO NOT CONTROL UNITED STATES IMPORTS

The policies of foreign producers, much more than present United States tariff rates, determine when, what, and how much they export to the United States. Since the war, for example, British manufacturers have sent most of their exports to countries in the sterling area, where they are protected from outside competition by tariffs, import licensing systems, and currency restrictions.

In 1952, however, when some of the sterling area markets closed up following collapse of the Korean war boom, the British quickly shifted. England's exports to the dollar area jumped 50 percent almost overnight—without any United States tariff changes.

United States tariffs, in fact, are now the least obstacle to world trade. Changeable policies of other countries, reflected in changeable import quotas, changeable currency restrictions and the like, are the real difficulty.

NOTE.—More than a year ago Bernard Baruch said the agitation for lower tariffs in the United States is serving only to provide other nations "with an excuse for blaming their troubles on the United States and, by feeling sorry for themselves, to overlook what they must do on their own."

In his column on January 13, 1955, Walter Lippmann pointed out:

"I wonder whether this (the campaign for lower tariffs) puts the real problem in its proper focus. Perhaps we can reach a clearer definition of that problem by saying that the main trouble today is not the level of the tariff rates. In the United States they are by and large not exorbitantly high any longer.

"The real problem is economic warfare. All the governments have armed themselves with legal powers which they use to interfere with the international markets for goods. They use them offensively and they use them defensively to cut down, to cut off, to divert, to penalize, to subsidize buying and selling so that the pattern of transactions is different from what it would be under the free operation of supply and demand. * * *

"The characteristics of these weapons of economic warfare is that they are not fixed rules and laws of trade but are operated by administrative decisions made, often under political pressure, by bureaucracies. * * *

"The essential condition of economic peace is that trade among friendly nations should not be subject to the arbitrary acts of administrative and political officials, that trade should be subject to laws enacted deliberately and openly and after debate and not changeable except by equally careful deliberation."

Pay Raise Legislation

EXTENSION OF REMARKS
OF

HON. JAMES M. QUIGLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955

Mr. QUIGLEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by me before the Committee on Post Office and Civil Service on Tuesday morning, February 15:

STATEMENT OF THE HONORABLE JAMES M. QUIGLEY, MEMBER OF CONGRESS, 19TH DISTRICT, PENNSYLVANIA, BEFORE COMMITTEE ON POST OFFICE AND CIVIL SERVICE, HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1955

Mr. Chairman and members of the committee, I appreciate this opportunity to appear before you and express my views on legislation affecting the welfare of Federal employees.

I submit these propositions:

Postal employees deserve an increase in pay.

All other classified employees deserve an increase in pay.

Neither pay bill should be dependent upon the other; neither should be dependent upon an increase in postal rates; and neither should be dependent upon action relating to reclassification.

Employees of the Federal Government, who must give up their right to bargain collectively when they enter the service, are dependent upon special wage legislation. As a result Congress has frequently looked upon Federal salaries as largess, rather than upon experience and the laws of labor supply and demand.

As a result, the wages of Federal workers have lagged behind the wages paid in private industry. For instance, in the case of postal employees, their spendable income is more than $600 a year behind the 1939 level.

I could cite similar examples regarding the classified employees.

Therefore, I believe that an adequate salary increase is in order for all postal employees. On the basis of my study of the matter and in the light of the increase in the cost of living since the last general wage increase was given in 1951, $800 per annum in base pay would be proper. I recognize, however, certain immediate factors which might tend to delay any early readjustment of postal salaries, so I therefore support, as a bare minimum, provisions of H. R. 1826 by Mr. Moss, and companion bills by Mr. RHODES, my colleague from Pennsylvania, Mr. MORRISON and Mrs. GRIFFITHS.

I believe that bills now before the committee granting similar minimum 10 percent pay increases for classified employees should also be acted upon favorably.

In connection with the postal pay increases, I should like to state emphatically that it is my firm conviction that the right of postal employees and their families to a decent standard of living should not be contingent on what it costs me to mail a letter or upon any other political consideration. Much as we might desire to see the postal system operated on a business-like basis, we should not overlook the fact that this means of mass communication is a service of the Government to the people, necessary to human welfare and to the national economy.

While I recognize the need for periodic review of and, if studies justify, reorganization of the functions of the various governmental agencies, I would oppose any scheme whereby, in the name of efficiency, the fate of every civil-service employee is placed in the hands of Mr. Summerfield or any other politician.

Finally, Mr. Chairman, and this does not directly bear upon the issue immediately before the committee, I would like to see a law enacted under which the properly designated representatives of the Federal employees will be given recognition at the bargaining table under a workable arbitration system for settling grievances concerning wages, hours, and working conditions. My Pennsylvania colleague, Mr. RHODES, has introduced such legislation, and I was pleased on yesterday to join his effort by introducing a companion bill.

The Late Robert Peter Tristam Coffin

EXTENSION OF REMARKS
OF
HON. ROBERT HALE
OF MAINE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. HALE. Mr. Speaker, I take this time to pay an all-too-brief tribute to Robert Peter Tristam Coffin, of Brunswick, Maine, who died suddenly on January 20.

Bob Coffin, as he was known to his friends, was born in Brunswick on March 18, 1892, and in Brunswick he was destined to spend in happiness the greater part of his life. He passed his youth on a salt-water farm on Sebascodegan Island in the town of Harpswell, which adjoins Brunswick. He commemorated his youth in Lost Paradise, published in 1934. He was graduated from Bowdoin College in 1915 with summa cum laude honors. After leaving Bowdoin he took a master of arts at Princeton; thence he went to Trinity College, Oxford, as a Rhodes scholar from Maine, where he spent the years 1916 to 1917 and 1919 to 1921. The intervening period he served in the American Army.

Life at the English university made a deep impression on him and his first books, Christchurch and Crowns and Cottages, reflect the influences of his English experience.

He taught in Wells College, Aurora, N. Y., from 1922 to 1934. Here he founded and carried on the Oxford idea of honor work in English literature. In 1934 he returned to Bowdoin College as professor of English literature. There he spent the remaining years of his life, though he lectured and taught from time to time in Harvard, Columbia, Johns Hopkins, and several other American universities. The academic year 1952–53 he spent as Fulbright special lecturer at the University of Athens, Greece.

In the interstices of his teaching career, Bob Coffin wrote and published more than 30 volumes of fiction, biography, autobiography, and verse. His Strange Holiness won the Pulitzer prize for poetry in 1935. It is as a poet that he would doubtless choose to be remembered, and as such he will probably be best known. Like most poets, his work was uneven in merit. Had he been primarily concerned with his standing before posterity, he might have been more self-critical and published more sparingly. But he wrote incessantly whatever feeling prompted him to write and no one can fail to be moved by the sincerity of his feeling. His best poetry is not likely to be forgotten.

As with many other Maine writers, his creative faculties were shaped by the heritage of the country in which he was born. He was a son of Maine as Longfellow, Edwin Arlington Robinson, Edna Millay, and Sara Orne Jewett—to mention only a few—were the children of Maine. Like Caledonia, Maine has been a "meet nurse" for poetic children.

The odors of rockweed at half tide, bayberry, spruce, and fir spoke to Coffin in a various language, but a language constantly in praise of their Creator.

Some may compare Coffin to Carl Sandburg and the two men have a bardic quality in common, but Coffin couldn't have written the Chicago Poems, any more than Sandburg could have written Kennebec and Saltwater Farm. They were as different as New England is different from Illinois.

Bob Coffin was beloved by all who knew him and his death which follows closely on that of his close friend and fellow townsman, Kenneth Sills, is widely mourned in and out of Maine. He was a friend to me and I shall ever cherish his memory.

[From the Brunswick (Maine) Record]

BOWDOIN COLLEGE SUFFERS GREAT LOSS

Bowdoin College in particular, the State and all of New England in general, suffered a great loss this past week when Robert Peter Tristam Coffin, Pierce Professor of English at the college since 1934, died suddenly in Portland where he had gone to give a lecture at Westbrook Junior College, last Thursday evening. Born in Brunswick March 18, 1892, he had travelled extensively both here and abroad but his New England roots were deep—he was always a New Englander.

Professor Coffin was graduated from Bowdoin with the highest possible honors; he spent 3 years at Trinity College, Oxford University, England, receiving there the degrees of bachelor of arts and bachelor of letters (literature). His first book of poems was published in 1924.

This publication was followed by more than 35 others. In explaining his literary credo—whether it be poetry or prose—Professor Coffin once said, "The things that matter most, love, faith, babies, roses, pride, friendship, death, have not been submerged by science or the industrial revolution; they keep the old splendor like the stars. And we can still have the happiness of walking and being alone to think."

It was because of these beliefs, and his adherence to same in his writings, that he became so greatly beloved—his works having wide appeal. No one who had ever heard him read some of his poems could ever forget him. Professor Coffin was instructor of English at Wells College, N. Y., before his alma mater, Bowdoin, called him back in 1934; while there he was the recipient of numerous honors; in 1936 he won the Pulitzer prize for poetry; he was Phi Kappa Beta poet at many colleges including Harvard, the College of William and Mary, and Tufts.

Funeral services were held on Sunday in the First Parish Church in Brunswick.

Golden Anniversary of Jewish Memorial Hospital

EXTENSION OF REMARKS
OF
HON. HERBERT ZELENKO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. ZELENKO. Mr. Speaker, it is a great satisfaction to record a communal achievement in the congressional district that I have the honor to represent, which deserves to be known widely and which can serve as an example for similar institutions throughout the country.

I refer to Jewish Memorial Hospital, a voluntary supported, nonsectarian institution, with a staff and with patients from all races and creeds, located at Broadway and 196th Street, which has rendered invaluable communal services to one of the fastest growing areas in the city of New York. This year it is celebrating its golden anniversary, the 50th year of its founding, marking a milestone in its history. The hospital is noted not only for its unusually high standards in medical and nursing services, but also for significant researches in medicine, for its program of community health education, and as a pioneer in programs for children.

The hospital has developed from a small institution to one that now has over 200 beds and bassinets, with a program approved by the Hospital Council of greater New York to increase its capacity by 140 beds, based on increased requirements of the area served by the institution.

As I have indicated, the hospital is currently celebrating the 50th year of its founding. In the course of its history it has secured approval of all of the important hospital and medical associations and has attained a distinctive reputation for its high standards, its unsur-

passed administration, its fine medical staff, and its dedicated board of trustees, a group of philanthropically minded citizens, headed by one of our city's outstanding businessmen, Mr. David Schwartz, of Jonathan Logan, Inc.

Research at the hospital has included important work, including: Work on the Rh blood factor—a dramatic achievement some years ago was a complete blood transfer to save a new-born baby; on leukemia—you may recall the Louis boy story, a Sing-Sing prisoner who offered himself for experimentation to save the life of 6-year-old Marcia Slater and who was later pardoned by Governor Dewey; with radioisotopes—Jewish Memorial Hospital is one of the few in New York City authorized to work on radioisotopes by the Atomic Energy Commission; and on trypsin—again, you may remember the dramatic last-minute call to the Jewish Memorial Hospital from Australia in an attempt to save the life of Sister Kenny.

I particularly emphasize the extraordinary research done at this hospital, because it paves the way for what can be done in other parts of the country.

Research at Jewish Memorial Hospital expanded to such a point in recent years that it was necessary to add a new wing to the present hospital building. Last fall the new research laboratory was dedicated and provided an occasion for community celebration and for tributes from outstanding Americans.

It may be of interest to recall some of the statements made on that occasion.

One of the main speakers was Dr. Ralph Bunche, the distinguished Nobel peace prize winner, who said:

This dedication signals a new advance in the development of a distinguished institution which for nearly half a century has rendered invaluable service to the community. Its portals welcome the needy. Its staff and facilities are open to all races and creeds. Its standards are among the highest.

The new research laboratory building will augment the facilities and expand the horizon of service of this hospital. Within these new walls, over the years, will be carried on the work of dedicated men and women which inevitably will bring new and greater benefits to humanity in its constant struggle against disease and suffering and untimely death.

Mayor Robert F. Wagner, of New York, felicitated the institution in these words:

My congratulations to you, the board and all those who have made possible this auspicious occasion, the dedication of the hospital's new research laboratory building. The addition of this important new facility for the expansion of the many noteworthy services provided by the Jewish Memorial Hospital is in keeping with the magnificent tradition of progress and contribution to our community's welfare that has been continuous since the hospital's founding almost a half century ago. As I advised, I greatly regret I cannot be with you to express personally my warm admiration for your objectives, and how grateful we all are for your cooperation in providing the means to carry on important research so vital to the health and welfare of us all.

The president of the board of trustees, Mr. David Schwartz, explained the origin of the new Research Laboratory Building when he said:

From the first day of my association with Jewish Memorial Hospital I urged and fought for the extension of our research work. We, of this hospital, believe that our services to the community should consist not only of curing the sick but of doing what is possible to study and to prevent illness and disease. We achieved some success toward our goal within the limited facilities at our disposal up to this time. This is evidenced by a number of major contributions in the field of medicine and research by the members of our staff, as for example with radioactive isotopes, in the study of cancer, leukemia, and the Rh factor in the newborn. With the magnificent expanded facilities which we are dedicating today, we have every reason to hope for even greater advances and achievements in the field of research. This is not something abstract. It is of direct benefit to patients, patients in our hospital and in other institutions. This is our pride: That we are being of direct help to those who suffer from illness and disease. And we are also proud of the fact that no one seeking treatment in this hospital is asked about his race, religion, or origin. A disease germ does not recognize those distinctions. Neither do we. A glance at our staff and at our patients will show the nonsectarian, universal character of our hospital services.

Last, the building itself was dedicated by one of our city's most distinguished spiritual leaders, Dr. Israel Goldstein, rabbi of Congregation B'nai Jeshurun, who said:

It is a source of special pleasure to me that my participation in these ceremonies today is an encore to my participation in the ceremonies at the dedication of your main building some years ago. The participation of clergy of several denominations then as now is no doubt a triple-clad guaranty of your success. Actually, it is a tribute to the broad character of your ministry of healing which does not ask whether a person is Christian or Jew; black or white; but only whether he is in need of the service you have to offer.

It is a sign of strength and progress that, between the dedication of the former building and the dedication of this building, new forces have come into your work, and into the carrying of the responsibilities. This is a tribute to the older men who have recognized the need for new reinforcements and have made room for new people. It is also a tribute to the younger men who so ably and generously have stepped into the noble tradition of their forebears.

This building can be dedicated because men have been dedicated, giving their time, their energy, and their resources to this institution. Yet, in every group, there is always one who stands out among his colleagues—primus inter pares—the one to whom recognition gravitates because his colleagues recognize in him unusual endowments of heart and spirit, in sight and foresight, sound judgment seasoned with courage and a dash of daring, and extraordinary business success which has not spoiled the humanity of the man. The Jewish Memorial Hospital is fortunate in having such a leader in David Schwartz, its president.

Efficiency must not necessarily be accompanied by austerity. A stern manner is not necessarily a sign of great skill. Though I am only a layman in this field, I venture the opinion that the doctor's affability and the nurse's smile do not retard convalescence. A pleasant manner does not hurt even in international relations, witness the success of Dr. Ralph Bunche who honors us with his presence today. To doctors and nurses, of course, the illness and suffering of patients are part of their daily routine, but not so to the patients themselves. Fortunate, therefore, is the patient who receives the ministry of skill seasoned with kindness. I trust that this community will always think of Jewish Memorial Hospital as the hospital with a smile, where skill is sweetened with kindness.

This building which we are dedicating today has untold possibilities for the well-being of men, women, and children everywhere. In the age of the atom, when we are hoping that the secrets of atomic energy may serve the purposes of peace and not of war, it may be that this building will have much to do with applying some of the results of these researches to the healing or the prevention of disease.

Thus we dedicate the research laboratory wing of the Jewish Memorial Hospital. Recalling the phrase of the prophet, Malachai, I pray that, like the son of righteousness, the Jewish Memorial Hospital may bring healing in its wings.

Mr. Speaker, this is a singular occasion for all of us to join in our tribute to this invaluable institution that for 50 years has striven earnestly and effectively to save lives, to restore health, to cure, and in other ways to serve the people in the community.

The hospital is marking its golden anniversary with a dinner, to be held on April 16 in the grand ballroom of the Waldorf-Astoria Hotel under the chairmanship of another distinguished New York philanthropist, Sol Rosenblatt.

I know that the community and my distinguished colleagues join with me in felicitations, in grateful appreciation for services already rendered and in hopes that the next half century will see a continued flowering of the precious values that Jewish Memorial Hospital is bringing to its community, to the city of New York, to America, and to all the world.

A Liberal Congress

EXTENSION OF REMARKS
OF
HON. CLARE E. HOFFMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955
